NUMBER 128 HECLA FURNACE, USED short time. Good as new. No. case. $75. D. G. Reid, Bothwell, Ont.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

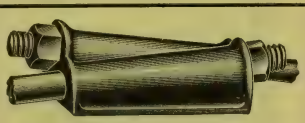
GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

Your Ad In This Paper

will get the attention of the busy men. They find here what they want, and they use it as a catalogue when they are in need. Will they see your ad?



Malleable Iron Lugs

SILOS TANKS
WOOD PIPE LINES

Variety of patterns, using round and flat bands.

Otterville Manufacturing Co.
LIMITED
OTTERVILLE, ONT.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Where the wheels of Industry turn

Go into the best shops and factories in the Dominion of Canada and there you will see shafting and machinery running smoothly without friction because the bearings are protected by—

Harris Heavy Pressure Babbitt Metal

This "Metal without a Fault" is giving excellent service for General Machinery Bearings. Agents are enthusiastically boosting it because they find that where it gets the opportunity to demonstrate its good qualities it always makes firm friends and constantly repeating orders.

Order from our nearest factory. We solicit enquiries from abroad.

NUMBER ONE

IN 1896, Wilbur Wright and Orville Wright of Dayton, Ohio, decided to abandon several small business enterprises in which they were interested and concentrate their entire force and inventive genius on the perfection of a flying machine. Up to the time they entered the field no one had ever studied the subject with such scientific skill or such undaunted courage.

The Wright Brothers were masters in all their work. After years of concentration they gave to humanity a gift which ranks in importance with the noblest achievements the world has ever known.

The secret of Wright Brothers' success was

CONCENTRATION

The same principle of concentration, which enabled the Wright Brothers to perfect their Airplane, has enabled us to create the Victor Hack Saw Blade—which is recognized everywhere as the last word in Hack Saw Economy.

For twelve years we have focused all our force on the perfection of this one tool—the Victor Hack Saw. We have centered our powers on making exhaustive experiments and on the development of new processes.

Logic told us that by concentrating all our energies on one tool, we were more likely to produce a Hack Saw Blade which would excel all others, than if we tried to perfect a dozen or a hundred different tools.

As a result of this concentration, we have created the most enduring and efficient Hack Saw Blade known to science. There is nothing vague about the economy of the Victor Hack Saw Blade. It has been proven.

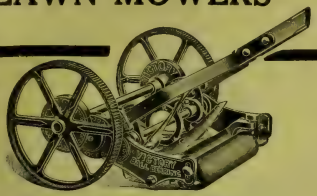
TOWNSEND'S
LAWN MOWERS



BUILT LIKE A WATCH

TOWNSEND MOWERS are superior in every feature of design and construction. In strength, durability and high character of work they do, they have no rivals.

No Noise but the Swish of the Blades

All Blades are of crucible steel, oil tempered. Ball Bearings originally adapted to lawn mowers by Mr. Townsend, insure easy, quiet operation. Triple Compound Gears permit of maximum strength with minimum weight. They are entirely enclosed and prevent dirt or grass clogging the pinions. Handsomely finished in colors and gold.

We manufacture a full line of mowers for use on Golf Courses. Send for complete illustrated catalogue and trade terms.

"WILL OUTWEAR ANY WARE"

Oakville Pure Aluminium Ware makes good with the most critical

The growing tendency on the part of housewives to buy good aluminium ware in preference to tin and graniteware has developed a greater expertness in the choice of kitchen utensils. Aluminium ware is expected to give longer service than other materials and consequently is required to show greater beauty of design and more expertness of manufacture.

The housewife is now buying kitchen utensils to last, and is naturally more critical—that's why it pays to sell her **Oakville Pure Aluminium Ware.**

This genuine, honestly made, beautiful ware fulfills her expectations and answers all her demands for greater beauty and better workmanship at a price that she is always willing to pay.

A trial order will get our prompt attention. Ask for catalog and price list of complete line.

HARDWARE BUSINESS WANTED — IN good Ontario town or city. Replies treated strictly confidential. Box 167, Hardware and Metal, Toronto.

This little advertisement inserted in HARDWARE AND METAL not long ago immediately brought eleven replies to the advertiser. And the cost was only 47 cents, including 5 cents for Box Number.

USE THE WANT AD PAGE

Tie Your Store to "BISHOPRIC" PRODUCTS

Tie it by sales—by quick turnovers—by profit—by mutual interests.

The steadily increasing cost of ordinary building materials and labor have steadily increased the demand for

BISHOPRIC STUCCO BOARD

Because the people realize the big savings to be made by using "Bishopric Stucco Board" and "Wall Board," instead of lath, plaster, building papers and sheathing board.

Write for samples, booklets, advertising matter and other sales helps—and tie up your store with "Bishopric."

WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.

MacLean's Magazine For MAY

Canada at the Peace Conference

THE British Empire will have a representative or representatives at the Peace Conference. The question is—Who? Who will be Canada's choice? Will Canada have any part in that conference of momentous import? H. G. Wells, one of the greatest writers of the age, has written on the subject of who is to represent the Empire at the Peace Conference. He has written this article for MACLEAN'S MAGAZINE and it appears in the May issue. (Mr. Wells parcelled this manuscript and addressed it himself, for MACLEAN'S MAGAZINE.)

How Does a Retreating Army Behave?

GEORGE EUSTACE PEARSON tells how in the May MACLEAN'S. Mr. Pearson is a Princess Pat man, and was gassed at St. Julien. He is now lecturing for the American Government in Texas and elsewhere. He is a Toronto man, and his war stories are of sensational interest. The **Saturday Evening Post** has published two of his stories, and other American magazines will. Mr. Pearson is well known to readers of MACLEAN'S MAGAZINE, and this wonderful contribution to the May MACLEAN'S will be read with intensest interest. Mr. Pearson is a wonderful delineator of war.

Robert W. Service in the May Number

Service is perhaps Canada's best known poet. He is at the front, and ever since going there two years ago his verse has been appearing in MACLEAN'S MAGAZINE—a fine compliment to Canada and MACLEAN'S. In the May number he has a stirring ballad—"The Twa Jocks"—great stuff!

Stephen Leacock is There, Too

Mr. Leacock likes MACLEAN'S. He is loyal to Canada. He gives to the Canadian people the children of his fancy—and he makes this gift through MACLEAN'S MAGAZINE. "May-time in Mariposa" is his contribution to the May MACLEAN'S. Lou Skuce illustrates it.

A. C. Allenson has a Story

MR. ALLENSON is another Canadian whom the editors of American magazines appreciate, and show their appreciation by buying his stories. Mr. Allenson remains loyal to MACLEAN'S which has been his cradle, as it were. We rejoice to be able to say that we shall have many stories from this Canadian short-story writer. His story in the May MACLEAN'S is "Drop Behind and Lose Two"—amusing and tender. W. B. King, a Saturday Evening Post illustrator, has made the drawings that accompany Mr. Allenson's story.

The Departments Everybody Likes

MACLEAN'S MAGAZINE is liked by many because it has an admirable **Review of Reviews Department.** This department condenses for busyreaders the best things appearing in the leading magazines and reviews of Great Britain and the United States. * * * **Women and Their Work** is a department that satisfies women. Women are bearing so many of the world's burdens nowadays that their fields of endeavor and interest deserve the recognition which they receive in MACLEAN'S. * * * **The Business Outlook, The Investment Situation** and **The Nation's Business** are departments valued by the business man.

(Circulation of MACLEAN'S is now 60,000—10,000 more than it was six months ago.)

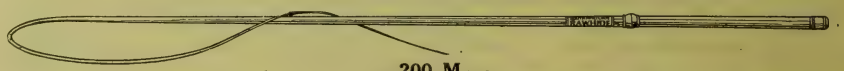
THE MAJOR LINE
FARM UTILITY WHIPS
for NATIONAL SERVICE

—introducing something new in farm whips

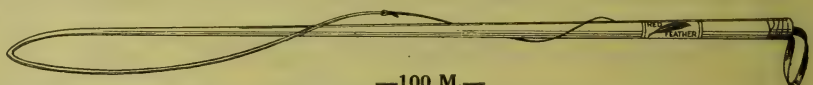
"Whip up" your whip sales by displaying a representative showing of the "Major" line in a prominent place in your store. The Major is the most serviceable whip ever made; can be utilized for Buggy, Carriage, Team, Plough and almost any other purpose. This is the reason the Major is called

THE UTILITY WHIP



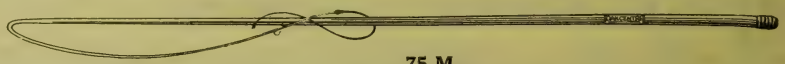
—200 M.—

The most serviceable whip ever made; can be utilized for Buggy Whip, Carriage Whip, Team Whip, Plough Whip, and for almost any other purpose for which a whip can be used. It is made of the very finest materials procurable. The centre is 4½" extra heavy selected imported rawhide. The other materials used in this whip are carefully tested. This whip has a rubberine lining under the thread, then heavy textile cotton lining at the top. The outer cover is 6-cord Phoenix silk finish. The cracker is hand braided Horsehide and hand worked sea island twine snap. It is fitted with two solid rubber buttons. An examination of this whip will prove to any farmer that it is the most economical whip he can buy.



—100 M.—

This whip is constructed of nothing but leather and thread. The centre is solid leather. The outer cover is 4-cord Phoenix silk, with a hand braided White Horsehide cracker, hand braided sea island twine snap. This whip is especially recommended for all kinds of heavy team work and for general use around the farm. "It's a bear for wear," and almost unbreakable. A real leader.



—75 M.—

The centre of this whip is a live oak stock. The top is made from strongest textile cotton. The outer cover is of 4-cord Phoenix silk. Cracker is 4-plat hand-made White Horsehide, with hand braided sea island twine snap. Can't be beat for the money.

—50 M.—

A good, durable whip for general purpose, steel loaded, leather lash. A big seller.

—40 M.—

A good whip at the money. Sells at a low price.

We invite your enquiry re prices, etc.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

The First Trial Means a Constant User

All the unpleasant features of cleaning toilet bowls are eliminated by

Sani-Flush

A small amount of this chemical powder shaken into the bowl and left standing long enough to dissolve the incrustation, produces a clean, sanitary, odorless condition.

All you need do is to sell the first tin to a customer. After that **Sani-Flush** sells itself.

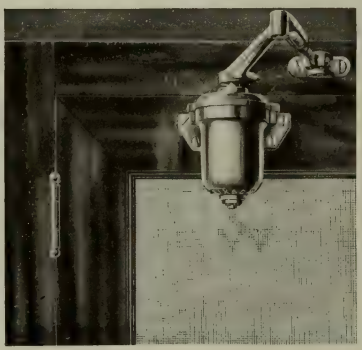
RIXSON

LIQUID CHECK

for Screen Doors

CHECK ONLY

Has no spring, and is designed for use on doors hung with spring hinges.



NO RIGHT NOR LEFT

Can be applied to Right or Left hand doors without any change of mechanism

BOTH as to mechanism and price this device meets a long and persistent demand for a reliable Liquid Check at moderate cost that will close a screen door quickly and yet noiselessly.

The numerous air checks put on the market have only served to accentuate this demand as these devices cannot be adjusted so as to operate a door properly, air being too elastic to use for this purpose. If the valve in an air check is set to-day so that the door will not slam, it will probably hold the door open for a minute or two to-morrow, which is a common sight with screen doors equipped with such devices, and which the large Screen Manufacturers well know, we only draw attention to it here for the benefit of the user.

There are several good liquid checks on the market, but in the first place the price is against them all; then they have been designed for general use on light doors and not specially designed for screen doors. The result is that the checking stroke is too long and does not permit of the adjustment required in an ideal Screen Door Check.

No. 1—Iron Check, gold bronze or dead black, also supplied in plated finishes, solid bronze or brass metal.

A Cost Cutter In Making Butter

MAKES
TWO POUNDS
OF
MERGED BUTTER
FROM
ONE POUND OF
BUTTER
AND
ONE PINT OF
MILK

HOW IT IS DONE

Pour one pint of sweet milk into the "Universal" Merger and add one pound of butter shaved in thin slices and one teaspoonful of salt. Place the jar in warm water to soften the butter. Do not melt it. Put jar back in churn frame and churn for two or three minutes until thoroughly mixed. Butter and milk are now ready to put in a cool place to harden.

UNIVERSAL

TURNS EVERY TRYER INTO A BUYER

LANDERS, FRARY & CLARK, New Britain, Conn.

Dazey Churns *The price is moderate.* Dazey Churns

We are receiving small shipments every week; if we haven't the goods in stock when the order is received, the orders are placed on fyle and shipped according to priority.

Write for full particulars.

Satisfaction Guaranteed.

DIRECTIONS FOR MAKING 2 LBS. OF MERGED BUTTER FROM 1 LB. OF BUTTER AND 1 PINT OF MILK

1st. Pour the milk into the glass jar of the merger, then add one teaspoonful of fine salt (more or less to suit the taste).

2nd. Cut the butter into thin slices and put in jar with the milk.

3rd. Set the jar with its contents into a pan of as hot water as you can bear your hand in with comfort, and allow to remain until the butter softens, but not long enough to melt. This can best be determined by feeling the butter with a spoon.

4th. As soon as the butter is soft enough, remove jar from water, screw on top, and turn handle fast until all butter and milk is thoroughly mixed. Now remove the top and empty the butter into a bowl (do not work it), then set in a cool place to harden.

You will now have two pounds of merged butter; sweet, wholesome and nutritious, and preferred by many to creamery butter.

Should the yellow color of creamery butter be desired, add to the milk before churning, ten to fifteen drops of Dandelion Vegetable Butter Coloring Extract; for sale by most grocery and drug stores.

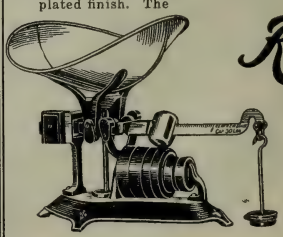
Show Her the Way

FOR goodness' sake, cries the average housewife, show us how to save money out of the deluge of sky-high prices for meats, sugar, flour—everything. And seldom a thought has she of what a tidy sum can be saved every little while by checking up the honest mistakes of grocer, butcher, etc. Show her.

Just a bit of enterprise, pushing the Renfrew Scale to the front—displaying it—and showing her how it soon pays for itself will stir up a tidy lot of sales worth while. Right now is the "psychological moment."

Clinch your sales by showing the Government Inspector's Certificate of correct weights accompanying every Renfrew. Scales supplied in black or all nickel-plated finish. The



Renfrew

HOUSEHOLD SCALE

National No. 806 Garage Door Set

as neat in appearance as it is effective in operation

Note the neat, clean appearance from the outside. No structural iron work is visible, track and hanger being on the inside. Note also how the one door opens without disturbing the others, thus giving free access to the garage without necessitating opening of all doors.

These are two of the features which recommend this set to builders and motorists.

This set opens the doors inwards, preventing any trouble from ice and snow. Its action is easy and certain, without friction or binding. The Hanger operates on a swivel, which permits the wheels to follow the track without sticking. A gentle push opens all doors; a slight pull closes them.

Set No. 806 includes: No. 27 Latch, 1 Swivel Hanger, 6-foot Braced Rail, 4½ pair 4x4 inch Jap. No. 505 T.P. Butts, 1 No. 820 Chain Bolt, 1 No. 830 Foot Bolt, 1 No. 5 Pull, 1 No. 30 Safety Hopp (4½-inch), and all necessary bolts and screws.

He wants to take the pump away with him

When Mr. Farmer drops in on you for a BT Pump he wants it right away—not next week. He has planned to set it up when he gets home, and he'll not be at all pleased if he is put off because you haven't the pump to suit him.

With only seven pumps in the complete BT line, keeping a stock is comparatively simple and inexpensive. These seven BT Pumps equip you fully for all the pump business that any locality can produce. They enable you to supply a better pump, at less cost, for any type or depth of well without being forced to carry a cumbersome stock.

See that your BT Pump stock is complete now, don't wait until the season is right on you.

New cylinders and leathers are easily applied to BT Pumps, so it's wise to have sufficient of these on hand.

Ready-to-Ship BT Pumps

The Excellence of the Products is Establishing the Line!

Write Now for Warm Weather Sales

PROFIT and PREMIER Electrical Appliances are linked together. Especially during warm weather days. For now is the time that the comfort and convenience of electricity appeal most strongly. And now is the time to cash in on the PREMIER advertising campaign.

You'll find PREMIER appliances "all that the name implies," all that we claim for them, all that you would expect from this organization.

They are built by men who have grown up with the industry, men who are known throughout the trade for producing appliances of merit, for fair dealing, for progressive ideals.

Few trades are harder to break into with a new line than the electrical appliance field. Yet, PREMIER distribution is coming faster even than we had hoped. That's because PREMIER appliances are sturdier, more handsome in design and finish, better value.

They carry a guarantee that has no strings or qualifications.

Test the PREMIER line now—while warm weather is stirring sales. Write for facts and figures, illustrated folders.

Gilbert
Machine Gun For Summer Business

Here's the biggest opportunity you ever had to do a profitable summer business on toys. Boys everywhere want a practical toy with which they can play war. And the Gilbert Machine Gun meets this demand. Your customers are going to want them this summer.

We have improved and perfected it until it represents the best value possible —it is genuine in its realistic uses—and ideal for summer play.

We have planned an advertising campaign in the boys' publications to appear during June and July and have a particularly attractive proposition to offer you in conjunction with it. It is a new idea in Toy marketing and will enable you to make your Toy Department pay you a profit during its usually dull season.

Our representatives are now on the road and will be glad to call on you —or we will give you complete information direct.

NEW SAFETY STOVE PIPE

The lock that holds

No. 1—Costs same as ordinary pipe.
No. 2—Made in 6 and 7-inch sizes.
No. 3—Made of 29 gauge iron.
No. 4—Telescope pipe does away with half lengths.
No. 5—No wiring needed. Can't be pulled apart.
No. 6—Pipe is nested, saving freight rates and storage room in store.
No. 7—Eliminates all danger of pipe falling down; easy to put up; absolutely leak-proof; cannot come apart; locks automatically; good appearance.
No. 8—New patent lock effects saving on each pipe, making a saving of one length in every 12 of ordinary pipe.
No. 9—Can be used any place where ordinary pipe is used, or can be used along with ordinary pipe.
No. 10—Patented in Canada and the United States, and "Made in Canada" by Fairgreave & Son, Toronto.

When you sell the new Safety Stove Pipe, same price as ordinary pipe, you are assured of repeat business because your customer receives the latest in stove pipe construction, the pipe with which no trouble will be experienced in joining the pipes or in keeping them in place after they are put up. The automatic lock on each joint is so easily operated that even a child can put the pipe together. The screw joint which connects and holds the pipe together makes a strong, solid connection which eliminates all danger of the pipe falling down, and which also eliminates necessity of using stove pipe wire, ceiling hooks and the consequent loss of time and annoyance which accompany the erection of pipes that need supports of various kinds.

Retailers, clerks and customers save time where this line is handled, and above all, the customer receives a product which satisfies him and agreeably surprises him to such an extent that he will pass the "tip" about the new stove pipe on to his neighbor. Write for prices.

Two Standard Shot Gun Shells

The sportsmen—trapshooters and hunters—who stand at your counter know the superior qualities of

Sovereign and Regal
Shot Gun Shells

The double assurance of strong, safe casings, due to the knurled base and the steel reinforced head in both the Sovereign and Regal are points that interest your sportsman customer. Care in loading — well seated wads — the large Dominion 3B primer all help to develop the

Speed—Pattern—Penetration

that have meant so many successful days for Dominion users —your customers.

Show the loading to the doubters by slicing the side of a Sovereign or Regal shell. Demonstrate further by pressing the cut paper back in place and firing the shell at a large piece of paper spread out on a board. Point out to him the number of pellets of shot that have hit and how evenly they are spread on the paper—Pattern. Show him how deeply the shot has gone into the board—Speed and Penetration. The customer will not mind missing a shell from a box when such quality is demonstrated.

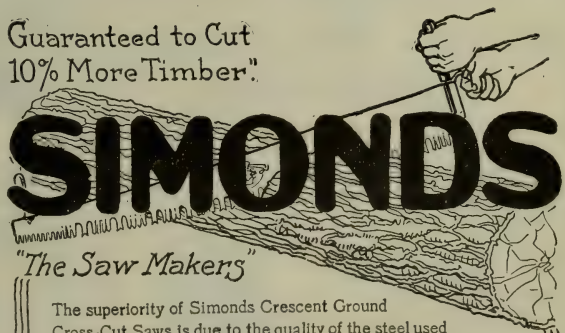
SIMONDS CANADA SAW CO., LIMITED



The superiority of Simonds Crescent Ground Cross-Cut Saws is due to the quality of the steel used in them and the method of grinding. Crescent grinding is an exclusive process, used only in Simonds Saws. It means teeth of even thickness throughout the length of the saw, and the blade tapered for clearance to the greatest degree consistent with strength. This grinding makes cutting easy because it prevents binding in the kerf. Write for Booklet.

Canada Third in Number of Autos

L. B. Howland, President of Canadian Automobile Association, so Asserts at Convention Held in Hamilton—To be no Gasoline Restrictions—Alberta and Saskatchewan Show Gains

THAT Canada is coming to be an important field for automobile accessories can be gleaned from the announcement made at Hamilton during the recent convention of the Canadian Automobile Association by the president, L. B. Howland. Mr. Howland asserted that there were over 200,000 cars in use in Canada, and that this country now ranks third among the countries of the world in the number of automobiles. United States is, of course, first in point of numbers. From this fact it will be seen that one of the most important markets for automobile accessories is right here in Canada. Hardwaremen are appreciating this fact, evidenced by the large number who already have started to handle this line and the interest taken in the matter by many others.

No Restriction on Gasoline

That the authorities at Ottawa did not contemplate putting any restriction on the sale of gasoline at the present time was a further announcement made by Mr. Howland. To a deputation that recently waited on the Fuel Controller the intimation was made by the latter that he did not consider it necessary to interfere with the importation of gasoline. He intimated that there was sufficient gasoline in America to go round. There was a shortage of gasoline in England at the present time, but that was caused through the shipping situation.

Some rather startling figures were given out at the convention as to the number of thefts of automobiles during the course of a year. In the City of Toronto alone there were some 800 cars stolen, while in the City of Winnipeg there were in the neighborhood of 1,000 stolen. The estimated losses on cars stolen throughout the Dominion during last year was $200,000.

Rapid Increase in Saskatchewan

The growth in the number of automobiles in the Province of Saskatchewan is fairly indicative of the great strides that are being made in the sale of automobiles. It is needless to point out that with every sale of an automobile there is a prospect for the sale of accessories. Ten years ago that province only had 74 automobiles. During the first four months of the present year the number of licenses issued amounted to 33,000 and the year is still young. There will be many more issued before the close of the present year. During the first four months of the present year more licenses were issued in that province than in the entire year of 1917. The total number of licenses issued last year in Saskatchewan amounted to 32,705.

Up to April 30 of last year there were issued only 12,838 licenses, compared with 33,000 at the similar period during the present year. Between May 1 and December 31 the number of licenses issued was approximately 20,000. If the same record is maintained for the present year the province expects to have a total of over 50,000 licenses by the end of 1918.

Alberta Also Ahead

There has been a noticeable increase in the number of automobiles in use in Alberta during the first four months of the present year, according to reports which have recently been received. During the year 1917 the total number of licenses issued was 20,639, while during the first four months of the present year the number of licenses issued was 21,080, or 441 more than the whole of last year. While the margin in Saskatchewan for the first four months of the present year is 295 more than the total number in 1917, it will be noted that the Province of Saskatchewan leads Alberta in the number of cars in use, Saskatchewan having 33,000 and Alberta 21,080. Saskatchewan has in the past maintained a lead over Alberta by about 50 per cent. in number, and this record is apparently being maintained during the present year.

The record of the way the automobiles have grown in numbers in the Province of Saskatchewan makes interesting reading. In the year 1906 there were only 22 automobiles in the whole province. Ten years later the number had reached 15,680. Folowing shows the number of licenses granted year by year since 1906 in that province:

1906	22
1907	55
1908	74
1909	147
1910	531
1911	1,304
1912	2,268
1913	4,659
1914	8,027
1915	10,225
1916	15,680
1917	32,705
1918 (four months)	33,000

Growth Because of Economy

Advices from the Western provinces indicate that this development in the automobile industry in the Western provinces has been directly attributable to the fact that the automobile is a great time and money saver for the farmer. It is something akin to the telephone in this respect, as it has been demonstrated to be a fact that it means a real economy as well as a great convenience. In the busy seeding and harvesting seasons, when the loss of a day by a breakdown, it may be in some piece of machinery on the farm, is a serious matter for the farmer. With an automobile ready at hand a quick run can be made to town to secure the needed part or repair and with very little lost time.

Growth of Auto Accessories

The growth of the auto accessory business is bound to keep time with the growth in the number of automobiles. Wherever a new machine is installed there is a prospect for the sale of additional accoutrements. From the record of development in the West it will be seen that that section of the country will need its full share of accessories in the days that are to come. Hardware dealers in the Western section of the Dominion have not been slow to realize the possibilities in this respect, as many have already taken up handling of these commodities and find them a most profitable line to carry.

Cream Separator Business Shifting

Number of Hardware Firms Have Recently Taken on Line—Logical Place, Because Hardware Merchant Carries Many Lines That Are Connected With Dairying

Interior of Store of S. L. Adolph, Listowel, Ont., Showing Neat Arrangement of Stock on Tables, Shelves and in Show Cases. Cream Separators Are Given Prominent Place on Store Floor in Order That Demonstration May Be Made to Prospective Customers.

THERE was a time when the implement man held almost supreme sway in the handling of cream separators. Why the implement man should handle this business was somewhat beyond the comprehension. For the hardwareman already handled churns, butter bowls, cream cans, milk pails, butter workers, milk strainers—in fact almost every line required by the dairying interests, with the exception of cream separators. Manufacturers of late have come more to the realization that the hardware store was the logical place for the cream separator to be handled. They have not been altogether satisfied with the service that the implement men have been able to give in the way of distributing their goods. The lines that the hardwareman has to sell are more varied. For the hardwareman is withal a merchant, whereas the implement man is very often an agent. The difference in the two terms very accurately describes the difference between the two as salesmen. The one has an investment in a business that belongs to himself while the other in many instances simply carries the stock of the manufacturer.

Recently there has been a return of interest in the cream separator business and quite a number of hardwaremen have again taken on the handling of these goods. One of the large manufacturers is authority for the statement that upwards of fifty hardware dealers in different parts of the country have started handling a line of cream separators since the beginning of the present year. About half of this number are located in Ontario, while the balance are distributed in different parts of Manitoba, Saskatchewan, Alberta and British Columbia. Manufacturers in some instances have come to the realization that the hardwareman is the best channel through which to handle their goods. The hardwareman is a merchant primarily—a salesman—whereas the implement man who in the past handled the goods is an agent.

One of the Ontario hardwaremen to take up this line is S. L. Adolph of Listowel. About March 1 Mr. Adolph put on a demonstration for the benefit of the farmers who were attending the Fair. The store was filled on the occasion and much interest was aroused. This demonstration resulted in one sale and eight or ten live prospects. Mr. Adolph is very well satisfied with the prospects in the cream separator business up to the present time. With the assistance of the manufacturers he hopes to carry on an aggressive campaign in the interests of the cream separator end of his business. The selling profit in cream separators is from 35 to 50 per cent. and as each sale amounts to a goodly sum the return on this line is fairly large. Mr. Adolph believes that it is good policy to pick a number of specialty lines to which he can devote his attention. To this end he intends to concentrate his attention on such lines as wire fence, roofing, ranges, oil heaters, cream separators and auto accessories. He will himself in a sense specialize on the salesmanship of these particular lines, leaving to his clerks the salesmanship of lines which require less technical knowledge.

As will be noted by reference to the photograph of the store Mr. Adolph has two cream separators in full view where they can be easily inspected and operated by the farmers and dairymen who come to his store. It is essential that this line be given a prominent space in order that it may be shown to best advantage.

Manufacturers Help Dealers

An important feature in connection with the handling of cream separators

is the fact that manufacturers are taking a live interest in the method the dealer is using to get their goods properly before the consumers. Some of the manufacturers have a complete plan of campaign mapped out to assist the dealer through advertisements in the local papers, sample machines, road signs, field signs, store signs, advertising matter furnished to live prospects by the manufacturers whose names have been supplied by the local dealer.

Cream Separator a Recent Development

Up to about fifty years ago the method of making butter had advanced very little from the prehistoric butter bottle, in which some cream was poured in the morning, the bottle fastened to the saddle and left dangling there until the noon meal, when it was opend and the buttery substance used for food. Eventually such methods as crocks and pans were developed, in which the milk was allowed to stand for thirty-six hours to give the force of gravity time to partially separate the skim milk from the butterfat, which was then dipped off with a hand dipper.

These methods were generally used forty years ago and much later in some sections of the world. Investigations proved that they wasted from ten to forty pounds of butter from each cow per year.

The first definite record of centrifugal force as being employed in the separation of cream from milk was in 1859 when Prof. Fuchs of Germany suggested an apparatus very similar to the ordinary Babcock tester. Prandtl made further experiments of a similar character but was not successful, because the cream was partly churned into butter during the separating process.

In the year 1872 another German professor by the name of Moser exhibited a separator at the Vienna Dairy Show. This caught the attention of several people, among them a prominent engineer, Lefeldt, who completed his model, so that at the Bremen Fair in 1874 he actually separated cream in twenty minutes, but the operation of this machine was not continuous. It had to be stopped and the cream skimmed off, the skim milk emptied and the operation repeated.

In the meantime, a French concern, the Vives-Lille Company, patented a continuous separator as early as 1874, but, so far as we know, this invention remained on paper. The first practical centrifugal creamery was established by day as factory separators and left 6 per cent. of the fat in the skim milk. Present day separators leave only .01 or .02 per cent. and even less.

"As early as 1881, a Danish Weston separator was shipped to John I. Carter, Pomeroy, Chester County, Pa. So far as ascertained this was the first centrifugal separator in practical use on this continent, and was the talk of the neighborhood.

The original Danish Weston bowl was a large, heavy drum, twenty-five inches in diameter, weighed nearly 100 pounds and ran 2,500 revolutions per minute.

Exterior View of Store of S. L. Adolph, Listowel, Ont.

These bowls required four horse power to drive and handled less than 600 pounds per hour, while some present day models weigh less than seven pounds, are 2¼ inches in diameter and are easily turned by hand power, separating 900 pounds per hour. Separators now skim to a trace when handled right. Their capacity has steadily increased; ease of cleaning and ease of turning likewise.

Rubber Placed on Restricted List

Imports Into United States Placed on Basis of 100,000 Tons Per Annum as Against 157,000 Tons Last Year—Will Mean Less Available For Commercial Uses

THE placing of rubber on the list of restricted commodities by the United States Government will have the tendency to cause a scarcity of supplies of all articles manufactured from rubber which come into Canada from the United States. The regulation provides that not over 100,000 tons of rubber shall be brought into the United States, whereas the amount imported last year was 157,000 tons. This will mean a reduction of approximately 35 per cent. The War Trade Board of the United States has issued the following statement in connection therewith:

"Rubber has been placed by the War Trade Board on the list of restricted imports. In pursuance of this important determination in its policy of conserving tonnage for military requirements through the limitation of oversea imports, the board, after consultation with the War Industries Board and with representatives of the trade, decided to place imports of crude rubber to the United States upon a basis of 100,000 tons per year, and has instructed its Bureau of Imports for the current quarter to limit the issuance of licenses for the importation of crude rubber from overseas to a total of 25,000 tons from May 6 to and including July 31, 1918.

"This restriction will be put into effect immediately by the Bureau of Imports. All outstanding licenses for the importation of rubber from overseas will be void for ocean shipment as to shipments made from abroad after May 8, 1918. From the restricted quantity the requirements for the production of goods for the United States and allied Governments will be met in full. The remainder of the 25,000 tons to be licensed will be allocated among the manufacturers of rubber products on a basis of their consumption of crude rubber during the calendar year of 1917.

Regulation of Prices

"As a preliminary step to this restriction of imports and to prevent a speculative increase of prices of crude rubber and an unjustified enhancement in the prices of manufactured products the War Trade Board a few days ago put into effect an option system of regulation of rubber prices, through which the cost of crude rubber is limited, from the time of import until it passes into the hands of the manufacturer, to a reasonable maximum, based upon the quotations current in the trade when the possibility of import restriction was first mooted. Possibilities for profiteering and speculative attempts to run up the prices of the limited supply were thereby barred. The salutary working of the option system was immediately noted in the elimination of the speculative advance which had developed in the price of crude rubber during the progress of the conferences regarding restriction.

(Continued on page 35.)

Music Pen Used in Original Showcards

Well Adapted to Small Letters Not Over One Inch in Height—Invented and Used Primarily For Writing Music—Two Splits in Point Make it Suitable to Cardwriting—Series in Cardwriting

By Robt. T. D. Edwards.

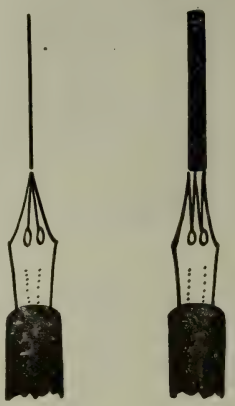
AMONG the many tools used by most modern cardwriters we find the music pen, an instrument which plays an important part in his daily work. This pen is exceedingly popular for all forms of Roman or spurred lettering, but is not practical for a square-faced letter. It is only good for small lettering up to about one inch or so in height, and is used for the most part for single stroke work and is used very seldom for outline lettering.

Its popularity in the United States is quite extensive and it is used by the larger percentage of departmental store cardwriters where small neat letters are required. In show card shops they are used extensively and the window trimmer who writes his own cards also favors these pens for small lettering. In fact the music pen when properly manipulated will form a far better and cleaner letter than can be made by the outline process and the work can be done in about one-quarter of the time.

As you will know by the name of this pen it was not invented for the cardwriter's use. In fact when it was first made its use as a lettering pen was not thought of. It was invented and made for the purpose of writing music. That is, for putting the notes, etc., on the already ruled sheets of paper. Its advantages as a lettering pen were not found out until later.

The music pen in appearance just looks like an ordinary nib but when the point is spread two splits are revealed instead of one, as in the ordinary nib, thus making it a three-pointed pen as shown in Fig. 1. This nib is made from flexible steel and lasts a long time and is very reasonable in price. There is no reason why any cardwriter should not have a dozen on hand. Use them in an ordinary pen holder. The thicker kind is the one to be desired because with continuous work it is not so liable to cramp the fingers as does the thinner one.

You might ask the question, why is this pen better than the round writing pen? The blunt round writing pens are good tools, but there is quite a difference in the work they do. First of all it takes all eleven sizes of the round writing pen to do anything near what one music pen can do. Even at that you cannot get as good results. For instance, to make a proper spur on a Roman letter, such as on the right of the upper case "E" with the round writing pen, you have to make more than one stroke and also have to turn the pen sideways, thus losing time. You also get away from the single stroke principle. But with the music pen all this can be done in a second and with one stroke.

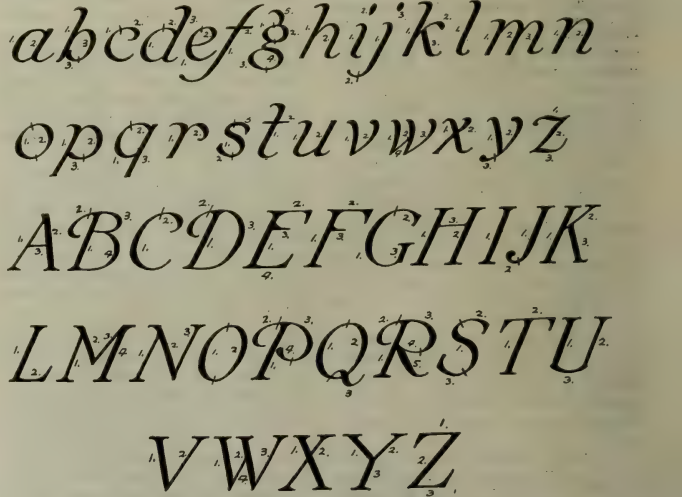


Wide and Narrow Stroke Made by the Music Pen

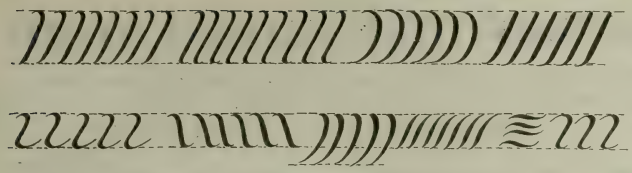
Now, the first thing to learn in connection with the handling of this pen is the principle by which all strokes are made, and when this is mastered all else will come easy. First, all narrow strokes are made when the point of the nib is closed, and all wider than the narrow strokes are made by pressing on the point of the nib until the desired thickness is reached. In other words, the width of the stroke desired is regulated by the amount of pressure placed upon the pen. Of course considerable practice is required in order to get a uniform stroke, but if you practice a uniform pressure you should have little trouble.

This principle applies only to straight strokes. But with the curved strokes a different principle is applied. Now we will take for instance either strokes of the letter "O." These begin and end with narrow but gradually get heavy toward the centre. This sort of stroke requires a great deal of practice and all depends how you are able to regulate the pressure placed upon the pen.

The principle of forming these pen letters is a great deal similar to brush stroke Roman. The pen should be held squarely on the surface of the card, that is, all three points when spread apart should be touching the card. The only time when it is necessary to hold the pen differently is in making the narrow cross strokes, the ones parallel with the guide lines. To do this have the pen point facing to the left.



Method of Procedure in Forming Letters



Strokes for Practice Use With Music Pen

Many cardwriters try to get the same effect with the brush as is gotten with the music pen, but let it be understood that it is almost impossible to get as clear a letter or as perfect as can be done with the pen. The brush is always getting out of shape while the pen always stays the same.

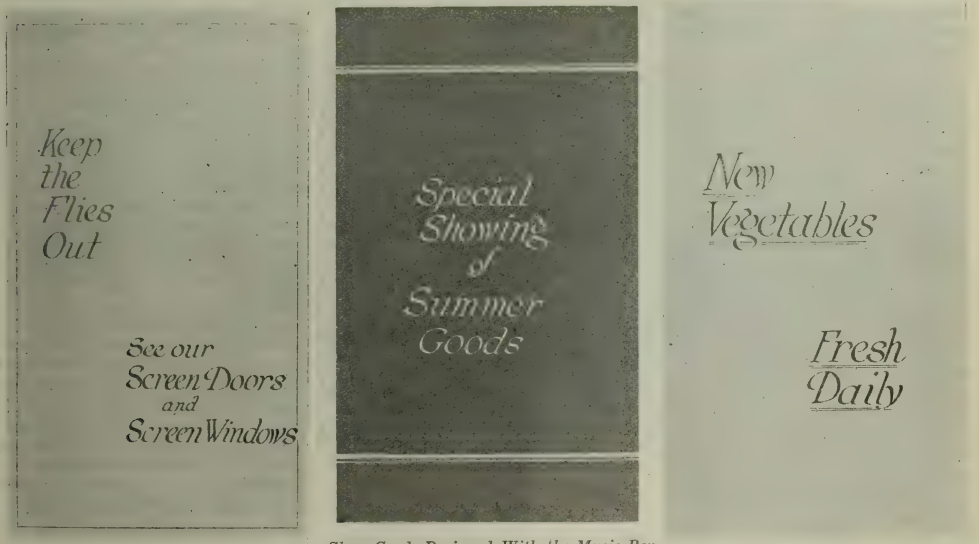
A great deal depends upon the ink or color you use as to the success of this work. First, never use other than an opaque color. So use your ordinary show card colors, for brush work, slightly thinned with water, but mix them thoroughly. The proper flowing consistency will be found out by experience. Never under any consideration use transparent or carbon inks. They are entirely useless for this work. The music pen is the most successful way to letter with a light color on a dark cardboard. White, yellow, cream, etc., flow lovely on dark surfaces and you can form just as perfect a letter with this as with black color on a white card.

One of the best points in this pen's favor is that it puts the color on thick and when it dries it stands out much better than when put on with a brush.

Slanting Form of Letter

The alphabet we are demonstrating this month shows another style of letter formation used by Toronto cardwriters. This is a slanting type and one when practiced that can be made with considerable speed. It is not an alphabet which can be used for all round work, but is meant for the better class of show card. One of the main things to watch in forming these slant letters is to have the straight lines, such as No. 1 in "B," No. 1 in "D," No. 1 in "F" and "E," Nos. 1 and 2 in "N," etc., in the upper case alphabet, all at the same angle. But you will find that all we can say or explain in these columns will be of no use unless you practice this lettering diligently.

The best method for practicing is to lay out a blank sheet of card with guide lines and proceed to practice as shown in Fig. 2, only practice stroke many times more than here shown. Practice every line in the alphabet many times until each one is mastered. The completed cards show this type in use.



Show Cards Designed With the Music Pen

Montreal Sportsmen's Show a Success

Fifteen Thousand Tickets Sold Outside—Interest Develops as Week Proceeds—Educative Value of Such Display Great —Patriotic Side to This First Sportsman's Show

AS indicating the interest that developed in the first Bicycle and Sporting Goods Exhibition held in Montreal, a big sale of tickets through the medium adopted, that of the various patriotic organizations of the city, many thousands of tickets were sold. As previously announced the proceeds of the show were to be given for patriotic purposes, and in this instance the idea conceived by Mr. Kirby seems to have been a timely and popular one.

The bicycle has again come into as great favor, if indeed it does not surpass that held for it many years ago. And the best part of the present interest taken in this modern vehicle is that of the utility it possesses for a regular army of workers, office men, boys and girls. This is the most widely recognized advantage and viewed from this angle the manufacturer and the seller as well should have a greater interest in and a larger hope for the development of the industry than when bicycles were looked upon as a somewhat costly luxury.

It always must rest upon one or a few leading spirits to enthuse the less interested in a new idea or scheme. Thus, the burden of launching the Montreal Sportsmen's Show this year fell very largely on the initiative of T. C. Kirby

Giving Employment to Returned Army

35,000 Home and 60,000 Disabled Men a Possibility Any Time — Study of Problem Shows it Requires More Than Superficial Thought

Written for MacLean Publishing Co. by C. Norman Senior, Department of Soldiers Civil Re-establishment.

MERCHANTS and manufacturers of Canada, along with the industrial and commercial communities in all the belligerent countries, today face in the returned soldier problem a condition which, if left to solve itself, will undoubtedly do so at the expense of their prosperity. Employers, along with all other classes of the community, are vaguely aware that the military authorities have returned 35,000 soldiers from overseas as unfit for further military service. They know also that if the war were to end to-day another 20,000 to 25,000, who are still in English hospitals, would gradually be brought back. That this army of disabled represents a definite national problem which has to be grappled with, not only by Government departments, but by individual employers, is what may not yet have registered as self-evident.

Patience Required at First

Everybody has been urged to employ returned soldiers. Probably the merchants, publishers, etc., have done as well as any section of the community. But the problem of this 60,000 is ever so much bigger and broader than mere employment. This will also be found true of the fit veterans when they return after the war, for the nerve-shattering experiences of the battle front do not leave men in the same condition as before. Just what is meant may be gathered from the remarks of a returned major, who now occupies a position as vocational officer with the Department of Soldiers' Civil Re-establishment. Addressing an audience of factory managers upon some of the problems which would confront them in employing returned soldiers, he said:

> "When I came from the front to Canada, even after I had had a good furlough, the first morning my duties commenced I could not stay more than one hour at my desk, I was so excited and nervous."

The inference may as well be drawn right here in the words of this officer himself:

> "Therefore, tolerance and human kindness towards the returned soldiers are what we ask of you who are or may be in charge of these fellows."

Not a few who have employed returned soldiers have reported that they found them "good for nothing," and were compelled to discharge them; sometimes the men did not even wait to be discharged, but took French leave of their positions for no apparent reasons. These incidents have occurred and will occur again, but the major pointed out to his audience of factory managers that anybody who has seen how these men behaved on the battle front, their coolness, their self-sacrifices to help their comrades, their bravery in the very face of death, could not believe that these were the men who would fall down on an ordinary job. The point he made was that some foremen and superintendents were too quick to reprimand and were not tactful in realizing that they must follow different methods in dealing with men who had been through the awful experiences of this unprecedented war.

Use Tact and Less Reprimand

Other employers, whose tactfulness had been adequate for the occasion, had found that after a short period of tolerance of certain irregularities the men had responded and made loyal, efficient employees, eager to give the maximum of satisfaction. A heart-to-heart talk with the returned soldier employee who may be acting in an unsatisfactory manner was urged as an unfailing remedy.

Disabled soldier, a former newspaper artist, receiving instruction in painting.

The discharged soldier was at heart earnest and determined to succeed in civil life, but his nerves and powers of concentration were not equal to all situations for the first few months, the major declared.

Now, just why should employers go to all that trouble with one class of employees? A lot has been said about gratitude to the returned soldiers, patriotism, etc. It was worth saying, and has been well said, but there are more powerful reasons even than those. At the present time there are 35,000 men in Canada who have done with their military service. This is no small group, and it consists entirely of young, mentally active men who three or four years ago were fit for anything, and who are now restricted in their scope as a result of their injuries. Thoughtless antagonism or even indifference to their welfare might easily impede the task of absorbing them into the community, by accentuating their temporary difficulty in settling down until it developed into real aversion for work under conditions as they found them. The demoralizing effect upon all classes of the community from a crystallization of this very real danger can easily be imagined. No business man needs to have any more than a casual reference made to the evils attending upon the presence in the community of a large unemployed section. Particularly in Canada, a young country, would the presence of a large non-productive element be harmful.

Returned Men Take Up New Employment

It should be remembered also that these first returned men are the ones who will control and guide the great bulk of our army when it returns after the war. If a spirit of resentment due to real or imagined injustice grows, the whole body of returned soldiers will respond very quickly and the business community would find the antagonism thus engendered very difficult to cope with. The general public is behind the soldiers in almost every stand they take, and this is a circumstance which should not be overlooked.

About one-tenth of the soldiers returned so far, it has been found, are so disabled that they cannot resume their pre-war occupations and be self-supporting. The country has undertaken the obligation of giving these men what is known as vocational re-education. That is, it trains them for new occupations in order that they may be self-supporting. It is the well considered aim of those responsible for the vocational training policy of the Department of Soldiers' Civil Re-establishment to protect the industrial community as well as the disabled men by training the veterans in as many widely different occupations as possible. No one industry or occupation should become overcrowded with disabled men, even though it is recognized that certain classes of work are easier to teach to injured men than are others.

In order that the men may be scattered as widely as possible through the commercial and industrial ranks, the policy of training them in the industrial establishments themselves rather than in technical schools and class rooms has been adopted. To train these men in schools would mean the establishment of large training centres where, at the most, probably 20 or 25 different courses could be established. Under the system adopted by the department of placing them

with employers to receive their training in the very conditions where they will subsequently work the number of occupations for which men are being trained already numbers 175, and is rapidly increasing.

Majority Can Earn Their Living

While it is true that these disabled men are limited in their scope as a result of their war injuries, it is also true that hardly any of them are absolutely debarred from earning their own living. The results of the vocational training already done have amply demonstrated this. When a blind man can be a stenographer, a one-armed man a telegrapher, a man with both legs off a machinist, and so on, it will be seen that there is some kind of opening for every one of them.

As far as possible it is sought to place the more seriously disabled in skilled positions. The man who formerly relied upon his strength for a living—that is, the absolutely unskilled laborer—is rendered unable to go back to his old occupation by almost any kind of wound which makes him unfit for further military service. These are being trained for all kinds of mechanical work where a little more brain work is necessary and a little less manual strength is required.

System Followed to Find Employment

There is in each province a district vocational officer as well as an officer in charge of industrial surveys, whose duty it is to locate the opportunities for training. Members of the retail and manufacturing trades may well consider the opportunities within their grasp of assisting in this all-important work and communicate with these officers.

Among the courses which are being given are bookkeeping, ordinary commercial courses, typewriting and stenography, typewriter repairing, photography, show-card writing, engraving, etc. These examples are cited here because many firms find workers of these classes valuable in connection with side lines of their business. It is the desire of the vocational officers to be in touch with all sections of the community so that no opportunities for training men may be lost.

Students Supported by the Department

During the period of training, which usually lasts from six to nine or even twelve months, according to the degree of disability and the difficulty of learning the new occupation, the department supports the student and his family by means of a vocational allowance based on military pay and allowances and Patriotic Fund allowances. The vocational pay, as it is called, varies on the side of generosity from these allowances, and the student is quite able to devote his full time to the study of his new occupation. This allowance is paid even when the man is placed as an apprentice with a private firm to receive his training under employment conditions.

A close inspection of the man's progress is made to see that exploiting is not attempted, and to see that the man is making definite progress.

Government to Take a Hand

The problem of unemployment in regard to returned soldiers is a big one, and it is accentuated by the fact that they are returned soldiers. It is one which must not be left unsolved, because its dangers are infinitely greater than any ordinary unemployment problem which has ever confronted Canada.

The question of training the disabled is one which the Government has grappled with fairly and squarely, and in which it has taken definite steps to obtain the co-operation of the employers generally. Sooner or later they will come to you to find out what the opportunities for training men are in your business.

In the meantime these facts should be considered: it is going to be good business to have returned soldiers in your place. There is a very strong disposition on the part of the public to do business with returned soldiers when it sees them.

Soldier with one arm taught to operate a device for a typewriter.

The same qualities of loyalty and steadfastness which made these men fight for their country are just the qualities you want in your own employees.

Plea for the Returned Soldier

That "patience and human kindness," which the returned major mentioned, will be well rewarded. This applies not only to the disabled who need to be trained for new work, but to those men who come back fit and anxious to take their ordinary part in civil life. You will have many applications for work from them, and it cannot be emphasized too strongly that, while the problem is a national one requiring strong Government action in a centralized way, the solution will only be found if each individual employer does his bit. No matter how small your store may be, if you employ men you will find among the returned soldiers many suitable employees. It is in your interest that these men fit back into civil life just as quickly as possible. You do not want to see any class consciousness develop among them, because you know it will be hurtful not only to you, but to the men themselves. The sooner they fit back into their ordinary grooves the better for everybody, but it will be a long time if you, as individuals, always "pass the buck" to the Government.

RUBBER PLACED ON RESTRICTED LIST

(Continued from page 31.)

"Imports of crude rubber during the previous year had been at the rate of 157,000 tons per annum. Imports will therefore be restricted by something over one-third. The War Trade Board and the War Industries Board, at whose suggestions the War Trade Board undertook the regulation of price and the restriction of imports of crude rubber, have acted with reluctance in a step affecting the fourth largest industry in the country, but the imperative demand for tonnage to transport troops, munitions, and supplies necessitated action. The board has been met in the most patriotic spirit by the representatives of the rubber industry, who have been ready to recognize and admit the vital need of the hour for the conservation of tonnage and have acquiesced in the limitation of imports to the basis of 100,000 tons per annum, which figure was decided upon after consultation with the trade.

Will Limit Output of Rubber Goods

"This limitation will naturally involve some limitation in the output of the finished products of the rubber industry, but it is believed that this will be accepted with equal patriotism by the consuming public, particularly since the establishment of a limited maximum price for crude rubber should operate to render unjustifiable and unnecessary increases in the cost of the finished products into which this raw material enters. Should, contrary to the hopes and expectation of the board, attempts be subsequently made to exact unjust prices from the ultimate consumer through speculative attempts to take advantage of the limitation of output of rubber products, measures to cope with this evil undoubtedly will be found necessary and justified.

SASKATCHEWAN RETAILERS MEET AT SASKATOON THIS WEEK

The convention of the Saskatchewan branch of the Retail Merchants' Association of Canada was held in Saskatoon on Tuesday, Wednesday and Thursday of this week. The agenda of the convention comprised interesting and important discussions on matters pertaining to the Western retail trade. The convention will be fully reported in HARDWARE AND METAL next week. A representative from the head office is now in the West, having made the trip for the express purpose of reporting this convention. An interesting report is assured to our readers.

EDITORIAL COMMENT

TURPENTINE in the primary market reached the high point of the present year during the week. An advance of over 10c per gallon has been recorded from the recent low level. Turpentine is one of the few commodities that has remained almost stationary in spite of the war. Crown him king.

* * *

EVERYTHING points toward a bumper wheat crop in Canada and the United States this year. Estimates place the exportable surplus for Canada at 350,000,000 bushels. Should that come about the banner year of 1915 would no longer carry the laurels. It is only the enemy within our gates that will view this prospect with alarm.

* * *

SIR GEORGE EULAS, "Duke of the Daylight and Thane of the Dawn," must have had his equipoise shaken from its equilibrium—just a little—by the noise that he kicked up when he proposed to change the weight of the cement bag.

INTENSIVE PRODUCTION HAVING EFFECT

ENCOURAGING reports from Pittsburg with respect to the production of iron and steel during the first two weeks in May are being made. There has been a marked increase in production of iron largely through the better shipments of coke from the Connellsville district.

There are some sections of the iron and steel trade in the United States which are of the opinion that sixty days of intensive production will remove the urgent requirements of the Government and allow a resumption of commercial business. Authorities at Washington, however, are apparently not encouraging this view.

Iron is now being produced in the United States at the rate of 40,000,000 tons a year and it is expected this figure will shortly reach 43,000,000 tons a year. Some of the furnaces have reached as high as 94 per cent. of their capacity. Steel mills on the average are operating at less than 85 per cent. of capacity. The poor showing of the steel mills is asserted to be due to the shortage of scrap. This rapid increase in production in the United States will be watched with interest by Canadian concerns who have depended upon that country as a source of supply.

NEW COPPER PRICES JUNE 1

CONSIDERABLE interest centres around the price that is likely to be fixed by Government authorites on copper in the United States on the first of next month. A conference between the copper producers and the Government officials was held in Washington recently, but nothing definite resulted.

At that conference a lot of statistical material was submitted by the producers to show the increased cost of production. These facts were made the basis for a plea for higher prices for copper. A further conference has been called for May 22, at which time it is highly probable the price will be fixed.

Consumption of copper for war demands continues on the increase. No shortage has been felt as yet for these needs, but it has been necessary to curtail sales in the regular lines of trade in order to assure a sufficiency for Government needs.

GETTING ADVERTISING MATERIAL READ

THE biggest problem for the advertiser is to get material in his advertisements that the prospective customer will read. A jumble of facts will not always attract. In fact it is rare that incoherent and disconnected points have weight. It is the appeal that is made in its entirety that catches and holds the attention.

This point is well illustrated by the method adopted by a very well-known steam gauge and valve company in the United States who secured the services of Elbert Hubbard to write the material for their catalogue. But for the untimely death of this well-known writer on the Titanic he might still have been producing excellent and readable catalogues.

Hubbard tackled the problem of telling about steam engines and indicators and told the story in such a way that even mill owners recognized the fact that they could read such a catalogue with profit to themselves. However, the catalogue of this company is still being read with much interest.

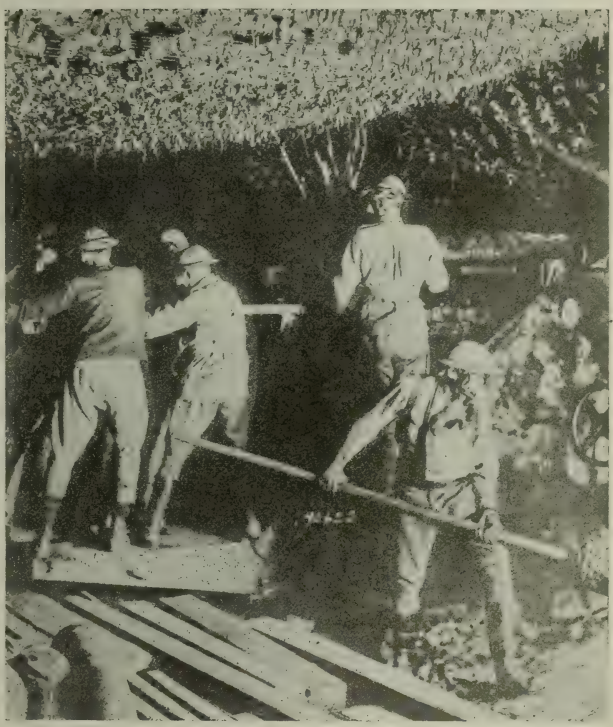
In framing retail advertising it is well to bear in mind that the human mind is looking for news about commodities. The advertising pages of this newspaper are read with a great deal of interest by the trade because they contain news—they make an appeal—they interest.

Current Events in Photograph—No. 20

MASKED GUNNERS SERVING THE GUNS

Long training has enabled the allied soldiers to fight for hours at a stretch while wearing their gas masks. Gunners man their pieces during gas shell bombardments three and four hours, wearing these masks and goggles, and are only relieved of them when wounded and carried down behind the lines.

Note the striking camouflage protection over the gunners' heads to protect them from the inquisitive eye of a German "Gotha."



Canadian Steel Men Sign Pledges

Agree to Place Production of Plants at Disposal of United States Government and Her Allies—Practically Impossible to Buy Many Iron and Steel Commodities For Importation into Canada

SOME Canadian iron and steel concerns who are members of the American Iron and Steel Institute have signed the pledge adopted by that body for the use of its members to the end that production at the various plants may be turned to the use of the United States Government and the Allies. The pledge adopted by the Institute was given last week in HARDWARE AND METAL, and runs as follows:

"For myself, my corporation or my firm, I pledge the prompt production and delivery of the largest possible quantity of material in our departments that is or shall be required by the United States Government for the necessities of itself and its Allies, and agree that all other lines of our business shall be subordinated to this pledge, and all this in accordance with the request of the War Industries Board."

In our editorial comment last week attention was drawn to this action on the part of the leading producers in the United States. Judge Elbert H. Gary in a recent statement to some of the Canadian members of the Institute asserted that all of the leading steel manufacturers of the United States had met at his office and had pledged themselves to give the Government 100 per cent. of their output or as much as it needed up to that point.

Unable to Buy in United States

"It is practically impossible to buy many of the iron and steel commodities imported into Canada from the United States producers," stated one of the large Canadian importers to HARDWARE AND METAL. "This is especially the case with sheets as a very large order, reported at 75,000 tons, was recently placed by the United States Government for use in certain defensive work on the Western battle front. This will take a large additional supply of sheets and will naturally cause a scarcity of these lines for commercial purposes on this continent." In view of this condition the Canadian trade will be interested in following the developments in this market with its consequent bearing on supplies.

Credit Men Report Very Few Failures

Annual Meeting of Canadian Credit Men's Association, Ontario Division, Held in Toronto—Conditions During Year Reported Very Satisfactory—W. H. Lamont Says it is Time to Keep Close Watch on All Credit Matters

ONE of the outstanding features of the annual meeting of the Canadian Credit Men's Association, Ontario Division, held on May 14 in the Board of Trade Club Rooms, Toronto, was the report of very few commercial failures during the year. W. H. Lamont, of H. S. Howland, Sons & Co., president of the Ontario Division, in his annual report advised that it was a time when all credit men should keep a close watch on their customers' affairs. Mr. Lamont is of the opinion that capital is necessary in conducting any enterprise but that an even greater essential is credit to assist in building up a profitable business, providing it is established on a solid basis. The report of the manager, A. S. Crighton, showed a very gratifying condition of affairs in the association.

Nominations for the incoming board of directors were made, which are to be voted on by ballot some time between now and June 1. Following are the nominations:

Toronto.—Thomas W. Learie of W. R. Johnston & Co.; C. T. Richardson of H. P. Eckhardt & Co.; A. G. Parker of W. J. Gage & Co.; Thomas McMillan of Ansley-Dineen Hat Company; D. Marshall of A. T. Reid & Co.; H. G. Tod of Thompson Lace & Veiling Co.; E. A. Lye of W. R. Brock & Co.; C. T. Ross, of the Keen's Company; F. W. Cooper of S. F. MacKinnon & Co; Warren Walker of Gordon, Mackay & Co.

Province of Ontario.—Mark Rowe of Canada Furniture Manufacturers, Limited, Woodstock; E. D. Goetz of Brandon Shoe Company, Brantford; John B. Kirby of Williams, Green & Rome Co., Kitchener; E. Leith of Balfour, Smye & Co., Hamilton; G. T. Dunn of Canadian Steel and Wire Company, Limited, Hamilton; W. S. Duffield of John McPherson Company, Limited, Hamilton; E. S. Little of Robinson-Little & Co., London; James A. Lamb of Grant-Holden-Graham, Limited, Ottawa.

Of the above number four are to be elected from the City of Toronto and five from the province. The president, vice-president and secretary-treasurer will be elected by the incoming board of directors. Following is the address of the president, W. H. Lamont, and of the manager, A. S. Crighton:

PRESIDENT'S REPORT

Gentlemen:—

It is my privilege and honor to present to you the sixth annual report of the Canadian Credit Men's Association, Limited, of Ontario.

We have just completed a year during which all credit men have been laboring under great strain. The rising market under which we are still trading necessitated in many instances the increasing of credit to our customers, consequently we, as credit men, were called upon to face the business conditions with optimism, yet using care, alert to see that our customers did not speculate too heavily by over-buying, at the same time bearing in mind that some protection in buying with the continued increase in prices was necessary. But I am glad to say that during this strenuous time credit men have learned to realize more than ever the many advantages of co-operation, and in consequence the detailed reports of the different departments of our association, as presented by our manager, are most encouraging. Our financial condition shows improvement, almost every month the balance has been on the right side, even in face of the ever-increasing operating expenses.

The Adjustment Bureau, though progressing slowly, is deserving of more encouragement from the members. Our board room can be used for meetings, and our complete and efficient organization is at the command of any member to carry out investigations, which they can rely on being handled with the best of attention. It is needless for your board to point out that in giving your business to this department you are helping yourselves. Any profit derived outside of the actual operating expenses goes back into the association to assist in building it up and bettering credit conditions throughout the country.

This is a time for all credit men to keep a close watch on their customer's affairs, and at the first indication of one getting beyond his depth his affairs should be carefully investigated so that he can be directed and encouraged to adopt progressive methods that will enable him to pay his liabilities, and work into a snug position.

Referring to legislation, your board is glad to announce that the Bulk Sales Act will become operative this fall, and that the Daylight Saving Bill has been passed. The result of this act of Parliament we feel confident will not only show a considerable saving to the country, but should also be beneficial to the health of the people generally.

The necessity of uniformity in provincial laws has been constantly before us, and your board is glad to report that the Bankruptcy Act as drawn by Mr. Grundy, solicitor, for the head office in Winnipeg, assisted by Mr. Jackson, of Regina, and by our own good friend and solicitor, Mr. A. C. McMaster, has been introduced at this session of Parliament by Mr. Jacobs, K.C., of Montreal. The opinion of all sections of the trade generally is in favor of the Act. The Bill will, no doubt, become law, though, perhaps, not exactly as drawn. It has been referred to a committee after passing the second reading, with the intention, I understand, that the country generally should have a chance to pronounce upon it, consequently the passing of the bill may be delayed until next session.

Open meetings have been held frequently during the year, at which we have enjoyed hearing speakers of a high order; their addresses have been well received, being both interesting and instructive to all members. These meetings serve the further purpose of bring credit men closer together and it might be advisable during the incoming year to try and hold them more frequently than we have been doing heretofore.

The various committees have been most active in the duties assigned to them, and I wish to express my personal appreciation of the attention given by all members of the association, without which it would have been impossible to have shown the growth that we have enjoyed during the year.

The earnings of mechanics and artisans are constantly increasing, farm products are bringing much higher prices than ever before, and in consequence the country generally is prosperous. This condition should go a long way in helping the retail merchant to reduce his outstandings and bringing his business closer to a cash basis. We are glad to observe that the people are realizing the necessity of thrift, resulting in a large over-subscription in placing the Victory Loan this year, which is something all Canadians should be proud of, but even after providing for this wonderful investment it is pleasing to note that the banks are reporting monthly increased balances in their saving accounts.

This terrible world war is still going on with the end not in sight. In consequence we in Canada will be called upon to produce more even than has been done, hence it behooves our Government to arrange for the best possible organization to assist in cultivating every available acre, and every effort should be made to perfect our means of transportation in order that our produce should be got forward to where it is required with as little delay as possible, as well as to provide for systematic distribution of foodstuffs among ourselves.

Because of the war our national debt is continually growing until the load is now very heavy, and in consequence we are going to be called upon to meet very heavy taxes, possibly for some time to come. Credit men must, therefore, look into the future with courage and confidence, using every opportunity to help build up the business of our country, in order that these taxes may be borne. Capital is a necessity in conducting any enterprise, but even a greater essential is credit to assist in building up a profitable business, providing it is established on a solid basis. Advances on debts which are promptly redeemed at maturity is one of the strongest influences to create and increase national wealth. It has been stated by an authority that credit advisedly extended has accomplished more in the past to enrich nations than probably the mines of the country.

Whenever possible we should try and educate the retail merchant in the value of credit, showing him how necessary it is to keep his affairs as liquid as possible, the necessity of careful buying as well as efficiency in collecting, so that capital will not be unduly absorbed in dead stock or open accounts. Facing these responsibilities, and while having careful regard for safety, helping in every way possible progress and development, shutting out from our minds any feeling of pessimism, we ought to keep ever before us the vision of success and the ultimate destiny of our country.

The thanks of your board is extended to the manager, and all the members of the staff for their efficient work during the year, and personally I wish upon retiring to tender to the incoming president my best wishes for his success in office. I feel sure the association will gain in usefulness and prosperity under his guidance.

W. H. LAMONT, President.

MANAGER'S REPORT

Gentlemen:—

The fiscal year just closed has been, perhaps, the most successful year in the history of this division. I do not mean to infer by this that the annual statement shows large earnings—this is not the case, although a reasonable net profit has been added to the former surpluses of the branch. The success attained is in the fact that a more valuable service has been rendered to the members, and the business community as a whole, than ever before. This has been made possible, through the medium of the association, by a closer co-operation on the part of the wholesale houses of the province, for the general betterment of conditions affecting mercantile transactions. The idea of co-operation among competitors is spreading, and is bringing forth much fruit. Wholesalers, who in the early days scoffed at the ideals enunciated by supporters of the association's principles, are to-day enthusiastic members, giving of their experience, time and money for the common good.

A decided growth in membership is responsible to some extent for the increased power of the association as a factor in the betterment of conditions which prevail, but increased interest taken by the members in their association, is responsible to a still greater extent. Very great appreciation is due to the chairmen and members of the various committees, many of which have been active throughout the year.

Clearing House

The value of the trade clearing report is becoming much more pronounced, due to the added number of members subscribing to this department. In the early days, due to the lack of members, it was in many lines of trade impossible to tabulate a report of value. To-day, except

in a few isolated trades, there are very few accounts cleared in which none of the members are interested, and, as a consequence, almost all reports issued contain sufficient information to enable the credit man to form an opinion as to the advisability of extending credit, and a large proportion of the reports show almost the total liability to the rade, of the party inquired upon.

A striking example of the benefits to be derived from the trade clearing reports, is in the case of a firm who recently found it necessary to make an assignment for the benefit of creditors. About six months prior to the assignment, a trade clearing report was issued to the members interested, showing a very unsatisfactory state of affairs, the bulk of the liability being past due and a number of members interested. Upon receiving this report the members evidently proceeded to get their accounts reduced as rapidly as possible, as when the crash came only a few of them were creditors, and these for comparatively small amounts. The large creditors finally interested were those who, failing to appreciate the benefits of co-operation in the interchange of ledger information, were not members, and had not seen the report.

The following is a record of the number of inquiries cleared by the Ontario division during the year:—

Inquiries cleared at request Ont. members	13,790
Inquiries cleared at request Montreal office	7,306
Inquiries cleared at request St. John office	3,046
Inquiries cleared at request Winnipeg office	7,723
Inquiries cleared at request Calgary office	2,438
Inquiries cleared at request Vancouver office	1,657
Total	35,960

During the past year a "Service Reference Book" has been published, giving particulars of the association's activities, its modus operandi, etc., and this has been found of very general benefit by the trade.

Financial Statements

Under the instructions of the improved credit department methods and educational committee, a new simplified form has been adopted. These are supplied to members should they desire to send them out to their customers, and are also used by the association in securing statements upon request of members. The interchange of statements between our branches is a feature of growing value to the trade.

Fire Insurance

Through the efforts of the association, a number of retailers have been induced to increase the amount of fire insurance carried on their stocks or other property, to an amount sufficient to protect their creditors in the event of fire. We were glad to take this matter up with any retailer at the request of members, without divulging names.

Prosecution Fund

No prosecutions have been instituted by the Ontario division this year. Frauds against creditors have not been of frequent occurrence. The prosecution committee are continually reminding members of the existence of this fund, and of the rules governing its use. It cannot be used for the purpose of investigating cases of suspected fraud but for the purpose of prosecution only. Members submitting whatever evidence they have been able to secure to the prosecution committee, are authorized the use of the fund if, in the opinion of the association's solicitors, the evidence warrants prosecution.

Adjustment Bureau

Commercial failures have been few and far between, and those which have occurred have not been of any great importance. Your Adjustment Bureau, therefore, has not been called upon to wind up many estates. It has, however, been successful in arranging for the general benefit of creditors a number of very satisfactory settlements, and has carried on several businesses under extension arrangements as Trustee. The Bureau is fully equipped to efficiently conduct investigations at the request of creditors, prepare statements of affairs, and to administer estates under extension or assignment in a competent and economical manner.

Creditors occasionally desire to discuss with other creditors the position of an account. For meetings of this nature, or any other purpose, our board is always at the disposal of members upon request.

Legislation

Your legislation committee, under the able chairmanship of Mr. James A. Catto, of Messrs. W. R. Brock & Co., Ltd., has been active. For a number of years your association has been advocating greater uniformity in provincial legislation. In co-operation with the Canadian Bar Association, bills have been submitted to the Legislatures of a number of the provinces, including Ontario, providing for the appointment of a commission, whose business it would be to consider the laws in effect relating to commercial matters and to consult with similar commissions in the other provinces, with a view of bringing about uniformity in such laws. The efforts of your committee have been rewarded in the fact that the Ontario Government at the recent session of the Legislature enacted the necessary legislation, providing for the appointment of a commission along the lines advocated.

Bankruptcy Act

Your Ontario committee has co-operated with the legislation committee of the head office, in an endeavor to have enacted at the present session of Parliament, a Bankruptcy Act which would meet with the approval of the various interests. A bill prepared by the association's head office solicitor, H. P. Grundy, K.C., Winnipeg, and revised by E. J. Jackson, K.C., Regina; E. R. Siddall, B.C.L., Winnipeg, and A. C. McMaster, K.C., Toronto, after having been submitted to practically all interested organizations in the Dominion, has at the time of writing been introduced in Parliament by S. W. Jacobs, K.C., of Montreal. Your association is sparing no effort or expense to secure a Bankruptcy Act, which in its operation will be speedy, inexpensive and equitable to creditor and debtor alike.

Your committee is active in watching carefully all proposed legislation going through the local House, likely to affect credit granting conditions, and the appreciation of the members is due to the committee for their efforts to safeguard the interests of the wholesalers of the province.

Membership

Many new names have been added to the membership list during the year, and your membership committee, under the capable chairmanship of A. C. Parker, of Messrs. W. J. Gage & Co., deserves great credit. It is indeed satisfactory to note that in spite of the fact that our membership now is considerably greater than ever it was, there have been fewer defections than in any previous year. This is evidence of the fact that as the membership grows the service becomes more valuable, and the service has now reached such a high state of efficiency that a wholesaler, in almost any line of trade, selling to the retailer, can secure from his membership, if he will make full use of the service, a splendid return for his co-operation and subscription.

Finance

The financial position of the division is steadily improving, the year's operations showing a slight excess of revenue over expenditure. As in practically every other line of endeavor, operating expenses have considerably increased during the period of the war, and, while the price of almost every other commodity has been increased, there has been no increase in the price of the service delivered to its members by our association. The membership fees remain the same, there has been no increase in fees charged in the Adjustment Bureau, and it is satisfactory to note that, in spite of expenses having increased considerably, the division is able to carry on a continuous propaganda for the improvement of credit granting conditions, and still earn a small margin of profit. Mr. Thos McMillan, the vice-president, has been chairman of your finance committee since the inception of the Ontario division, and the success of the division is to a large extent due to his careful supervision of the finances.

The thanks of the entire membership is due to the president and board of directors for their careful and systematic supervision of the affairs of the branch. The addition last year of directors representing the various cities and districts of the province has proven very beneficial.

The members of the staff have proven themselves to be efficient and loyal in every particular, and a spirit of co-operation prevails. I desire to express my sincere thanks to them for the hearty support rendered me at all times.

The general manager, Mr. Henry Detchon, is a never failing source of strength and can always be relied upon for the right kind of advice and assistance at the proper moment. I wish to express to him my great appreciation of his many kindnesses and helpful suggestions during the year.

The Ontario division has operated in complete harmony and accord with the other divisions from coast to coast, and we are indebted to all of them for many services rendered to the Ontario members and courtesies extended to the Ontario branch upon every possible occasion.

Respectfully submitted,

A. B. CRIGHTON, Manager.

SPEED LIMIT INCREASED

The Toronto and Hamilton Highway Commission has decided to increase the speed limit to 20 miles in towns and villages and 30 miles in townships. Heretofore the law fixed the speed in towns and villages at 15 miles and in townships at 20 miles. The special constables have been given instructions not to bring into court any motorist who does not exceed these figures.

TO BUY ALL PIG IRON

An announcement has been made by the authorities at Ottawa that all pig iron produced by blast furnaces constructed within the Dominion during the next two years will be taken on the basis of a three years' contract. This move is taken with the idea of encouraging production of iron and steel in this country. An agreement will be entered into with prospective producers on behalf of the Government, the price to be governed by the market conditions at the time. This arrangement has been reached as a result of representations which have been made by members of Parliament from British Columbia. A delegation from that province urged that a subsidy be granted to producers of iron and steel. The Reconstructed Committee of the Cabinet, however, decided that a subsidy at the present time was unwise, but in lieu of a subsidy have agreed to purchase the output for three years of any new blast furnace established during the next two years.

EVENTS IN THE TRADE

BUSINESS CHANGES

Camrose, Alta.—Ofrin & Maland are starting a hardware store.

Melita, Man.—Hamilton & Co., hardware and lumber, are discontinuing.

Millbank, Ont.—S. Fewings, hardware, has advertised his business for sale.

Lachine, Que.—The hardware business of La Quincaillerie Lalonde has been sold.

Strassburg, Sask.—J. A. Howse, hardware, has been succeeded by Thompson & McMahon.

Montreal, Que.—P. H. Klein, Jr., Co., Ltd., manufacturers of electric lamps, has dissolved.

Montreal, Que.—The American Paint Supply Company has changed style to the Boston American Paint Supply Company.

Courtenay, B.C.—Thomas Booth & Son, who conduct a general store at Courtenay, are reported as selling their hardware stock.

Bassano, Alta.—E. G. Paddon, hardware, with branch at Bassano and headquarters at Calgary, has sold the Bassano branch of his business.

FIRE LOSS

Retlaw, Alta.—The Retlaw Hardware Company, Limited, has suffered fire loss, which is partially covered by insurance.

Montreal, Que.—The Munitions and Metal Products, Limited, has suffered fire loss.

PERSONALS

L. H. Cornwall, of Oakville, Ont., was a Toronto visitor during the past week.

R. J. McNally of Blackstock, Ont., was on a buying trip to Toronto during the week.

E. A. Button, of Stouffville, Ont., drove into Toronto during the past week on a buying trip.

T. A. Dustin, hardware merchant, Bowmanville, Ont., was a visitor in Toronto during the past week.

Fred Moore, manager Benjamin Moore & Co., paint manufacturers, is spending a month at Preston Springs, N.Y., for his health.

N. G. MacLeod, manager Beardmore Belting Co., Toronto, returned Tuesday of this week from a holiday to New York City and Atlantic City, N.Y.

Lorn D. Campbell, Toronto manager for B. & S. H. Thompson & Co., Limited, was in Montreal on business during the first part of the present week.

Godfrey Darling, formerly advertising manager for the G. F. Stephens Co. Ltd., Winnipeg, was recently married in London, England. He is still connected with a tank battalion in France.

O. B. Henry, Drayton, Ont., passed through Toronto Tuesday of this week on his return home from Florida, where he has been spending a couple of months for his health. Mr. Henry reports that he feels greatly benefited by his holiday.

H. M. Roblin, for many years representative of the James Smart branch, Canada Foundries and Forgings, Ltd., Brockville, in Eastern Ontario, has joined the sales staff of Rice Lewis & Sons, Ltd., Toronto, and will cover the same territory for this firm.

W. E. Hargreaves, assistant factory superintendent for the G. F. Stephens Co. Ltd., Winnipeg, left last week for Ottawa, having joined up with a tank battalion for service in France. On his departure he was presented with a purse of gold by the staff, accompanied by their best wishes.

E. T. ENLOW

President Dominion Sheet Metal Company, Hamilton, Ont., who has recently returned from a six weeks' trip to the West Coast. Mr. Enlow spent three weeks on the westbound trip going by way of the Canadian route and three weeks on the return journey, traveling by way of the Southern portion of the United States. "I was amazed at the great prosperity in the Canadian West and the wonderful war activities in the States," stated Mr. Enlow to HARDWARE AND METAL *on his return.*

W. H. Gerke, late of the Boston Varnish Co., and who has been connected with the Martin-Senour Company for some 28 years, has been made manager of the Chicago office of the company. Mr. Gerke was in the Chicago office for sixteen years prior to taking up the management of the Montreal office, having held the latter position for twelve years.

MONTREAL NEWS NOTES

Mr. Falls, with the New Haven Clock Co., is in Montreal this week.

The Slaymaker Co. are represented this week here by Charles K. Eichler.

Mr. Hinchman, with the John H. Graham Co., New York, is in Montreal this week.

Jos. Gulien, hardware merchant, of Pont Rouge, Quebec, was in Montreal on Monday of this week.

Raymond A. Catlin, with Corbin Cabinet Lock Co., New Britain, Conn., is a Montreal caller this week.

C. D. McDowell, representing the H. D. Smith & Co., Plantsville, Conn., will call on the Montreal trade next week.

F. A. Ray, of the Stevens-Hepner Co., Ltd., Port Elgin, Ont., was a Montreal visitor in the interest of his firm.

T. H. Jordan, vice-president of A. C. Leslie & Co., returned recently from a trip to New York and other United States points.

Willis H. Simpson of the Willis H. Simpson Company, Inc., New York, is a Montreal visitor this week in the interests of his firm.

Harry M. Patterson, secretary-treasurer of the Stratford Brass Co., Stratford, Ont., was in Montreal calling on their business friends.

Beverley Robinson, president of B. & S. H. Thompson, was in New York last week reviewing the situation on steel products handled by his company.

J. A. St. Germain has opened a manufacturer's agency at 104 Delorimer Avenue. These premises were formerly occupied by the Canada Stove and Foundry Co. and Mr. St. Germain will handle their line of stoves and also various other household lines.

John M. Young, well-known representative for the Thos. Davidson Mfg. Co., Ltd., sustained a serious accident last Saturday. While walking along the street in Westmount he fell and was rushed to the Western Hospital, where he has since been confined. Owing to the fact that he has been unable to speak since and state how the accident happened it is not known whether it was a case of paralysis or not, and the doctors

are puzzled over the case. The numerous friends of Mr. Young will wish for him a full and speedy recovery. At this writing his condition is stated to be serious.

MONTREAL GLASS FIRM MOVES

The Hobbs Manufacturing Co. has just completed moving from 33 St. Maurice Street to 444 St. James Street, where they will not only have increased scope for their business but are splendidly located in the new premises. For their stock and office purposes the space at their disposal is much greater than that in the old location.

BICYCLE WEEK STARTS SALES

Reports from various parts of the Dominion indicate that Bicycle Week held from May 4 to 11 had a very beneficial effect in getting the sales started for the present season. Intimations from Vancouver showed that much enthusiasm was manifest in the event through store displays, full page advertisements and window displays. On Vancouver Island, at Nanaimo and Victoria, interest was also keen and the spring trade started off well. In Winnipeg there was a parade of some 500 bicycles, half of which number were decorated. Stores also made a special effort in placing the bicycle in the place of honor. One of the very material benefits reported was the cleaning up which resulted and the better arrangement of the stores throughout. From Edmonton, Calgary, Moose Jaw, Regina and Medicine Hat come reports of the enthusiasm which was engendered. This is really the first year that the West has taken up with the idea of a bicycle week and the dealers are more than pleased with the result. As reported elsewhere Montreal had a very successful bicycle run and Sportsmen's Show. As reported in these columns last week Toronto had a fine turnout, over 700 being in line. In the East the bicycle dealers in Halifax, St. John, London, Brantford, Kingston, Chatham and Ottawa got together and made a good showing on the occasion. From the number of sales that have already been reported it would seem to indicate that the new draft is not going to make any material difference in the quantity.

RUMORS OF TAX ON GASOLINE STATIONS

There have been various rumors afloat in the City of Toronto with respect to a tax on gasoline service stations. These rumors have in some instances placed the amount of the proposed tax as high as $100. Oil men and tank men when consulted on the matter said they have not been advised of any such measure. The manager of one oil company points out that such a tax would be highly improbable, as it would tend to drive many of the small service stations out of business entirely, and would thereby throw the business in the hands of the larger companies. He is of the opinion that any Government would think very seriously before adopting such a prohibitive tax. As far as can be learned it would seem that the basis of such reports is largely rumor.

MAJOR L. L. ANTHES

Of the Anthes Foundry, Limited, Toronto, who has been Re-elected by Acclamation as Chairman of the Toronto Branch of Canadian Manufacturers' Association. The annual meeting of the branch was held in Toronto during the present week.

ERECT OIL STORAGE TANKS

Advices from the West indicate that the Imperial Oil, Limited, will make Dodsland, Sask., the central distributing point on the Biggar-Calgary branch of the Grand Trunk Pacific Railway. Two large tanks of 20,000 gallons capacity each will be erected there. W. R. Webb is to be the company's agent at that point.

BRITISH REGULATIONS FOR TIN

Ministry of Munitions, from April 25, prohibits purchase or sale, except for purpose of carrying out contracts, of all tin situated outside United Kingdom. Further, no person may purchase or take delivery of tin situated within United Kingdom or sell or deliver such tin without license; all persons to make monthly returns of tin held by them in stock or otherwise under their control on last day of preceding month.

ISSUES BULLETIN ON AUTO ACCESSORIES

The firm of T. McAvity & Sons, Limited, St. John, N.B., is showing more than a passive interest in the sale of automobile accessories, as evidenced by the issuance of a bulletin which is called "McAvity's Messenger of Automobile Accessories." The first number of this bulletin was issued during April and carries a photo of the firm's premises, together with numerous illustrations and good descriptive matter of some of the lines carried by the company. The bulletin is printed on a good quality of paper, and pages are four in number and of size 15 inches by 11 inches. The "Messenger" will undoubtedly carry a forceful message on auto accessories to their customers and prospective customers.

TO MAKE CHI-NAMEL IN CANADA?

It is said that arrangements have been completed for the manufacture of Chi-Namel in Canada. This is a product which is manufactured by the Ohio Varnish Co. of Cleveland, Ohio. It is understood that the product will be made at Brantford, Ont.

CATALOGUES and BOOKLETS

Pamphlet on Brooms

The Boeckh Company, Limited, Toronto, have recently issued a small pamphlet descriptive of their "Clean Sweep" brooms. The pamphlet is well illustrated and tells in addition to the advantages of using these brooms the directions for their care in order to get the best service.

The Empire Way

An exceptionally attractive 50-page booklet has been issued by the Empire Mfg. Co., Ltd., London and Toronto, featuring Empire Water Supply Systems, and also a number of plumbing and heating lines. Among the many lines featured and illustrated in this booklet are pneumatic water supply systems, power pumps, tanks, force pumps, portable engines, gasoline engines, plumbing supplies, water heaters, farm pumps, bibbs, valves, hot water boilers, radiators, tools, etc. The book contains some authentic and interesting information regarding the history and operation of hydro pneumatic water systems and the Empire method of furnishing running water throughout the home. Copies of this new booklet will be supplied to the trade upon request.

HARDWARE LETTER BOX

Floor Wax

Smith & Snetsinger, Cornwall, Ont.—Please advise where we may secure Ronuk floor wax.

Ronuk floor wax is sold by Ronuk, Ltd., 53 Yonge Street, Toronto.—Ed.

Manufacturers of Gaslighters

Plaunt Hardware Co., Ottawa, Ont.—Kindly let us know who manufactures the gaslighter with platinum wire and small wooden handle.

C. G. Lighter Company, Haverhill, Mass.—Ed.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

25. **Twines and cord.**—A Bristol firm would import twines and cord.

26. **Terra alba.**—Canadian exporters of terra alba used for paper dressing are requested to communicate with a firm in Bristol.

27. **Cement.**—A Bristol firm desires to import cement for uniting litho. blocks to slate slabs so that they will stand water after being put together. This cement previously came from Germany.

32. **Excelsior or wood wool.**—A British firm requires excelsior or wood wool for government work. From 50 to 100 tons are desired from Canada immediately. This firm is in a position to furnish the necessary import license. One cwt. bales are preferred, but 2 cwt. bales would be satisfactory. Samples should be sent with quotations. Quotations should be made on board ship at an Atlantic port or, preferably, c.i.f. Liverpool.

33. **Steel Ewbank nails and dog spikes.**—An Australian firm specializing in contractors' supplies desires samples and quotations of Canadian steel Ewbank nails and dog spikes. The nails are from 3 inches to 9 inches in length, slightly thicker in centre than at ends. The sizes wanted in the spikes are 2 inches by ¼ inch square; 2½ inches by 5/16 inch; 3 inches by ⅜ inch and 4 inches by ½ inch, measured under head.

37. **Raw potash feldspar.**—A Midlands (Eng.), company asks to be placed in communication with Canadian producers of raw potash feldspar, favorably situated for export to the United Kingdom.

38. **Vulcanizing machinery.**—A manufacturing firm in St. John's, Newfoundland, asks to be put into communication with Canadian exporters of machinery for vulcanizing automobile tires.

39. **Marbleized tin.**—Canadian manufacturers of marbleized tin in size 20 by 40 inches are asked to communicate with a Newfoundland inquirer.

41. **Veterinary clinical thermometers, T squares, boxwood scales, etc.**—A manufacturers' representative and distributor in the United States wishes to obtain in Canada supplies of the following articles: Veterinary clinical thermometers, T squares, boxwood scales, drafting instruments and other supplies for engineers, artists, draughtsmen, etc., tracing paper and cloth blueprint and Vandyke papers, chemical glassware for laboratories, asbestos mittens, pencils for draughting and copying.

42. **Steel plate.**—A London, England, company is desirous of obtaining plates from Canada according to the following specifications: 144 square feet (about) of steel stokehold plate, 5/16-inch thick over the checkers, standard sized plate say 6 feet long by 3 feet wide; 3½ tons ⅛-inch mild steel plate; 1½ tons 3/16-inch mild steel plate. The company states that it is inclined to purchase from Canada supplies which in the past have been obtained elsewhere.

43. **Rubber tires for bicycles, motor-cycles and automobiles; rubber shoes, rubber hose and rubber belting.**—Wholesale merchants and manufacturers in the Netherlands would like to correspond and make arrangements with Canadian manufacturers for the "after-the-war" importation of the articles mentioned. The firms in question are all of the highest standing and could arrange for payments through New York bankers against surrender of bill of lading.

44. **Belting of rubber, balata, cotton and leather.**—Canadian manufacturers interested in the "after-the-war" trade in belting of rubber, balata, cotton and leather are requested to communicate with wholesale merchants and manufacturers in the Netherlands who are interested in the importation of the said articles. Terms as in the previous inquiry.

45. **Wire nails and straw baling wire.**—Manufacturers and wholesale merchants in Holland would be glad to get in touch, with a view to "after-the-war" trade, with Canadian manufacturers of wire nails and straw baling wire.

46. **Lubricating oils and grease.**—Canadian manufacturers of lubricating oils and greases, who are interested in the "after-the-war" exportation of such articles, will do well to communicate with wholesale merchants and manufacturer in Holland who are desirous of importing these products.

47. **Graphite.**—Manufacturers and wholesale merchants in the Netherlands wish to get into commmunication with Canadian manufacturers of graphite with a view to the "after-the-war" importation of the same.

48 **Asbestos.**—Firms in the Netherlands are anxious to prepare for the "after-the-war" importation of Canadian asbestos, and with this view will be glad to get in touch with Canadian exporters of same.

49. **Calcium carbide.**—Canadian manufacturers of calcium carbide are asked to communicate with wholesale merchants and manufacturers in the Netherlands who are seeking to make arrangements for "after-the-war" trade in Canadian calcium carbide.

50. **Machinery, laboring-saving devices, works and domestic appliances; apparatus, such as railway switches, etc., car movers, electric appliances, balers; hardware; anchors and chains; rails, patent sleepers, "chairs," etc.; tramway rails; motr-cars; motor engines; motor ploughs.**—A Glasgow firm of importers is anxious to communicate with Canadian manufacturers of the above articles.

77. **Asbestos, wood pulp, metals and ferro-alloys.**—A house in Genoa would like to have offers from Canadian producers of asbestos, nickel, chrome ore, wood pulp, steel billets, pig iron, and such ferro-alloys as ferro-chrome, ferro-tungsten, ferro-silicon, ferro-manganese, etc.

82. **Electrical equipment.**—A firm in Florence, Italy, which furnishes electrical supplies to Italian companies, wishes to get into communication with Canadian manufacturers of electric lighting equipment, contact breakers and electrical heating supplies

MONTREAL SPORTSMEN'S SHOW

(Continued from page 33.)

who so successfully managed the Motor Car Show last winter.

The Exhibitors

There was not as large nor as representative a display as earlier and at first anticipated in view of the promises of various sporting goods dealers. Some stated that they were unable to procure the necessary stock to make the display desired. Others had other and less reasonable excuses, but to the credit of many patriotic dealers the main floor of the Auditorium on Ontario Street had a representative and presentable display.

The decorations were well selected and placed, and these, in keeping with the times, were of a patriotic nature both in the matter of interior decorations and those of most of the displays. Flags have formed an important feature.

The show was opened on Saturday afternoon, May 4, by President Art Ross of the Bicycle and Motor Cycle Dealers' Association, and while the attendance on the first and second days was not large, considerable numbers came, especially on Monday and following nights.

The Canada Cycle and Motor Co. had a complete line of their bicycles which occupied considerable space as allotted. As a background a large painting of the Weston plant was used to good purpose. British and French flags were also a part of the background here and in all there were about 20 different models of bicycles displayed by them.

The Art Ross Sales Company used for their background bicycle and motor car tires and a red, white and blue color scheme. In the foreground they had a well-arranged display of motorcycles and bicycles and motor wheels.

Auto Cycle Limited exhibited Perfect and Columbia bicycles and in addition had a good showing of accessories, including lamps, tubes, covers and also a line of fishing tackle which atratcted many of the visitors interested in angling.

Hyslop Bros. Limited had a good display of their various lines of bicycles with a variety of models shown. In addition they exhibited accessories of various kinds, including spark plugs and cord tires.

McNeice & Orchard displayed Massey Silver Ribbon bicycles and Thor Motorcycles, and in addition used considerable space in the display of accessories such as lamps, batteries, flashlights, etc.

One of the most complete displays was that made by Henry Morgan & Co. This display included canoes, skiffs and rowboats, in addition to a well-arranged showing of bicycles, toy wagons, tennis rackets, golf goods and other lines. An ingenious use was made of a small toy cannon to attract attention.

The Canadian Swiss Ski Mfg. Company of Three Rivers, Quebec, had a display of its products.

Among other displays made were those of Hershbain Bros., Brantford and H. B. bicycles and accessories; Graveline & Kennedy, Excelsior and Henderson motorcycles; H. Wheeler, Michelin tires; F. X. Brazeau, cyclemotors; Ed. Barsalou, Dayton and C. C. & M. Co. bicycles, tubes, covers, etc.; the "D. H." Vulcanizing Company.

In addition to the regular exhibitors of purely sporting goods lines space was allotted the Khaki League who used the same in showing products made by returned men, these consisting mostly of toys suited to the use of small children.

The Daughters of the Empire also took advantage of this opportunity to distribute literature from the Food Controller's Department bearing on greater conservation of foods and greater garden production.

One of the features liberally subscribed to was that of a drawing for a bicycle donated by the Canada Cycle and Motor Company. Tickets sold are to provide proceeds for the work among crippled children.

The engagement of Gagnier's Orchestra provided music for the attendants at the show during the week. Undoubtedly the annual sporting goods show will hold a very educative value for the progressive dealer who will make proper use of this advantage.

THE CLERKS DEPARTMENT

E. C. SIMMONS NEVER QUITS, AND HAS TIME TO SPARE

Founder of the World's Greatest Hardware Concern Inspires Lasting Loyalty From His Staff—Simple Secrets of His Success as Seen by His Secretary

"YOU never quit, and you always have time."

After 31 years' experience of his methods a veteran and valued employee of the Simmons Hardware Company, St. Louis, Mo., set these qualities down as the crowning miracles of his employer's marvellous personality. That employer was E. C. Simmons, founder of the firm, and the Simmons Hardware Co. is declared to be the world's greatest hardware concern.

Building a hardware business is big work—"a man's job" every minute of time. Even men who delight in other great business undertakings, engineering, finance, merchandising of perishable commodities, are ready to admit that it takes more than merely brains and energy to develop even a moderate sized hardware business. In the swift searchlight beam thrown by Mr. Simmons' secretary upon his methods, is found shining like a diamond of great price the secret of this great business man's surpassing success. Here is what his secretary, Miss May Darneille, says of him when she describes him as "The best employer in America," in an article in *Forbes Magazine*:

"One thing which he has persistently taught, and which has always made a great impression on me, is that the difference between doing a thing just right and about right is the difference between success and failure."

Why He is "The Best Employer"

In giving her reasons for considering Mr. Simmons the best employer in America, his secretary is very confident and clear, for, as she says, "personal and actual knowledge of the real man," are her sources of knowledge about him. She writes:—

"E. C. Simmons is, to my mind, the best employer in America, principally because he possesses kindness of heart and that rare quality in men of big affairs—thoughtfulness of others in all the little things that go to make life worth while. These two attributes, with all the many ramifications that go with them, seem to me to cover all that is necessary in a successful and very useful life.

Absolute Loyalty From His Staff

"Coupled with this he has endeavored constantly to make his life a worthy and shining example to the many hundreds in his employ, and by his example and his absolute sense of frankness he has made a world of staunch friends among the retail dealers and has inspired in his co-workers a loyalty which causes them to exert their most powerful efforts in accomplishing anything he asks, and he never asks the impossible. When he makes a call it is not the few who respond; all pull together, and this spirit has caused his house to take rank as the greatest hardware business in the world. After all, a business is "but the lengthened shadow of the man behind it," and in integrity, truth, and fair dealing, the Simmons' Hardware Company is certainly the lengthened shadow of its founder.

He Always Has Time

" I wonder, in our busy lives, if we all try to cultivate one other attribute that comes to my mind which this very busy man possesses, and this is, always having time to do the necessary and needful thing.

"I cannot convey this idea better than by reproducing here a paragraph or part of a letter received by Mr. Simmons on his seventy-seventh birthday. This letter came from a man who has been in his employ for years, a man who has worked up to one of our top places, a man of high ideals and worthy purposes, and to me the tribute he pays to his employer is wonderful:

A Wonderful Tribute

" 'You are a wonder to me in one particular, which I believe I admire more than all your other extraordinary qualities. You never quit and you always have time—time for your business and your numerous outside interests; time for your home and family; time for your church work; time for your friends; time for your clubs and various organizations; time for everybody and everything; time to write me a letter when I send you a newspaper clipping. I love work and do work all the time, but hard as I have tried to measure up to your standard I am forced to realize that you possess, as God-given gifts, what cannot be acquired by mere man.

The Test of the Years

" 'When I was fifteen years old you engaged me as an office boy. You were forty-six then and I am forty-six now, so you see I am drawing a comparison between us at forty-six. You were a wonderful man then, and what have I done in the same time? Why am I at forty-six not as you were at forty-six? Answer: Talents. I bow to you in honor and respect. Thirty-one years since I first ran your errands, and there has never been one minute of those thirty-one years when I would not have fought the boy or man who dared to speak of you except in praise.

" 'My congratulations—another milestone. God grant that there may be many more."

Busy and Happy

"Another lesson of his life," writes his secretary, "has been that the busy people are the happy people, and he has always surrounded himself with a corps of busy and correspondingly happy people. Countless numbers owe their success in life to his teachings, and I happen to know that scarcely a day passes but that he receives a letter from some ex-employee, paying tribute to him and thanking him for whatever success life has brought to them, stating freely that all their valuable lessons have come from his early teachings.

"In addition to this, I doubt if any man in America has to his credit more men redeemed from the paths of waywardness. He has worked faithfully and patiently with all inclined that way, and in almost every instance has been successful in showing them the folly of their bad habits, so that he now has in his employ many men who are splendid and worthy citizens who might otherwise be wrecks.

"Be Ye Kind"

"His life has been founded and built from day to day on the text: 'Be ye kind.' Some may consider this a small virtue; it to my mind is a noble and great virtue, and if one has but the will, the spirit can be shown everywhere and anywhere and at all times by all persons—the matter of just being kind. It does not necessarily mean gifts; it may be a kind word, a newspaper, a magazine, an interested inquiry about the other's family.

"When all is said and done, what shines out clearest is his habit of trying to do or say something kind every day to somebody. This greatest blessing and greatest gift that can be given to man he has to a degree not possessed by any one with whom I have ever come in contact.

Like Father: Like Son

"What better evidence could there be that he is one of America's most splendid men, as well as the best employer, than the fact that he has three fine sons, all men of high ideals, all men who will ever carry out his teachings and example. They have shouldered the responsibilities of this enormous business, relieving their father so that now he acts in an advisory capacity, and although seventy-eight years of age his mind is as actively keen and alert as ever, and he takes a constant and daily interest in the business which he has founded and watched grow."

NEW HARDWARE GOODS

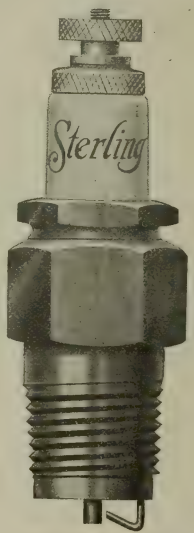
OFFERED TO CANADIAN HARDWAREMEN

WINDOW LOCK

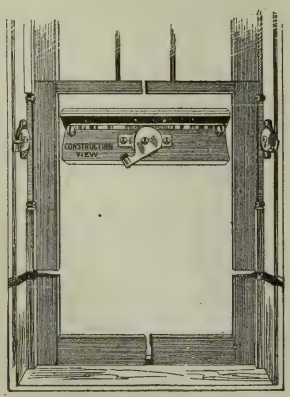
The United States Manufacturing Company of Springfield, Ohio, has recently placed on the market the "Bowlus" anti-rattling window device, designed to hold the window at any height and prevent rattling. It is claimed for it that it keeps out wind, dust, rain and cold and keeps in heat, and is not conspicuous. It is asserted the device may be easily attached and conveniently operated. The company will give further details on request.

NEW SPARK PLUG

The Sterling spark plug is a new product which has recently been placed on the market and which is being distributed by the Dominion Battery Company, Toronto. One of the outstanding features claimed for this plug is the fact that it can be taken apart and cleaned. It is asserted the big diameter porcelain petticoat is smoothly glazed, which makes it proof against carbon being deposited. The electrodes being of special alloy, it is claimed for them that they will not corrode, and being large will hold their shape in excessive heat. It is claimed that with perfect fitting copper asbestos gaskets, leakage is prevented no matter how often the plug is separated for the purpose of cleaning. The advantages secured from such a plug, it is asserted, lies in the fact that all cylinders are firing all the time. Practically a new plug results by wiping away the accumulated carbon. The length of life of the spark plug is increased from six to ten times, it is asserted. Replacement of cores accidentally broken can be made at half the expense of a new plug, is another point claimed for this plug.



Sterling Spark Plug



Bowlus Anti-Rattling Window Device

AUTOMATIC CHURN

The Canadian Automatic Churn Company, Limited, Chamber of Commerce Building, Winnipeg, is placing on the market an automatic churn which it is claimed will produce butter in one minute to three minutes.

Canadian Automatic Churn

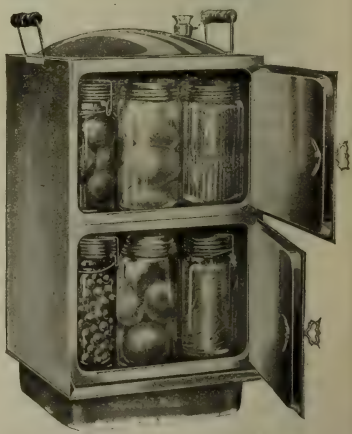
The churn is in the form of a glass jar suspended in a frame between strong springs, and is operated by a touch of the finger. The whole process of churning is done by vibration. There is absolutely nothing inside of the jar except the cream. The other materials used in the construction of the churn, besides glass, are aluminum and nickel-plated steel, and one frame is adjustable to any size of container for cream.

It is claimed for it that it is self-cleaning in ten seconds and requires no scrubbing. Vibration of oil-tempered steel springs is the motive power used. There are no dashers or paddles in the construction of the churn.

FOOD CONSERVER

The Toledo Cooker Company, 1336 Bancroft St., Toledo, O., is placing on the market an article which is called "Conservo" wherein is utilized the "cold pack" process of sterilization by pressure. It is a square metal container, made to fit over a single burner of a kitchen range. It will hold, in the medium size, 14 quart jars of fruit or vegetables for canning. The vegetables are placed in the jars cold, the water compartment beneath the racks is filled and it is claimed the rest of the canning is simply a matter of timing the sterilization correctly according to tables furnished.

It is claimed for it that it is simple and may be used extensively in the daily meal getting, as it cooks an entire meal over a single burner, cooks everything thoroughly, without shrinkage, drying up, burning or loss of valuable food flavor and nutriment. Saving of fuel is another point claimed for this device.



Conservo Food Sterilizer

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

ANOTHER advance of 25c per pound has featured ingot tin during the week, and to-day's price on this metal is almost prohibitive. Scarcity still predominates the situation, though Eastern reports indicate some licenses are being granted. However, it is further stated that all coming under said licenses is sold. Another increase in the price of solder has followed in the wake of the advancing market on tin. The results of various embargoes placed on shipments to this country are showing in badly broken stocks, with opportunities for replenishing remote.

Ten-gauge sheets and plates are reported in a very firm position, and that higher price levels will be established is indicated as a possibility within the near future. Two or three gauges of black sheets have shown an easier tendency during the week, but this, it is felt, will be shortly overcome in view of the uncertainty of securing further supplies.

The position of wire nails is one of extreme firmness. Importations of wire rods from the United States, which have been comparatively light during the past few months will, it is thought, be restricted even more in view of the Government demands on mill output. Whether Canadian mills will be able to supply the demands of the makers contains an element of uncertainty. Government intervention in operation of steel industries is, under existing conditions, always a possibility, so commercial requirements cannot be contracted for with definite assurances of fulfillment. These are factors which must enter into the determining of any new prices, and that higher levels may be reached in nails is not looked upon as uncertain.

Canadian manufacturers of builders' hardware announce new prices on their entire line of goods, the advance ranging from 3 to 10 ten per cent., immediately effective. The lines affected include door locks, door knobs, lock sets, sliding door locks, hat and coat hooks, casement fasteners, sash fasteners, etc.

Many important changes are noted in miscellaneous lines, malleable and cast iron fittings going higher, as well as advances in nail hammers, barn door hangers, chain pipe vises and tongs, post hole augers, steel squares, hammock chains, oil heaters and stoves being named. Business on seasonable lines continues in splendid volume, reports as to trade being very optimistic.

MONTREAL MARKETS

MONTREAL, May 16.—While the changes of the week have not in all cases been great, they have been numerous, and some look for still more in the immediate future. Cotton clothes lines, builders' hardware of various kinds made in Canada, malleable and cast fittings, coil chain, Yankee and Roxton tools, some lines of blacksmith's tools and horse rasps have been advanced. The only item showing a decline is that of brass snare wire, which declined about 10c per pound. Trading is fairly good, and one jobber reports that while this has been best from country points there is much more activity within the past day or two from within the city. It is somewhat difficult to secure supplies of goods. River navigation is now quite active and a good many orders are going forward to water-served centres.

Clothes Lines Up; Snare Wire Down

Montreal.

CLOTHES LINES, SADDLERY, HARDWARE, SNARE WIRE. — The week has seen advances in the price of cotton clothes lines. The new prices represent an increase of about 10 per cent. and quotations now are, per dozen, 30 ft., $2.90; 40 ft., $3.40; 48 ft., $4.20; 50 ft., $5.10, and 72 ft., $6.20 Saddlery hardware prices are about to be revised but the advance is not yet obtainable, prices being now figured out Brass snare wire is down somewhat, No. 20 selling now at 75c pound; No. 22 at 77c; No. 24 at 85c, and No. 26 at $1.02. This is a decline of about 10c per pound.

Chisels, Hardies, Flatters And Rasps Up

Montreal.

HARDIES, RASPS, ETC.—Heller's horse rasp prices have been revised, the change representing an advance of around 10 per cent. Chisels, hardies, rasps, flatters and fullers used by blacksmiths also are higher, the new prices being 45c per pound. Changes are immediately effective.

Builders' Hardware Up; Also Various Tools

Montreal.

BUILDERS' HARDWARE, TOOLS.—An advance is announced in various lines of builders' hardware. This applies to the various Canadian makes and is about 5 per cent. in an approximate way. Locks, small shelf goods, knobs, etc., figure in the changes. Revisions also are made in the prices of various tools, prominent in the changes being Yankee and South Roxton products. New prices are now being figured out and these will average 8 to 10 per cent. higher than now ruling.

Fittings Revised; Also Coil Chain

Montreal.

FITTINGS, COIL CHAIN.—Among the week's changes B.B.B. firewelded chain prices have been revised. These are in the nature of advances in some sizes, and others are declines. The new prices will be found in the current quotations. Advances also have been made

in the prices of some malleable and cast fittings, bushings being based at 25 per cent. discount, the former additional 7½ per cent. being removed.

Steering Wheels And Auto Cleaner Advance

Montreal.

STEERING WHEELS, AUTO CLEANER.—Steering wheels of the tilted variety are advanced. The former prices of $6.60 for singles, $4.75 trade, and $4.52 for lots of six have been raised to $7.70, $5.55 and $5.27 respectively. Adelite auto cleaner has also been advanced. In lots of 96 the old price was 32½c, now 43c; lots of 24 price was 35c, now 45½c, and trade price of 37½c is now 49c each.

Head And Tail Lights Higher; Also Radiators

Montreal.

HEAD LIGHTS, RADIATORS. —Various lines of headlights, side lamps and tail lights have been advanced, both in single and double styles. These comprise many lines, and the advances are from 6 to 10 per cent. according to the variety. Radiators for 1916 and also for 1917-18 Ford cars are marked higher. Former prices for the 1916 and earlier models were: $26 trade and $35 retail, and these were now raised to $27.80 and $37 respectively. For the later models the corresponding prices are: old, $30.00 and $37.50; new $30.40 and $40.50.

Roller Bearings And Cocoa Mats Up

Montreal.

ROLLER BEARINGS, COCOA MATS. —Among the week's revisions is that of an advance in the price of various roller bearings used in automobiles, the increase being about 10 per cent. Running-board cocoa mats are up about 12 per cent., prices being as follows: No. BB-12, 4 dozen lots were $1.44 each, now $1.64; dozen lots were $1.56 each, now $1.78; these are the 10 x 14 in. size. The smaller or 8 x 14 in. size were $1.27 each in 4 dozen lots, and are now each $1.44, while the dozen quantity price of $1.19 each has been advanced to $1.38.

Sale Wares Fair; Also For Stoves

Montreal.

STOVES AND WARES.—The season finds demand for the various lines fair and manufacturing continues in fair volume. Orders are not of great size in some cases but they show care in selection which means that stocks are being kept in good condition throughout the country. Stove sales are fairly well maintained, orders coming in reasonably well. The undertone of the market is firm and prices are likely to rule steady. at the recent advances.

Oil And Gasoline Steady And Firm

Montreal.

OIL AND GASOLINE.—The interest centres around gasoline which while unchanged in price is in heavy demand, and this will still increase. The market is firm and motor grade is selling at the unchanged price of 34c. Coal oil sales are not so large although there is the usual demand for the season and prices are held at 22c for Electroline and Palacine, and at 19c for Royalite.

Jute Products High; Rope Unchanged

Montreal.

CORDAGE AND ROPE.—There is very little to report as rope sales continue on an unchanged basis at unchanged prices. The position of jute products is one of increasing costs, these having been applied to various products and ranging at from one to three cents per pound all around. Some little improvement is noticeable in the demand for shipping needs but this has not developed to a great extent as yet. Pure manila rope is based at 39c, British manila at 33c and sisal at 27½c per pound.

Sales Nails And Wire On Fair Basis

Montreal.

NAILS AND WIRE.—The demand for nails is fairly well maintained with this better from outside than from within the city. No changes have occurred, and the movement is without interesting feature. Standard wire nails are based at $5.25; cut nails at $5.60, and smooth steel wire $6.25 per 100 pounds.

Fair Sales Made Iron And Steel Bars

Montreal.

IRON AND STEEL.—The market is steady and some business is passing in regular sizes. When it comes to the special sizes wanted sometimes there is delay in securing these, but for the most part the trade is supplied with fair promptness. Some expect advances in the not too distant future.

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05

Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Sheet Market Fair, But Some Revision

Montreal.

SHEETS AND PLATES.—While there is little hope held out of getting much supply from outside, there is not much trade being done and one importer is quoting certain gauges at more favorable prices. Some supplies are being secured from the Canadian makers, and these will be to hand in the near future. There is no change on galvanized sheets at all and trading is fair.

BLACK SHEETS—		100 lbs.
10 gauge	$9 50	$9 00

All Lead Products Held On Firm Basis

Montreal.

LEAD PRODUCTS.—The position of solder is that holding the maximum of interest this week, but there has been no change. The high price has naturally little interest for probable buyers, and quantities selling at the high figures are small. Lead products are steady and in sympathy with the position of lead, these are somewhat firmer. General trade is quiet to fair.

Lead pipe, lb.	....	0 14

Quiet Prevails In Old Metal Markets

Montreal.

OLD MATERIAL.—There is very little change in the condition of old metals. In fact the market is as reported last week and movement has not manifested itself to any appreciable extent for the various commodities. There has been a better movement in the United States markets, but this condition has not in any way reflected here. Prices are held steady on the following basis.

Tea lead	$ 0 05	$0 06½
Heavy lead pipe	....	0 07
Yellow brass	0 12½	0 13½
Red brass	0 22½	....

Overshoes, lumbermen's rubbers boots	0 07	....
Bicycle tires	0 04¼	....
Auto tires	0 04½	0 05

More Interest In Ingot Metal Markets

Montreal.

INGOT METALS. — Tendencies are

rather firmer in a general sense through the list this week and some trading is being done in the various items. Tin occupies the place of importance in its scarcity and prices are somewhat further enhanced.

COPPER.—Conditions show no change during the week although indications point to a very satisfactory basis prevailing in this metal. Commercial trading is within small compass and the position steady at 29c to 30c pound.

TIN.—Supplies are scarcer than ever. Some slight hope is entertained now for small supplies and a few licenses have been secured. Against these the quantities that they cover are really sold already, and for regular trade needs there is little to be had. Small lots of Chinese were offered at $1.15, and Straits is quoted at $1.30 per pound. Some will not quote at present.

SPELTER.—This is quite strong and sales have been better too. Reports as to the conditions in the States are of a much stronger character and sales are being made in good volume at enhanced prices. Quotations here are 10c to 10½c per pound.

LEAD.—The sale of lead is not large at the present time. However, the position is firmed and there is a suggestion that the independent sellers will likely make advances soon. Prices here range from 9½c to 10c per pound.

ANTIMONY.—This item is one of the quietest in the list and sales are few. Price remains at 15c per pound.

ALUMINUM.—A very uninteresting and unchanged item with sales small and price unchanged at around 50c per pound.

TORONTO MARKETS

TORONTO, May 16.—Price changes have been numerous during the week and the tendency throughout has been towards higher levels. A revision in malleable and cast fittings has become effective which provides for a substantial advance. New prices have been named on builders' hardware, affecting locks, knobs, lock sets, hat and coat hooks, foot and chain bolts, casement fasteners, etc., ranging from 3 to 10 per cent. higher than former quotations. Adze eye hammers, steel squares, and chisels have also joined the list of those to register advances and other items included during the week are barn door hangers, chain pipe vises, posthole augers, grindstone fixtures, oil stoves and heaters.

Business continues in very good volume, reports from all sources indicating a satisfactory movement of available merchandise.

Hammers Go Higher; Squares Up 10 Per Cent.

Toronto.

HAMMERS, SQUARES.—A further advance has gone into effect on Maydole A. E. hammers and new prices established are said to be more in line with present market conditions in steel and wood. Quotations now being made are for No. 0, $20.70 per dozen; Nos. 1 and 11, $15.50; Nos. 1½ and 11½, $14.45; No. 12, $13.20; No. 13, $11.95; No. 23, $10.35.

Steel squares have made an advance of about 10 per cent. Some of the more familiar lines are being quoted on the following basis: No. 1, $24.00 per dozen; No. 100, $25.25; No. 100 B, $31.50; No. 100 N P., $31.00; No. 3 Rafter, $22.00; take-down, No. 100 Standard, $30.60; take-down rafter No. 100, blued, $41.50.

Barn Door Hangers Make Stiff Advance

Toronto.

BARN DOOR HANGERS.—A substantial advance is provided for in the new prices established on Atlas barn door hangers during the week. This is another line which has been affected by conditions in the steel market with continually advancing costs of production to be met. Quotations are now for No. 0, $12.50 per dozen pairs; No. 1, $12.95; No. 2, $15.90.

Builders' Hardware Lines Up 3 To 10 Per Cent.

Toronto.

BUILDERS' HARDWARE.—Canadian manufacturers of builders' hardware have made an increase in practically all lines of their manufacture, locks, knobs, lock sets, etc., establishing a discount of 20 per cent. from list. One manufacturer of steel and cast hardware has put into effect advances of from 5 to 10 per cent. on all his lines. This will, it is said, affect among other things. thumb latches, saw vises, saw sets, sad irons and handles and mangles. Some of the builders' hardware items with new prices ruling are: Cast rim locks, $2.70 per dozen; porcelain door knobs, $2.50 dozen; inside lock set with 2-piece knob, $6.85, and with 1-piece knob $7.25 per dozen sets.

Changes Effected in Pipe Vises, Tongs and Pliers

Toronto.

PIPE VISES, TONGS, PLIERS.—Higher prices have been named on Vulcan chain pipe vises, which now run as follows: No. 1, $4.10 each; No. 2, $8.85 each; No. 4, $21.05 each. Vulcan chain tongs are also under revision, new prices established representing about a 10 per cent. advance. Bernard pliers are another line on which changes towards higher levels have been made and today's range of quotations shows about a 10 per cent. advance.

Post Hole Augers Up; Grind Stone Fixtures Too

Toronto.

POST HOLE AUGERS, GRINDSTONE FIXTURES.—New prices have been established on post hole augers, which are at considerably higher levels than previously ruling. Quotations now being made on Vaughan augers are: 6-in., $12.50 per dozen; 7-in., $14.10; 8-in., $15.80; 9-in., $17.30; 10-in., $18.75.

Grindstone fixtures at $7.00 per dozen for 15-inch and $7.60 per dozen for 17-inch, are selling at an advance over former figures.

Roofing Caps, Door Buttons, Chisels All Higher

Toronto.

ROOFING CAPS,, DOOR BUTTONS, CHISELS.—A price of $7.50 per 100 pounds has been named on tin roofing caps, which is an advance. Door buttons are also affected by the advancing trend of prices and are now selling at 80c gross for 1½-inch and $1.05 gross for 2-inch. Sorby English chisels have undergone revision upward, all lines making substantial increases during the week.

Hammock Chains Higher; Clippers Also Up

Toronto.

HAMMOCK CHAINS, CLIPPERS.—Hammock chains have gone to higher levels during the week and are now being quoted on the following basis: 3-ft., $5.20 dozen pairs; 6-ft., $10.40 dozen pairs; 9-ft., $15.60 dozen pairs.

Coates toilet clippers, Yankee and Khedive are quoted at $1.50 per pair, which is a new price at higher levels. Face plates No. 0 have also gone higher to $3.25 each.

Roofing Makes Advance; Cement Unchanged

Toronto.

ROOFING, CEMENT.—New prices have been established on still another line of roofing during the week, Panamoid now selling at $1.50 per square for 1-ply; at $1.70 per square for 2-ply, and at $1.90 per square for 3-ply. Other lines have held firm and unchanged. Business in roofing and building papers is reported as keeping up at very satisfactory levels.

Cement shows no change, only a fair demand is manifest and prices hold steady. Plaster of Paris is also firm and unchanged with a fair movement reported.

Lubricating Oils Go Higher; Good Movement

Toronto.

OILS, GASOLINE.—As outlined in HARDWARE AND METAL during the past couple of weeks, lubricating oils have undergone revision upward and some of the more familiar lines are given herewith: Standard gas engine, 42½c per gallon, barrel basis; Gargoyle, 1-gal. tins, $1.55, can included; 5-gal. cans, $1.09 per gallon, cans extra; barrels, $1.05 per gallon, barrels extra; Polarine, 1-gal. tins, $1.45 can, included; 5-gal. cans, 84c per gallon, cans extra; barrels,

80c per gallon, barrels extra. Other changes include machine oils, regular grades now ranging from 26½ to 36½c per gallon, barrel basis; paraffine oil, 24c gallon, and Imperial cylinder, 66½c per gallon. A good demand for all lines is in evidence.

Coal oil has shown no change during the week, Royalite selling at 18c and Palacine at 21c per gallon. The demand has been heavy and continues in good volume. Gasoline is moving freely and prices have held unchanged at 33c per gallon.

Oil Heaters and Stoves Make Advance

Toronto.

STOVES, ENAMELWARE.—An advance has become effective in Hot Blast oil heaters and stoves and new prices have been named which provide a quantity differential. The No. 2 heater is now listed at $28.80 in dozen lots and $31.20 for less than 12 with a discount of 7½ per cent.; the stoves are listed at $14.40 in dozen lots and $15.60 for less than 12 with the same discount, viz., 7½ per cent.

Other lines of stoves have made no change during the week, prices being firmly held. Summer trading is comparatively brisk but a break to warm weather which may develop at any time now will add a stimulus to business being handled.

Enamelware is moving out very freely, such lines as are available, and prices hold firm and unchanged.

Revised Discount in Malleable and Cast Fittings

Toronto.

MALLEABLE AND CAST FITTINGS.—Revised discounts have been named for malleable and cast fittings which provide for an advance in price. The selling basis arrived at is as follows:

Malleable fittings—Class A, black 60c, galvanized 70c lb. net; Class B, black, 24-26c, galvanized 34-36c lb. net; Class C, black, 16-17c, galvanized 24-26c lb. net.

Unions, 35 per cent. discount; bushings, malleable and cast, 20 per cent. discount; plugs, cast, 17½ per cent. discount.

Very Firm Situation Exists in Nails

Toronto.

NAILS, WIRE.—The situation in respect to wire nails can be said to be extremely firm and in some quarters it was intimated that an advance of 25c in the base price to $5.45 per 100 pounds would not come as any great surprise. Wire rods are practically unobtainable from the United States and the uncertainty as to whether the mills here will be able to turn these out for commercial purposes has added strength to the market. Stocks generally are none too heavy though equal to present demands. Prices for the week remain at $5.20 for wire nails and $5.65 base per 100 pounds for cut nails. Smooth steel wire is firm at $6.25 base per 100 pounds.

Iron and Steel Remains Unchanged

Toronto.

IRON AND STEEL.—Little of interest has developed during the week in respect to iron and steel bars. The demand continues along a fairly normal basis and supplies are equal to present requirements. Prices held firm and unchanged at levels noted herewith:

TORONTO—	Per 100 lbs.
Common bar iron	$ 5 25
Common bar steel	5 50
Refined iron	5 65
Angle base	5 75
Horseshoe iron	5 50
Tire steel	5 70
Mild steel	5 50
Norway iron	11 00 13 00
Toe caulk steel	6 25
Sleigh shoe steel	5 50
Band steel, No. 10	5 75
Do., No. 12	6 00
Spring steel	9 50 11 50
Mining drill steel	19 00 30 00
Sheet cast steel	0 42 0 45
Tool steel	0 20 0 42

Manufactured Sheet Metal In Very Firm Position

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—The position on all lines of manufactured sheet metal, including corrugated sheets, siding, shingles, eavetrough, conductor pipe, etc., is one of extreme firmness. The scarcity of sheets developing with further supplies uncertain has added strength to all manufactured lines which may result in new prices at higher levels being put into effect.

The demand for corrugated sheets is reported fair and the same might be said of eavetrough and conductor pipe though orders going forward in these lines do not represent a heavy volume of trading. Prices on corrugated sheets for the week follow. Prices on eavetrough and conductor pipe appear in current market quotations:

TORONTO—	Per 100 Galvanized	Sq. Feet Painted
No. 28 gauge	$ 8 25-$ 8 75	$6 75-$7 25
No. 26 gauge	9 00- 9 50	7 75- 8 25
No. 24 gauge	13 00-	10 50
No. 22 gauge	16 00-	13 25
No. 20 gauge	19 00-	16 50
No. 18 gauge	23 00-	20 00

Discount 7½%.

Plates Hold Firm; Some Slight Revisions

Toronto.

SHEETS, PLATES.—Plates have held very firm during the week, although an easier tendency has been reported in two of the heavier gauges of black sheets. This is largely a local condition and the feeling is that prices generally will go to higher levels. Though stocks in some quarters are reported in very good shape others again report a scarcity developing. However, there are few orders going forward incomplete as yet.

Galvanized sheets hold firm and unchanged with conditions largely the same as noted with black sheets above. Prices prevailing on both lines follow:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$9 50	$12 00
14 gauge	7 20 8 15	8 40
16 gauge	7 25 8 25	8 50

No Change in Wrought Iron Pipe; Boiler Tubes

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—There has been no change in the situation regarding wrought iron pipe during the week. Conditions show no improvement, raw materials being scarce and the output naturally restricted somewhat. The demand is held within comparatively narrow channels, with prices firm and unchanged.

Boiler tubes are by no means plentiful and supplies reaching the city are being distributed with great care under the watchful eye of the Government. Quotations herewith are unchanged.

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00

4 inch	90 00	75 00

Solder Reaches New High Levels

Toronto.

LEAD AND ZINC PRODUCTS.—Prices on solder have recorded further advances in some quarters; new high levels having been reached by some manufacturers, which has further served to narrow the range in some lines and extend the highest quotations in others. Guaranteed is now being quoted at 66 to 68c per pound; strictly at 60 to 66½c, commercial at 55 to 62c, wiping at 54½c to 56c, and wire at 65 to 70c. The increasingly high prices on tin is influencing solder to its present levels.

Lead and zinc products hold firm and unchanged.

Solder, wire, lb.	0 65	0 70
Zinc sheets, per lb.		0 26

Old Materials Show Little Variation

Toronto.

OLD MATERIALS.—There is practically no variation in old materials during the week, activity having become a thing of the past, though how long this condition will hold is uncertain. There is some talk of quantities of scrap being held in some quarters, with the idea that a higher price will be paid by the mills owing to the scarcity of pig iron. There is nothing to prove that such is the case but it is a rumor that prevailed this week. Prices hold nominally unchanged.

Cordage Holds Firm and Unchanged

Toronto.

CORDAGE, TWINE.—Cordage holds firm and unchanged during the week, with the demand reported light. Manila is being quoted at 39c base, British manila at 33c base and sisal at 27½c base per pound. Hemp and jute twines are very firmly held at recent advances and supplies are said to be none too heavy. Unfavorable crop reports for Ontario have influenced movement of binder twine slightly, but is not expected to curtail the demand to any great extent, if at all. Prices remain the same at 23½c per pound, 500-ft. basis.

Waste Firm and in Good Demand; Oakum

Toronto.

WASTE, OAKUM.—Waste is holding very firm and unchanged with a splendid movement reported. Orders are going forward freely and manufacturers are operating at capacity. Oakum is moving out in fair quantities though the heavy shipments of a month back are not being kept up. Prices on both waste and oakum appear in current market quotations.

Tin Now $1.50; *Other Metals Same*

Toronto.

INGOT METALS.—Tin is again the feature metal during the week, an advance of 25c per pound being recorded. Supplies grow lighter every week, practically no shipments coming to hand to relieve the situation which naturally looks serious. Spelter has held firm and unchanged and whereas lead shows no revision in price, this metal is rather weak. Embargoes are commencing to be felt keenly in various lines, stocks generally becoming badly broken up.

COPPER.—Dealers here do not look for any change in the price when the new Government ruling takes place at Washington on June 1. Canadian buyers find no trouble in securing all the copper they need, and this condition seems to be general. This ability to secure needed supplies is counted on to assist in keeping the prices at present levels. Locally quotations range around 30c per pound.

TIN.—The price of tin has again jumped, latest quotations reaching $1.50 per pound. Small lots of Chinese tin come through to the local market, but they are uncertain and very high in price. Straits tin used to be counted on for Canadian trade, but that is all under order to the British Government. To-day's price is more in the nature of a bargain between buyer and seller rather than an observance of a fixed price.

SPELTER.—Spelter holds firm with a slightly advancing trend noticeable at primary points. A very fair buying movement has sprung up which has sustained the market. Locally prices are unchanged at about 9c per pound.

LEAD.—Locally the market remains rather weak though prices are unchanged at 8¾ to 9¼c per pound. Primary points report a slightly improved demand which has strengthened the market somewhat but supplies are more than ample for the demand and little change looked for.

ALUMINUM.—The supply is not great, and dealers can hardly count on securing their needs at the supposedly fixed price. One Toronto buyer, for instance, bought in the American market a few days ago. He paid 11c over the United States price. It is claimed there are cases where the holders will not sell out at the Government schedule. The local price is nominally given as 50c per pound.

ANTIMONY.—The market locally holds firm and unchanged at about 16c per pound. Fairly large offerings of this metal at primary points have had a tendency to weaken the market there and slight declines are reported.

PIG IRON.—Conditions prevailing during the past few weeks show little change as regards pig iron. Supplies are by no means too heavy and the uses to which this commodity is subjected provide for its quick consumption.

LONDON MARKETS

LONDON, May 16.—Price changes during the week have not been so very numerous though a general advance in builders' hardware, including locks, knobs, lock sets, etc., has become effective. Malleable and cast fittings have also gone to higher levels along with washing machines, hammock hooks, fork handles and corn planters. During the past week business has continued good. Painting, housecleaning and gardening are still in full swing, and the necessary goods are in big demand. Deliveries on goods are still slow, but seem to be improving some. Collections continue good.

Pipe Fittings Register Advance

London.

PIPE FITTINGS.—New net prices and discounts have been issued on malleable and cast pipe fittings which provide for a substantial increase in all these lines. There has been no change made in wrought iron pipe fittings as yet and none immediately contemplated. The present scale of quotations follows: Malleable fittings, Class B, black, 25c per pound; C, black 16c pound; B, galvanized, 36c pound; C, galvanized, 26c; bushings discount 20 per

cent.; unions, 35 per cent.; plugs, 15 per cent.; iron stop cocks, 10 per cent.

Corn Planters Advance; Fork Handles, Too

London.

CORN PLANTERS, FORK HANDLES —A new price has been named on corn planters which represents an advance over previous quotations. King of the Field corn planters are now selling at $10.50 per dozen. In line with increases made in other lines of handles, quotations on manure fork handles show revision upward and present prices are now $4.80 per dozen.

Sheep Shearing Machines Moving Out Freely

London.

SHEEP-SHEARING MACHINES.—A splendid sale of sheep-shearing machines is reported, orders going forward in splendid volume. Prices have held firm and unchanged as follows: Stewart No. 8, $15.00 list each; Stewart No. 8, combination for sheep and horse, $22.00 list each; Stewart No. 9, ball-bearing, $17.00 each, list, all less 25 per cent. Sheep-shearing attachments for No. 1 Stewart horse clippers, $12.00 list, each, less 25 per cent.

Hammock Hooks Up; Washing Machines, Too

London.

HAMMOCK HOOKS, WASHING MACHINES.—A further advance has become effective in the price of hammock hooks, and quotations now being made the trade are for No. 138, with plate, 90c per dozen, and No. 128, to screw, 80c per dozen. New prices have also been named on the London washing machines, No. 1 plain selling at $8.00 each and No. 5 improved at $9.00 each. A very fair movement of all lines of washing machines and wringers is reported.

Lawn Hose And Accessories Selling Freely

London.

LAWN HOSE AND ACCESSORIES. —A very good demand is now manifest for lawn hose, hose reels, hose nozzles, etc., and prices on all lines hold firm and unchanged at levels prevailing for some time past. The basis of quotations follows:

Lawn Hose—Corrugated: ½ in., 15¾c.; ⅝ in., 18¾c; ¾ in., 21½c; 1 in., 31½c per foot. Less 5 per cent. in 500 ft. reels.

Plain—No. 33 3-ply x ½ in., 9c; ⅝ in., 10¾c; ¾ in., 12½c per ft.

Plain—No. 44 3-ply x ½ in., 11c; ⅝ in., 12¾c; ¾ in., 14½c per ft.

Hose Reels—Plain wood, 90c each; wood with drum, $1.15 each; steel, No. 10, $1.70 each; No. 20, $2.50 each.

Gem Hose Nozzles—$6.0 0doz.

Hose Bands—Galvanized, ½ in., 35c; ⅝ in., 38c; ¾ in., 38c; 1 in., 60c doz.

Hose Couplings—Brass, ½ in., $1.70; ⅝ in., $1.75; ¾ in., $1.80; 1 in., $3.50 doz.

Builders' Hardware Moves To Higher Levels

London.

BUILDERS' HARDWARE. — Canadian manufacturers of builders' hardware have made revisions in their lines and new prices established on locks, knobs, lock sets, sliding door latches, hat and coat hooks, etc. are on a basis of from 3 to 10 per cent. above those they supplant. Net quotations now being made on common cast rim locks are $2.70 per dozen, and on porcelain knobs $2.50 per dozen.

Nails Holding Firm; Rope Is Steady

London.

NAILS, ROPE.—A very firm situation prevails in respect to wire nails, though prices hold unchanged at $5.20 base per 100 pounds. A very fair sale is reported. Cut nails are steady at $5.68 base. Rope is in an uninteresting position, the demand being within comparatively narrow channels. Prices have been held steadily as follows: Pure manila, 39c base per pound; British manila, 33c; New Zealand hemp, 33c; sisal, 27½c; cotton, 3-16 in., 69c; ¼ in. and larger, 68c base per pound.

Movement Of Linseed Oil And Turpentine Better

London.

LINDSEED OIL, TURPENTINE.—There is a very fair sale of linseed oil reported, and turpentine is also enjoying a very good movement. Stocks are not heavy in either line, though orders are being taken care of as they come in. Prices have held firm and unchanged: Linseed oil, 1 to 2 bbls., raw, $1.95, boiled, $1.98 per gal.; 3 to 5 bbls., raw, $1.94, boiled, $1.97 per gal.; 6 to 9 bbls., raw, $1.92, boiled, $1.95 per gal, less than barrels, add 10c gallon. Turpentine, 1 bbl. lots, 75c; 2 to 4 bbls., 74c; 5-gal. 85c Imp. gal.

Glass, Putty, White Lead In Oil Firm; Unchanged

London.

GLASS, PUTTY, WHITE LEAD IN OIL.—There has been no change reported in glass, putty, or white lead in oil, prices holding firm and the demand along a comparatively narrow basis. Quotations prevailing follow:

Glass—Single Diamond, 25%; double diamond, 25%; cut light, 10%.

Putty—Standard, 25, 50, 100-lb. drums, $5.40 per 100 lbs. Pure, 25, 50, 100-lb. drums, $7.40 per 100 lbs.

White Lead in Oil—Pure, tons, $16.20; less than ton, $16.55 per 100 lbs. Pure Elephant, tons, $16.70; less than ton, 17.05 per 100 lbs.

WINNIPEG MARKETS

WINNIPEG, May 16.—Prices in general have been steadier during the past week, although lines affected show heavier advances than usual. Among the items which have changed appear solder, friction tape, shovel handles, recoil pads, wire stretchers, and woven fencing.

Business for the past week is again normal in general shelf goods, while garden tools continue to move freely. Freight shipments from American factories continue to be delayed, due to the urgent Government needs for military transportation, and for the present at least no improvement can be looked for. The result has been that Winnipeg jobbers are hard pressed to make deliveries in some lines.

Woven Wire Fencing Makes Further Advance

Winnipeg.

WOVEN WIRE FENCING.—Owing to increased cost of production, freight congestion and limited supplies of raw materials, woven fencing has again shown a small advance. This is the third increase during the year. Owing to the numerous styles it is impossible to quote prices. These, however, will be gladly furnished on application to any of the Winnipeg jobbers.

Shovel, Spade And Scoop Handles Are Up

Winnipeg.

SHOVEL, SPADE, SCOOP HANDLES, WIRE STRETCHERS. — During the week another heavy advance has been announced covering both D and long shovel and scoop handles. These move up approximately 20 per cent. over old prices, and are quoted to-day at $6.50 per dozen for all styles.

A slight revision in price has been recorded on Richards-Wilcox wire stretchers, No. 340, which are quoted to-day at $16.25 per dozen.

Solder Records Another 5c Advance

Winnipeg.

SOLDER.—Quite recently HARDWARE AND METAL predicted further advances on solder. New prices just issued show another advance of 5c per pound. Even prices ruling to-day are low when compared with New York quotations on tin, which has reached as high as $1.10 per pound during the past couple of weeks, with practically no stock to offer. Price now ruling on half-and-half solder is 60c per pound in cases and 61c in less than cases, while guaranteed solder is quoted at 61c per pound in cases and 62c in less than cases.

Bolts Moving Freely; Prices Hold Steady

Winnipeg.

BOLTS.—Bolts of all kinds continue to move freely, as large quantities are used in getting harvesting equipment in shape. Prices on all lines continue firm, as formerly quoted. To-day's ruling discounts are as follows:—Carriage bolts,

⅜ in. and smaller, 5 per cent. off list; 7/16 in. and larger, 5 per cent. advance on list; machine bolts, ⅜ in. and smaller, 5 per cent. off list; 7/16 in. and larger, 5 per cent. advance on list; plow bolts, 5 per cent. advance on list; stove bolts, 50 per cent. off list; shaft bolts, 5 per cent. advance on list; tire bolts, 25 per cent. off list; sleight shoe bolts, 5 per cent. advance on list.

Good Demand For Coil And Log Chain; Firm

Winnipeg.

COIL AND LOG CHAIN.—Coil and log chain continue in good demand, while prices remain firm at levels recently established. Stocks in general are reported as well assorted.

Coil Chain—3-16 in., $18.50; ¼ in., $13.65; 5-16 in., $12.20; ⅜ in., $11; 7-16 in., $10.70; ½ in., $10.40; 9-16 in., $10.40; ⅝ in., $10.25; ¾ in., $10.15; 1 in., $9.90 per 100 lbs.

Logging Chain—5-16 in., $14; ⅜ in., $12.80; ½ in., $12.20 per 100 lbs.

Recoil Pads Up; Tire Tape In Big Advance

Winnipeg.

RECOIL PADS, TIRE TAPE.—Due to increased production costs, a further advance has taken place covering recoil pads, which are now offered at the following prices:—Akron, $24 per dozen; anti-flinch, $39 per dozen.

The price of tire tape, which has remained firm for the past two years, has this week shown a very heavy advance, due to increases in raw material, making to-day's selling price as follows:—1-oz. rolls, 72c pound; 2-oz. rolls, 68c pound; 8-oz. rolls, 65c pound.

Stocks Wrot. Iron Pipe Becoming Broken; Firm

Winnipeg.

WROUGHT IRON PIPE.—Prices on wrought iron pipe, both black and galvanized, continue firm. Stocks in general are rather broken owing to the inability of manufacturers to supply certain sizes, due to the shortage of raw materials. Shipments are reported as normal. Prices ruling to-day are given herewith:

Inch	Black Per 100 ft.	Galvanized Per 100 ft.
¼	$ 6 08	$ 8 42
⅜	6 16	8 50
½	7 83	9 63
¾	9 95	12 38
1	14 67	18 27
1¼	19 88	24 75
1½	23 76	29 57
2	32 04	39 78
2½	51 30	63 59
3	67 05	83 16
3½	84 92	
4	100 62	
4½	116 10	
5	135 00	

Linseed Oil Steady; Turpentine Holds Firm

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices continue firm, with the usual spring movement. Prices now ruling are as follows: Raw, $2 gal.; boiled, $2.03 gal.

The market on turpentine remains unchanged at former quotations, which are given herewith: Barrels, 80c gal.; half-barrels, 83c gal.; 5-gal. lots, 85c gal.; 1-gal. lots, 85c gal., plus the usual extras for containers.

PITTSBURG MARKETS

PITTSBURG, Pa., May 16.—As to prospective supplies of commercial steel, current items of news perhaps strike a balance. On the one hand there is complete agreement among producers with the principles laid down by the Director of Steel Supplies at the New York meeting of April 27, that each mill must ship the maximum tonnage possible against the orders of the Government and its allies. On the other hand, production has been increasing and is at a rate better than was expected, a rate well in excess of any previous rate in the history of the industry.

As explained in previous reports, the 100 per cent. effort to fill war orders does not mean that all steel produced goes into that channel, because some of it is not suited. There is some steel left, and a considerable tonnage, indeed, but it in turn must be given most freely to the commercial industries that are most helpful, indirectly, towards winning the war. This distribution the mills definitely undertook several weeks ago. Since then the merchant blast furnaces have undertaken a similar activity in connection with pig iron, but instead of the producers doing this individually, as is the case with the steel mills in distributing commercial steel, the merchant furnaces have gathered data as to the orders on books, and are now gathering data from consumers as to the use they intend for the pig iron they have on order.

Increased Production

The monthly blast furnace report of the "Iron Age" shows that pig iron was produced in April at the rate of 40,400,000 tons a year. That is the highest rate in eleven months. It is 1,800,000 tons above the average rate in 1917, and 1,000,000 tons above the average rate in 1916, while it is 36 per cent. above the average rate in January and February of this year. That is not the whole story, however, for the rate increased during April and there has been a further increase since, so that it seems fair to estimate that at the present time pig iron is being produced at the rate of fully 42,000,000 tons a year. The increase in pig iron production has been greater than the increase in coke production, on which the production of pig iron has depended right along, the reason for this divergence being that when coke supplies are insufficient the furnaces do not work economically, and consume more coke per ton of pig iron produced. The furnaces now in blast are nearly all working economically at capacity, and further increases in pig iron output will come chiefly from the blowing in of furnaces now idle on account of lack of coke. The best estimate of capacity has been 43,000,000 tons, but there is now a distinct possibility that the furnaces will show they can do more than this.

The spurt in pig iron production, with more coke supplied, is not temporary. The gain will be consolidated by the completion, in the next few months, of several large by-product coking plants, so that there will easily be a large excess of coke-making capacity, and the only danger threatening is traffic difficulties next winter. Doubtless special efforts will be made to accumulate stocks of by-product coal at the by-product ovens and of coke at the blast furnaces.

Steel ingot production has kept pace with increasing pig iron supplies, but the percentage of production to capacity is lower in steel than in pig iron, this being due to the shortage of scrap. The allowance of the scrap dealers' commission of 3½ per cent. a fortnight ago has not increased scrap offerings materially. While the dealers insisted they ought to be allowed the commission in order to make scrap move, they have not made good thus far on their representations. As was thought in many quarters right along, the scrap does not exist, the nature of industrial operations at present not being such as to bring out much old material. The scrap produced in shell manufacture, large as it is, does not entirely fill the gap.

Discard Steel

A few months ago the brokers were generally able to pick up shell discard steel without much difficulty, and get it rolled into such billet sizes are were required. Now, with a much heavier production of shell steel the discards are much harder to find. The mills had the problem of finding a market for the discard steel, and usually sold it at a shade less than the set prices for ordinary soft steel, but now they are strictly limited as to where they may dispose of the discards. The government has found some war uses for discard steel and is trying to find more. While the material is harder to work, there are many cases where in actual use in war it serves the purpose at least as well as ordinary soft steel. Posts for barb wire entanglements are mentioned in this connection.

Steel Corporation's Bookings and Shipments

The Steel Corporation's unfilled obligations decreased 314,524 tons during April, against a decrease of 232,049 tons during March. The April decrease was equal to about 24 per cent. of the full capacity for the month, while shipments may be estimated at about 88 per cent. of capacity, from which it would seem the bookings represented about 64 per cent. of capacity. This compares closely with the average of bookings, similarly estimated, for the three preceding months of the year.

While shipments of steel are being rigidly confined to the filling of war orders, when the steel that can be produced fits such orders, it does not follow that the Steel Corporation does not book any additional commercial business. It is the rule with some of the departments to book regular customers for additional tonnages as their old tonnages are work-

(Continued on page 56.)

WEEKLY PAINT DEPARTMENT

Use Color Cards Judiciously

Paint Manufacturers Have Issued These Samples at Considerable Expense—They Should be Made Real Selling Factors—Valuable Advertising Material —Send to Selected Lists

NOT all those who have color cards to hand out as advertising material realize their full value as advertising material. Some have been in the habit of giving them out promiscuously to anyone who would make a call for them. Others lay them on the counter where all the school children and others can help themselves to their heart's content. These color cards are prepared at big expense by the manufacturers and especially now that the price of all workmanship and materials have advanced considerably over prices prevailing in the pre-war days. One manufacturer is authority for the statement that dealers do not make better use of these color cards in many instances because the manufacturers usually supply them free of charge. Getting them so easily they fail to appreciate their worth. But this is war time, and dealers should long ere this be conscious that a judicious use should be effected wherever possible.

If these color cards are wasted or put to an improper use it means that the price of paint has been increased by just the amount that the color cards have cost. To waste two or three color cards here and there perhaps seems a small item. Yet the aggregate in a year with any one dealer might be quite large. This waste would not be so glaring if there were no better use to which to put the color cards. But they are a distinct and valuable asset to help the dealer sell his stock of paints.

THEY CARRY A CONCRETE IDEA

Now the value of the color card consists in the fact that it carries a concrete idea to the mind of the prospective customer as to what the paint will look like. They can take it home, moil over it, and size up the different colors. It is the nearest thing to the actual demonstration of the paint. One manufacturer also made the assertion that these cards would be appreciated more at their real worth if a certain charge were made for them by the manufacturer. But how can they be made to serve their real purpose? that is the question every paint dealer will ask himself.

In the first place they should be given out judiciously. They are not meant for children to decorate their playhouses with. The time to give them, of course, is when the dealer has an interested prospective customer. If inquiry is made for various kinds of paint an effective sales talk can be made by reference to the paint paddles, if such are carried. These paint paddles very often convey a better idea of what the painted surface will look like, for they have a wider expanse of painted surface than the color cards. Of course the paint display in the store interior, the window display, the newspaper advertising, are all links in leading the customer to make inquiries for paint. Once the sale has been assisted to that point it remains for the salesman to clinch it either on the spot or in such a way that it will not eventually get away.

SEND TO SELECTED LISTS

And here is the point where the color card comes into real service. Taken for granted that the prospective customer has been led to the point where inquiries are made. Information respecting amount of paint required for a given surface will perhaps be given by the salesman, colors will be shown and the merits of the paint set forth. But even in the face of this campaign the prospective customer may not yet be in a position to buy. Perhaps they do not have the money on their person at that time, or they are not just ready to start their painting. They decide to leave the purchase off for the present. A color card handed to that one will help refresh the memory as to what the paint will look like after they reach home again.

But the color card may also be used on a selected list of prospects to help them start thinking in terms of paint if these cards are mailed with the request that they look them over and consider well if it would not be advisable to do some painting this spring. This methods often unearths new prospects. Use the color card to the full extent of its worth.

"The Bristles can't come out"

BOECKH TRADE MARK — Est'd 1856 — TORONTO

Here's time and opportunity to *Start Something*

Here's a proposition on which we can co-operate for a bumper paint season drive.

Here's Boeckh's Rubber Set Steel Grip Brushes, universally acknowledged to be the **best type of brush on the market,** because the bristles **can't** come out.

And here's the zenith paint season—a season where the demand for brushes is at its greatest height.

Why not grasp this unusual opportunity by calling your men together and urging them to push Boeckh's Rubber Set Steel Grip Brushes for all they're worth, **while the season is on?**

It will mean satisfaction to your customers **now** as well as to yourself, in later, bringing sales in other lines and repeat orders **through the good-will established.**

The Boeckh Company, Limited

TORONTO, ONTARIO

I want the Very Best Wall Finish you've got, That's it-MURESCO!

"I have heard that churches, schools, buildings, opera houses and apartment houses are all big buyers of Muresco, and just last week through experienced parties I found out *Why.*

"I am told that it does not peel, crack or rub off, that a little goes a long way, and that the most elaborate color schemes can be arranged for anything from a residence to the largest public building.

"That's the wall finish I am buying—Muresco. It's by far the best, users say."

Sales are big — so are profits. Write for agency proposition.

Benjamin Moore & Company Limited

West Toronto, Ontario

If interested, tear out this page and keep with letters to be answered.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 16.—Much activity is expressed as applying to the sale of mixed paint and general painting materials. The season has opened up well and a good volume of trade is expected for many weeks. Not only do reports come in from various travelling men as to the activity in many parts of the country, but managers find the same condition, and retail representatives have been reporting conditions as healthy, with a bright outlook. Turpentine is scarce, and as a consequence there is a still higher price, while some have refrained from quoting only against stock to arrive. Changes have been made by some in wall coatings, advances being recorded. The markets in general are firm.

More Linseed Oil But Demand Absorbs

Montreal.

LINSEED OIL.—Delivery of seed has improved, but with no surplus available, due to the short delivery during the late winter and early spring months, this is absorbed promptly. As it looks to-day there will be little likelihood of cheap oil. This is the opinion of one of the large crushers, and while the situation may somewhat improve the active demand for and larger use of oil from now on will, it is thought, pretty well use up stocks as they are available. Prices are held unchanged for the week. The available supply of seed at the lake head is stated to be about one-third of what it is normally at the middle of May.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.82-$1.86	$1.84½-$1.88½

Scarcity Turpentine Eliminates Quotations

Montreal.

TURPENTINE.—Supplies were rapidly absorbed during the last ten days or so, and now that the demand is good, there is not enough to go around. Supplies are on the way, and are expected forward in the very near future. It has meant a rapid rise, and, in fact, with many short of their needs the quotations have been withdrawn for the present altogether. On the basis of arriving some are quoting 70c per gallon and others quote a slightly higher figure. The situation in the States is firm.

Turpentine—	Per Imp. Gallon
1 to 4 barrels	....
5 barrels and over	....

Small quantities 10c advance over 1 bbl. prices.

Position Is Firm On White Lead In Oil

Montreal.

WHITE LEAD IN OIL.—There is a very good demand now for white lead in oil. Prices are firm and unchanged, with five-ton lots of standard selling at $15.50; ton lots, $16, and smaller lots, $16.35 per 100 pounds.

Moderate Sales Putty; Prices Held

Montreal.

PUTTY.—This commodity is selling fairly well, and the market is held without any change at all. There is a firmness of undertone nevertheless, and no likelihood of revisions downward being made. With oil and all costs high prices are likely to rule firm. Prices:

Standard Putty—	Per 100 lbs. 5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.70

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

Plate Glass Is Moved To New Basis

Montreal.

PLATE GLASS.—The changes made in the list on plate glass recently adopted at many other points have now become effective in Montreal, and the same basis as shown in the current reports apply here. The new change makes an awkward figuring schedule, some say. The new list records an advance and the discount is 25 per cent. from this, freight being prepaid and boxing charges being eliminated on orders exceeding $25 net. Other glass prices are held without change and business is just fair.

Various Kalsomines Are Marked Higher

Montreal.

KALSOMINES, ETC.—Various advances have been made in the price of hot and cold water wall tints. Some have changed their quotations on different lines, but as there are many varieties and grades these are not uniform. Coralite tints are advanced as follows:—Five-pound packages, white, 7c per pound; tints, 7½c per pound. The prices in barrels are 5½c for white and for tints 6c. On other lines advances of about 10 per cent. have been made.

Still Better Sale For Ready-Mixed Paint

Montreal.

MIXED PAINTS.—Painting seems to have been general the last week, for reports indicate a decided improvement, with the outlook for a continued activity bright. Paint makers reported that from various sources they were receiving encouraging news, and the many orders coming to hand are the best indication that these are correct. Shelf goods are being asked for this year to a greater extent than ever by the women folk, who are "painting up" in real earnest. Prices are firm and unchanged.

TORONTO

TORONTO, May 16.—An advance in turpentine in some quarters has served to narrow the range on this commodity. Stocks are by no means heavy, but shipments en route are expected to help out the situation considerably. Linseed oil is holding firm, the seed market, after a period of depression, showing increased strength. The movement of seed shows a slight improvement, but this is by no means great as yet. White lead in oil holds firm, with a fair movement in progress. Sorting orders for mixed paints are coming to hand very freely.

Linseed Oil Shows Little Improvement

Toronto.

LINSEED OIL.—There is as yet no marked improvement in receipts of seed, though some shipments arriving are attributed to the opening of navigation. However, the movement is by no means heavy, and has not yet served to allow crushers and dealers to overcome the accumulation of orders on their files. Seed had a period of depression towards the end of last week, and on Monday of this week was down to $3.69½ per bushel for No. 1 N.W.C., cash basis. Tuesday and Wednesday the market stiffened, however, and Wednesday's price of $3.76¼ for this grade was nearly 2c higher than that prevailing on the corresponding day last week. Prices on oil have held unchanged on the basis shown herewith:

	Raw, Imp.gal.	Boiled, Imp. gal.
1 to 2 bbls.	$1.86-$1.95	$1.88½-$1.98
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Still Scarce; Prices Hold

Toronto.

TURPENTINE.—Stocks of turpentine are still rather light, and there is a tendency for dealers to guard their supplies very carefully. The opportunities for shipping from Southern points cannot be gauged with any degree of accuracy, consequently the future as regards delivery of orders placed must remain uncertain. A further advance of 2c per gallon has been made in some quarters, which has served to narrow the range to that extent. Quantity orders are not being solicited, so prices named can only be termed nominal.

	Imp. Gal.
1 barrel	$0 72½-$0 75
2 to 4 barrels	0 72½- 0 74
5 gallon lots	- 0 85

White Lead In Oil Makes No Change

Toronto.

WHITE LEAD IN OIL.—There has been no change in the situation during the week, and business continues along normal lines, which are rather restricted so far. A fair movement is reported in some quarters, though this is by no means heavy. Prices are holding steady and are unchanged during the week on the following basis: Pure, in ton lots, $16.20 per 100 pounds; smaller quantities, $16.55 per 100 pounds.

Mixed Paints Continue To Move Freely

Toronto.

MIXED PAINTS.—Sorting orders continue to come along in very good volume, and manufacturers and jobbers express themselves as well satisfied with the amount of business going forward. A break to real warm weather would, it is felt, stimulate the demand to an even greater extent, but altogether the outlook is very encouraging. The higher prices established have had little effect on the demand, it would seem.

Glass Is Unchanged; Putty Holds Steady

Toronto.

GLASS, PUTTY.—There have been no new developments in the glass situation during the week. Business is light and stocks are thought to be reaching a fairly low level. There is no movement of glass from Southern points reported yet. Prices are unchanged at figures shown in current market quotations.

Putty is unchanged and the market uneventful. There is a fair movement in progress, with stocks ample for present requirements. Prices on standard bulk in casks remain at $4.55; 100-lb. drums, $5.30-$5.40; bladders in barrels, $5.45-$5.65 per 100 pounds. Pure putty quotations range $2 per 100 pounds higher than those shown for standard.

Brushes Unchanged; Brooms Go Higher

Toronto.

BRUSHES, BROOMS.—There has been nothing further to report in regard to brushes during the week. The market remains firm and unchanged, with a very good demand being taken care of.

In line with prediction made in HARDWARE AND METAL last week, a further advance in brooms has taken place, averaging from 10 to 20 per cent. A quotation made on a 4-string standard broom reveals a price now of $10.20 dozen. The situation in respect to broom corn grows steadily worse from all accounts. In addition, handles are hard to get, twine is scarce, and labor at a premium. These are factors which have continued to influence prices to present levels.

RESULTS OF WINDOW-TRIMMING CONTEST

In a Colorite Window Trimming Contest conducted during the week of March 25 to March 31, 1918, throughout the United States and Canada, by the Carpenter-Morton Co., Boston, Chicago and San Francisco, the following prizes were awarded:

First Prize—A Ford touring car, won by Geo. A. Ducker Co., Joliet, Ill.

Second Prize—$100 in gold, won by J. M. Carroll, Youngstown, Ohio.

Third Prize—$50 in gold, won by Clarke Bros. Stores, Scranton, Pa.

Fourth Prize—$10 in gold, won by W. G. Holloway, Dayton, Ohio.

Fifth Prize—$10 in gold, won by Liggett's Gordon-Mitchell Drug Store, Winnipeg, Manitoba, Canada.

Sixth Prize—$10 in gold, won by Frank Cowles, Edmonton South, Alberta, Canada.

Seventh Prize—$10 in gold, won by H. H. Hay Sons, Portland, Maine.

Eighth Prize—$10 in gold, won by Chas. H. Dack, Columbus, Nebraska.

The photographs of the display were judged from the standpoint of originality, attractiveness and selling value, and the judges were Mr. Frank A. Black, advertising manager for William Filene's Sons Co.; Mr. Melville H. Smith, New England manager for the *Ladies' Home Journal* and *Saturday Evening Post*, and Mr. Harry H. Humphrey, president of the Boston Credit Men's Association, Boston, Mass.

The result of the contest shows how practical merchandising can be developed. The competition aroused in this contest is all that could be desired, and the company wish to assure all their patrons that they have endeavored to conduct this campaign in all fairness.

TIN CONSUMPTION OF UNITED STATES

According to a statement issued by the War Industries Board from returns obtained through the subcommittee on pig tin, the consumption of pig tin for different purposes in that country during the calendar year 1917 was as follows in long tons of 2,240 pounds: Tin and terne plate, 27,600 tons; solder, 17,000; babbitt and other bearing metals, 10,800; brass and bronze, 4,800; foil, 4,000; collapsible tubes, 2,100; white metal, 1,764; and miscellaneous, 8,193; making a total of 76,257 long tons.

As the United States is almost wholly dependent upon foreign sources for tin, it is of interest to note that importations of tin and tin ore during the first quarter of 1918, stated in terms of metallic content, have been at the rate of 5,873 long tons per month or 70,476 long tons per annum. To get an accurate estimate of the total supplies, however, the amount of tin recovered by detinning plants and in other ways should be added to these imports, as well as the almost negligible amount of tin produced in that country. The exports of domestic and foreign tin, although small, should also be taken into consideration.

ASKING INFORMATION ON PIG IRON

The War Industries Board of the United States will soon ask for information from consumers with respect to the tonnage and kind of iron being received from producers, the use to which the iron is being put, the tonnage under contract and the intention with respect to the use thereof. The purpose of this inquiry is to give the War Industries Board full information to the end that the output may be distributed to the best advantage. It is asserted that consumers who refuse to give full information on these points will receive no pig metal. As many Canadian concerns get their supplies of pig iron from the United States the regulation will undoubtedly apply to them as well.

PITTSBURG MARKET LETTER

(Continued from page 51.)

ed off. These bookings have nothing to do with the distribution of steel, which is the concern of the government, since the customers are given absolutely no delivery promises. The mills want to serve their regular customers to the extent possible, and they can appraise their prospective requirements the better by having the formal contracts on their books.

Steel Supply Prospects

To the commercial consumer of steel the present increase in shipments is of particular interest, for the reason that when production was especially restricted the production was as far as possible of war steel, and as the total supply of steel increases a proportionately greater amount of steel cannot be put through the finishing departments that make war material because formerly they were getting more than their proportion of the output. Thus the increased output means, in a sense, a larger surplus of steel that cannot be used in filling war orders. This steel, however, is to be distributed to the industries that will help most in indirect manner, and the success of the buyer in placing an order, or in securing a delivery, depends chiefly upon the use to which he intends to put the steel.

Summer time is *Paint time*

IT is during the Spring and Summer months, that every householder *makes* time to do the necessary inside and outside painting. A nice display of *Jamieson's Pure Paints* is sure to make paint sales move quickly because of the Jamieson reputation for dependability and permanent satisfaction. Give the customer what he wants and at the same time you will be selling a line that pays you a larger profit.

Selling Spark Plugs Intelligently

MEHASCO
ANOTHER MEHASCO MESSAGE 4

With every 100 lot assortment we give a display stand which shows the proper plug for every make of car. Your customer can pick out the plug he wants and order by name, which makes selling easier for you and more satisfactory for him. We handle the celebrated Rex Plug—absolutely guaranteed—as well as all the other ready sellers, including the Mica Tractor Plug in all sizes.

Easyon Tire Chains

The only chains an autoist can slip on the wheels when alone and stuck. Put up eight chains in a set, four for each rear wheel. Handy little friends to motorists and real, active sellers.

MERCHANTS HARDWARE SPECIALTIES, LIMITED
CALGARY

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

Substitution runs riot when material is scarce

Just at this time when steel is hard to get and other material for manufacture scarce, substitution is the general rule all along the line.

In Empire products, however, there is no change. The high standard of quality and workmanship which we have maintained from the first is still immediately apparent to purchasers of our products.

The above is an illustration of our Jenkins Disc Globe Valve on which we have concentrated all our experience and knowledge in making it the best Globe Valve on the market.

Have one of your customers test it out under our guarantee in some tight corner in the factory. Clear proof of our claim will be the only result. Write us for particulars of other products. Largest manufacturers of plumbers' brass goods under the **British** Flag.

Empire Mfg. Company, Limited
LONDON - CANADA

Here's Butter Season Right Upon You, Mr. Dealer

June begins the season when butter makers speed up their old dash churns for a long spell of good butter and hard work. Experienced buttermakers of the old school will not do without their old dash churn.

They'll admit the work is hard but they argue that good quality butter cannot be got from a churn built on any other principle. And right here is where you have Mrs. Experienced Buttermaker when you can **close a sale.** Use her own argument against her.

The "Reliable" churn is nothing but the old dash and churn principle made mechanical so as to eliminate all the work and muss. It is simply an up-to-date dash churn which can be quickly adjusted to make **any quantity of butter** you require in half the time and without any muss.

That is why agents find it so easy to sell "Reliable"; once tried it is given preference over any other churn.

If there is no "Reliable" Agent in your town, write us about it.

The Reliable Churn Company of Canada
T. W. FOSTER, Mgr. 141 King Street East TORONTO

Stephens

It's so easy to apply

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Help your patrons to realize that Silkstone is in reality a specially prepared wall Paint — a flat finish peculiarly adapted to use on plaster. Then they'll understand why it is so easy to apply. So many people, when you speak of wall coatings, think of kalsomine and other distemper colors. Naturally they don't like the idea of mucking and splashing around with a big brush in a thin fluid that flies everywhere and spots everything.

We can send you a dandy booklet on Silkstone, and in handing it out we would suggest your drawing attention to the fact that Silkstone goes on just like paint.

We would like to know if there is no Stephens Paint Agent near you.

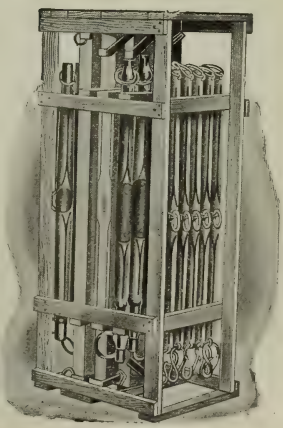
Protected by the Westwo Guarantee

Selling Westwo Painted Waggon, Implement and Plow Sets is satisfactory and profitable. They are made from selected No. 1 quality Oak and Hickory, are carefully painted (2 coats), striped and varnished, and are absolutely guaranteed against defects in material and workmanship. The best way to order Westwo Painted Sets is in crates of six sets. Then you're sure of getting them in perfect condition. —no bruised woods—no marred finish.



Guarantee

All Westwo Sets are guaranteed, and any defective part will be replaced free.

Send to-day for the Westwo folder that describes the various Westwo lines.

Read What the Other Agents Think— They Know

The Sherwin-Williams Co. are certainly to be congratulated on the most magnificent line of advertising matter displayed by them this year. They have certainly excelled themselves.

This should surely awaken the possibilities that may be attained through such assistance, and as one of your Agents we are going to do our utmost to increase our Sales during 1918.

Yours truly,
MOORE HARDWARE CO., LTD.,
St. Catharines, Ont.

Help your customers to grow more vegetables

satisfaction as well as profit in selling your customers Gilson Weeders. Gilson Weeders eliminate so much of the labor of weeding and cultivating as to encourage constant attention to the garden, with a resultant increase in production.

Gilson Weeders, and all Gilson Garden Tools have special features that appeal instantly to gardeners of both small and large spaces. They'll save time, save labor, and leave the ground in better condition than ordinary tools. The Gilson proposition is interesting from all standpoints. If your jobber cannot explain it to you write us direct.

To help you sell Gilson Garden Tools we are regularly using space in both Farmers' Magazine and MacLean's Magazine.

5 Point Scratch Weeder

Patent Applied For

The Rogers Hardware Co., Charlottetown, P.E.I.; T. McAvity & Sons, Ltd., St. John, N.B.; Kennedy Hardware Co., Toronto; Lyons & Marks, Toronto; J. H. Ashdown Hardware Co., Winnipeg; Wood, Vallance, Ltd., Winnipeg; Wood, Vallance & Adams, Ltd., Calgary, Alta.

P⨯H

TRADE MARK

Quality Files

They are rugged tools made to stand up under the exacting demands of modern industry.

Fine materials and fine workmanship go into their manufacture.

On the basis of actual performance they are "The Standard of File Efficiency."

Port Hope File Mfg. Co., Ltd.

Port Hope, Ont.

"Ask Your Jobber"

The Boss, some plumbers and a maid
Are here in diverse moods portrayed.
Of course, the Boss and maid are sore
To see that jacknife in the floor.

DOUGALL LINOLEUM VARNISH

"the varnish that lasts longest"

This is the LINOLEUM VARNISH "par excellence."

Doubles the wear of Linoleum or Oilcloth.

A coat now and then will make oilcloth or linoleum wear indefinitely.

Costs no more than ordinary Linoleum Varnish, and lasts much longer.

Shall we send you our pamphlet "DOUGALL LINOLEUM VARNISH."

A card will bring you our proposition.

The Dougall Varnish Company Limited

"the varnish that lasts longest"

This is the Season to get busy on Boiler Systems

Repairs and installations of Boiler and Heating Systems are usually made at this particular season, when conditions and prices are just right, and it is a time when dealers should get busy in bringing these facts home to Prospects.

Morrison Improved Steam Gauges

for steam, water, air, ammonia, etc., are instruments of the very highest quality and utmost reliability, and are sold under a full guarantee of satisfaction. Approved by Provincial Boiler and Steamboat Inspection Departments.

J.M.T. Pressure Reducing Valve

will not equalize and will maintain a steady, reduced pressure, regardless of the variation of the initial pressure.

J.M.T. reducing valves can be supplied to suit every requirement.

James Morrison Brass Manufacturing Co., Limited
93-97 ADELAIDE STREET WEST, TORONTO

Sell Every Ford Customer One of These Fan Belts

Tell every Ford customer when he comes into your store that you have a Fan Belt that will last him *longer than any belt he has ever had.*

You are sure to interest him and finally make a sale because you can *prove* what you say.

Best quality oak tan leather that has had the stretch all taken out before making up and that cannot be affected by water or oil.

That's our Fan Belt. In other style it is fitted with a quick, detachable fastener that will permit instant removal.

List price, 1911-16 Ford models, 45c; 1917-18 models, 50c. Quick detachable belt, 1911-17, sells for 50c; 1917-1918 sells at 55c. Liberal discount to the trade.

In writing for our catalog ask us about *Rear Curtain Lights* and *Re-Covering* for *Ford Touring Cars.* Our proposition is interesting and profitable.

Prompt shipments guaranteed.

ARE YOU GOING OR COMING?

This is a reprint of an advertisement well worth your reading. It appeared in full page space in the Chicago *Tribune*. It was written by Wm. Hart, one of the best known advertising men in the United States. It can be applied equally well to Canada and to Canadian business men.

WHAT is your business going to be after the war—an institution or a memory? Are you grooming yourself for second place—for oblivion—or for leadership? You may have anything you want—but you must decide *now*.

You cannot eat our cake and have it too. You cannot hide your head in the sand until the storm is over and then make the public believe that you are one of the country's big, bold captains of industry.

This country isn't going out of business!

J. Pierpont Morgan, the elder, made his money "by always being a bull on the United States!" No matter what else went up or down, he always played the United States for a rise. Don't you think he would play the game the same way today—and don't you think he would win bigger than ever?

Have you a better system to suggest? Are you playing it? And is it working? And does your pessimism make you happy? Or are you a little more nervous, a little less confident each day? And has your state of mind anything to do with your fitness to hold a big business together and to maintain or increase its momentum?

The country's going ahead just the same — with or without you — but don't you wish, just for your own sake, that you had a little more of that Morgan faith and optimism and the courage they breed?

This war period is the acid test! It's going to spotlight the big men in American business—the creators, the men of imagination, foresight and staying-power — the men who were "always bulls on the United States."

IF your business is built on *publicity*—on the public's knowledge of you and its good-will toward you—are you going to keep that knowledge alive and that good-will active—or not?

Suppose you can't fill your orders now—suppose your facilities are all taken up with war work—or you can't get enough cars to ship in—or the public isn't buying your goods just now—or any one of a thousand things—are you going to invite the public to forget you?

Suppose the war lasts five years and you can't make a dollar during that period and your normal profits are a million dollars a year, is it worth anything to you to keep your good-will active and growing —and to position yourself for a profit of one or two millions a year after the war?

How much is your good-will worth—isn't it easily worth ten times your annual earning capacity? Do you want to forfeit an asset like that just because you can't cash in on it for a year or two, or maybe five? How long has it taken you to build it—and how much has it cost you? Do you want to buy it all over again? Do you think you can buy it any more quickly or cheaply the next time?

And how long do you think it will be good for in these times, when the public has more to think about besides you than it ever had before? The public has a short memory. Are you willing to risk its forgetfulness—even to invite it? Figure it out in dollars and cents. *Can you afford it?*

RETRENCH? Of course! But *retrenchment* does not mean *retreat*. To *conserve* does not mean to *quit*.

Retrenchment means "stripping for action"—that's all; cutting out the impedimenta and getting down to real business. American business must now be "stripped for action"—but stripping does not mean starving. You have to strip an athlete, but you cannot starve him and make him win. You merely stop feeding him cocktails and candy and give him milk and meat instead!

Are you Going or Coming?

And conservation means the *development* of resources instead of their *waste*—that's all. When the government started in to conserve the forests it didn't *neglect* them. It hired good *men* and spent good *money* to develop them. That's what conservation means — *development* through proper care and nourishment. **You don't** believe in *deterioration*, do you? Then you do believe in conservation.

Words like retrenchment and conservation scare some men out of their senses. But the truth is that retrenchment and conservation are the two best things that ever happened to us. It will be worth the huge financial cost of the war to get them permanently into the fabric of American business. Before we're ten years older we'll all thank God that something happened to put these two words into our vocabulary—or we'll be out of business—listed among the casualties of war.

WE DON'T believe that American business men are quitters—that in the face of present conditions they intend to create a *new* tradition of *retreat*. We must learn a new technique of business, a better one, one that's going to give us more and better business. But no real business man ever hesitated before new and difficult problems. These are the things that weed out the unfit and make business better, healthier, sounder for everybody that's left.

That's what is happening right now. A good many businesses are losing ground that it would be easier to hold than it ever will be to regain. Good-will does not stand still—it goes forward or back.

The calmest judges of affairs in the country prophesy a post-war period of prosperity for America such as the world has never seen! And every man who thinks knows that it is true. The figures of after-the-war trade are going to stagger even the optimists. A *world* is to be rebuilt, re-clothed, re-furnished and re-stocked—entertained, amused and educated all over again. The institutions that build their places in the public good-will *now* are going to do the job—at enormous profit and satisfaction to everybody concerned.

The world's present facilities are totally inadequate to the new job. The only sane course for American business men, therefore, is to build *now* for the future. The real leaders in every industry *must* do it—and *will* do it—because it is the price of leadership.

BUSINESSES that are firmly intrenched in the public *mind* and the public *good-will* when the war ends are going to make fortunes while the others are getting started! Yours will not be one of them unless you lay the foundation *now*.

The best proof that the MacLean publications are performing a real service is found in the fact that each publication is showing a gain in circulation and this in spite of an increase in subscription price due to increased costs.

The MacLean publications are keeping abreast of new conditions, and are enabling their readers, by very practical plans and suggestions to meet successfully the ever changing conditions due to the war.

Here is the list. Every publication is a leader in its field.

Those Hard-To-Get-At Nuts

In every garage, machine shop, blacksmith shop and factory in your locality there's a lot of unnecessary cussing that you can turn to profit.

Those nuts that are so hard to get at with an ordinary wrench are easy prey to the Original "Westcott" adjustable "S" Wrench. The "Westcott," besides being the most convenient and useful wrench for ordinary use, can be used in places inaccessible to the Monkey-Wrench. It stops the cussing and adjusts the nut quickly and effectively.

"Westcott" Wrenches are fully guaranteed to do their duty. We empower you to refund the purchase price of any "Westcott" that fails.

The "Westcott" is easily adjusted by the hand that holds it. Its handle is made of first-class refined malleable iron and the jaws of forged steel scientifically heat treated.

If your jobber cannot supply the "Westcott," write us and we will tell you who can.

"Delta" Files

—we'll help you sell them

TRADE MARK

DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

Higher Selling Costs

How Will You Meet Them?

Selling costs are on the rise.

Representative hardware dealers everywhere report definite increases this year in business expense. These advances range from 3 to 8 per cent.

The profit-rise is not as rapid as the expense-rise. There is new need for items of ready sale and adequate profits.

Many up-to-date hardware dealers are finding a business balance-wheel in Gargoyle Mobiloils. From country cross-roads to city corners Gargoyle Mobiloils have a steady influence on hardware profits.

The reasons are plain:

Gargoyle Mobiloils yield a substantial profit. These profits are assured profits that will grow. They are assured by the steady demand of motorists. They will grow if you put behind them a real selling effort.

Progressive hardware dealers who sell Gargoyle Mobiloils know that there is a multiplied sales opportunity in every motorist in town.

They see in Gargoyle Mobiloils sales more than simply a good profit on oil. They see a chance also to sell to motorists other lines—paints, tools, stoves, hardware, etc.

Why?

The Gargoyle Mobiloils Chart of Recommendations gives to your advice the authority of the many years' experience of the Gargoyle Mobiloils Board of Engineers. This Chart establishes you as a lubrication expert, capable of giving personal advice.

It is such personal service that makes permanent customers of casual oil buyers.

If you display the complete line of Gargoyle Mobiloils with the Chart of Recommendations, you are equipped to correctly lubricate every car on the road.

Automobiles are a permanent and growing factor in Canadian life. You can make the profit on automobile lubricants one of the steadiest profits in your business.

Write us at Room 704, Imperial Oil Bldg., Toronto, for 64-page booklet, "Correct Lubrication," containing Charts of Recommendations for all makes of automobiles, tractors, motorcycles and motor-boat engines. Ask for full information regarding our proposition to dealers.

Why You Should Be A Michelin Dealer

No. 5

Michelin Advertising Reaches Practically Every Motorist

Michelin advertising reaches practically every motorist in Canada—not just once or twice, but regularly and frequently.

Big Michelin advertisements appear in the leading Canadian magazines, farm journals and newspapers, as well as in many periodicals published in the United States that circulate extensively in Canada.

This advertising drives home the fact that Michelin Dealers offer their customers greater value and satisfaction for their money than can be had anywhere else.

Michelin has been telling the motorists in your territory to go to the Michelin Dealer.

Is this great force behind ***your*** business? If not, why not?

Write for full particulars of Michelin's dealer-proposition.

MONTREAL, CANADA

MICHELIN

Over 5,000,000 Motorists

will read the Thermoid Story

BRAKES INSPECTED 1918

"Go to your Dealer"— "Have your brakes inspected"

THAT is the doctrine we are preaching to over 5,000,000 car and truck owners.

In each of the forty advertisements being run in the publications shown above we are urging motorists to join the "Brake Inspection Movement." We are sending him to his dealer to have his brakes inspected.

If a motorist comes to your store for brake inspection, and you find that his brakes need new brake lining, it will mean a sale for you.

Very likely he will also buy other necessary supplies and accessories besides brake lining. It may be your opportunity to make a new customer.

Thermoid superiority is proved

If you will carry a stock of Thermoid Brake Lining, you will find that the service we give our dealers is equaled by the service Thermoid gives the motorist.

Here are three reasons why Thermoid Brake Lining will give satisfactory service to your customers and thus increase your good-will:

More material, greater service

1. There is over 40% more material and 60% more labor used in the manufacture of Thermoid Hydraulic Compressed Brake Lining than in any woven brake lining. This abundance of material and labor must mean longer wear.

Grapnalized

2. Thermoid Brake Lining is Grapnalized, an exclusive process which creates resistance to moisture, oil and gasoline. Moisture causes brake lining to swell, making it grab or slip.

Hydraulic compressed, uniform throughout

3. Every square inch of Thermoid is hydraulic compressed at a pressure of 2,000 pounds. Thermoid is uniform all the way through. It cannot compress in service. There are no soft spots to wear out quickly. It will give uniform service until worn cardboard-thin.

Endorsed by automobile manufacturers

The engineers of fifty-one leading car manufacturers, ten of the most prominent axle-makers, all leading jobbers and thousands of dealers have selected Thermoid Brake Lining because of its dependability.

We are co-operating with jobbers and dealers to make this season the biggest ever, not only in Thermoid Brake Lining, but in all branches of their business.

Advertising campaign in your city

Our new book, "The Brake Inspection Movement and What It Means to Dealers" tells in detail how we have planned to advertise your store direct to the car owners of your city—over your name. It is jammed with interesting and profitable ideas for increasing your business.

If you have not received your copy of this book, write for it to-day.

Our guarantee: Thermoid will make good or —WE WILL.

Brake Inspection Movement

Prominent officials, leading clubs and organizations and motorists everywhere have endorsed this big national movement to reduce automobile accidents by having all brakes inspected before the touring season begins, and regularly thereafter. Give it your support. Tie it up with your store.

$\frac{V^2}{10.8}$

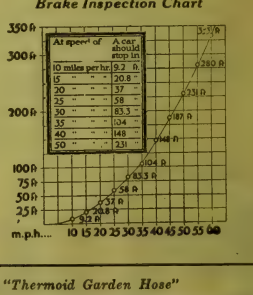
Will your car do this?

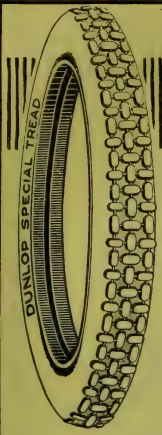
Automobile engineers have proved that when brake mechanism is right and road conditions average, any car should stop at distances and speeds given by the chart.

V^2 means the square of the velocity or speed of your car. 10.8 is the proved factor of retardation under average road conditions. This factor decreases on smooth slippery roads to 6.7 and increases as high as 17.4 on rough worn roads. The chart represents the average condition and other conditions can readily be figured by changing the factor within the given limits.

Remember that your brake mechanism is not "right" unless its brake lining has the ideal co-efficient of friction. The better the brake lining the quicker your stop.

Thermoid Brake Inspection Chart





DUNLOP TIRES

SEAL OF QUALITY

AUTOMOBILE

Are You Seriously in the Tire-Selling Business?

Every tire dealer in every part of Canada will find food for thought in our next sentence:—

"No other rubber company in Canada can compare with Dunlop in length of auto tire manufacture or experience in co-operating with the dealer for successful tire-selling."

Our auto tire business alone to-day is greater than our total business in all lines two years ago. That surely indicates two things:—

That we have obtained a good measure of the new business, and **retained a goodly measure of the old.**

We need not point out to you that the automobile is now a mammoth industry; but it is important that you realize that the first automobile tires ever made in Canada were made by us. The auto tire to-day, with all its perfection, is the enlargement or outcome of our original patented bicycle tire.

Because we were successfully manufacturing bicycle tires and other rubber products when the automobile first came, we feel we have been in closer touch with every angle of the industry than any other tire-maker. All the more reason, we should think, why every dealer should know all about the Dunlop Line and the Dunlop Plans. Our men are competent to talk to you about tire-selling, and they'll be perfectly frank with you, too.

For Ton Trucking Purposes

Ford

ONE-TON TRUCK

BUSINESS men everywhere who have hauling or delivering problems to consider—whether operating a wholesale business, a retail store, or a farm—will welcome the arrival of the Ford One-Ton Truck.

PRICE

$750

F. O. B.
FORD, ONT.

Heretofore, the Ford user who wanted to carry loads up to a ton found it necessary to get one of several special attachments or extensions which were on the market. Now the standard Ford truck is available—a car that can withstand the drudgeries of commercial use, and yet lacks superfluous weight, and is easily handled.

Supplied as chassis only

The truck differs from Ford passenger cars in that it is specially designed throughout in proper pattern and strength for heavy-duty service. It has a final drive of the worm gear type, so that all gears are enclosed. Rear wheels are equipped with solid tires. Front tires are pneumatic. Standard Ford motor, transmission and ignition.

The largest truck and automobile company in the British Empire, with an organization of more than 700 Canadian dealers stands back of every Ford truck purchased.

Champion Regular for Studebaker cars. Price, $1.00.

Champion

Dependable Spark Plugs

are more than half sold when the customer reaches your store

The dealer who carries the complete line of Champions does not have to *sell* spark plugs. He simply supplies the demand that we have created.

For years we have been educating users of the dependability of Champions and have backed up that education with the guarantee of "Absolute satisfaction to the user, or free repair or replacement will be made."

An appreciative public has come to realize that Champions mean spark plug reliability and satisfaction —that is why more Champions are in use than all other plugs combined.

That is the best possible reason why you should stock the full line of Champions—the plugs that are in greatest demand—the plugs that the great majority of motorists have come to depend upon for real spark plug service—the plugs that offer you a living profit—the plugs that are backed by a big, live campaign of promotion that has more than half sold Champions to your customers before they reach your store.

Look over your spark plug stock now and order from your jobber a complete line of Champions that you may be in a position to capitalize our promotion to your own profit.

RED SIDE WALLS

"Classify Your Car

—as a car tired with leaders in the field."

If Diamond Tires were sold at so much per delivered mile their first cost would be among the highest.

For Diamonds **cost less to buy.** In every kind of service all over the U.S. and Canada, Diamonds are cutting tire upkeep.

For after all, the purchase price means nothing if the tire does not wear well; if it does not **cost less to run.**

In buying Diamonds your customer begins to cut tire "upkeep" costs from the first minute. He keeps on cutting "upkeep" the more he runs it. Diamond Dealers usually just say this to prospects:

"When your car is equipped with four Diamonds you are cutting tire 'upkeep' **four ways at once."**

THESE SPECIALTIES FOR FORD CARS ARE IN GREAT DEMAND

HARDWARE dealers generally now realize the importance of carrying a stock of Auto Accessories, for customers will invariably buy in addition, articles for the car separate from general hardware stock. The articles listed below are seasonable and quick sellers.

"Non-Set" Piston Rings

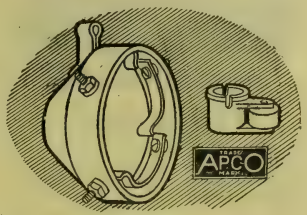
No. 8309

This step cut piston ring is a great improvement over the mitre cut type of one-piece ring. It permits expansion of the piston ring against the cylinder walls without leakage, and the lap joint automatically compensates for wear. Furthermore, these rings are made .0025 oversize, which permits of their being accurately fitted to pistons in worn or new cylinders. Each ring is individually cast, and ground down to a smooth, accurate fit.

All of these combined advantages produce a piston ring which holds the compression, thereby causing the motor to deliver its maximum power.

No. 8309—**Price**, each.....**$0.20**

Apco Timer



No. 8244

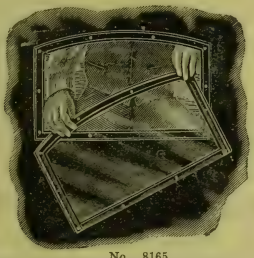
By eliminating the fibre ring and replacing the small spring on the roller with four large contact springs on the case, the Apco Timer overcomes practically 90% of the ordinary commutator troubles.

The Apco Timer is of highest quality construction throughout. Shell is a steel stamping; contacts are of clock spring steel held by special screws insulated with bone fibre, and roller is made of hardened steel and runs on a hardened steel bushing which practically insures it against wear.

The Apco Timer gives snappy action in making contacts, increases the engine speed, consumes less current and saves gasoline.

No. 8244—**Price**, complete **$1.50**

Rear Curtain Light for 1916 Models

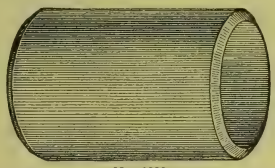


No. 8165

Made of extra heavy celluloid, substantially bound with Pantasote and has holes punched ready for attachment. Furnished with fasteners and fitted with a weather flap at bottom. Readily replaces the broken curtain without fitting of any kind.

No. 8165—**Price** **$0.90**

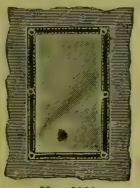
Extra Quality Radiator Hose



No. 8293

Made of high-grade fabric and rubber, smooth and seamless, not affected by oil or water.

	Length.	Outside Dia.	Price, each
No. 8293—Inlet Hose	2¾ in.	2 in.	12c.
No. 8294—Outlet Hose	3¼ in.	2⅜ in.	15c.



No. 8166

(For 1917-18 Models)

Light Curtain Rear

Furnished with fasteners ready to attach. Made of heavy celluloid with Pantasote binding. Complete set for 1917-18 Fords consists of three separate lights of the same size.

No. 8166—**Price**, each.....**$0.35**

No. 8171.

Rear View Mirror

Enables the driver to observe approaching vehicles from the rear without turning the head.

The clamp on the 12-in. arm attaches to any Ford windshield. The wing nut adjustment permits mirror to be set at any desired angle and will not jar loose. 4-inch convex lens. Black satin finish. An ornament to any car.

No. 8171—**Price** **$1.20**

Black Radiator Cap

No. 8200.

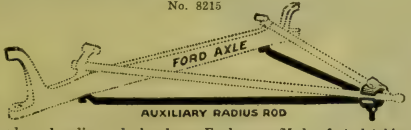
Made of extra heavy metal with black rubber finish. The deep corrugations allow of a good grip for screwing on or taking off cap.

Will lend a distinguished appearance to your car. It is much easier to take off and put on than the regular radiator cap with which the Ford is equipped.

No. 8200—**Price**, Black Radiator Cap **$0.35**

No. 8215

Hyslop Auxiliary Radius Rod



Add 100 per cent. to the safety of axle and radius rod already on Ford cars. Made of steel tubing and malleable castings. The clamps are two-piece. When rods are fastened under front axle, using same bolts holding spring shackles, a bolt is then applied to the clamp and drawn up with a nut which clamps radius and auxiliary rods, making a very rigid fastening.

No. 8215—**Price** Hyslop Auxiliary Radius rod **$1.35**

You will find hundreds of other useful articles in our 168 page catalogue; send for copy if not already supplied.

FORD SET

The Ford Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

STANDARD SET

Standard Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex nuts, as follows: U.S. Standards from ¼ to ½ in.; A.L.A.M. Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 in. to ⅝ in.

Autoists like that ratchet feature

Lane's Unique Ratchet Wrench is ideal for close work

The autoist who has once discovered a few of the hard-to-get-at nuts and screws on his car is only too pleased to have some one introduce to him Lane's Unique Ratchet Wrench. He sees at a glance how effective the ratchet feature would be in close quarters where an ordinary tool would be absolutely useless.

Play up this ratchet feature and so arrange auto accessory displays that when motorists get up against the tool problem they will remember Lane's Unique Ratchet Wrench and come to you for a set.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.

Ask any Thresherman, Mechanic or user. A sure good sale and splendid profit.

Sleep-Meter *of Westclox*

THE strongest recommendation Sleep-Meter could have is the family name—*Westclox*—on the dial. *Westclox* is the badge of alarm clock quality. Sleep-Meter is proud to wear it.

Sleep-Meter is made by the Western Clock Co.,—makers of Big Ben and other *Westclox* alarms—and is easily the best medium-priced alarm you can buy.

Like all *Westclox*, Sleep-Meter has the patented *Westclox* construction—a better method of clock making: Needle-fine pivots of polished steel greatly reduce friction. That's why all *Westclox* run on time and ring on time.

Sleep-Meter has taken a front rank place as a business and household timekeeper, and is telling time in several rooms of many homes today.

Sleep-Meter is five inches tall, has a cheerful-toned gong and an easily read dial. You'll want one of these clocks—more likely *two*.

See Sleep-Meter at your dealer's. Look for the family name—*Westclox*—on the dial. If your dealer cannot supply you, Sleep-Meter will be sent direct on receipt of price: $1.75; in Canada, $2.50.

Western Clock Co.—*makers of Westclox*

Big Ben—Baby Ben—Pocket Ben—America—Ironclad—Sleep-Meter—Bingo

La Salle, Illinois, U. S. A.

A *Westclox* Alarm

This is what we said to your customers on April 6th in the Saturday Evening Post and in other national mediums

COW-EASE

KEEPS FLIES OFF CATTLE AND HORSES

Thousands of live merchants have bought and sold Cow-Ease on my say-so for seventeen years.

And in that seventeen years' service we can count the complaints upon the fingers of one hand. My faith in Cow-Ease is plainly shown by my ten-day **free** trial offer. It **must** make good or I will.

To spread the knowledge of my confidence and to send farmers and dairymen to **your** store, I will advertise Cow-Ease and my ten-day **free** trial offer in the best known farm and dairy papers.

I will supply you with a lithographed steel sign that shows the way to use Cow-Ease and that will be an ornament to your window or store. It will link your store to my advertising and help you make sales. Send to your nearest jobber for my Special Trial offer. You take no chances,—guarantee satisfactory results to your customers, for I guarantee them to you.

If you want more information about Cow-Ease and my selling plan for 1918 before ordering, write to me to-day.

National No. 800 Garage Door Set

View inside garage.

View outside garage.

The ideal set for swinging doors

This simple, easily-operated set is just the thing for garage doors constructed to swing on hinges. It is equipped with three pairs loose pin, reversible "T" hinges which can be used as full surface hinges or the "T" part can be reversed and mortised into jamb when used on brick buildings. It also includes 1 No. 820 Chain Bolt, 1 No. 830 Foot Bolt, 1 No. 5 Door Pull and 1 No. 29 All Steel Door Latch. The complete set is packed in a neat, strong carton with necessary screws.

Sales of this set or of our No. 801 set give opportunities for sales of our No. 810 Garage Door Holder which is described on pages 34 and 35 of our 1918 Catalogue. It is always worth introducing to your customer whether you make the sale at once or later.

By the way, did you get a copy of our 1918 Catalogue?

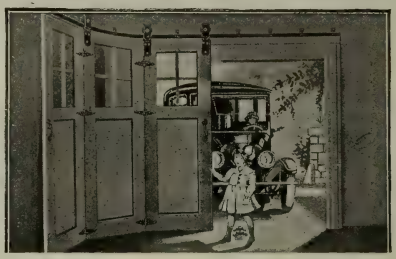
The Hatch Garage Door Outfit

makes hinged doors

Sag Proof, Weather Tight
And Open and Close Almost Automatically

Note the single hinged door which allows entrance to the garage without disturbing the other two.

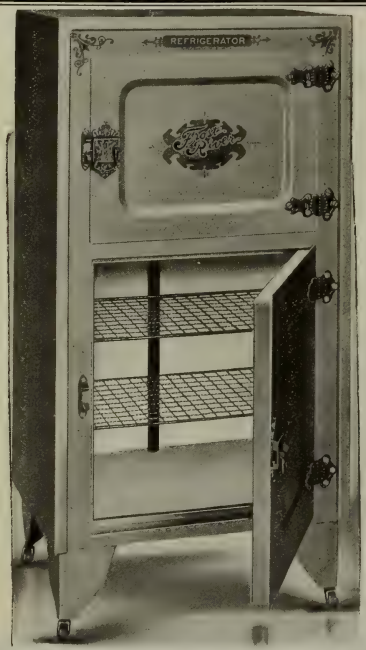


Efficiency, ease of operation and no waste space are outstanding features.

The smooth-gliding, swivel rollers hold the doors in place—take the bind off the hinges and roll the doors around the corner, on the inside of the building to the side wall.

This practical, inexpensive equipment affords a wonderful opportunity to increase sales and profits.

Canada Steel Goods Co., Limited
HAMILTON, CANADA



Davidson's Well Known FROST RIVER

Refrigerator shown herewith

Made entirely of Sheet Steel Galvanized

The exterior is Japanned French Grey, beautifully finished with neatly decorated panels and corner scrolls.

The Food Chamber is coated with white enamel, thoroughly hardened and baked on in an oven of high temperature.

All inside parts are removable for cleaning purposes.

The drip pipe for the waste water has been carried outside the body, and does not run through the Food Chamber—as usual in other refrigerators.

Made in three sizes, the largest with double doors.

NOW is the time to get your Orders in for these goods and ensure prompt shipment.

HERCULES
Smokeless Shotgun
POWDERS

At this end of the shell is the name of the powder. Ask for and look for

INFALLIBLE

A Story of Importance to You

YOU can't know too much about the shells you carry in stock. The information you should have is easy to obtain for it is told on the shell itself. The two ends give the story—a story that is important to you because *it is important to your customers.*

On the base you will, of course, find the name of the maker and loader from whom you order the shell. At the other end, on the top wad, are printed the size and quantity of shot, the quantity of powder and, last but not least—*the name of the powder.*

Hercules Infallible Smokeless Shotgun Powder, may be obtained in any standard make of shell. Undoubtedly the names of the shells you carry in stock are given in the column to the right.

The next time you order shotgun shells it will pay you to specify that they be loaded with Infallible Powder. The cost of the shells will be the same and you will make sure that you are selling your customers as good powders as can be made, in their favorite brand of shells.

If you are not familiar with the advertising service which we give to retail hardware and sporting goods houses it will pay you to drop us a postal asking about it.

On this end is the name of the maker. Hercules Smokeless Shotgun Powders may be obtained in shells made by the following:

The Dispute Settler

Here is a scale that captures confidence the minute you show it. And confidence "sells goods." In a dispute over correct weights, for instance, the owner of a Renfrew can defend its accuracy against any other scale, no matter how elaborate. The Government Inspector's Certificate, accompanying every Renfrew, is indisputable evidence of accuracy in every weight from ½ oz. to 30 lbs. That is one reason why the Renfrew sells like everything, these days. The housewife is ferreting out every leak due to honest mistakes in weighing. Get the

Gilbert
Machine Gun For Summer Business

Here's the biggest opportunity you ever had to do a profitable summer business on toys. Boys everywhere want a practical toy with which they can play war. And the Gilbert Machine Gun meets this demand. Your customers are going to want them this summer.

We have improved and perfected it until it represents the best value possible —it is genuine in its realistic uses—and ideal for summer play.

We have planned an advertising campaign in the boys' publications to appear during June and July and have a particularly attractive proposition to offer you in conjunction with it. It is a new idea in Toy marketing and will enable you to make your Toy Department pay you a profit during its usually dull season.

Our representatives are now on the road and will be glad to call on you —or we will give you complete information direct.

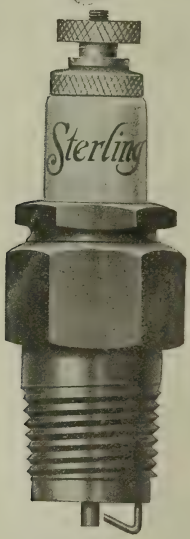
The Dealer Knows!

When the dealer recommends Sterling Spark Plugs he knows he is doing you a service because he knows the value of Sterling Plugs and knows he can personally guarantee their performance. That is worth while.



A size and style for every car

Sterling Spark Plugs

If your car was not originally equipped with separable spark plugs you will replace them eventually. Then put in Sterlings and you will appreciate their distinct advantages. When carbon accumulates wipe the porcelains with a cloth or waste and the plugs will give service equal to new ones. Separated, the porcelains are bare—from top to bottom. No doubt about their being positively clean. Sterling Plugs are sold by progressive garages and supply dealers.

Why You Should Be A Michelin Dealer

No. 6

Michelin Durability Is Further Proved By Large Traction-Surface

In previous advertisements in this series we have shown you how you can convince motorists of Michelin's extra durability by explaining Michelin's unique experience as the world's oldest tire maker and demonstrating that Michelins contain more rubber and fabric.

Another important proof of Michelin's superior durability is the extra size of the traction-surface of Michelin Tires.

We all know that the small eraser on the end of a pencil wears away quickly as compared with an eraser that is broad and flat. So likewise the tire whose tread consists of small, sharp projections will wear out more quickly than the tire with a large, flat traction-surface.

Michelin dealers can make this convincing test: Lay a piece of screen over one unit of the tread of a Michelin Universal and compare the number of squares that touch the raised portion with the number that cover the portion not raised. You will find that three-quarters of the Michelin Tread bears on the ground.

No wonder that Michelin Dealers so easily convince prospects of the durability of Michelin Tires

Write to-day for Michelin's Dealer Proposition.

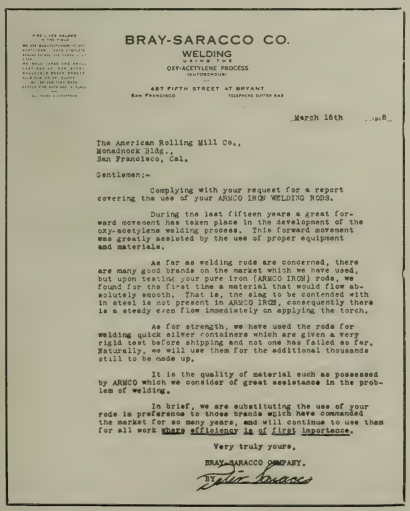
Bray-Saracco Company of San Francisco.

Practical Welders Use

Armco Iron Welding Material



BRAY-SARACCO CO.
WELDING
ELECTRIC
OXY-ACETYLENE PROCESS
AUTOGENOUS

487 FIFTH STREET AT BRYANT
San Francisco TELEPHONE DOUGLAS 642

March 16th ...1918.

The American Rolling Mill Co.,
Monadnock Bldg.,
San Francisco, Cal.

Gentlemen:-

Complying with your request for a report covering the use of your ARMCO IRON WELDING RODS.

During the last fifteen years a great forward movement has taken place in the development of the oxy-acetylene welding process. This forward movement was greatly assisted by the use of proper equipment and materials.

As far as welding rods are concerned, there are many good brands on the market which we have used, but upon testing your pure iron (ARMCO IRON) rods, we found for the first time a material that would flow absolutely smooth. That is, the slag to be contended with in steel is not present in ARMCO IRON, consequently there is a steady even flow immediately on applying the torch.

As for strength, we have used the rods for welding quick silver containers which are given a very rigid test before shipping and not one has failed so far. Naturally, we will use them for the additional thousands still to be made up.

It is the quality of material such as possessed by ARMCO which we consider of great assistance in the problem of welding.

In brief, we are substituting the use of your rods in preference to those brands which have commanded the market for so many years, and will continue to use them for all work where efficiency is of first importance.

Very truly yours,

BRAY-SARACCO COMPANY.

By Felix Saracco

The photograph shows a shipment on an order for ten thousand Quicksilver Containers, 4″ by 16½″, being manufactured by the Bray-Saracco Co. Before shipping, the flasks are thoroughly tested under 80 lbs. air pressure, then filled with quicksilver and dropped to a cement base from a height of 4 feet.

Mr. Saracco's letter of March 15th tells what they think of Armco Iron Welding Rods.

The Page Steel & Iron Wire Company of Monessen, Pa., are Manufacturers and Distributers of Armco Iron Wire for welding and electrical purposes.

The American Rolling Mill Co.

Licensed Manufacturers under Patents granted to the International Metal Products Company.

Saskatchewan Convention Big Success

Association in Flourishing Condition in the West—Many Important Matters Considered—A New Impetus to Trade in Prairie Provinces —Officers Elected For Year

SASKATOON. — From the early discussion at the proceedings of the first day of the Saskatchewan Retail Merchants' Association convention, it is to be seen that the problem of manufacturers selling direct in some instances to the retail trade, and of wholesalers selling foodstuffs direct to laundries and hardware, dry goods and foodstuffs direct to threshing outfits and others not legitimate retailers, is one of the biggest just now in the West.

The mail order question was incidentally touched upon once or twice during the discussion, but the question is on the list to come up later on during the convention proceedings.

During the past year there has been a change in the operation of the work of the association asa Dominion body by the establishment of a Western Executive Council and an Eastern Executive Council, each of which considers problems common to its own particular district and which later come under the eye of the Dominion Board. This is explained in connection with one of the resolutions below.

The convention was held in the Saskatchewan University Building. For a number of reasons the attendance was not large. Among them were shortage of help in the stores, cutting out of convention rates and increase of 15 per cent. in railway fares, etc. However, after the delegates got warmed up to the business at hand, the lack of a large attendance was made up in enthusiasm and the businesslike way in which discussions were conducted.

Urged Consideration of Delivery Problem

President A. A. Evans, Outlook, Sask., presided. Mayor A. McG. Young welcomed the convention delegates. The Mayor complimented the association on its organization, referring particularly to the excellent work being done by the Traffic Department. Any organization that tends to the operation of business more cheaply is undoubtedly of great value to the country, he said. The town and city delivery problem—duplications particularly—was one he thought ought to receive as much attention as possible. If people in the country can buy supplies for a week at a time it should not be any hardship for those in the city to do with one delivery a day, was his suggestion.

J. J. Polson, Regina, replied, thanking the Mayor for his interest in the convention.

President Dr. W. C. Murray, of the University of Saskatchewan, Saskatoon, added to the welcome of the Mayor. The convention was an important agency towards the forming of public opinions, he said, and for that reason was most important from the standpoint of the welfare of the country. "The more we turn our conventions into educative gatherings, the more valuable and the more successful will they be, and the more far reaching their results. These conventions are developing the provincial ideas among us and causing to disappear rapidly the small local jealousies," was the chief thought he left with the delegates.

George Morrison, secretary of the Moose Jaw R.M.A., replied for the association.

Address of the President

President Evans read a message from E. M. Trowern, Dominion secretary, wishing the convention every success. Mr. Evans explained that having gone out of the retail business some months ago, and being away from the province he was out of touch with the situation. He would ask First Vice-President H. D. MacPherson, Regina, to read the president's address. Mr. MacPherson reported as follows:

THE PRESIDENT'S REPORT

"Since enjoying the hospitality of the Moose Jaw local at the convention twelve months ago, much history has been made both at home and abroad. These be times when the world is moving at a rapid pace and conditions, outlook and desires of our whole race are altering and re-shaping themselves overnight to meet the unceasing demands of international upheaval. The retail merchants, from their intimate relation to the activities of our people and country, must of necessity be a part of any such general tendency. It naturally follows that this report has to chronicle a number of very important happenings

City Freight Yards of C.N.R. 2nd Ave. looking North, Saskatoon, Sask. C.N.R. Depot, Saskatoon.

which will yet be found to be of heavy import to the future of this and similar bodies.

"Leaving the last convention with instructions from you as to the undertaking of Alberta organization, your executive started actual work in that Province in June, 1917, sharing with the sister state the time of our organizers. Now, at the end of almost a year of operation under such a basis, it is a pleasure to report that in the Province of Alberta there are 627 retail merchants who are members of our association and are receiving our service. We have been able to administer their organization affairs and liquidate old liabilities to the extent of $1,435.00, with every prospect of being able to hand over the organization in another year's time on a good sound footing with a membership large enough to warrant their operating their own service department.

"Members of your executive have had two formal conferences with the Alberta officers during the past year. Last October we met them in Calgary with reference to the reorganization of the Dominion Board; in April of this year a meeting was held in Edmonton when the government of Alberta was interviewed on matters of important legislation and afterwards matters of domestic policy were discussed and planned. We take this opportunity of acknowledging the hearty support of executive and retailers of Alberta in our efforts on behalf of their organization. The results thus far have shown clearly that your decision to undertake this work was wise and will have a powerful influence on the future good of our association in both Provinces and in a larger field throughout the Dominion.

"The Retail Merchants' Association is now an unbroken chain from Atlantic to Pacific and in April last at Ottawa, for the first time, duly accredited representatives from every province sat at the council board, each with a live provincial organization behind him.

"In matters of legislation which will be dealt with in detail in the secretary's report, I just wish to mention that we had the privilege at the last session of the legislature of appearing before the committee on laws and amendments and presented the items you gave us to bring before them at the last convention. We were able to have the Hawkers' and Pedlars' license raised from $25.00 to $100.00, and the City Act amended to provide for a half-holiday. The Factory Act which was in force in Alberta militated very unjustly against the merchants in that Province, and we were successful in having the objectionable clauses removed. The reason we mention this here is to show you the advantage of being organized, which prevented an act of this kind being put in force in this Province. We were also successful in having the Small Debts Act put in operation in Alberta.

"Those of you engaged in distribution of foodstuffs are already familiar with the licensing requirements of the office of the Food Controller. Difficulties and awkward features have already imposed themselves upon your notice, even though you are all of one opinion as to the necessity of some such machinery of control for the purpose of conserving essential foods to the best advantage and with the least possible hardship. Difficulties are bound to arise in carrying out any plan forced to hurried completion as this one was, but hearty co-operation of many interests and organizations has no doubt helped the Food Controller to avail himself of varied opinions and experiences so as to minimize troubles resultant on the operation of his regulations.

"At the beginning of framing these regulations, our association was hurriedly called into conference with manufacturers, jobbers and wholesalers for the purpose of advising the Food Controller. The time was too short for any proper representation of our members on a Canada-wide basis and our interests had to be represented at that first conference by merchants who were convenient to Ottawa and who made the necessary sacrifice of time to attend. The basis suggested for further consideration was an admirable one with the exception of a few points in which peculiar Western conditions were not considered or known. At subsequent hearings held by the representative of the Food Controller at Calgary and Regina, these matters were laid before him by executives and members of both provinces with the result that particularly objectionable points of regulation were eliminated or modified to such extent as to remove the ill effect.

"At the request of the Food Controller, three grocers were appointed as advisers on behalf of our body and members, Messrs. Nichol of Radisson, Neil of Saskatoon, and Biggs of Regina. Our experience in this matter afforded just one more evidence of the need of Dominion re-organization with a view to providing machinery which would be flexible enough and mobile enough to do the work of our organization without loss of motion and time. This report is particularly happy in being able to state that such re-organization is now an accomplished fact after three years' agitation and effort by your successive executives.

"Following the meeting of the Dominion Board in 1917, your executive reached a point in relation to the Dominion Board where further acceptance of existing conditions was out of the question—if we were to discharge our obligations as your representatives. You were called to a special meeting in Saskatoon in October, 1917, to be asked for specific instructions for our guidance. By practically a unanimous ballot of absent members, and by wholly unanimous vote of members present, the action of your executive was sustained and full power given us to push negotiations to a final issue. At the close of the meeting an executive went into conference with Mr. E. M. Trowern, Dominion secretary. A further conference was held at Calgary two days later at which your executive and Mr. Trowern were joined by representatives of Alberta and British Columbia. An adjournment was made to Regina and at this third session a basis of agreement was struck which has since been ratified by the Dominion board and put into operation.

"The new form of organization arises from the acknowledgement of the fact that the needs of Canada as a unit can in many respects be best served by recognizing conditions in East and West as dissimilar and therefore to be best solved by intimate acquaintance with territorial conditions, together with an appreciation of the association's growth to a point where partial decentralization of machinery must make for added efficiency.

"Nova Scotia and Prince Edward Island have been merged for association purposes so that there will be four provincial branches in the East and a like number in the West. In the West each province is represented by an executive officer on the Western executive council. This council will act in conjunction with a similar council of the East in matters pertaining to the Dominion as a whole. The eight members of the two councils will constitute the Dominion executive council.

"Our per capita tax will be payable to the Western executive council instead of to the Dominion board as formerly. Our Western council will bear one-half of the expenses of the Ottawa office and administration with adequate control in policies of action and expenditure. The personnel of the Western executive council as struck at the Dominion board meeting last month is as follows:—

British Columbia—G. A. Howker.
Alberta—T. A. Gaetz.
Saskatchewan—J. L. S. Hutchinson.
Manitoba—J. A. Banfield who is also Dominion president for the coming year.

"While on the subject of Dominion matters, reference should be made to a joint meeting of manufacturers, wholesalers and retailers held last August in Montreal at which your executive was represented along with several other provinces and the Dominion board. This conference was arranged at the request of your resolution passed at our last convention, with a view to laying before manufacturers and wholesalers our need of their further help in keeping the cost of distribution down to such a level as will offset some of the increase in cost of necessities. The retailer is in many instances forced to shoulder the blame for increased cost, when as a matter of fact he is discriminated against in the market where he buys. All we ask is that you should have the privilege of buying to as good advantage as anyone else who claims to give a distribution service. These points were all discussed at the above conference and the co-operation of manufacturers and wholesalers asked. Your executive are sorry to be unable to report any encouraging results or any reasonable prospect that your difficulties along this line will meet with any lightening, unless it be by your own efforts. This report is quoting a formal resolution of your executive in stating that in the absence of the necessary relief from outside co-operation, the retail trade is morally free to take such steps for betterment as the situation may require.

"A matter which your executive have had in consideration for some time seems to be coming a reality at last. In the matter of a course for retailers at the Saskatchewan University your executive have information which leads them to believe that this will be instituted in the near future.

"Another important step in our arrangements was completed in February when the executive of the Saskatchewan Retail Implement Dealers' Association, met your executive and after discussion decided to allow their organization to lapse and to advise all retail implement dealers in this province and in Alberta to become members of our association. The implement trade in the West is of large proportions and is meeting its own share of problems and doing its fair share in carrying on the general activity. Their troubles and needs are basically the same as all other branches of retail trade and their joining us should prove a big benefit to all sections of our membership. Pending further arrangements at this convention, your executive accepted a nominee of the Implement Dealers' Executive to act in an advisory capacity with us in all matters directly affecting the trade.

"It is a pleasant duty to congratulate various centres on the splendid progress they have made in broadening the sphere of service of the local branch. In Saskatchewan the cities of Saskatoon, Regina, Moose Jaw and Swift Current have made large increases in their membership and the two first named have installed permanent offices where regular service to members and visitors is being maintained.

OFFICERS FOR 1918

Following officers were elected for the coming year:—

Honorary President—A. A. Evans.

President — H. D. MacPherson, (Men's Furnishings), Regina.

1st Vice-President — J. J. Polson (Piano Merchant), Regina.

2nd Vice-President—S. D. McMicken (Grocer), Moose Jaw.

Treasurer—J. L. S. Hutchinson (Hardware), Saskatoon.

Secretary—F. E. Raymond (re-elected).

There was a tie vote for the office of Treasurer between Mr. Hutchinson and F. R. MacMillan, also of Saskatoon, President Evans giving the casting vote.

The convention next year will be held at Regina.

Similar activity in varying degree must be commended in Edmonton, Calgary, Medicine Hat and Lethbridge. These live local organizations mean a great deal to their own members and also contribute to the general vigor of the provincial branch both in money and morale.

"At last convention you expressed the wish that your executive get in touch with representatives of the farming associations with a view to closer co-operation and better agreement of plans in all matters of mutual benefit and interest. In September, 1917, a committee waited upon Mr. Maharg, president of the Saskatchewan Grain Growers' Association, assuring him of our desire to co-operate with their executive and promising to hold ourselves in readiness to meet with them in conference at whatever time would be suitable, they to advise us as to date. We regret that thus far no conference has been announced or held. Our regret has been accentuated because of the splendid possibilities discovered to be latent in such a plan, by our conference last February with Mr. Wood, president of United Farmers of Alberta and Mr. Rice-Jones, general manager of the Alberta division of the United Grain Growers, Limited. Your executive appreciates very highly the frank interchange of views with these gentlemen and we have reason to hope that a further community of interest will be furthered by approaching meetings with the full U.F.A. executive. The farmers' problems are our problems and only by joint action can we reach a solution which will be really useful to the West as a whole.

"Following our belief that a clear understanding of our hopes and aims will secure for us increased consideration and help from all classes of citizens, we have inaugurated a publicity campaign. Arrangements have been made with leading newspapers of the province and Alberta, by which at regular weekly intervals material will appear dealing with retail problems, their solution from the inside and their relationship to the good of the consumer. Mr. Dainow, the latest acquisition to our staff, has this campaign in charge and results thus far are very pleasing.

"Your executive wishes to remind you that anything it may have accomplished in the past year has depended to a large measure on the faithful service of field and office staffs. Our personal touch with most of you throughout the year is largely dependent on the interviews of the organizers. The service we are able to give you is almost entirely dependent on the smoothness with which the office activity runs. The other members of the executive feel that this report would be incomplete and unfair unless ample mention be made of the untiring efforts of F. E. Raymond, secretary, and his associates of the paid staff.

"You will notice an innovation in our program for this week. At the closing session a space has been provided for a discussion of policy for the coming year, after the election of your next executive. Your present executive before laying down their office would take the liberty of suggesting that their successors might be greatly helped by some further division of duties and responsibilities.

"Your association is growing, not only in numbers but in influence. We are being called into conference in connection with increasingly numerous phases of public plans and these avenues of effort will no doubt multiply. War problems and reconstruction plans will also add their quota to the obligations of this organization and the load of the executive will increase.

"Even in the past year, the individuals on your board have given to association matters time to the extent of at least three weeks in the aggregate and some of us have spent over six weeks' actual time on your business. Every one of us are glad to have been able to do what we could for the association and you are under no obligation to us if we have served the common good. If in the future there

H. D. McPHERSON
President of Saskatchewan Branch R.M.A.

be a corresponding increase of activity, the point must soon be reached where many of you, competent to do your share on the executive, will be forced to decline because you simply cannot give the time which the work will demand. Such a state of affairs would be unfortunate and ought to be avoided if possible. May we ask you to consider this problem to the end that some plan may be evolved in which "many hands may make light work?'"

Mr. Polson, in elaborating on the above report, pointed out that the surplus from the general funds was only $11.44. The fact is, he added, that it cost us $11.99 out of each membership fee of $12 to operate the business. The larger surplus shown in the statement was due to obtaining revenue from other sources. He suggested that later on a discussion would take place in regard to a slight increase in the annual fee.

THE ACORNS PRODUCE THE OAKS

While in Regina last week HARDWARE AND METAL representative came across the minutes of a meeting of the Board of Trade held there March 5, 1913, dealing with the question of a Saskatchewan Retail Merchants' Association. Members state this was the nucleus of the present aggressive organization.

H. G. Smith, of H. G. Smith, Limited, wholesale grocers, was then president of the Board at that time. The minutes show that he read a communication to the meeting suggesting the provincial organization and a convention to discuss plans. The Board of Trade, Implement Dealers' Association, Canadian Credit Men's Association, the Commercial Club, the Regina council and retail merchants were mentioned as those who could assist in this work.

The committee selected to deal with the matter was: C. O. Hodgkins, H. A. Knight, R. J. Lecky, S. C. Burton, A. Gibbons, and A. M. Nichol.

A convention was held shortly afterwards and the association organized.

A. G. Moncrief, general merchant, Glenavon, Sask., remarked he would be glad to see the membership fee doubled as far as he was concerned because of the greater service being given.

C. C. Reid, Kindersley, thought that on account of the increase in cost of living the office staff should have an increase in salaries. Secretary Raymond pointed out this had been done to extent of about 25 per cent.

R. S. Hodson, hardware merchant, Maple Creek, asked the number of members in Saskatchewan.

Secretary Raymond replied that 1,214 had paid their membership fee in 1917, and 376 in Alberta.

A Substantial Balance.

Treasurer J. J. Polson, Regina, presented his report as follows, showing how the funds stand:

BALANCE SHEET—December 31, 1917

The Retail Merchants' Association of Canada, Inc.
Saskatchewan Board
Saskatoon, Sask.

ASSETS

Petty cash on hand	$ 5.00	
Cash in bank, general account	241.25	
Cash in bank, savings account	1,755.10	
		$ 2,001.35
Accounts Receivable—		
Collection department	$ 6.30	
Retailers Trust Company	368.80	
Loan to B.C. Association	40.00	
Advances to employees	100.00	
		515.10
Furniture and fixtures	$1,250.09	
Automobiles	849.30	
		2,099.39
		$ 4,615.84

LIABILITIES

Accounts Payable—		
Collection department	$ 246.79	
Dominion Ass'n for dues	310.85	
		$ 557.64
Balance, being surplus as at December, 1917		4,058.20
		$ 4,615.84

STATEMENT OF INCOME AND EXPENDITURE

For one year ended December 31, 1917
The Retail Merchants' Association of Canada, Inc.
Saskatchewan Board,
Saskatoon, Sask.

INCOME

Dues—		
Saskatchewan	$14,481.52	
Alberta	4,483.00	
		$18,964.52
Commissions on collections		384.53
Sundry receipts		129.20
Retailer, advertising	$2,031.52	
Subscriptions	505.75	
	$ 2,537.27	
Less publication costs	1,737.80	799.47

Automobiles	283.00	
		433.85
		$19,466.81
Balance, income exceeds expenditure by		810.91
		$20,277.72

Jas. Clinkskill, haberdasher, Saskatoon, made a number of suggestions in connection with the treasurer's statement. It was decided to discuss the entire report later on.

Report of the Secretary

Secretary F. E. Raymond presented his report in part as follows:—

"It behooves us as retail distributors to do our part in assisting the government to carry out its war measures. Many of them may appear severe to those of us who are not in as close touch with the needs of the peoples in the war devastated countries, and our men at the front, as our government must of necessity be, but none of these measures are put into effect until after careful consideration, having due regard to the interests of the various bodies affected after consultation with their accredited representatives.

"This does not mean, however, that any restrictions placed into effect cannot be changed or modified if it is found they are unworkable, and that they place undue hardship upon any section of the community.

Helped to Raise Canned Goods' Ban

"It is in cases of this kind that the value of this Association to you as retail merchants is demonstrated. As an illustration we might mention that it was largely if not altogether due to prompt action on our part that the ban which was placed on canned goods during the threshing season last fall was lifted, it having been shown that while this measure might be practicable in Eastern Canada where produce of various kinds is extensively grown, it would certainly have hindered operations in the West during a critical period of the year if it had been allowed to remain in effect.

"The Food Control Board saw the justice of our contentions with the result as you know, that the Prairie Provinces was exempted.

"The Retail Clothiers have the Association to thank for the fact that the Government is not now supplying returned soldiers with civilian clothing due to protests having been forwarded from every Province in Canada pointing out not only the injustice to the Retail Merchants but the dissatisfaction that would be felt by the men themselves, who should at least be accorded the privilege of satisfying their own taste in this matter.

"As still another illustration we might merely mention the fact that it is due to the representations of this Association that the license fee for Retail Merchants handling food products is now based upon a minimum of two dollars instead of ten as was at first proposed.

"E. M. Trowern, our Dominion Secretary, located at Ottawa, is in constant touch with the various departments of the Dominion Government, and is frequently requested to appear personally for consultation and also before select committees conversant with conditions in connection with any particular lines of trade affected by any enactment the government may have under consideration.

How 1917 Resolutions Were Dealt With.

'To proceed with a resume of our year's work in this Province, possibly the first thing in order is to deal with the resolutions pased at our last Convention.

"Resolution No. 1—re Provincial License Fee for Hawkers and Pedlars.—I am pleased to be able to announce that, at our request, at the last session of the house, this license fee was raised from twenty-five to one hundred dollars.

"Resolution No. 2—Re cartage charges. This resolution was to the effect that shippers and railway companies be notified that on and after July 1st, 1917, advance charges for cartage on shipments would not be paid.

"Due to the fact that the Manitoba Convention was being held early in the month of June, your Provincial Executive thought it wise to delay any action in this matter until after that time, as it was made known at our Convention that the same question would be considered there, and joint action by the two Provinces was considered advisable.

"Manitoba passed a similar resolution to our own, with the exception that the time was set for September first instead of July first, as they felt that July first would not allow those interested sufficient time to make any necessary changes.

"Subsequent to the Manitoba Convention we kept in constant touch with them to ascertain when they proposed to act and were advised that as the same matter was to come up at our Dominion Convention to be held in Montreal in August they had decided to postpone any action pending results there.

"In due course the subject was introduced at our Dominion Convention, but after a short discussion was referred to a joint meeting of manufacturers, wholesalers and retailers, to be held during the course of the last two days' proceedings. Finally at this joint meeting it was thoroughly discussed from every angle, and generally agreed that cartage is a necessary service that cannot be dispensed with and that the present system is the most economical and satisfactory from every standpoint in which goods can be handled from warehouse to freight shed.

"For the reasons before mentioned, it was felt that cartage charges as they exist form a legitimate part of transportation costs, the question as to who should pay them being a matter between buyer and seller.

"Your Executive is of the opinion that even though we were to notify shippers and railway companies that cartage charges will not be paid after a certain date, it could not be enforced, for the reason that it has been held by the Railway Commission that cartage forms a legitimate part of transportation costs.

"Resolution No. 3—Re minimum carload weight of flour. In view of the fact that a 30,000-lb. minimum is provided for under the classification on this comodity, no action was considered necessary.

"Resolution No. 4—Re organization work in Alberta. This has been undertaken and caried on with good results, as will be shown later in this report.

Arranging for Mercantile University Course

"Resolution No. 5—Re University Course in Retail Merchandising. This matter has been taken up with President Murray of the University of Saskatchewan and it is quite probable that with the commencement of the next term, this course will be installed. It is also quite probable that within the very near future a short course extending over a period of four or five days will be arranged.

J. L. S. HUTCHINSON
Elected Treasurer of Saskatchewan R.M.A.

"Resolution No. 6—Re closer co-operation between commercial interests. Steps were undertaken to arrange a meeting between commercial interests of Western Canada, but after proceeding with these arrangements for a time it was learned that a similar meeting was to be held in connection with our Dominion Convention at Montreal, and for this reason our own plans were abandoned.

"Resolution No. 7—Re a more equitable system of taxation. This matter was taken up with the Manitoba Executive and the conclusion reached that the only thing to do is to agitate for the appointment of a taxation board.

"Resolution No. 8—Re re-sale prices and the appointment of an Inland Trade Commission. The bill introduced in the Dominion House for the abolishment of resale prices was thrown out. Sir George E. Foster has expressed himself as being entirely in favor of the establishment of an Inland Trade Commission and we have reason to believe that the matter will have the favorable consideration of the Government within the near future.

"Resolution No. 9—Re amendments to the City and Village Acts giving the Council authority to pass a by-law, upon receipt of a petition signed by at least two-thirds of the merchants in business, making a weekly half-holiday compulsory. This was taken up with the Government at the last session, and we were definitely promised that both of these Acts would be amended giving the necessary power. Unfortunately, however, apparently through some oversight on part of the Government, the Village Act was overlooked. This will be taken up again at the next session.

"Resolution No. 10—Re N.S.F. cheques. This matter was referred to the Secretary of the Dominion Board and is now receiving the attention of that body.

"At our last Convention held in Moose Jaw on May 8th, 9th and 10th, 1917, the following executive officers were appointed:

A. A. Evans, Outlook, President (re-elected).

H. D. Macpherson, Regina, 1st vice-president (re-elected).

J. L. S. Hutchinson, Saskatoon, 2nd vice-president.

J. J. Polson, Regina, treasurer.

F. E. Raymond, Saskatoon, secretary (re-elected).

"During the year ten executive meetings have been held, in connection with two of which interviews were arranged with the Government for the purpose of discussing various matters of legislation which we were anxious to have passed at the last Session of the House.

"In connection with one other, an interview was held with the Hon. W. R. Motherwell, Minister of Agriculture, and W. W. Thomson, Registrar of Co-operative Organizations, with reference to co-operative trading.

"Three of these meetings, one at Saskatoon, one at Calgary, and one at Regina, were held in connection with the proposed formation of a Western Executive Council.

"The first of these meetings held at Saskatoon on October 25th was a general meeting to which all members of the Provincial organization had been invited. E. M. Trowern, our Dominion Secretary, was present at this meeting, and also at the two subsequent meetings held in Calgary and Regina, together with representatives from Alberta and British Columbia.

Two Executive Councils

"Finally at Regina a basis of agreement was reached which has since been adopted by the Dominion Board, resulting in the appointment of an Eastern and Western Executive Council, the two forming a Dominion Executive Council.

"The members of the Western Executive Council consist of J. A. Banfield, of Winnipeg — representing Manitoba — who was also appointed Chairman of the Dominion

Executive Council; J. L. S. Hutchinson, representing Saskatchewan; T. A. Gaetz, representing Alberta; and G. A. Howker, representing British Columbia.

This is something for which Saskatchewan has been agitating for some time and we are pleased to be able to say that it is now an accomplished fact, due to our efforts alone.

"One other meeting held in Regina on January 16th, 1918, was called to meet P. B. Tustin, the Assistant Food Controller at that time, together with representatives of other interests concerned, to consider the proposed regulations governing the distribution of food supplies. At this meeting there were also quite a large number of retail merchants present from different parts of the Province. Our representatives upon this occasion were well received, and it without doubt resulted in having removed from the proposed regulations certain claims which were considered unfair to the retail trade, but which did not in any way affect the underlying principle of the regulations.

"Our next meeting was held in Regina on February 13th and 14th, at the time the Joint Commitee of Agriculture and Commerce was in session. We were represented on this Committee by J. L. S. Hutchinson, who took an active part in the discussion upon the various matters introduced affecting the interests of the retail trade.

Implement Dealers Come In.

"On February 14th we met the Executive of the Retail Implement Dealers' Association by appointment, they having requested a meeting to consider the idea of disbanding their own organization and joining forces with this. The result of the interview was that they decided to do so and to recommend to the individual implement dealers throughout the province that they become members of the Retail Merchants' Association and take full advantage of the different services offered. This is only another recognition of the value of this organization, embracing all sections of the Retail Trade, as compared to single line Associations, which from the very nature of things cannot be as effective.

"At this Executive meeting an informal interview was also had with Mr. H. W. Wood, President of the United Farmers of Alberta, and Mr. Rice-Jones, who is connected with the trading activities of the same organization, which we feel will lead to closer harmony and co-operation between the two bodies. It is anticipated that a further meeting of this kind will be held in the near future.

"This step was taken because of the attitude expressed by Mr. Wood at the joint meeting of the Agriculture and Commerce, when he showed himself to be in full accord with the fundamental principle of retail distribution.

"At all executive meetings held throughout the year many matters of importance to the retail trade have been considered and acted upon.

"The President has outlined some of these in the course of his address.

"At all of these meetings with the exception of those held during the time that our President, Mr. Evans, was away from home, a full attendance was recorded.

"Your executive has been most generous in giving of their time in looking after the interests of our members. In no case has an executive meeting occupied less than one full day, in some cases two, and in other cases three days have been taken up. On every occasion it has been necessary for at least two members to leave home.

"In addition to the Provincial Executive meetings, three of your representatives attended the Dominion Convention held in Montreal in August, 1917, and one attended the Dominion Convention held in Ottawa during April this year. It has meant much to our future welfare that we were so well represented on these two occasions, as has already been explained to you by the President.

More than 1,600 Members in Saskatchewan

"Organization work has been carried on throughout the year in Alberta and Saskatchewan with good results. In June last year each of our organizers was provided with a Ford run-about, with which they have been able to make about one hundred per cent. faster time at practically the same expense. Furthermore they have been able to visit towns which heretofore were impossible to reach without serious delay and expense owing to inadequate train service.

"With the exception of certain portions of Saskatchewan, which will be worked within the next month or six weeks, the two Provinces have been thoroughly covered.

"Our total paid up membership in Saskatchewan, as at December 31st, 1917, was 1,214, and in Alberta 376, making a total of 1,590 in the two Provinces.

"From January 1st to April 30th this year 395 members have been enrolled in Saskatchewan and 251 in Alberta, making a total of 1,609 in Saskatchewan and 627 in Alberta. The Saskatchewan total of 1,609 includes 467 members whose membership has expired since January 1st, but to this should be added 483 members in territory not yet visited by our organizers, who should be rightfully considered as members of the Association—making a net total of 1,625 members in Saskatchewan.

Traffic Department Saves Money

"Our traffic department, with F. E. Hamilton in charge, has proved a very popular feature of our work. This, as you know, consists of checking railway expense bills for which a commission of 25 per cent. is charged on all amounts recovered and following up delayed claims for loss and damage. In connection with the former, amounts totally approximately $2,000 have been refunded by the railway companies and approximately $1,000 have been secured in settlement of loss and damage claims which amounts were recovered only through our efforts. In addition to this and of which no record has been kept many merchants have referred freight bills covering individual shipments to us for attention, requesting information as to whether or not the bills were correct.

"We have also received many inquiries respecting traffic matters in general, all of which have received careful attention.

"Mr. Hamilton, supported by your Executive, has appeared before the Railway Commission on three different occasions, in opposition to the various applications of the Railway Companies for rate increases and also in opposition to the proposed new freight Classification No. 17, which is still under consideration and is one of the subjects to be dealt with by this Convention.

"It will be readily appreciated that this work entails a great amount of correspondence which has occupied a large part of Mr. Hamilton's time. The work of the Department has increased to such an extent that we have found it necessary to engage additional help.

"There is one point in connection with railway expense bills which we would like to mention, and that is, that it is of no value to send bills in to be audited totalling under two dollars, as even although there may be errors, the amounts recoverable are so small that it is not worth your while, or ours, to bother with them.

"To those of you who have sent in bills to be audited and have received no report, we wish to explain that all bills are checked in order as received, and they have been handled as quickly as possible. With the services of an additional checker any delay which you may have experienced will be overcome.

"In connection with our publicity work, extensive changes have been made. In the first place our magazine, "The Retailer," has been considerably improved upon. It is our aim to embody in this an outline of any legislation, Dominion or Provincial, affecting the retail trade, and also to include articles of special interest or retail merchants as a whole. We feel assured that the magazine is appreciated by a great many of our members, particularly those who make a point of reading it.

"In addition to "The Retailer" extensive publicity is being carried on through the leading newspapers in the two Provinces.

"We have recently been able to secure the co-operation of the editors of a number of influential dailies in the publication of a Saturday feature page of news covering the activities of the Retail Merchants' Association. This in addition to the daily publication of items of interest is having the effect of not only creating a better understanding in the minds of the public, of conditions peculiar to the carrying on of a retail business, but also of acquainting them of the fundamental aims and objects of this Association.

"This work, including the editing of "The Retailer," is being successfully conducted by David Dainow, who has had several years' experience as a newspaper man and who for this reason should prove himself of value in this connection.

"Mr. Dainow succeeded W. R. Kell, who resigned his position in February last.

Getting in Many Old Debts.

"I am pleased to be able to report that our collection service is producing excellent results. The collection sticker and letter provided by the Association to members direct have been the means of collecting many thousands of dollars. It was felt by your Executive that this free preliminary service did not go far enough, and in June last year a Collection Department was established for the purpose of following up the accounts referred to us by means of collection letter stubs and otherwise, on a commission basis. Since that time until April 30th this year $4,042 have been collected. This, I think, you will admit is a most gratifying result and augurs well for the future of this department—the usefulness of which we hope to continually improve.

"We have reason to believe that many of our members either do not know that we are supplying a collection sticker and letter for the purpose of aiding them in collecting their accounts, or if they do they are not taking advantage of this service. In view of the excellent results obtained all of our members are strongly advised to make use of the facilities thus provided.

"Our Mutual Fire Insurance Company has made very satisfactory progress as will be shown by the reports to be given at the annual meeting to-morrow.

"One of the services rendered by our Insurance Department is that of checking the policies of other companies to see that they are concurrent in every respect, so that our members may know that they are getting the protection for which they are paying.

"This department is in charge of Joseph James, a man thoroughly experienced in the fire insurance business. Many inquiries have been received concerning fire insurance and as to the standing of other companies, all of which have received careful attention.

"In connection with the general policy of the Association it can be summed up in the one word "Service." This is demonstrated by the varied requests for information and advice being received daily, all of which are given individual study and replied to in an accurate and dependable manner.

"In view of the number of regulations being passed by the Canada Food Board, which naturally affect a large number of our members, it has been found necessary to keep in constant touch with the authorities at Ottawa in order that we might be in a position to give the most up-to-date information. This we have succeeded in doing and thus have been in a position to answer the large number of questions asked.

"Legal enquiries, applications for credit ratings, applications for store help, etc., have been carefully attended to.

" In this connection we appreciate the fact that our members are taking advantage of the services offered to the extent they are. This has naturally resulted in a great increase in work, necessitating staff and larger quarters for the Provincial Office.

"It may be of interest to the members to know that our office is the largest in Canada of any Provincial Office of the Association and employs the largest staff.

"In conclusion I wish to thank the Executive who have so faithfully performed the duties of their office.

"I wish, if I may, to earnestly counsel this Convention to elect year by year, strong Executives who will help the Provincial Secretary carry on successfully the ever-increasing work of conducting the affairs of the Association.

"I desire also to give public expression of my appreciation for the work during the past year which has been so faithfully performed by our organizers, G. W. Anderson and W. L. McQuarrie, and the Provincial Office Staff, each one of whom is deeply interested and specially adapted to the work they are doing and for this reason are of great value to myself and the Association."

J. A. Banfield, furniture dealer, Winnipeg, president of the Dominion Board of the R.M.A., and C. F. Rannard, boot and shoes, president of the Manitoba branch, were then introduced to the convention by President Evans. A. L. Strutchers, of Winnipeg, who was on the program to speak later on was also introduced.

The Problem of "Selling Direct"

One of First Resolutions Discussed at Saskatchewan Convention Brought Forward This Question of Long Standing—New Executive Councils Explained—Selling "Memberships" and Supplying Goods at Wholesale Another Problem on Slate

Reported by B. T. Huston, of MacLean Publishing Company's Editorial Staff.

THE RESOLUTIONS DEALT WITH

At the afternoon session on Tuesday Secretary F. E. Raymond opened the afternoon session by reading a number of resolutions. These were discussed one by one as follows:

Resolution No. 1.—That the basis of reorganization be accepted, as adopted by the Dominion convention held at Ottawa on April 16, 17, 18, and J. L. S. Hutchinson's appointment as Saskatchewan representative on the Western executive council be confirmed, and that the Dominion secretary be notified accordingly by registered mail to-day. Moved by Geo. Hazen, Hazen-Twiss, Limited (stationers), Saskatoon.

J. L. S. Hutchinson explained at the request of the president the circumstances leading up to this. It was felt by the Saskatchewan executive that there was required a system where the association could get quicker action on many questions of a purely western character rather than have to get the information and action through the head office of the Dominion Board. After many conferences in the East and in the West it was suggested that a Western Council be created composed of one member from each province, the same to apply to Eastern Canada to be known as the Eastern Executive Council. The two are to constitute what is known as the Dominion Executive Council, composed of eight members. Each council will meet as often as deemed necessary to deal with their respective problems.

The minutes are sent to the head office and the entire board meets once a year and deals with all the problems of a general nature that arise.

Mr. Hutchinson maintained that the West had been contributing more than its share in the past to the maintenance of the Dominion Board. Under the new arrangement the West undertakes to pay only 50 per cent. of expenses necessary to operate the Dominion office, leaving balance for purpose of their work in the West through the Western Executive Council.

President Evans asked why the Eastern representatives of the Dominion Board objected to the Western Board in the first place, and how this opposition was overcome. Mr. Hutchinson replied that the West felt better results were required in the way of organization. A number of conferences were held and Dominion Secretary E. M. Trowern had come west last fall to go into the matter finally. After a conference lasting three days the idea was accepted and later confirmed by the Eastern members of the board.

The resolution was adopted on motion.

Resolution No. 2.—Resolved that we wish to impress once more upon the manufacturers and wholesalers the absolute necessity of further co-operation from them with us if we are to meet in adequate fashion the increased cost of distributing merchandise. We still hope that the co-operation asked for at the joint conference of August, 1917, at Montreal may be brought about without delay and thus obviate any necessity of the retail trade seeking relief through other channels by their own efforts.

President Evans explained that in some instances some manufacturers were selling their goods direct to the retailer. This was a disadvantage, he mentioned, to many others. Some couldn't buy in large quantities. The merchants' claim was that the manufacturer should sell through the wholesaler to the retailer as the legitimate channel of trade. Some manufacturers told them that in cases where they sold direct, the retailer could buy the goods at same price as if he bought through the wholesaler. The representative of a manufacturer of shirts and collars in particular had made this claim, but very few of the other manufacturers could give the trade any satisfaction when the problem was put up to them. "There are some jobbers," Mr. Evans claimed, "who are getting a greater margin of profit on certain lines than what the retailer gets. He cited a case where the jobber was getting a profit of 15 per cent. on a 4-dozen case of goods whereas the retailer only received around 12½ per cent. per gross. The retailer, too, had to make from 24

to 48 sales to get that margin, whereas the jobber had only one. He felt the conditions were not satisfactory and the association was consequently seeking some kind of a solution that would be more equitable to the retailer.

Mr. B. Scott, general merchant, Lang, Sask.: "I understand that certain wholesale fruit merchants in this city do not charge delivery to city dealers but when an out-of-town merchant orders fruit he has to pay cartage charges to the station in Saskatoon as well as from his own station to his store." This was something he felt should be amended.

Vice-President MacPherson, Regina, said that the executive felt that it was up to the manufacturers to come through with a solution to the whole problem of selling direct at lower prices that retailers could buy through the wholesaler, but if they did not do so then it would be up to the association to do something drastic such as starting a wholesale house of their own. "We do not desire to take any drastic action," he added, "but we feel we have been criticized too severely for the high cost of living and that we are not responsible for it."

F. J. James, general merchant, Beadle, Sask., suggested this question be left over until more delegates arrived. It was too important to pass over with slight discussion.

Jos. Dort, general merchant, Meota, Sask., moved the adoption of the report and Chas. Biggs, grocer, Regina, seconded it.

B. S. Hodson, Hodson Hardware Co., Maple Creek, maintained that the resolution was too vague, that it didn't ask the wholesalers or manufacturers to do anything definite, and didn't suggest that we do anything if they didn't.

Mr. MacPherson suggested again the formation of a wholesale house. Mr. Scott asked if this wasn't tried out before in the matter of the Canada Supply Co.

The reply was that the Canada Supply Co. was not a part of the R. M. A.; that it was suggested a couple of years ago by Mr. Hutchinson that an organization of this kind would be a good thing from the standpoint of buying cheaper hardware. He was authorized to go ahead and formulate plans. This was done and finally the Canada Supply Co. was formed, members of the R. M. A. taking stock in same.

A Word for the Specialty Salesman

One or two members suggested the elimination of some of the travelers, commission men and specialty salesmen of manufacturers' agents with a view to cutting down cost of the goods to the dealer.

Mr. B. Scott said these men were out selling because their firms were aggressive and wanted to develop business. They would lose considerable business if they did not do so, he claimed. They go after business this way on the same principle that a retailer advertises for business. Their sales are larger, which cuts down their overhead, and he did not think the retailer paid any more in view of these salesmen calling upon him.

The resolution was finally adopted.

Resolution No. 3.—Resolved that we wish to assure the government of our earnest desire to co-operate with them in anything which will serve to further the main efforts of the country, namely, the prosecution of the war and the production of food.

The above resolution was carried unanimously by singing "God Save the King."

Resolution No. 4.—Resolved that after July 1st, 1918, the membership fee be increased to $15.00 per year, including the subscription to "THE RETAILER." This was moved by A. G. Montcrieff, Glenavon.

F. E. RAYMOND
Re-elected Secretary of Saskatchewan R.M.A.

An amendment by R. S. Hodson, Maple Creek, to the effect that this be held over for a day until the discussion on the treasurer's report was carried by a narrow margin. In the later discussion it was decided to have the fee remain at $12.

Resolution No. 5.—Resolved that whereas we are credibly informed that some wholesale grocers are making a practice of selling direct to laundries, that the secretary be instructed to write the Food Controller urging that the necessary steps be taken to guard against such infractions of the regulations under which Food Supply Licenses have been issued.

Secretary Raymond explained that some wholesalers were selling to laundries, these wholesalers claiming that if they did not do so the business would go out of town as Chinese particularly would not buy from local retailers. If a wholesaler is found to be selling to anyone not holding a retailer's license it was against the new food law, he urged.

Mr. Morrison, Moose Jaw, claimed that the laundries would have to buy from the retailers if the wholesalers did not sell them. That was merely bluff.

R. S. Hodson said that "the only way to get any reform is in close co-operation on our part, probably along the lines of the Canada Supply Co."

A. G. Montcrieff maintained that more members of the association should come to the convention and then they could begin to talk about co-operation. "As soon as the conventions are over most of us forget about co-operation," he said.

"No wholesaler," he added, "can now legally sell direct to a laundry or to a farmer under his food license. Local organizations should be able to handle this particular point themselves by simply reporting each case to the provincial secretary."

Mr. Morrison, Moose Jaw: "No use passing this resolution unless we write to every wholesaler in the province telling them it is contrary to our wishes and contrary to law to sell to laundries, threshing outfits, etc." He urged that the wholesalers be written as well as the Food Control Board. This suggestion was embodied in the resolution which was adopted.

Resolution No. 7.—Since it has come to our notice that certain organizations are selling memberships throughout the country and professing to supply goods to their members at wholesale prices, be it resolved that this convention go on record as being opposed to wholesalers, whom we are supporting, supplying these, or any other like concerns, and that we are of the opinion that the wholesalers have not exercised proper precaution in the best interests of the merchants and themselves in selling goods at wholesale prices to parties not engaged in the legitimate retail business.

One member asked if this sort of business was authorized by the Government through its licensing machinery.

J. L. S. Hutchinson claimed that the wholesale trade should be more particular as to whom it sold. It was a matter of good business on their part irrespective as to whether the retailer and wholesaler were licensed. In this particular case the license question did not enter the discussion.

The president explained that the retail house in question sold these memberships at $12 and charged wholesale prices "plus cost of handling." The words "cost of handling" is a very vague term.

J. Clinkskill, Saskatoon, read an advertisement from the Consumers' Association in a Saskatoon paper advertising sugar at $6.50. He asked how it was possible for a firm to do this.

One member remarked he would like to buy up "all that sugar."

The resolution was then adopted.

Resolution No. 8.—Resolved that this convention go on record as being in favor of any reduction of duty which will increase production of foodstuffs.

Sold Fruit Wholesale to Hotel

One merchant reported here that a wholesale fruit house sent a traveler to his town and because he couldn't get an order from either of the retailers he sold to the hotel.

Mr. Hutchinson urged that such cases should be reported to the secretary. A. G. Montcrieff stated a somewhat similar case had happened in his town some time ago. He wrote the provincial secretary and in a short time the matter was satisfactorily arranged.

Resolution No. 9.—Resolved that whereas after receiving frequent complaints that farm implements are often sold at wholesale prices to the casual handler or user, that the secretary be instructed to place this matter before the Wholesale Implement Association and ask for their co-operation to see that the privileges and facilities of jobbers' services be only extended to such parties as are prepared to provide the full services of a dealer to his client. This was moved by J. Wright, Regina, and seconded by J. L. S. Hutchinson.

Mr. Clinkskill maintained this was a political question and should not be passed upon at a merchants' convention. The Union Government is a non-political one and every encouragement should be given to it, he added.

One retailer suggested that maybe the Government is not in a position to take off the duty on farm implements, etc. They may need the money too badly. It was a resolution, he thought, that should be left alone.

Mr. Rannard, Winnipeg, said he was in Ottawa recently and discussed many questions of an economic character with officials. There was a heavy balance of trade against Canada in connection with United States trade and it was the duty of everyone not to import any more goods than were absolutely necessary.

It was finally decided that the motion be laid on the table.

FIRE INSURANCE COMPANY FIGURES

The affairs of the Retail Merchants' Mutual Fire Insurance Company were discussed at the afternoon session of the Saskatchewan R. M. A. on Wednesday. This company is controlled by members of the Saskatchewan Branch R. M. A., and no one has the privilege of taking out a policy in it unless he is a member in good standing.

President J. L. S. Hutchinson presided and presented the annual report. This showed net insurance in force at end of 1917 of $615,470.50, after deducting cancellations, and expiries of $432,814.50. Of the $615,470.50 in force $60,534.79 is reinsured in other companies.

The income during last year from all sources was $13,405.55 and expenditures $8,125.85, leaving a balance of $5,279.70.

Assets at end of year were $30,637.41 and in the liability column were the following: Accounts payable for re-insurance, $463.68; guarantee premium deposits, $19,273.66; surplus on Jan. 1, 1917, $5,620.37; excess income for year 1917, $5,279.70.

The president announced that in 1915 (partial year only) total net fire losses had been $370; 1916, $205; 1917, $4,893.83 and 1918, $1,562.21.

The surpluses from year to year are: 1915, $1,141.88; 1916, $5,620.37; 1917, $10,900.00, and 1918, $15,102.50 to the end of April. Most of this surplus was invested in Victory Bonds.

The directors at a special meeting decided to recommend to the association that the risks be doubled during the coming year. This recommendation was acted upon so that risks of $2,000 in non-protected towns and $4,000 in protected towns and cities will be accepted the coming year.

J. L. S. Hutchinson and H. D. McPherson were on motion re-elected directors of the company for the coming three years.

On motion of A. G. Montcrieff, general merchant, Glenavon, and E. H. Insull, hardware, Craick, a vote of thanks was tendered the president and directors for their work during the past year.

Manager James of the Mutual Company explained in detail the principle of the premiums.

C. F. Rannard, on the advisory board of the Manitoba R. M. A., stated that the merchants of that province were desirous of starting a mutual fire insurance company. It was their desire to link up with Saskatchewan, he pointed out, suggesting in a general way the basis for agreement.

After considerable discussion it was decided to empower the executive of the Saskatchewan Mutual to consider the question and to deal with it as they see fit.

Bankruptcy Bill Being Amended

President J. A. Banfield, of Dominion Board, R. M. A., Tells of Work of Dominion Executive at Saskatoon Convention—Killing of the Knowles Bill—Principles of the Association—Some Interesting Market Information

THE work of the Dominion Board, Retail Merchants' Association of Canada, was reviewed by J. A. Banfield of Winnipeg at the Saskatchewan convention on Wednesday afternoon. Mr. Banfield was not long ago elected President of the Dominion Board. His address demonstrated that he has been a follower for more than a short time of the inside details of the Dominion Board.

In a vigorous manner he emphasized the work that was being done, the policy of the head office and hoped that every member would avail himself of the opportunity of asking for information on any question upon which he was not clear. He first referred to the removal of the head office from Toronto to Ottawa. This he thought was a wise move because Ottawa is really the pulse of the business interests of this country and the place where the most good can be done.

He called attention to a bankruptcy bill that certain interests were recently endeavoring to get through at Ottawa, when an executive meeting was being held there. The bill had passed through the House of Commons and was coming up next morning in committee. Although late the executive made representations to the committee as strongly as possible calling attention to a number of clauses which were not in the retailers' interest. The consequence was the bill has been amended and reprinted and will be sent back at the next session for reconsideration. That was just one of the many services the Dominion Board was rendering.

Principles of the Association

He read the principles of what the Retail Merchants' Association stands for as follows:

Absolute honesty in weights and measures.

Correct representation in the quantity, quality and value of goods sold.

One price to all customers on proprietary or trade-marked articles upon which a fair price has been fixed by the manufacturer.

No deceptive practices, such as inducing customers to buy staple, trade-marked goods, the prices of which they are familiar with, and which are placed by some merchants at a cent or two below regular prices of such trade-marked goods in order that by so doing they will induce the public to buy goods, the prices of which they are not familiar with, and thereby more than make up the loss they made on the well-known staple lines.

Truthful advertising and honest marking.

Fair treatment for the working classes and for the farmers, by buying and selling manufactured articles that have been made or produced by those who receive fair wages.

To assist in the development of community life and civic pride in the cities, towns and villages of Canada, and, as far as possible, to keep money in local circulation.

To endeavor to raise the commercial and professional status of retail merchandising to that of the other professions, so that the public may receive the most efficient service at the lowest possible cost.

To give credit to those who are worthy, and who observe and consider their contracts to be worth more than a "mere scrap of paper."

To co-operate with the Dominion and Provincial Governments, and with all municipal councils, in establishing an equitable system of taxation, uniformity in municipal accounting, and in proper administration of civic affairs generally.

To co-operate with the educational departments, and with the universities of the various provinces throughout Canada, in promoting a higher standard of commercial education, and in the establishment of chambers or departments of commerce in the universities.

To educate the public on the importance of the retailer in the community, and to be in a position to submit the views of the organized retail trade of Canada to the various departments of either the Dominion or Provincial Governments on all questions that affect the channels of retail distribution, through which over ninety-five per cent. of the merchandise in Canada must pass.

That was a pledge card that he considered every retail merchant should sign and was something that should be brought forcibly to the attention of the consuming public.

On representations made at Ottawa Dominion Secretary E. M. Trowern has now the privilege of attending all committee meetings so as to keep closely in touch with new legislation and its relation to the retail trade, Mr. Banfield explained.

Legislation that the R. M. A. has taken

up and put into the Statutes includes:

Doing away with trading stamps in 1905.

Making false advertising a criminal proceeding.

Amendments to the Adulteration Act.

Placing a standard weight on a bag of potatoes—90 pounds.

Gold and Silver Marking Act.

Mr. Banfield also referred to the valuable charter the Retail Merchants' Association possess, which gives them strong powers.

What Dominion Board Had Discussed

At the Dominion Board meeting recently the following questions were discussed:

The Bankruptcy Act above referred to.

The importance of keeping books. It is the aim of the R. M. A. that it be made compulsory for a retailer starting in business to immediately keep a proper set of books.

Parcel Post. Why should parcels not pay the full value of their carrying? Mail order parcels are not paying their full rate as the parcel post system is not paying for itself and it is being used principally by the mail order houses.

Sending articles for repairs. An act is wanted to put a limit on the length of time an article may be left in the store before it can be sold for storage charges.

Question of our boys going to the front and having to close their stores on demand.

Matter of duty and excise taxes prior to the coming down of the budget, so that they would be fair to the retailer.

Amendment to the False Advertising Act.

Amendment to the Smuggling Act. The R. M. A. had already done effective work in watching smuggling of goods across the border more closely. He told a story of how a certain Winnipeg man had to pay $2.50 dutv on a pair of boots he was wearing and had been wearing for some time as he was coming home from a trip to Minneapolis. He had been there less than three months. Asked when the authorities had become so strict, the customs officer said that the Retail Merchants' Association had been getting after them and they had to carry out their duties.

Defeat of the Knowles Bill, which was an attempt to do away with the price maintenance plan, was another success of the R. M. A.

Manufacturers May Fix Prices

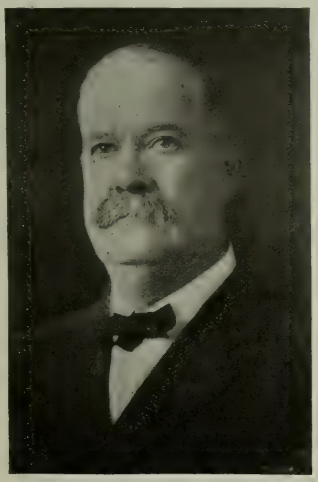
"Can a manufacturer set a price on the article he makes and refuse to sell anyone who cuts?" asked one member.

"Yes, he now has that privilege," replied Mr. Banfield.

Mr. Banfield gave the convention some very important information on market conditions. The big department stores were buying all the goods, dry goods particularly, that they could possibly get and storing them. He told of how wholesale houses in some cases were sending out envoys to buy up goods from the retailers who did not know any better, such as table napkins, cottons, etc., which they found impossible to get themselves.

He also told an interesting story he heard recently about the profits of a large mail order house in Canada. These were larger than the proprietor had intended, as they were to be divided as bonuses, so the solicitor of the house in question was consulted for a solution to the quandary.

The lawyer asked the head of the house how much his salary was, on hearing of the difficulty. He was told the figure. "The only solution I can see," he added, "is to make it a million."



S. D. McMICKEN,
Moose Jaw, Sask., elected 2nd Vice-President of the Association.

An Implement Repair Week

Saskatchewan merchants are anxious to see a big crop in this year and that the harvest will be adequately handled. Some of them are leaving their stores from time to time to help their farmer friends sow the seed.

At the convention an important resolution was suggested urging the Government to set apart an "Implement Repair Week," so that the farmers would have a special time set apart to attend to their machinery well in advance and have harvevsting repairs made before harvesting operations are actually begun.

R. A. Magee, M.P., and general merchant, Wolseley, moved this and urged the importance of encouraging the getting ready well in advance the machinery with which to take off the crops.

"Evvery year," Mr. Magee said, "there is a great deal of loss and inconvenience because farm machinery and implements are not ready when harvest time arrivves. Unless something is done along this line there will be a serious loss of time in the harvesting of Western grain this year on account of help shortage. Many producers do not begin to fix their binders, etc., until they are ready to use them. We are all vitally interested in the winning of the war and this resolution would show our good faith." The resolution was advanced by the Implement Section of the association. W. J. M. Wright, Regina, and Mr. Thompson, Winnipeg, also spoke in favor of the necessity of having farm machinery repaired in good time. Mr. Thompson thought it should be a Dominion wide movement. The resolution was carried.

No Advance in Fees

There was a suggestion that the annual fee be increased from $12 to $15, but the majority felt this was not a good year to make the change and no action was taken.

Sugar Cards Not Endorsed

R. J. Moffat, general merchant, Bradwell, proposed the following resolution:

That whereas the supplies of sugar available for distribution in the Dominion of Canada are short of the normal requirements of the people; therefore be it resolved that this Convention express itself in favor of a system of Card Distribution.

"I do not think," he said, "the present sugar regulations are taking proper care of the sugar difficulty. The only system that will take care of this adequately is this card system."

After considerable discussion pro and con the resolution was tabled.

Will Not Interfere With Food Board

A resolution was submitted from the farmers of one of the Saskatchewan districts urging the rescinding of the Food Control Board regulations in regard to returning more than fifteen days' supply of flour. It was decided to lay the resolution on the table.

University Course for Merchants and Clerks

The relations between the University and the retail merchant and what the University was prepared to do in educating the retailer and clerk were prefaced by a scholarly address by Dr. W. C. Murray, president of the Saskatchewan University, at the closing session of the convention.

He did not think the University at the present time was prepared to put on a four-year course for high school boys with a view to fitting them for the business life of the country. In the larger cities the Y.M.C.A. was providing evening classes for students in various lines of work, such as insurance, selling, advertising, etc. He considered that to be possible in connection with the University, the only objection being that such classes would only be satisfactory to Saskatoon. The other large centres of the province would not be satisfied.

It would, too, be difficult to get the right type of teacher for this class of work. He must not be one who would peter out in a few days' or weeks' time. A teacher of merchandizing who would wear is the only kind that would bring results.

He suggested the appointment of a committee of merchants to confer with a committee of the University Board in order to discuss the entire matter.

R. A. Magee, M.P., Wolsely, proposed a hearty vote of thanks to Dr. Murray not only for the dainty luncheon served and trip around the grounds but for the thoughtful address he had given.

Mr. Magee maintained that on account of the importance of the retail merchant, who does so much to bring goods from the confines of the earth and placed them in convenient manner before the consuming public, he deserved a great deal of consideration at the hands of the Government. "We do not realize to what extent the country has been developed by the aggressive leadership of its merchants," he said. "Anything that will assist the merchants of Canada to give a better service to the people must necessarily be in the best interests of the country."

S. D. McMicken, Moose Jaw, seconded the motion extending the thanks of the convention to Dr. Murray which was enthusiastically carried.

At the meeting subsequently held, a committee consisting of the new executive with power to add to their numbers was appointed to meet the University committee in regard to a University course of education for the mercantile interests.

The association pledged its full support to the Red Cross organization in its campaign to raise $1,000,000 in June. R. A. Magee suggested that the merchants endeavor to propose a better and more adequate system of collecting. He suggested monthly subscriptions. W. R. Phillips, Kindersley, urged that under the present collecting system many people who should are not giving, with the result that others had to give more than their share. He urged that the Government take over the Red Cross collection and levy a special tax to secure the necessary funds.

A proposal was made to appoint an advisory board consisting of three or four members from the outlying districts, to get the pulse of the mercantile interests in those districts and to assist the executive. This was considered a good idea, the matter being left in the hands of the executive to select the committee.

Practical Problems in the Question Box

Extension of Credit—Should Saskatchewan Have Copper Coinage? — Are Sales Companies Useful?—Opposed to Selling "Membership" in Consumer Propositions—Why the Snow in Saskatoon?

THE "Question Box" provided some splendid practical points for discussion at the Saskatchewan Merchants' Convention. Among these were the extension of credit, the new freight classification proposal, copper coinage for Saskatchewan, turning a credit business into cash, sales companies, firms selling "memberships" to consumers, etc.

A committee was appointed consisting of A. G. Montcrief, Glenavon; J. W. Cresswell, Regina; N. J. James, Beadle, to go over the questions in the question box and eliminate the duplications. Secretary Raymond then read the following questions:

Question—Several merchants may have extended credit to some who have been conscripted. If the party does not pay what redress have we?

Answer—"No redress at all while the moratorium is in effect," Secretary Raymond stated.

Opposing Freight Classification No. 17

Question—What is being done regarding the new proposed freight classification No. 17?

Answer—F. E. Hamilton, in charge of the traffic department of the association, explained in detail the proposal. This classification affects everybody, he said, merchants and consumers. In 1916 we took objection to No. 17 classification change. Since the question has been gone into with Boards of Trade and it has been agreed to accept the principle of high minimum rates. The matter was still being closely followed, strong objections being made. Mr. Hamilton has appeared three times before the Railway Commission to emphasize the protest of merchants.

H. R. Bowers North Battleford, urged the association to register a strong objection to classification No. 17. There were two or three western cities which he claimed would get the benefit. He did not object so much to the increase in rates as to the discrimination against the smaller towns and cities.

On motion of S. D. McMicken, Moose Jaw, and T. B. Dynes, Fleming, it was decided to do what was possible to prevent the new classification going into effect in its present form.

Question—Does this convention favor the greater use of copper coinage?

Answer—Many replied "No," but some considered it was a necessity at the present time. S. D. McMicken, Chas. Clerkson, Swanson; W. Gunn, Kincaid; J. S. Dart, Meota, spoke in favor of it. It was finally left to the discretion of each individual member.

Question—How would you proceed to turn your credit business into a cash business?

Answer—Nothing definite was proposed. "Keep a stiff back-bone and tell the customer you want cash," suggested Mr. McMicken.

Value of Sales' Companies

Question—What is your opinion of sales and sales companies? What impression do they leave in the community?

Answer—W. C. Paynter, Tantallon, said he would just about as soon have a fire. W. O. Robins, Kindersley, claimed where you got some one to do your advertising in a business-like way it was a good thing, but did not believe in let-

A view of Calgary, Alta., taken from the North Hill.

Main Street, Moose Jaw, Sask., looking from the Walter Scott block on the left, and another view of the same street looking north on the right.

ting someone come into the store to run everything and set prices.

President A. A. Evans recalled a sale he put on on shoes some three years ago. The advertising was done by a sales company. During that sale we sent shoes out from 100 to 150 miles from Outlook. People are still coming back to buy the same line of shoes. It increased our shoe business greatly. One man bought sixteen pairs. We fixed our own prices. The impression it leaves all depends on the merchant himself. We filled orders at less than catalogue houses and brought a great deal of business to the home town.

L. T. McLandress, Redvers, reported he put on a sale once following a fire and in nine days took in $4,200.

Question—Should there not be a law preventing firms selling so-called "memberships" to individuals unless the latter be given stock in the company selling such memberships?

Answer—W. D. MacPherson, Regina, replied the matter had been mentioned to the government, but at the present time there is no machinery to overcome this. A resolution, too, had been passed the day previously.

Mr. McMicken and Mr. Montcrieff moved that the executive take action with a view to having a law put on the statute books prohibiting the operation of firms selling "memberships" as these were not in the public interest. Carried.

Question—Why are oil companies allowed to sell by weight instead of by the gallon?

Answer—A number of members stated that if the merchants insist upon it they would have to sell by measure. The matter will be taken up through the Dominion board with the Dominion Government.

Question—What is the best method of extending credit? Should there be a difference in the cash and credit price?

Answer—S. D. McMicken—"I've got to meet the cash prices of the big stores in the city. When I sell on credit I get a note and charge interest."

N. J. James charges 5 per cent. interest on all credit accounts. He puts this right on the bill going out.

A. G. Montcrieff.—"There are a great many merchants in business in the West who shouldn't be in business at all. The credit business is all a matter of good bookkeeping. That is the simplest way of solving it."

Question—What is the reason that Saskatoon ordered this weather; it is now snowing? (Laughter).

Answer—Jas. Clinkskill, Saskatoon.—"We ordered this weather for the farmer. It will do thousands of dollars' worth of good." (Applause).

CONVENTION BRIEFS

The Saskatoon branch entertained the visitors at the Daylight Theatre, where the boys from "Over There" put on "Two Hours in France." It was surely two hours of interest.

* * *

One member read an advertisement from a Saskatchewan paper quoting "good" sugar at $6.50. Wonder how much the other kind would be? Probably a gift.

* * *

From individual talks among the merchants the following three problems seemed to be uppermost in their minds: (1) Cash or credit, or both? (2) Collecting accounts so that long credits could be cut down; (3) mail order competition.

* * *

The Calgary "Eye-Opener" has some competition—at least in name. It is the Swanson "Eye-Opener."

* * *

Past President Evans has left the retail counter to direct the plow and seeder. He is now a Saskatchewan farmer. He conducted the convention affairs in his usual efficient manner and has earned the respect and confidence of the members during his term of office.

* * *

J. C. Nichol, general merchant of Radisson, who will look after the retailers' licenses in his district after June 1, was among the visitors. Chas. Biggs, of Regina, was another.

* * *

Saskatchewan merchants are giving splendid direct help to the farmers in their districts. A. G. Montcrief, of Glenavon, for instance, has spent several afternoons on neighboring farms.

The West is planting a big crop this year. The retailers are going to do their best to see the harvest through.

* * *

Organizers W. L. McQuarrie and R. A. Anderson have motor cars to go after their new members.

* * *

Secretary Raymond doesn't say very much at conventions, but he is responsible for the putting through of an enormous amount of work just the same.

* * *

The luncheon given by the University of Saskatchewan on Thursday, under the direction of Dr. Murray, was one of the very pleasant events of the convention. The buildings and grounds were also inspected.

* * *

Strangely enough the mail-order question received little attention in the open meetings. Evidently the retailers' methods of aggressive merchandising are making better headway.

* * *

The representative nature of the convention will be seen from the number of Saskatchewan towns and cities that sent delegates.

PROVINCE WELL REPRESENTED

The register showed the following in attendance: Avonlea, T. A. Easson; Aylesbury, N. C. Wells; Assiniboia, R. Maze, W. P. Ball; Asquith, H. J. Baldwin; Allan, Geo. Forster; Beadle, N. J. Advertising That Pulls Trade

Hamilton Hardware Firm Makes Strong Appeal Through Advertisements in Local Papers—Get Fine Results—Suggest Seasonable Articles That Will Interest

THE Mills Hardware Company, Limited, Hamilton, has made a study of the science of advertising. They are enthusiastic believers in the value of printer's ink in order to get their message to their customers. Window displays are also made a very important part. Articles that are advertised in the newspaper are also on display in the windows. In this way one form of advertising backs up the other. A double volley is fired, as it were. Springtime is always a season for making an aggressive appeal through advertising. Advertisement reproduced herewith appeared as part of the advertising campaign of this company during the present spring. It brought fine results. Hardwaremen can perhaps find some timely hints for their own advertising by a perusal of the advertisement.

Typical Western views—Wheat shoulder high in the field near Winnipeg—A view in the C.N.R. yards at Winnipeg.

Hope Springs Eternal in the West

Eyes of a World With Food Supplies Greatly Depleted Look With Expectancy to Grain Fields of Canada—Conditions Augur Well for Big Production—West Will Have Great Purchasing Power With Another Good Grain Crop.

"I ESTIMATE the amount of wheat under cultivation in the West this year will be fully 25 per cent. more than last year," stated Professor T. Ferrier, head of the school for teaching agriculture to the Indians located at Brandon, to the representative of the MacLean Publishing Company, who made a special trip to the West to report the convention of the Saskatchewan branch of the Retail Merchants' Association of Canada. This in brief is the story of the hope that is centred in the West this year. It is a hope that springs anew each year, but with the food supplies of the world greatly depleted by the ravages of war all eyes are centred more than ever upon the grain crop. This estimate of the increased wheat crop corresponds well with other estimates that have so far been made.

This estimate of 25 per cent. more wheat under cultivation does not mean that the amount of land under cultivation has been increased by that much. Conditions last fall were not conducive to breaking up very much new soil. So far moisture has been adequate and with favorable rains during May and June the opinion prevails there should be a good crop in the West this year. If present promise materializes it is estimated the exportable surplus of wheat will be 350,000,000 bushels. It is of course too early to count the chickens, for many things may intervene between now and the time the crop is ready to harvest. All that can be said at the present time is that the promise is good. The greatest source of wealth for the West is wheat. Because of this factor hope springs eternal in the West—and the East for that matter as well—that the wheat crop shall be a good one each year. It is wheat that has made the West. It is the wheat that has furnished the wherewithal for the development of the industries of the West.

Area of Western Province

The area of the three Western Provinces of Manitoba, Saskatchewan and Alberta is 479,162,438 acres. Of this it is estimated that some 200,000,000 acres are arable land. It is estimated that but little more than 10 per cent. of the available land is under cultivation. When the West is thoroughly cultivated it will be seen that immense possibilities lie before the country. The future of the cities and towns of Western Canada will be measured by the size of the crops of the three prairie provinces.

The greatest part of the crop of the West is handled through Winnipeg, and it is small wonder therefore that Winnipeg has become such an important distributing gateway. On the basis of local trade figures it is estimated that the city of Winnipeg sells throughout the extensive area for which it is the economic distributing centre manufactured goods somewhat in excess of $175,000,000 annually. The purchasing power of the Western Canada market is directly correlated to the productive power of the country. With an exportable crop of 300,000,000 bushels of wheat valued around $2.20 per bushel it will be seen that the West may have something over $6,000,000 to spend as a result of the wheat crop alone. More and more the West is turning to diversified farming. Oats, barley, flax, livestock are important items also when the wealth of the West is being considered.

Purchasing Power of West

Some interesting figures were compiled by the Winnipeg Industrial Bureau showing the amount of goods shipped into the West for the years 1911 and 1912. There is an enormous interprovincial commerce being carried on as indicated by the figures gathered at that time. The following figures show the straight car lots of various commodities that were handled for the West through the various Winnipeg jobbing houses during the year 1911:

	Car Lots.
Agricultural implements	1,120
Wire nails, fencing	1,539
Cement	1,180
Furniture	1,090
Hardware	1,042
Sugar	972
Paper	868
Machinery	765
Carriages and wagons	712
Iron pipe	682
Stoves and ranges	584
Canned goods	571
Brick	539
Barrels	514
Sewer and drain pipe	667
Automobiles	436
Glass, window and plate	406

Transactions of Retailers

Compilations from the records of turnover of various Winnipeg jobbing houses for the year 1912 showed some interesting figures with respect to the amount

Main Street—the Financial District and a Glimpse up Notre Dame Street—Winnipeg.

of goods handled by Western retailers through the Winnipeg houses. Following are the figures:

Groceries	$15,000,000
Hardware	16,000,000
Agricultural implements and machinery	25,000,000
Dry goods and textiles	17,000,000
Iron and building trades	12,000,000
Boots and shoes	6,000,000
Automobiles	6,000,000

Signs of Prosperity

One of the signs of prosperity of any community is the increasing number of automobiles in use. There has been a great increase in the number of automobiles in use in the West even from a time so recent as the year 1911. As an instance of this development the numbers in the province of Saskatchewan might be cited. During the year 1911 records show there were 1,304 licenses issued in that year. Already for the first four months in 1918 the number of licenses issued exceeds 33,000. The increase in the number of automobiles in Alberta is keeping pace with that in Saskatchewan. For the first four months of the present year there were 21,080 licenses issued in Alberta as compared with 20,639 in the entire year of 1917.

Rich in Water Power

In these days when the development of electric power is becoming such an important factor in the industrial welfare of any community it is of interest to know that the water powers of the Western Provinces hold vast possibilities in this regard. It is estimated that in the Province of Manitoba alone there are some 7,000,000 horsepower capable of development. It is stated that the city of Winnipeg has in the Winnipeg river alone power sufficient to supply a city of 2,250,000 people. With such an abundance of water power the West is bound to loom large in industrial development in the years that are to come. It is small wonder that with such potentialties that "hope should spring eternal in the West."

Stephens'
REGISTERED TRADE MARK

Advantages of Handling a Paint with a Good Name

There are stronger reasons for handling Stephen's line **now** than ever before.

In these days, when the balance of supply and demand of raw materials is upset by war, many poor Paints are marketed, many dealers are tempted to handle Paint lines on which profits on **present** sales are a little in excess of well-established brands. But how about future sales? When good-will is spoiled and customers' confidence is gone, where will repeat orders go, as well as future sales in **other** lines?

Paints with a good name, and those that will unquestionably stand up to their reputation are the **only** paints that make profitable selling.

It will pay you to sell Stephens' Paint **now** as never before, because they are of the same old standard quality to-day as of yore. War conditions have not interfered with their famous quality in any respect.

Stephens' products will hold your business and build your business. Good profits. Get our agency proposition without delay.

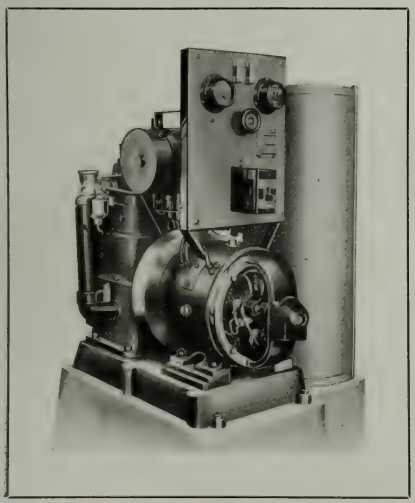
Better Lighting for the Farmer

Hundreds of farmers throughout Western Canada testify to the efficiency, convenience, reliability and low maintenance cost of **Ashdown Direct-Connected or Belt-Driven Electric Light Plants.**

The majority of these plants have been installed through wide-awake dealers who do not overlook their farmer customers, but see the profit in supplying their needs.

You can easily instal an Ashdown Plant. The wiring on the switchboard is all completed before the plant is shipped, and all you have to do is to connect two wires between the switchboard and storage batteries, and two wires from the switchboard to the house wiring. All wires are plainly marked and the instruction book gives you complete information about unpacking and setting up the plant, as well as full instructions for operating and taking care of it.

We use a four-cycle engine—practically the only one on the market. The price is the same as a two-cycle engine. We have found the latter unreliable.



Ashdown's Electric

Light Plants

Send for booklet that deals thoroughly with the construction, installation and operation of this plant. And, while you're writing, ask us about our Water Supply and Septic Tank Systems for rural homes. Built, as are our lighting systems, with a view to making operation practically no trouble to the farmer, these plants are easily installed and give you a neat profit.

WINNIPEG HARDWARE SECTION

"X" RADIATOR LIQUID "X"

A scientific method of repairing leaky radiators without metal or fire.

"X" IS a chemically pure liquid. It is poured into the radiator, circulates freely as part of the water and turns to a *metallic solid* over *every* leak, whether in the radiator, water jacket, hose, connections, motor head gasket or elsewhere in the cooling system.

This product makes a permanent repair—immovable under the roughest vibrations and capable of withstanding a pressure of over 500 pounds.

Only a small portion of "X" Liquid is required for a leak; that which remains in the radiator automatically seals all *new* leaks.

"X" Radiator Liquid neutralizes the corrosive elements in water. It does away with rust inside the cooling system.

Moreover, "X" Liquid prevents the formation of scale. The metal is kept clean and bright, the water passages free and clear, and the cooling system always efficient.

What "X" Will Do

1. *Seal all leaks permanently.*
2. *Eliminate possibility of future leaks.*
3. *Prevent rust from eating away radiator tubes.*
4. *Prevent formation of scale, thus keeping cooling system clear.*
5. *Keep the motor much cooler.*
6. *Work in alcohol or other anti-freeze solution.*

Don't put anything into the radiator that you are not *sure* about. Remember that "X" is a pure *Liquid*. It contains no cement, powder or glue. It cannot clog the cooling system.

Recommended by radiator makers and automobile engineers.

"X" does the work in about ten minutes. No need to drain the radiator, no bother, or fuss—nothing to take apart. "X" is guaranteed to make good or *your money will be returned.*

"X" Makes Every Cooling System Leakproof, Rustproof, Scaleproof

Anthes Cast Iron Self-Sinking Tank Heater

Every farmer, stock raiser or rancher who sees the "Anthes" Tank Heater on your floor will be convinced that it's the best for his business. He wants to buy the best, and you'll find it more profitable to sell him an "Anthes."

The Anthes Tank Heater is made of high-grade Cast Iron, and every Heater is tested and guaranteed before leaving the factory. Made in two sizes:

Dia.	Height.	Weight.
12 in.	22 in.	120 lbs.
14 in.	24 in.	150 lbs.

Descriptive circular sent on application.

Anthes Cast Iron Feed Cooker

Built for service and lots of it, the Anthes Feed Cooker is a necessary part of the equipment of everyone who has stock to feed. The cauldrons are of high-grade cast iron, uniform in thickness and smoothly finished inside and out. They come in 20, 30, 40, 50, 60 and 75-gallon sizes, Imperial measure, conforming to the new law which prohibits the use of wine measure.

In the 20 to 60-gallon sizes the jackets are of 16-gauge sheet steel, and in the 75-gallon size of 14-gauge sheet steel, reinforced at bottom with heavy band iron.

You'll be pleased with **your** margin of profit on this Cooker.

For sale by all leading jobbers — specify "Anthes" when ordering.

The Shortage of Coal is Critical

Relief must, will and is already coming through the most logical, practical and universal means,

Replacing the coal-consuming stove with an Efficient, Dependable and Serviceable

OIL STOVE

Every Hardware Man

will therefore see the vital reason for this season's phenomenal increase in the sale of Oil Stoves.

The Demand is Universal

The Dealers' concern is to select the stove that will best meet this demand—that will procure for him his full share of the big Oil Stove trade with the utmost satisfaction to both himself and his customers.

Hence This Wise Solution

Mission Oil Stoves

"The Stove that's Decidedly Better"

And Why! Listen to This

Mission Stoves are made of the finest polished steel with generous size reinforced top that will conveniently carry the heaviest cooking utensils. They are supported by cast iron legs firmly bolted to both the body and the lower shelf, thus giving construction much more rigid than could be obtained by using steel legs.

The Burner—the big feature of Mission Stoves—is known as the "Direct High Speed Type." This type of burner first converts the oil into a gas which burns with an intense blue flame, striking the bottom of the vessel direct. The result is remarkably quick cooking on a small consumption of oil.

The Glass Tank, from which the oil is conveyed through a brass-lined pipe, is equipped with a bail which also permits of it being used as a container for carrying the oil.

The Finish—Mission Stoves are handsomely finished in brilliant grey enamel, decorated with dainty colored flowers and gold striping, all nicely relieved with nickel-plated mountings.

Furnished With or Without High Shelf:

Numbers—72 (2-burner); 73 (3-burner); 74 (4-burner)

Too Good to Delay Ordering. Better Write Us To-day.

Fine Evidence of the Spirit of Progress

To know that at the recent convention of the Retail Hardware Men of Saskatchewan the word SERVICE was by no means neglected—to be told that it appealed as never before—that its discussion was in every way constructive, must at least be encouraging to the hardware trade of Western Canada.

BUT—to a house that has made SERVICE synonymous with its name such reports are doubly encouraging, serving as a stimulus to great efforts — AND never were greater efforts so necessary when determined to maintain the same high standard, no matter how trying and adverse the conditions may be.

THE CONVENTION HAS DONE GOOD. IT HAS HELPED US TO HELP YOU.

Painters Prefer it to any other Kalsomine

All dealers will eventually sell Dutch Kalsomine. We are as confident of that as we are of its superiority over any other Kalsomine on the market.

Painters say so—everywhere, users are actually demanding it and many write us after once using it, asking where they can **continually** get it.

That's **why we know.** Dutch Kalsomine is quick; it is permanent; it covers well with one coat; always jells to the proper consistency regardless of weather or climate; will not peel, crack or rub off upon a hard surface; is non-poisonous and gives plenty of time for spreading because it works "cool."

A line that is popular along with Dutch Kalsomine is Master Painters Wall Size, a safe, efficient and economical primer or first coater for interior surfaces of plaster, wood burlap, canvas, etc.

Display these two lines on your shelves, Mr. Dealer, and we will guarantee sales.

Write now for our proposition and have us explain to you all about these two fast-selling lines.

Dealers—Handle this Fence

YOUR success in the sale of fencing does not depend so much on your sales ability as on the fencing you sell. It's fence service—not price—that brings you customers. Ours is a fence of service—a fence of repeat orders. We have letters from dealers all over the Dominion substantiating these statements.

Peerless Ornamental Fencing

not only protects, but beautifies property as well. Every stay is made of strong, stiff wire that will not sag. Our fencing is made from galvanized wire and in addition, is given a coating of zinc enamel paint, thus forming the best possible insurance against rust. Peerless fence is easy to erect and will hold its shape for years to come. We also build a full line of ornamental gates.

Send for Dealers' Proposition

Get our literature showing many beautiful designs for lawns, parks, cemeteries, etc. Also ask about our farm fencing and gates.

Mail Order Houses Aided by Criticism

Portage la Prairie Hardwareman is of Opinion That Best Method to Adopt With Customers is to Pass Mail Order Houses by in Silence—Should Try to Let Customers Forget About Them

"DON'T advertise the mail order house."

This is the underlying principle that guides the actions of Alfred Babb, hardwareman, Portage La Prairie, Man., whenever the burning question of the mail order house has to be dealt with.

Mr. Babb has been in the hardware business a good many years and from experience he had had in dealing with his customers he has come to the definite conclusion that the more one complains about the actions of the big catalogue people in drawing trade from districts they do not help to support, the more business goes their way.

"You hear a lot of people talk about the mail order houses and how to meet their competition," he said to a representative of HARDWARE AND METAL, "but to my mind the best way is to endeavor as far as possible to have your customers forget about them while in the store. There's no use complaining because that merely aggravates the situation. There are many things we can sell just as cheaply, some cheaper, but then again there is competition we cannot meet as the big stores are selling as low as we can buy the goods."

This latter feature of the problem has made Mr. Babb an enthusiastic supporter of maintenance of price on the part of the manufacturer. In his estimation this is the only way to meet this particular situation.

"Many merchants," he claims, "put the blame on the jobber whereas it all rests with the manufacturer. There are certain lines including watches, safety razors, etc., where no one merchant gets any better show than his competitor, no matter how large he may be. On these we make a sure profit. Sometimes it may not be large but we have the satisfaction of knowing that none of our community's money is going out to the distant house where it will never come back again."

Does Not Pay to Knock

Mr. Babb claims it is not good policy to knock anybody's goods. "To sell goods successfully select those you know will give satisfaction, study closely the features and characteristics of them, know every talking point and you have one of the best methods of developing sales," is the way he puts it.

"By running down a line your competitor handles you divide the attention of the customer betwen it and yours and that makes the sale the more difficult."

Anybody in Portage La Prairie will tell you that the farming community around the town is the best in the entire West. It certainly looks good. This makes the farmers on the whole well-to-do and results in Portage drawing a substantial trade each year from the farmers. Building, as in most other places, is quieter than usual on account of advanced prices of materials, but other lines are taking the place of building materials in the hardware trade of this progressive town.

Trade in auto accessories has developed wonderfully during the past few years. Farmers particularly are buying autos freely.

"The automobile has become practically a necessity to the farmer," Mr. Babb states, "and is bound to play a prominent part in the future farm development of the Canadian West. Distances are so great that to get where he wants to go without loss of time the motor car is, I would say, a necessity."

Business generally in the Portage La Prairie district is splendid. As long as wheat remains around the $2.20 mark it will not be otherwise. Business men say that there never has been a real crop failure as far as the surrounding country is concerned and they don't anticipate seeing one this year. Wheat was in from 10 days to two weeks earlier than usual. It is well up in most fields and will be a good deal higher before this gets into print. There has been sufficient moisture to germinate the seed normally. With favorable rains the yield will be great. The price will do the rest, so the hardwaremen are not worrying.

No More Welsh Tinplate For Canada

Supplies from United Kingdom Are Required for War Purposes —Canadian Market Will be Left to United States—Big Decline in Production of Tinplate by Welsh Mills

ONE of the interesting developments in trade circles has been the stoppage of supplies of tinplate from the Welsh mills for Canadian consumers. By arrangement it has been agreed that the United States would supply the Canadian market. This move has been taken in the interest of conservation of the supplies in the United Kingdom for war purposes. In a recent issue of the *British Ironmonger*, the situation is discussed editorially and the reason for such an arrangement made plain. The article says:

"The tinplate trade usually has a grievance to nourish, and sometimes its grievances fail to arouse the sympathy of disinterested persons, but its latest trouble is serious enough to merit attention, inasmuch as it threatens the existence of the trade in important foreign markets. Presumably it was inevitable that the output of the Welsh mills should be drastically cut down during the war; possibly the interest of the country required that export licenses should be issued in such limited numbers as to leave only a flimsy remnant of the great overseas trade that British merchants and manufacturers had built up slowly and laboriously; but when last week it became known that arrangements were in course of completion by which the little that was left of our foreign tinplate trade was to be scrapped, the industry began to ask itself if such methods really were necessary for the successful prosecution of the war.

"In the market report of our issue of April 20, attention was called to a statement by the American Bureau of Foreign and Domestic Commerce that the United Kingdom would cease to ship tinplate to countries to which the United States were now exporting. Apparently this statement was not far short of the mark. The problem that faces our authorities is to ration the various consumers out of an output so largely reduced that last year, for instance, it was estimated at only 350,000 tons, compared with a production of 825,000 tons in 1913. The chief present user of tinplate is the War Office, and when its wants have been satisfied those of many other departments must be attended to. An effort has been made to systematize these allocations, and presumably it has been found that when all the Government requirements have been met there will be no tinplate left for the foreign markets. The British output is taken up in the allocations to the munitions requirements of ourselves and some of our Allies, the Board of Agriculture and Fisheries, the Ministry of Food, the Railway Executive Committee, the High Commissioners for Australia, South Africa, and New Zealand, the Crown Agents for the Colonies, and the Egyptian State Railways.

"It may be taken for granted, therefore, that South America and the East, with the exception of the British Possessions, will be supplied by the United States who will also take care of Canada, while France, Italy, Spain, and Portugal, as well as British Colonies and Possessions, except Canada, will be looked after by this country.

"While deploring the necessity of relinquishing its last remaining foothold in

(Continued on page 79.)

EDITORIAL COMMENT

EDITORIAL BRIEFS

SIGN in Windsor, Ontario: "Minerva Paints." We'd never suspect it of Minerva—more like something Mame would do, states the Boston *Transcript.*

* * *

BUILDERS' hardware keeps marching steadily onward and upward. An advance of 3 to 10 per cent. was recorded last week. People had better make up their minds to build now while the building is good.

* * *

D. G. KERR, Vice-President of the United States Steel Corporation, told the Senate Committee that unless large quantities of Brazilian ore can be brought in there will be a steel shortage. This is another one to ponder over.

* * *

IF THE Minister of Labor, who pounced upon the "Three Cobblers at Chatham" is looking for exercise, he might find something interesting in a few branches of the hardware trade—and he wouldn't need to dig very deep for information.

* * *

TIN has reached the price of $1.50 per pound. It is now almost in a class with real estate. Each bit of tin stands on its own merits. Sale is in the nature of a dicker. The seller gets as much for it as he can; the buyer hopes to get it as cheaply as possible.

* * *

EVEN the best customers of the United States steel mills find their importunities to get their orders for commercial steel slipped through are of no avail. Big business perforce must take a back seat in the face of a big war program.

* * *

RAIN has been quite general in the West and the strain has been relieved. This is but the first of a long series of thrillers between now and the time the crop is taken off. Life would not be half as interesting without the palpitations caused by the "grain situation" in the West each year.

* * *

EVEN the cigars are not being omitted in the preparations that the United States is making to take a good big meal out of Germany. Last week contracts were let to Springfield manufacturers to supply 250,000 cigars monthly for "use of the American expeditionary forces."

SOME steel plants that through the nature of their work cannot be converted into producing steel for United States Government account are expected to close shortly. In this way supplies will be conserved. It looks as though the United States cannot be deflected from her resolve to turn 100 per cent. production of iron and steel into war purposes.

CO-OPERATION TO GET TRADE

L. T. WALLS, writing in the *Winnipeg Free Press* recently on "A Basis for Western Trade Expansion," lays down the principle that if trade must expand in the Western Provinces there must be co-operation on the part of its business men. This co-operation he claims is necessary on the part of competitors. Business integrity and fair dealing at all costs are essentials of co-operation. He calls attention to the fact that one of the most regrettable facts of business life to-day is lack of candor between business men, especially if they be competitors.

Business organization on the part of individual firms is another important point dealt with in so far as expansion of Western trade is concerned. The most successful businesses of to-day are the best organized, he claims, and in such undertakings we find a high degree of departmentization or specialization.

The above are two very important fundamental principles for the expansion of trade in any country —co-operation and organization. Mr. Walls is interesting himself in this large western problem, and it is to be hoped that his energies will meet with success.

GERMAN CUTLERY PRICES

THE low prices at which the Germans, prior to the war, were able to sell the cheaper classes of cutlery were generally believed to be made possible only by the system of German subsidies to the maker. According to the English *Ironmonger,* experience has now shown that the foreign goods could be produced and sold at a profit without such a system and that, given similar commercial conditions, notably large and continuous output, and substitution of machinery for hand labor, Sheffield might have competed with Germany even in price.

The use of machinery in the lighter staple industries of Sheffield has made striking progress dur-

ing the past six months. Several razor making plants have been completed and, it is said, are capable of a huge output without the addition of skilled labor, as they can be manipulated satisfactorily by girls. The latest machines do all work on razors even to the process of grinding and finishing the full hollow ground blade. This authority also states that the use of machinery for forging and grinding table knives and forks is also making headway and another innovation is the grinding of blades of pocket knives. It is said that the reduction in cost which is effected by the newer methods has surprised those who have adopted them.

The wage rate in all branches of the cutlery trade in Sheffield has been further advanced by about 20 per cent. This makes advance upon the pre-war standard to about 60 per cent., in addition to which the workers' price list has been revised and some processes raised to a higher level. Employers are paying approximately 100% more than before the war. The wages represent only a portion of the increased cost which makers of cutlery are compelled to meet and it is said that distributors who are disposed to complain of selling prices do not take the foregoing matters into consideration. It is claimed by the makers that in view of the greatly increased cost in labor and material, the advances in cutlery have been very reasonable indeed.

After the close of the war, with the assistance of the new machinery which is now in use, it is altogether probable that English manufacturers will reach out for a larger share in the cheaper classes of goods which were formerly supplied by Germany.

SASKATCHEWAN RETAILERS MEET

CANADIAN retailers will no doubt read with interest the report of the convention of the Saskatchewan Branch of the Retail Merchants' Association of Canada which appears in this issue. In the West new ideas are the breath of life. Old methods must go by the board in the progress of events.

There is a sincere grappling with the problems which confront the retailer in various lines of business and we doubt not but that great good will result from the discussions and various actions decided up-

HARDWARE AND METAL was represented at this convention by a special staff representative who made the trip especially for the purpose of reporting the proceedings.

GREAT CALL FOR GASOLINE

AN estimate of the amount of gasoline required by the Allies places the figure at 1,000,000 gallons per day. The daily production of gasoline in the United States averages about 7,000,000 gallons.

Of the amount produced in the United States the local consumption amounts to about 1,400,000 gallons for commercial cars and 2,200,000 gallons for passenger cars.

The fuel administration of the United States is considering a plan to compel pleasure cars to use a mixture of one-half gasoline and one-half kerosene. It is believed that such a plan would save enough gasoline in the United States alone to supply the Allies with their requirements.

When the air fleet of the United States gets into full fighting swing the average daily consumption will be much greater than it is at present. Intimations have been made in these columns that a strong situation prevailed in the market for gasoline and all oil products.

With a greater use found for kerosene for passenger cars it will be natural to expect a comparative scarcity of that commodity. It would seem that prices would be due for an increase if such a regulation were put into effect, unless perchance the price were regulated.

TURPENTINE PRODUCTION FALLING

SOME speculation may be in order as to the cause for the recent firmness in the price of turpentine with a consequent advance in prices. In the primary market during the month of April prices advanced slightly over 10c per gallon. At the date of writing prices were holding firm at the advance.

New crop turpentine begins to be marketed about April 1 each year and the lightness of arrivals so far has been largely responsible for the advance in price. Early forecasts made it apparent that a decreased production was to be expected this year on account of the labor shortage in the South. This anticipated condition has been justified.

Receipts of turpentine for the three principal receiving ports of the South for the period April 1 to May 2 show that 7,114 barrels were marketed as compared with 15,992 for the same period last year and 17,848 barrels during the same month in 1916. As compared with last year it is apparent that production was about half in the first month of the producing season of that in 1917.

However, there are heavy stocks of turpentine in store in the Southern centres as compared with the same period last year. On May 2 of last year stocks amounted to 61,274 barrels as compared with 114,207 barrels on the same date this year. In 1916 stocks at the beginning of May amounted to 44,124 barrels and at the same period in 1915 there were 41,521 barrels.

The existence of heavy stocks carried over from last year may have a steadying effect on the market. On the cessation of hostilities when export can again start those close in touch with the turpentine situation quite generally anticipate higher prices.

EVENTS IN THE TRADE

BUSINESS CHANGES

North Cobalt, Ont.—Robert Lillie is closing his branch hardware store at North Cobalt.

Alida, Sask.—A. Renault, hardware and implements, has sold hardware business to R. Beriault and implement business to Gauthier & Donais.

The Westman Hardware, Limited, London, Ont., has been purchased from A. Westman by A. H. Neely of Toronto. Mr. Westman has conducted the business for nearly fifty years. Mr. Neely is a son of the late Robert Neely, manufacturer of Dorchester. The new firm will be known as the London Hardware Company, and will be under the management of Fred J. McLeod, who has been connected with the Westman Hardware for eleven years.

FIRE LOSSES

St. Catharines, Ont.—The Moore Hardware Company, Ltd., suffered damage from fire on the night of May 15. Cause of the fire is unknown. Loss is covered by insurance.

Carievale, Sask.—Shannon's hardware store at Carievale, Sask., was destroyed by fire on May 20. The store was located in a block of buildings which suffered damage to the extent of $75,000.

A fire at the Canadian Oil Company's refinery at Petrolea on May 6 destroyed some 2,000 barrels of gasoline and did other damage amounting to approximately $15,000.

PERSONAL

Edward Goodwill, general manager of the Thomas Davidson Manufacturing Company, Montreal, spent Monday and Tuesday of this week in Toronto on business.

INCORPORATIONS

Kerrobert, Sask.—Auto Accessories, Ltd., has been incorporated with headquarters at Kerrobert.

Oneida Company Given License

The Oneida Community, Limited, a corporation incorporated under the laws of the State of New York, has been granted a supplementary license under the laws of the Province of Ontario to use capital within the Province to the extent of $500,000.

Hardware Business Incorporated

I. W. Bennett & Son, Limited, have been incorporated under the laws of the Province of Ontario to carry on a general hardware, plumbing and tinsmithing business in the town of Gananoque. The subscribers to the memorandum of agreement of the company are Anne Eleanor Bennett, widow; George Kilborn Taylor, merchant; John James Davis, physician; Robert Tulloch, business manager; and Orma Lena Davis. The capital of the company is to be $50,000.

DEATH OF LANARK HARDWAREMAN

Peter White, who has conducted a hardware and tinsmithing business in the town of Lanark, Ont., for upwards of 40 years, died recently at his home in that town. Mr. White was born in the township of Bathurst 65 years ago. Death came suddenly while he was lifting some wood in his back yard.

ONTARIO NEWS ITEMS

Stewart & Lee, hardware merchants of Lanark, Ont., have added a motor truck for delivery purposes.

Rae & Thompson, hardware merchants of Winham, Ont., put on a demonstration of oil stoves on May 17 and 18.

Otto Schmidt, hardware merchant, Arkona, Ont., has added a repair garage to his hardware store and has taken on an agency for cars. He also carries a stock of tires and auto accessories.

St. Marys Hardware, Ltd., of St. Marys, Ont., has bought a one-ton auto delivery car and started to use same last week.

A. B. Dobbyn, formerly a traveller for D. H. Howden & Co., Ltd., wholesale hardware, London, Ont., has returned to his old trip during the absence of Harold McGuire, overseas.

PORT OF MONTREAL FOR FREIGHT THIS YEAR

The traffic in and out of the port of Montreal this year is reported to be devoted solely to freight and such special traffic as is deemed wise and essential. Such decision has been made, of course, by the Admiralty and for various reasons in order to conserve shipping and make the best possible use of all that is available and to expedite the delivery of supplies. At the present time there is a great deal of freight piled in the huge sheds here for transportation across the Atlantic. In addition to the large supplies sent out from Canada, at least of Canadian products, there are also large lots from the United States finding their way through the port of Montreal.

JOINS THE COLORS

Percy John Laird, who has been in the employ of W. C. Anthony, hardware merchant, Georgetown, Ont., for the past four years, left on Monday last to join the 2nd Depot Battalion at Hamilton. As a small token of the esteem in which he was held by his employers and fellow employees he was presented with a wrist watch from Mr. and Mrs. Anthony, and a wrist watch by his fellow employees. This makes the tenth employee of this firm to join the colors.

NEW BRUNSWICK NEWS NOTES

Richmond P. Graham, of St. John, who has continued the stove and hardware business of his father, Philip Grannan, M.P.P., since the latter's death, is now training for overseas service.

A wrist watch was presented to Fenwick W. Farris, who has enlisted in a siege battery, by the Nail Makers' Union of the Maritime Nail Works, St. John, of which he was a member.

Representatives of the Retail Merchants' Association have waited on the Moncton Common Council to ask that steps be taken to make Moncton a home-buying centre. They suggested that accommodation be provided where farmers could leave their rigs and their parcels while engaged in shopping. The proposal will be considered.

Thomas Nagle, promoter of the St. John Shipbuilding Company, has announced that his company has been awarded the contract for the construction of two eight-thousand-ton steamers and that preparations will be undertaken immediately to proceed with the work on the western side of Courtenay Bay, in St. John. The announcement was made last week that the St. John Dry Dock and Shipbuilding Co. Ltd., had secured a contract for two ten-thousand-ton steamers which would be built on the western side of Courtenay Bay at East St. John, this contract also including the completion of the dry dock for which almost the entire excavation had been made by the Norton Griffiths Company. A large wooden steamer in the Grant & Horne yards and a four-masted schooner in the Saker yards are nearing completion and will be followed by others.

TO ERECT HOUSES

The Plymouth Cordage Company has awarded a contract for the erection of seven four-tenement houses at Welland, Ont., for use of their employees.

PRESIDENT BOARD OF TRADE

J. E. Wildman of the Sheet Metal Company of Canada was unanimously elected president of the Winnipeg Board of Trade for the coming year. J. R. Ashdown, president of the J. H. Ashdown Hardware Company, was elected chairman of the board of arbitrators and also a member of several other committees.

OIL SHIPMENTS TO BRITISH COLUMBIA MAY CEASE

Intimation has been made that the United States Fuel Director is considering the issue of an order prohibiting the use of fuel oil in parts of the Pacific North-west in order to relieve the fuel oil shortage in California. Such action would materially affect the transportation interests of the West coast province. The C. P. R. and G. T. P. railways use oil-burning engines west of the mountains and also have their coasting steamers equipped with oil-burning apparatus. Such an order would be a drastic step so far as the West is concerned.

INDUSTRIES MUST BE MORE SELF-SUSTAINING

Major L. L. Anthes, president of the Anthes Foundry, Limited, Toronto, is of the opinion that Canadian industries will have to throw off their swaddling clothes and become more self-sustaining. Major Anthes was last week re-elected by acclamation as chairman of the Toronto branch, Canadian Manufacturers' Association, announcement of which was made in last week's issue. It was during the course of his address to the association that he asserted Canadian industry must become more self-contained. It was necessary that the industries of the country should be prepared to absorb the men who returned from the front after serving their country. He is of the opinion that greater efficiency can be secured from the man power of the country.

OBJECT TO TAX ON USED CARS

Dealers in second-hand cars in the Stratford district have made a protest to the Government against the tax of 10 per cent. on used cars. They have no objection to the tax on new cars, but think it unfair that they should have to pay a tax on second-hand cars when the private individual can buy and sell used cars without having to pay the tax.

COPPER PLANT FOR QUEBEC

The British-American Nickel Corporation is making provision for the construction of a nickel and copper refining plant at Deschenes, Que., which will cost over $1,000,000 for buildings and machinery. The contract calls for the completion of the job before the snow flies. It is understood that British and Norwegian interests are interested financially. The company has mines in the Sudbury district and it is anticipated that production of the refined products will be on a scale larger than that hitherto known in Canada.

was one of the commodities that should be investigated and the price fixed.

TO HOLD TRADE CONVENTION

Announcement has just been made that the Canadian National Exhibition, proposes to hold a trade convention as an added feature of this year's exposition. It is proposed to hold a series of sessions at which leading men of various industries will give trade talks. Opinions and suggestions are being sought from various trade organizations. The Canadian Bicycle Dealers' Association propose to hold the second annual convention of the association during the coming exposition. The proposed trade talks would fit in admirably with the plans for the assembly of the bicycle dealers. The Canadian Bicycle Dealers' Association has decided to meet in Toronto during the first week of September.

BRUSH COMPANY RE-ORGANIZED

The Gladstone Brush Mfg. Co., Ltd., 70 Lombard street, Toronto, has been reorganized for the purpose of manufacturing all kinds of sanitary wire brushes, dustless dusters, mops, automobile brushes, etc. The company state that they are now manufacturing a complete line of brushes and mops for all kinds of domestic and automobile use. The officers of the re-organized company are as follows: President, Geo. A. Marshall; vice-president, John V. Gray; Sec.-Treas., Chas. E. Bachly.

NO MORE WELSH TINPLATE FOR CANADA

(Continued from page 75.)

any market, the tinplate trade might conceivably reconcile itself to the new conditions if it were sure that the orders coming to this country from those Governments and Departments which have received allocations would be fairly dealt out to the trade, and that merchants would be given a legitimate share of them. So far as we can gather the system adopted is that the Priority Department of the Ministry of Munitions issues certificates in bulk to the various bodies to which allocations are made, and that these bodies then make their own arrangements for buying and shipping. Probably the familiar difficulty of obtaining export licenses will be found to have vanished."

HARDWARE LETTER BOX

Boot Stitching Machines

John Worthington, Minto, Man.—Kindly give the names of some wholesale shoe repair houses and also the manufacturers of boot stitching machines.

Shoe findings from Beardmore & Co., Toronto, and Independent Box Toe Company, Montreal. Boot stitching machines from United Shoe Machinery Company, Ltd., Montreal.—Editor.

CATALOGUES and BOOKLETS

Catalougue of Brooms and Brushes

The Boeck Company, Limited, Toronto, has issued a very attractive catalogue called Special Catalogue 55B which comprises the complete line of banister brushes, dusting brushes, carpet brooms, floor brooms, factory brooms, stable brooms and other lines. The catalogue contains twenty-four pages printed in colors. Reproductions of the brushes are made in colors corresponding to the colors of the wood in the brushes. The cover of the catalogue is embossed and printed in a very artistic design. Complete data with respect to their various lines of brushes are contained in the catalogue, which is for distribution to the trade.

Catalogue of Pneumatic Water Systems

The Empire Manufacturing Company, London and Toronto, has issued a catalogue called "The Empire Way," in which some of their styles and types of pneumatic water systems are illustrated and described. The history and operation of pneumatic water systems are described in addition to the other valuable information contained with respect to their line of water systems. In addition to the material on water systems some plumbing goods such as baths, sinks, laundry tubs, closets, valves, and other lines are shown. The catalogue comprises 56 pages and is well printed on heavy calendered paper.

War Time Separator Catalogue

The Sharples Separator Co's of West Chester, Pa., new catalogue strikes the keynote of all our activities in its opening paragraph:

"This country is at war and our main business is to **win the war.**

"Upon farmers and dairymen depends our food supply—we must **produce more** food stuff and **waste less** than ever before.

"Every ounce of butterfat and every item of time and labor must be saved. Hence the vital importance of installing a Sharples Suction-feed Separator, which saves **all** the butterfat (at least 10 pounds per cow yearly **over** any other separator) and which, because of its freedom of speed (it skims clean at any speed) and ease of cleaning (it has no discs), saves more time and labor than any other separator or method.

"Still—the purchase of a Sharples Separator is not less of a patriotic duty than it is a shrewd personal investment."

The catalog is a handsome sample of the modern printer's art, well illustrated and convincingly worded. The written message is strengthened by the reproduction of ten letters from agricultural colleges regarding tests made with the Sharples Suction-feed Separator.

WANT GASOLINE PRICE FIXED

The Toronto Board of Control proposes to ask the Dominion Government to fix the price of gasoline. One of the members expressed the opinion that it

NEW HARDWARE GOODS

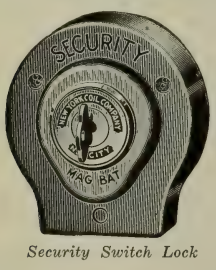
OFFERED TO CANADIAN HARDWAREMEN

NEW SWITCH LOCK

The New York Coil Company, 338 Pearl Street, New York City, announce a new switch lock for protecting the ignition circuit on Ford cars. The device consists of an especially strong alloy metal housing that completely covers the conventional Ford switch, the one model taking care of all previous (moulded) Ford switches, as well as the new 1918 all metal switch recently brought out by the Ford Company. The housing is secured by removing the nameplate on the moulded switch, or the complete metal covering on the new 1918 Ford switch, and applying the device over the present switch, securing same by three screws.

At the first turn of key, a cam forces out a pair of metal bars, which operate in slots on the inside of switch. These metal bars completely cover screw heads which it is claimed makes it impossible to remove the screws. These bars, it is stated, at all times cover the screw holes and do not operate at each turn of the switch. It is claimed, the entrance of dirt or foreign matter which might interfere with the working parts of the switch is avoided.

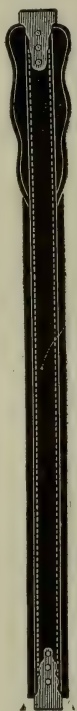
A bronze contact spring is secured to the cam, and when the key is removed, this bronze spring makes contact with the central member of the switch, which grounds or short circuits the four coils, making it impossible, it is claimed, to



Security Switch Lock

wire around or make an external connection to operate the ignition system, even in the event of a separate battery being employed.

A non-pickable barrel lock, approved type, is used, which is supplied with two keys, as well as all screws and fittings, so that installations may be effected, it is claimed, in less than five minutes' time, the only tool required being an ordinary screw driver. The switch lock is finished in rich enamel and nickel.



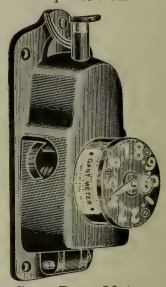
Never-Break Trace

NEVER-BREAK TRACE

R. R. Kinread, 286 Bannatyne Ave., Winnipeg, is placing on the market the "Never Break Trace," which he is offering to the trade with a five-year guarantee. He points out that this is made of seven-ply special fibre belting centre, over which is folded a special tanned chrome leather, and faced with one layer No. 1 quality harness leather, stitched through with best quality waxed thread. This trace is made in 1½ inches, 1¾ inches, 2 inches and 2¼ inches wide, 6 feet 4 inches long. The manufacturer offers to supply every dealer a sample trace with each order, showing how it is constructed, thus enabling the dealer to show his customers. The manufacturer claims that this trace will not stretch, and therefore the stitching will not break. He also claims it will wear twice as long, haul double the load, and give the best satisfaction.

HEAVY DUTY ROPE METER

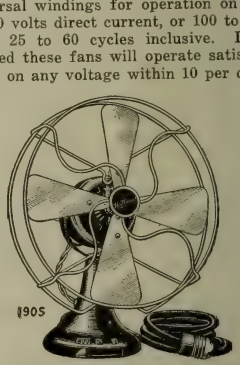
The E. M. Gant Mfg. Co., Ethridge, Tenn., have recently added to their line of rope meters "A Heavy Duty Machine" that it is claimed will handle all sizes of rope from ¼ inch to 2 inches in diameter. It is asserted this machine is somewhat radical in construction as it allows all sizes to be handled through the same opening. It is claimed the idler is self-adjusting, with a V-shaped grooved pulley that holds all sizes of rope to its capacity exactly in the centre of a small-faced spiked wheel that is connected to a train of gears in the gear box above. This notched wheel only touches the large part of the rope and rolls down it as the rope is drawn through the machine. The machine registers up to 100 feet; however, any number of feet can be measured. The idler and driving wheel are both ball bearing. It is asserted this machine handles rope accurately and rapidly, and without the usual drudgery attached to the sale of rope in large or small quantities.



Gant Rope Meter

IMPROVED ELECTRIC FAN

The Factory Products, Limited, Toronto, is introducing to the Canadian trade an improved design of the "Northwind" electric fan motors. These fans are made in the 8-inch and 10-inch oscillating styles and are offered with 110-volt universal windings for operation on 100 to 120 volts direct current, or 100 to 120 volts, 25 to 60 cycles inclusive. It is claimed these fans will operate satisfactorily on any voltage within 10 per cent.



Northwind Electric Fan

of their nameplate marking. The 10-inch Northwind oscillating fan is also offered for operation on direct current storage battery systems, such as the usual farm lighting plant with an effective voltage of from 30 to 35 volts. Some of the points enumerated by the manufacturers of this article are: four-blade fan; double-ring; steel-welded guard with front wires; two speeds; full swivel-trunnion feature; convertible desk-bracket base; four base rubbers; shaft of 3-16-inch steel; weight, net 4 pounds, packed in individual carton for mailing.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

THE uncertainty of further supplies of manufactured steel is engaging the close attention of dealers, and whereas generally conditions may be said to show little variation from those of the past few weeks, there is a growing feeling that stocks now dwindling will not be replenished as rapidly as might be wished. Increasing demands for war work are being constantly made on the mills, with the natural result that commercial requirements must go into the background.

Rumor has it that the War Trade Board at Ottawa is considering price-fixing, though how this would work out on commodities not produced in this country is a question. However, there is no disposition to worry over the outlook, as the steel and iron business to-day is virtually under Government control, with the restrictions ruling on distribution, etc.

The smaller lines of steel shelf hardware will probably be big sufferers in another year of war. One large manufacturer of steel products in the United States, who supplies a large proportion of Canada's trade in these lines, reports only a sufficient amount of steel on hand to take care of about one-third of their commercial requirements. This is being made up now and when completed they will devote their entire plant to war work.

The metal markets during the week show little change. Tin is in an acute position as regards supplies, and though some declines have been registered in both London and United States markets, this has not been reflected here as yet. Lead shows a little strength in a ½c advance in price, though the movement for commercial purposes is very light.

There have been quite a number of changes on miscellaneous lines during the week, the items affected in each case recording advances over former quotations. Some of the lines on which new prices have been named are food choppers, pump leathers, lamp and lantern burners, trip gongs, pipe wrenches, sash hangers, planes, screwdrivers, plumbs and levels and sad irons. Business is reported good for all seasonable lines such as garden tools, oil stoves, screen doors and windows, etc.

MONTREAL MARKETS

MONTREAL, May 23.—The price changes this week have not been numerous but there have been several of some importance. Wire nails have advanced 10c per keg. Anvil tools are up 10c a pound to 45c. Drugget pins, bread mixers, standard scales, Heller's rasps, expansive bits and food choppers are all higher. There are firmer tendencies in some iron and steel products. There is greater difficulty in getting supplies of some lines and thus far substituting has been somewhat satisfactorily resorted to. Screws are very hard to get and it will not be surprising if an advance follows shortly. A heavy demand has been made on oil stove stocks, refrigerators, and for garden tools the demand has been almost unprecedented. Replenishing stocks are now coming forward. Altogether there has been a fairly good week, and river navigation is helping materially. Some lines of accessories are higher this week also.

Drugget Pins Higher; Corn Shellers Arrived

Montreal.

DRUGGET PINS, CORN SHELLERS.—The advance this week in the price of drugget pins is quite considerable. Half inch sold before at 80c per gross are now 95c; ⅝-inch, which were 90c, are now $1.40, and ¾-inch are now $1.75, the previous price being $1.20 per gross. A supply of corn shellers has been received, the first to hand for some time.

Bread Mixers, Rasps, Anvil Tools Up

Montreal.

BREAD MIXERS, RASPS, ANVIL TOOLS.—Advances have been made in the price of bread mixers. The number 4 size is now worth $38 as against the former price of $32.50, and the number 8 which were selling at $37.50 are now $43.50 per dozen. Anvil tools are advanced to 45c per pound, the former price being 35c. Heller rasps are firmer, the advance being represented in a change of the discount from 62½ to 60 per cent.

Standard Scales Up; Also Simplex Nails

Montreal.

SCALES AND NAILS.—Two lines are marked up this week and the first of these, standard scales, have taken a discount of 20 per cent., the former discount being 25 per cent. Simplex roofing nails also have advanced, the old price was $17 per keg and the revised quotation calls for a price of $20 per keg.

Expansive Bits Up; Also Food Choppers

Montreal.

EXPANSIVE BITS, FOOD CHOPPERS.—There has been a recorded advance in the price of Clark's expansive bits. This is about 10 per cent. over the old price. The same advance applies to a line of food choppers made by the P. S. & W. Co. Other lines of this make are suggested as taking a similar advance, but these lines were not available at time of writing this report.

Tool Boxes, Wrenches, Valve Lifters Up

Montreal.

TOOL BOXES, AUTO ACCESSORIES—Various advances have been made in the prices on automobile tool boxes. These average all the way from 20 to 30 per cent. The position of raw material used in making these is such as to make the market firm, and prices are consequently very strong. Perfect handle valve lifters have advanced about 15 per cent. over the old lists of $1.32 for lots of 24; $1.44 for lots of 6, and $1.53 for single lifters.

Radiator Ornaments Goggles Higher

Montreal.

AUTO ACCESSORIES.—Among the accessory changes for the week are those of advances for radiator ornaments. Several lines are affected, including Doctor's Cross, Wheel and Wings, Rotary Club, and others. In lots of 24 the old prices were $1.15 each, and the new are $1.44. Lots of six sold at $1.25 each before, and now are $1.57, while the former trade price of $1.33 is advanced now to $1.67. To arrive at the Canadian list on other ornaments 25 per cent. is to be added to the American list. Certain assortments of goggles are higher and the advance is from 10 to 12 per cent., no straight percentage applying.

Instrument Boards, Flashlights Go Higher

Montreal.

INSTRUMENT BOARDS, FLASHLIGHTS.—Johnston instrument boards for use on sedans and couplets are marked higher. The former trade price of $1.50 has been advanced to $2 each. Usual discount applies. Certain flashlights of "Eveready" make are up, No. 6901 with a former trade price of 87c being now 97c. The same change applies as well to Nos. 6903 and 6904.

Stoves, Refrigerators And Wares Are Firm

Montreal.

STOVES, REFRIGERATORS, WARES —For ordinary ranges and stoves the sale is not large, but this is fair. Prices are naturally firm. The season for oil stoves is developing fast and a large number are being sold to the retail trade, particularly in the country. Prices are firm with the material entering into their construction so high. For refrigerators there is a big demand just now and the season is proving a good one. Prices are held unchanged. The season for enamelled wares should soon prove to make the demand active; in the meantime it is reported good.

Oil Demand Good; Gasoline Price Steady

Montreal.

OILS AND GASOLINE.—There is an especially active demand for oils just now, more particularly those used for lubricating purposes on the farm. The opening of navigation has stimulated sales and refiners are more than busy shipping out orders to various points. Coal oil sales are maintained on a seasonable basis and prices are held unchanged with Royalite selling at 19c and Palacine and Electroline at 22c per gallon. Motor gasoline sales are heavy and the price is held unchanged at 34c.

Continued Strength Marks Soft Fibres

Montreal.

ROPE AND CORDAGE.—The market is without feature this week excepting that soft fibres continue to rule with a very strong undertone. Advances have been made several times in the price of these and the end does not seem to be in sight yet. The ordinary rope situation is steady and prices are held without any change whatever, pure manila being based at 39c per pound; British manila at 33c and sisal 27½c per pound. There is an active enquiry for binder twine, orders now being sent forward to distribution points for further delivery later.

Wire Nails Advanced To Five Thirty-Five

Montreal.

WIRE AND NAILS.—Of interest this week is the announcement that wire nails have advanced 10c a keg, making the base price now $5.35. The continued strong position of all steel products and the increasing difficulty of securing supplies from the usual sources is responsible for this. Stocks are reported to be in fair shape and all sizes are still available. With the outlook for wire rods none too promising this revision may be only the prelude to a still further advance. Cut nails are held on the unchanged basis of $5.60 and smooth steel wire still sells on a base of $6.25 per 100 pounds.

Business Normal For Iron And Steel

Montreal.

STEEL AND IRON.—The usual amount of trading as obtaining for this season of the year prevails now and prices, while unchanged, are very firm. The features are few, and with the outlook for fully maintained prices and the possibility of revisions being made upward at any time, the situation is quite unchanged from last week. Prices are as follows:

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Galvanized Sheets Firm; Black Unchanged

Montreal.

SHEETS AND PLATES.—The firmness of the steel markets is well known. As pointed out last week certain gauges of black sheets were to be had at favorable prices and this condition still obtains. As for galvanized sheets these are firm, and one jobber reported a readjustment of his prices to higher levels. The demand is fair although without any marked increase of note. Prices hold with the following list covering the market here.

BLACK SHEETS—		100 lbs.
10 gauge	$9 50	$9 00
12 gauge	9 25	9 65
14 gauge	7 00	9 00
16 gauge	7 10	9 15
18-20 gauge	7 25	9 25
22-24 gauge	7 75	9 60

28 ga.	9 65
26 ga.	9 25
22 and 24 ga.	9 05
20 ga.	8 85
18 ga.	8 85
16 ga.	8 70

Demand Light For Lead Products

Montreal.

LEAD PRODUCTS.—The demand for lead products, while seasonable, is not very brisk. Lead bends and traps, lead wool and lead pipe are firm, but without any change. Plumbers are doing some repair work but in a general way there is nothing of an extensive nature being undertaken. The firmness of all grades of solder rules still and at the high prices asked there is naturally little trading done.

Lead pipe, lb.	....	0 14
Lead waste pipe, lb.	....	0 15
Lead traps and bends	Net list	
Lead wool, lb.	....	0 12
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	....	0 11½

45-55	....	0 63¾
Zinc sheets, casks	....	....
Do., broken lots	....	....

Heavy Cast Iron High; Others Held

Montreal.

OLD MATERIAL.—The market is ruling somewhat quiet still. Of course there is a good demand at high prices for number one machinery cast. For this as high as $40 per ton is being paid where the grade is select, but the market averages around $36 to $37. Anyone having a superior lot to dispose of can usually secure a good return. For lead, brass, copper, old rubbers, etc., the demand is fair and prices are held without any change.

Tea lead	$ 0 05	$0 06½
Heavy lead pipe	....	0 07
Yellow brass	0 12½	0 13½
Red brass	0 22½	....

Old rubbers, boots and shoes	0 08	0 08¼
Overshoes, lumbermen's rubbers boots	0 07	....
Bicycle tires	0 04¼	....
Auto tires	0 04½	0 05

Copper Unchanged; Tin Still Holds Up

Montreal.

INGOT METALS.—The position of the markets is one with a general firmness of undertone for the most part. Tin is held in its strong place and offerings are practically nil with some asking at a higher figure than that quoted. Copper is unchanged.

COPPER.—The meeting in the States this week is being awaited with interest

when the price to be fixed by the government will be arrived at and announced. Some think it will rule with little change from the existing price while others look for an advance. Here trading is done on the basis of 29c-30c per pound.

TIN.—Some tin was offered here and for this around $1.50 was asked. This is said to be an unreasonable price, even with the scarcity so great. Few lots are available on spot and the position with regard to import licenses is tight and unchanged. Prices rule at $1.15 to $1.30 per pound according to grade. New York reports a slightly easier tone.

SPELTER.—Demand for spelter is not very great. The market here is steady and it is thought this will be quite unchanged for some time. Small traders are offering odd lots at favorable prices. Demand outside is said to be light. Prices here 10c to 10½c per pound.

LEAD.—The position here is one of steadiness. Outside in the United States markets there is a firm undertone with trading normal. Price here 9½c-10c per pound.

ANTIMONY.—There is a firm basis on this metal and enquiry has improved. Stocks are just fair. Outside points report a dull market. Prices here are from 15c to 16c per pound.

ALUMINUM.—The market is one characterized by small business and the conditions are unchanged. Prices here are based on 50c per pound.

TORONTO MARKETS

TORONTO, May 23.—Price changes have been numerous during the week and the tendency in all cases has been towards higher levels. Among the lines affected are valve leathers, lamp burners, Mrs. Potts' sad irons, food choppers, pipe wrenches, planes, screw drivers, levels and marking gauges. Trip gongs are also higher, along with sash hangers, Nevada ware, hemp wrapping twines and chains for bicycle padlocks. Difficulty in getting through supplies is increasing and shows little chance of improvement. One large manufacturer of steel hardware in the United States has intimated that he has sufficient material to make up about one-third of his commercial requirements for next year. This he is going to manufacture now and then turn the plant over entirely to war work. Business is reported good in seasonable lines.

Pipe Wrenches Higher; Corkscrews Up

Toronto.

PIPE WRENCHES, CORKSCREWS.—An advance has been made in prices applying on Truro wrenches and whereas not of great volume shows the trend with practically all lines of steel—upward. New prices now being made are: 8-inch, $14.20; 10-inch, $16.75; 14-inch, $22.00; 18-inch, $31.50; 24-inch, $45.70 per dozen.

A new price has been named on pocket corkscrews, the small type having a wood protector, No. 04, of 85c per dozen, which represents an advance.

Planes, Levels, Locks Gauges All Go Up

Toronto.

PLANES, LEVELS, LOCKS, GAUGES.—New discounts have been issued on the Stanley line of planes, screwdrivers, marking gauges, plumbs and levels, which provides for an advance of about 5 per cent.

Cabinet locks are also higher, the present scale of prices being about 7½ per cent. up on those previously ruling. Fraim padlocks have also been marked up about 5 per cent.

Advance Made In Food Choppers

Toronto.

FOOD CHOPPERS, NEVADA WARE.—A further advance has been made in prices applying on Universal food choppers of about 7½ per cent. The present scale of quotations range as follows: No. 0, $17.75; No. 1, $21.50; No. 2, $27.00; No. 3, $35.00 per dozen.

A 5 per cent. advance in Nevada ware has become effective in some quarters during the week. A very fair sale is reported.

Lamp and Lantern Burners Up

Toronto.

LAMP, LANTERN BURNERS, CHAINS.—A substantial advance has been recorded in lamp and lantern burners during the week and new prices now ruling follow: Banner lamp burners, No. 0, $1.50; No. A, $1.50; No. B, $1.85 per dozen; Security lamp burners, No. A, $1.80; No. B, $2.25 per dozen; Gallery lamp burners, No. D, $3.80 per dozen. Lantern burners, No. 1, $1.20; No. 2, $2.00 per dozen.

Chains for bicycle padlocks have undergone revision upward, present price being $1.25 per dozen.

Pump Leathers Go Up Brush Hooks Too

Toronto.

PUMP LEATHERS, BRUSH HOOKS.—Pump leathers have reached new high levels in price and are being quoted on the following basis: Valve 2½-inch, $1.10; 3-inch, $1.35; 3½-inch, $1.85 per dozen; cup, 2½-inch, $1.45; 3-inch, $1.85; 3½-inch, $2.65 per dozen.

Handled brush hooks at $15.75 per dozen have also reached a higher selling basis.

New Prices Named on Hog Ringers

Toronto.

TRIP GONGS, HOG RINGERS.—An advance is provided for in new prices issued on trip gongs during the week. These have remained firm for some time past but new stock arriving is being invoiced at higher figures, which has resulted in the following quotations being named: 5-inch, $1.80; 7-inch, $3.70; 9-inch, $7.55 each.

Hog ringers have also gone up, quotations to-day being named at $2.60 per dozen for No. 2.

Potts' Irons And Sash Hangers Go Higher

Toronto.

POTTS' SAD IRONS, SASH HANGERS.—New prices have been issued on Mrs. Potts' sad irons which represent a stiff advance over quotations previously ruling. The No. 55 set, polished, is being quoted at $2.30 per set, and the No. 50, nickel plated, at $2.40 per set, with a rebate of 10c per set in full case lots.

Another line to undergo revision is sash hangers, and new prices are at higher levels than those formerly ruling: No. 1716 is now being quoted at $1.55 and No. 18 at $1.75 per dozen pairs.

Stoves and Ranges Unchanged; Enamelware

Toronto.

STOVES, RANGES, ENAMELWARE.—There has been no change in the situation on stoves and ranges during the week. Business is rather light at the present time and supplies of raw material are becoming increasingly scarce. What the outlook is for a period six or eight months, or even three months hence is hard to forecast. Summer lines are moving out very freely though with these there is added difficulty noted in getting through supplies. Prices on all lines have held firm and unchanged.

Enamelware shows no interesting features during the week. A very satisfactory volume of trade is being conducted and prices hold firm.

Oils and Gasoline Enjoying Good Sale

Toronto.

OILS, GASOLINE.—The heavy demand for lubricating oils continues and orders are going forward very freely. Prices have held firm at advances recorded last week. The sale of coal oil has been very satisfactory and business shows no falling off from the heavy demand prevailing throughout the winter months. Oil is being used extensively as a fuel at the present time and will be used throughout the summer. Prices are unchanged, Royalite selling at 18c and Palacine at 21c per gallon. Gasoline continues to move freely and prices show no revision at 33c per gallon.

Nails Hold Firm; Tinned Wire May Advance

Toronto.

NAILS, WIRE.—The position of wire nails remains extremely firm but deliveries are being effected satisfactorily. This condition is different from that prevailing in the United States, where indications are that great difficulty in completing orders is being experienced and shipments are now going forward on a pro rata basis to the dealers, with

an element of uncertainty regarding further supplies noticeable. Wire nails are still being quoted at $5.20 base per 100 pounds and cut nails at $5.65. Wire is very firm and tinned wire particularly so. The exceedingly high price of tin may result in revisions upward on tinned wire being made necessary. The base on smooth steel remains unchanged at $6.25 per 100 pounds base.

Fair Supplies Iron and Steel Available

Toronto.

IRON AND STEEL.—There are indications that fair supplies of iron and steel are available for present demands, which, while not heavy, represent a very good volume of trade. Prices have held unchanged during the week on the following basis:

TORONTO—		Per 100 lbs.
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65
Angle base	....	5 75
Horseshoe iron	....	5 50

Norway iron	11 00	13 00
Toe caulk steel	....	6 25
Sleigh shoe steel	....	5 50
Band steel, No. 10	....	5 75
Do., No. 12	....	6 00
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Corrugated Sheets Steady; Eavetrough Unchanged

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—Prices ruling on corrugated sheets and other lines of manufactured sheet metal rule with a very firm undertone though no changes during the week are provided for in quotations shown below.

Eavetrough and conductor pipe rule firm also, with only a limited amount of trading being done in these commodities. Prices shown in current market quotations are unchanged.

TORONTO—	Per 100 Sq. Feet Galvanized	Painted
No. 28 gauge	$ 8 25-$ 8 75	$6 75-$7 25
No. 26 gauge	9 00- 9 50	7 75- 8 25

No. 20 gauge	19 00-	16 50
No. 18 gauge	23 00-	20 00

Discount 7½%.

Prices on Sheets Remain Unchanged

London.

SHEETS, PLATES.— Uncertainty seems to be the predominating element in respect to further supplies of sheets. In some quarters, advices are to hand that contracts placed prior to certain dates will be filled, while other reports indicate contracts will be acted upon only when Government needs have been taken care of. If the latter prove the rule, it will mean that little can be expected in the way of delivery for some months. owing to increasingly heavy demands being made for war work by the Government. That conditions in Canada may undergo regulation to some extent by officials at Ottawa seems within the realm of possibility though local dealers know little in this connection as yet. Prices are unchanged as follows:

BLACK SHEETS—		Per 100 lbs.	
10 gauge	....	$9 50	$12 00
12 gauge	7 15	9 60	10 00
14 gauge	7 20	8 15	8 40

3/16-inch plate	....	9 10	10 25
¼-inch boiler plate	....	9 00	10 00
GALVANIZED SHEETS—			
10¾ oz.	$9 00	$9 25	$9 50
U.S. 28	8 70	8 95	9 20
U.S. 26	8 40	8 65	8 90
22 and 24	8 25	8 50	8 75
16	7 95	8 20	8 45
14	7 85	8 10	8 35

Wrought Iron Pipe Firm; Boiler Tubes Steady

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—No new developments have been reported in respect to wrought iron pipe during the week. Shipments of raw materials are not coming through in any too liberal quantities and production consequently is limited. Only a fair volume of trade is being transacted. Prices remain unchanged at figures shown in current market quotations.

There is nothing new to report in respect to boiler tubes, conditions prevailing during the past few weeks showing little change. Prices shown below are unchanged.

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Manufactured Lead Products Steady

Toronto.

LEAD AND ZINC PRODUCTS.—Manufactured lead products show no change during the week. The primary on lead is holding firm but with the small demand for plumbing lines, little change in the situation as regards the manufactured products is expected. Solder, which has been enjoying a period of advancing prices, shows no change for the week and quotations given below are firmly held.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼

Solder, wiping, lb.	0 54½	0 56
Solder, wire, lb.	0 65	0 70
Zinc sheets, per lb.	....	0 26

Old Materials Are Very Quiet

Toronto.

OLD MATERIALS.—Business in old materials is relatively quiet at present and dealers are apparently carrying little stock other than that required to supply the needs of regular customers. The feeling of uncertainty that has characterized this market for some weeks is still a feature of existing conditions. No price changes are recorded, but slight uneasiness is reported. Machine cast iron is strong and in good demand, but the nominal quotation of $31 is the price given by dealers here. Some dealers are looking forward to higher prices on scrap copper.

Tea lead	$ 0 04½	....
Heavy lead pipe	0 07	0 07½
Yellow brass	0 12	0 13
Red brass	....	0 21

Binder Twine Moving; Cordage Unchanged

Toronto.

CORDAGE, TWINE.—Binder twine orders are now being shipped forward to dealers by the manufacturers and indications are that ample supplies will be available for all crop requirements. Early shipments are advocated to overcome any transportation difficulties which may arise.

There has been no change in the cordage situation whatever during the week. The demand is light and prices firm and unchanged at 39c base for pure manila; 33c base for British manila and 27½c base per pound for sisal.

Beaver and Atlas hemp twines have recorded an advance of 10 per cent. during the week.

Waste Moving; Oakum Light Demand

Toronto.

WASTE, OAKUM.—A good movement of waste continues to be manifest and manufacturers are being kept very busy. Oakum is in comparatively light demand when business of a month or so back is considered, but a nice volume of orders is being handled now. Prices are unchanged at figures shown in current market quotations.

Tin Holds Steady; Lead and Spelter Firm

Toronto.

INGOT METALS.—Prices on tin have held firm and unchanged during the week. No relief from the acute shortage has been felt and supplies are gradually reaching the vanishing point. Lead shows a little strength during the week but there is very little movement. Spelter held firm, but there are few transactions being effected. Copper remains unchanged with supplies ample.

COPPER.—Requirements for essential war purposes are being taken care of, but little interest is shown in domestic consumption which has reached a very low point. Some interest in whether revised prices will be named on copper in the United States is shown, but it is felt the change under consideration would have little effect on prices here.

Locally quotations are around 29c to 30c pound.

TIN.—Tin has held steady on the local market at about $1.50 per pound, though declines in both London and United States markets have been reported. The acute and uncertain position of tin is still pronounced. Local dealers report the demand restricted to essential requirements, only those in urgent need getting any supplies.

SPELTER.—Little interest is manifest in this metal, and an unchanged position rules at primary points. Buying is normal, but that is within restricted channels. Prices hold at around 9c per pound.

LEAD.—A slightly firmer tone has been noticeable in lead locally during the week, prices now being named at 9¼c to 9½c per pound, ½c up. Outside of war requirements there is practically no lead moving, domestic consumption being at very low levels.

ALUMINUM.—There is little demand and the market holds unchanged at prices ruling for some time past, viz., 50c per pound.

ANTIMONY.—Quiet prevails in this market and there are no outstanding features to report. Quotations at primary points hold firm and the same condition rules here, prices locally being about 16c per pound.

PIG IRON.—There is nothing new in pig iron and no predictions as to the future are offered. Output of iron is being absorbed as quickly as produced, but indications are that this is below requirements.

LONDON MARKETS

LONDON, May 22.—The markets during the week have not been so very active in the matter of revised prices, though new quotations have been issued on one line of oil stoves and heaters in addition to hammock chains, hay and manure fork heads and solder. Business is reported as extra good.

Paint still continues a good seller. Lawn mowers, garden tools, fishing tackle, oil stones and auto accessories are also in big demand.

Splendid Sale Lawn Mowers; Prices Firm

London.

LAWN MOWERS, GRASS CATCHERS.—A splendid sale of lawn mowers is manifest and jobbers are well satisfied with the volume of trade being handled. Prices have held firm and unchanged, the discount from lists shown below remaining at 40 per cent.

Lawn Mowers—Daisy, 12 in., $8.25; 14 in., $9.00; 16 in., $9.70 each. Star, 14 in., $10.70; 16 in., $11.40 each. Woodyatt, 14 in., $11.80; 16 in., $12.50; 18 in., $13.20; 20 in., $13.90 each. Empress, 14 in., $15.25; 16 in., $16.00; 18 in., $16.65; 20 in., $17.35 each.

Grass catchers are also moving out quite freely, prices holding as follows for those with galvanized bottom and canvas sides: Medium weight, $16 ga., $15.50 dozen; heavy, 10 ga., $20.00 dozen.

Oil Stoves and Heaters Highers

London.

OIL STOVES, HEATERS.—New prices have been named on one line of oil stoves and heaters during the week, present quotations representing an advance over previous figures. The prices which rule for the Hot Blast oil stoves are $14.43 dozen, and for the Hot Blast oil heaters, $28.86 dozen.

Fork Heads Up; Shovel Handles Too

London.

FORK HEADS, SHOVEL HANDLES.—New prices have been named on hay and manure fork heads only at higher levels than former quotations and now read as follows: Hay fork heads, 3-prong, $4.75 dozen; manure fork heads, 4-prong, $6.75 dozen; 5-prong, $11.00 dozen.

In reporting an advance in D spade and shovel handles in the May 11 issue, a price of $5.00 per dozen was given and this should read $6.25 per dozen. The advance was 25 per cent. on the old price of $5.00.

Scythes, Snaths, Gross Hooks Holding Firm

London.

SCYTHES, SNATHS, GRASS HOOKS.—A very firm position is held in the markets on scythes, snaths and grass hooks. Some interest in these lines is becoming manifest though the movement as yet is within limited channels. Quotations now ruling are given herewith:

Scythes—	
Cast steel	$12.50
Clipper	13.50
Double bead	14.00
Little Giant	14.50
Brush	13.00
Snaths—	
Patent No. 3	$10.50
Patent No. 2	11.50
Patent No. 1	12.00
Patent No. 2/0	12.50

Gross Hooks—

Canadian: No. 2, $3.40 doz.; No. 3, $3.50 doz.; No. 4, $3.60 doz.; No. 5, $3.80 doz.

Fox (English): No. 2, $5.00 doz.; No. 3, $5.50 doz.; No. 4, $6.00.

Solder Goes Higher; Hammock Chains

London.

SOLDER, HAMMOCK CHAINS.—The continued strength of the tin market with the resulting added cost in manufacture has resulted in new quotations at higher levels being reached on solder. Half and half is now selling at 62c per pound and the wire solder at 65c per pound.

New prices have been named on hammock chains, the price to-day on the 4-foot being $4.00 per dozen pairs and on the 6-foot $5.75 per dozen pairs.

Garden Tools Moving Freely; Ladders, Bicycles

London.

GARDEN TOOLS, LADDERS, BICYCLES.—A splendid sale of all lines of garden tools is reported and cultivators are enjoying a goodly share of this trade. Prices have held firm and unchanged at the following levels: Eureka No. 4, $3.75 each; No. 8, $4.50 each; No. 10, $5.00 each. 5- prong Buco Hand, $12.38 dozen; Pull Easy (adjustable), $18.00 dozen.

For housecleaning orders for stepladders are going out in very good number. The shelf lock holds firm in price at 16c and the Ontario firm at 21c per foot.

A continued good demand is manifest for bicycles and this means of locomotion seems to be coming back if increased sales of bicycles count for anything. The Victor shows no change in price, selling at $33.50 for the 20-in., 22-in., and 24-in. frame.

Nails Unchanged; Rope Holds Steady

London.

NAILS, ROPE.—No change in the nails situation has developed during the week. A fair sale is reported and prices have held at figures ruling for some time past, viz., $5.20 base for wire and $5.60 base per 100 pounds for cut.

Rope remains in an uninteresting position, there being very little movement. Prices hold steady as follows: Pure manila, 39c base per pound; British manila, 33c; New Zealand Hemp, 33c; sisal, 27½c.

Linseed Oil Moving; Turpentine Active

London.

LINSEED OIL, TURPENTINE.—A very fair sale of linseed oil is reported though no one seems overburdened with stocks. Prices have held unchanged during the week, although the seed markets show considerable fluctuation, with a tendency toward higher levels.

Turpentine prices are very firm, the situation at primary points showing

strength. A good sale is in evidence during the week.

Quotations on linseed oil and turpentine follow:

Linseed Oil—

	Raw	Boiled
1 to 2 barrels, per gal.......	$1.95	$1.98
3 to 5 barrels, per gal.......	1.94	1.97
6 to 9 barrels, per gal.......	1.92	1.95

Less bbls, add 10 cents gal.

Turpentine—

	Imp. gal.
1 bbls. lots	$0.75
2 to 4 bbl. lots	0.74
5 gal. lots	0.85

facturers show a substantial reduction in asbestos wick packing and accordingly the Winnipeg price is reduced from $1.35 per pound to $1.10 per pound.

WINNIPEG MARKETS

WINNIPEG, May 23. — Price changes for week are again numerous, with one exception all show an upward trend. The following are the lines affected: wrapping twine, No. 900 tinned cutlery; combination wrenches, cobblers' sets, Premium whiffletree hooks, cast and malleable pipe fittings, screw drivers, and automobile drills. Asbestos wick packing shows a decline of 25c per pound.

Winnipeg jobbers are at present facing a serious problem due to the strike of freight handlers both at the head of the lakes and in Winnipeg. Many shipments are delayed and railways are refusing to accept l. c. l. shipments until some settlement is arrived at. In the meantime everything possible is being done to overcome existing difficulties.

Pipe Fittings Register Advance of About 5 P.C.

Winnipeg.

PIPE FITTINGS.—This week's prices show the first advance in pipe fittings during the past year and represent an increase of only about 5 per cent. on the most prominent lines. Prices ruling to-day are given herewith:

	Black	Galv'd
Malleable Fittings, Class B, lb...	$0.27	$0.38
Malleable Fittings, Class C, lb...	0.17½	0.27

Cast Fittings—

Elbows, tees, etc., 10% advance on list; eccentric reducers, 25% advance on list; plugs, 15% off list; bushings, 20% off list; flange unions, net list; floor flanges, floor plates and ceiling plates, 20% off list; expansion pipe hangers, 20% off list; companion flanges, 10% advance on list; drainage fittings, 30% off list.

Malleable unions also follow the above advance and are quoted to-day at 30 per cent. from the standard list, making net prices read as follows:

Black—¼ in., 12½c; ⅜ in., 14c; ½ in., 15½c; ¾ in., 19c; 1 in., 23c; 1¼ in., 32½c; 1½ in., 40½c; 2 in., 52½ each.

Galvanized—¼ in., 19c; ⅜ in., 21c; ½ in., 23c; ¾ in., 28c; 1 in., 35c; 1¼ in., 49c; 1½ in., 63c; 2 in., 81c each.

Screwdrivers and Drills Reach Higher Levels

Winnipeg.

SCREW DRIVERS, DRILLS.—New prices have just been announced covering many lines of tools manufactured by North Bros. and show an increase of from 5 to 10 per cent. over former quotations. Prices now in effect on a couple of lines are given herewith:

Screw Drivers—

No. 10, 2 in., $6.00; 4 in., $8.40; 6 in., $10.80; 8 in., $12.30 doz.

No. 12, 1⅛ in., $9.80 doz.

No. 15, 2 in., $6.80; 3 in., $7.40; 4 in., $8.00 doz.

Spiral Screw Drivers—

No. 30, $30.20; No. 130, $34.60; No. 35, $23.10; No. 135, $27.40 doz.

Automatic Drills—

No. 41, $28.80; No. 44, $32.00 doz.

Extra Drill Points for No. 41 drill, $9.60 doz. sets.

Firm Situation Exists In Steel Squares

Winnipeg.

STEEL SQUARES.—Prices on steel squares continue to hold firm despite the advances in many other high grade steel products; with recent embargoes placed on steel and decreasing stocks a further advance in this line would not be unexpected. Prices in the meantime remain unchanged at 5 per cent. advance on list, revealing net prices on a few of the more familiar lines as follows: No. 14 plain, $15.75 dozen; No. 14 galvanized. $20.75 dozen; No. 22 plain. $10.50; No. 24 plain, $11.55 dozen.

15 Per Cent. Advance in Combination Wrenches

Winnipeg.

COMBINATION WRENCHES.—Combination nut and pipe wrenches again move up in price, showing an advance of approximately 15 per cent., which manufacturers advise is due to purchases of raw material at new prices, all old contracts having expired. To-day's ruling prices are given herewith:

Short Nut Pattern, Polished—10 in., $28.75 doz.; 12 in., $32.50; 15 in., $46.25.

Long Nut Pattern, Polished—10 in., $31.50 doz.; 12 in., $35.60; 15 in., $50.60.

Long Nut Pattern, Black—10 in., $30.30 doz.; 12 in., $34.20; 15 in., $48.60.

Cotton Twine Up 4c; Asbestos Wick Down 25c

Winnipeg.

COTTON TWINE, ASBESTOS WICK —Following the recent advance in numerous other lines of cotton products, wrapping twine moves up in price. The latest advance is 4c per lb., making today's market price on 3-ply 68c pound; and 4-ply, 72c pound.

New prices received from the manufacturers show a substantial reduction in asbestos wick packing and accordingly the Winnipeg price is reduced from $1.35 per pound to $1.10 per pound.

Cobbler Sets Up 10 P.C.; Whiffletree Hooks

Winnipeg.

COBBLERS' SETS, WHIFFLETREE HOOKS.—Prices on cobblers' sets again show an increase in price of approximately 10. per cent., and are quoted to-day as follows: Economical, $10.80 dozen; Home No. 1, $24.00 doz.; Home No. 2, $18.00 dozen.

Firm prices have been maintained on Premium whiffletree hooks for some time past, but manufacturers advise that increasing costs have compelled an advance and ruling prices to-day are given herewith: No. 2, $4.25; No. 3, $4.90; No. 4, $5.50 per dozen.

Tinned Cutlery Up; Safety Hasps Revised

Winnipeg.

TINNED CUTLERY, SAFETY HASPS.—Due to increased manufacturing costs a slight advance has been found necessary covering No. 900 tinned cutlery, which becomes effective at once. New prices are as follows: Tea spoons, $3.75 gross; dessert spoons, $7.25 gross; table spoons, $7.50 gross; dessert forks, $8.25 gross; medium forks, $8.50 gross. A slight revision in price is just announced covering safety hasps No. 915, which are quoted as follows: 3-in., $1.55 doz.; 4½-in., $2.15 doz.; 6-in., $3.25 doz.

No Change in Turps or Linseed Oil

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices continue firm at former quotations with the usual spring demand. Prices ruling are: $2.00 gallon for raw and $2.03 gallon for boiled.

No change is recorded in the price of turpentine, which continues firm at the following prices: Barrels, 80c gal.; ½ barrels, 83c gal.; 5-gal. lots, 85c gal.; 1-gal. lots, 85c gal., plus the usual extra for containers.

PITTSBURG MARKETS

PITTSBURGH, Pa., May 23.—The American Iron and Steel Institute's report of steel ingot production indicates that in April production was at the rate of about 42,650,000 tons per annum. This is the best rate since last November and is about one per cent. above the average rate in 1917. The gain over March, however, is only 1.7 per cent. The increased production of pig iron, however, indicates that the rate of ingot production at present is between 44,000,000 and 45,000,000 tons, ingot production naturally lagging somewhat behind pig iron when there is a change in the rate. While ingot capacity is between 47,000,000 and 50,000,000 tons, the present rate is considered so satisfactory—it being generally felt that in these trying times operation absolutely at capacity can hardly be expected—that the chief concern of the industry now is to maintain the rate of operation rather than increase it. Soon the really hot weather will come, and in the past production has always decreased 10 to 20 per cent. in July and August. Mill managers are endeavoring to devise means that will avoid the usual curtailment. Consideration is also beig given to the problem of next winter, to avoid as far as possible a recurrence of the difficulties of last winter.

The New Government Arsenal

Announcement has been made of the site of the arsenal, the building of which

has been planned for some time past, through a partnership between the Government and the United States Steel Corporation. The site is Neville Island, an alluvial deposit in the Ohio river just below Pittsburgh. The island is well above high water mark, about five miles long and containing some 1,500 acres, with its upper end five miles below the city of Pittsburgh. The site is considered ideal, from the character of the land and its shipping facilities. At its head stands one blast furnace of some 550 tons capacity per day. This furnace was built by the American Steel & Wire Company just before the formation of the Steel Corporation, and under an announced plan whereby the wire company would build a very large steel plant on the island, concentrating all its Pittsburgh district operations at that point. Whether the plant really would have been built if the Steel Corporation had not been formed it has never been possible to decide. The blast furnace is now owned by the Carnegie Steel Company, and being a detached stack has been operated only in times of exceptionally heavy pig iron requirements. Details as to construction are lacking, but rumor has it one or two additional blast furnaces will be built. Then there will be built an open-hearthed steel plant, designed to cast such ingots as will be required for the large guns to be built, up to 16-inch. The blast furnaces and steel plant will be built and owned by the Steel Corporation. The gun and projectile plant will be built by the Steel Corporation and operated by it, but the funds will be supplied entirely by the Government. The Corporation donates its expert service, selecting from all its ranks the men best fitted for superintending the erection and operation of the plant. The Steel Corporation entered into the arrangement at the earnest solicitation of the Government and not only will make no profit but will donate a large amount of engineering and other skill.

Want Government to Tackle Housing Problem

Toronto Branch Canadian Manufacturers Will Make Representations to Government to Deal With Situation Which is Asserted to be Menace to Industrial, Social and Political Welfare of Dominion

THAT the present shortage in dwellings is coming to assume a grave aspect is recognized by the Toronto branch of the Canadian Manufacturers' Association who at their annual convention pased a resolution calling upon the Government to deal with this matter in an energetic manner. Following is the text of the resolution:

"Whereas a serious situation exists in Toronto and other industrial centres in Ontario because of the lack of adequate housing accommodation at reasonable rates, creating conditions that menace the industrial, social and political welfare of the whole country;

"And whereas it has been demonstrated that private initiative, operating through the law of supply and demand, has not met adequately the housing requirements of progressive communities;

"And whereas in all the principal countries of Europe, in Australia, and in Ontario, Governmental responsibility for the improvement of housing has been recognized by legislation providing for the advance of the public credit in various forms and in varying degrees in furtherance of improved housing undertakings, and in the United States the National Government has recently appropriated $100,000,000 to provide for housing for shipyard workers and those engaged on war contracts;

"And whereas Great Britain for generations has led the world in housing betterment, and, recognizing that adequate housing is essential to industrial efficiency, has spent since the war began $300,000,000 in providing the most approved housing for war workers, and as a part of its reconstruction program after the war has planned for the erection of at least half a million houses;

"And whereas we believe that adequate housing facilities are essential to industrial progress and national well-being;

"Therefore, the Toronto Branch of the Canadian Manufacturers' Association begs to submit that it is urgently incumbent upon our municipal, Provincial and Dominion Governments to seriously consider the whole question of housing reform, in order that plans may be laid for the provision of adequate housing facilities looking towards the increase of home ownership, and that measures be taken for the early realization of these plans. Furthermore, we beg respectfully to submit to the Dominion Government that immediate progress can be made by enlarging and emphasizing the work of the Housing and Town-Planning Branch of the Commission of Conservation, and to the Provincial Government that arrangements should be made to hold a Provincial Housing Conference at the earliest date possible for the assembling of information and the consideration of ways and means with regard to the whole question of housing betterment."

TO CONSIDER PRICE OF GASOLINE

In the House of Commons on Thursday of last week, Hon. A. K. MacLean stated that representations had been made to the Government with respect to the price of gasoline and that the Government proposed to investigate the matter. As to the probability of a tax being placed on gasoline for use in pleasure cars he intimated that the imposition of such a tax would be difficult. On this account it was evidently decided not to impose a tax. L. B. Howland, president of the Canadian Automobile Association, at the convention of the association recently held in Hamilton, asserted that the assurance had been given that a tax would not be imposed on gasoline. The Acting Minister of Finance stated that owing to the scarcity and consequent increase in the cost of crude oil the price of gasoline might increase considerably. This intimation of the Acting Minister of Finance is in line with the opinion expressed by HARDWARE AND METAL about ten day's previous to the minister's announcement.

RULES GOVERNING ASBESTOS EXPORT

The following procedure in regard to export of asbestos from Canada to the United States has been agreed to by the Canadian War Trade Board and the United States War Trade Board.

Application for export will be granted by the Canadian War Trade Board on the undertaking to export either the shipment to the Asbestos Trades Bureau or, if shipment is consigned to importer, the bill of lading will be endorsed to the Asbestos Trades Bureau.

Collectors of customs have been notified that a license to export will only be granted when the above procedure is complied with. It is, therefore, not necessary for the exporter to produce United States import license when making application to Canadian War Trade Board for export license.

ADDITIONAL REGULATION FOR COKE

An additional regulation governing the maximum price of coke from certain ovens in Virginia and Oklahoma has been issued by the United States Fuel Administration, effective at 7 a.m., May 13.

The maximum price of blast furnace coke made in beehive ovens in Wise and Lee Counties, Va., is fixed at $7.25 per ton of 2,000 pounds, free on board cars at the ovens, and $8.25 for 72-hour selected foundry coke.

Blast furnace or smelting coke made in beehive ovens at the Howe plant of the Howe-McCurtain Coke Co., in the State of Oklahoma, is fixed at a maximum price of $10.75, while 72-hour selected foundry is permitted to be sold at $11.75.

SHIPMENTS TO AUSTRALIA DELAYED

Shipments of heavy hardware, building materials, harvesting implements and machinery of various kinds which are destined for Australia have been backing up at the factories in the Dominion owing to the urgency of the tonnage needs in other carrying trade. To combat this condition it is reported the Commonwealth of Australia anticipates a vigorous shipbuilding campaign. Restriction of supplies that are allowed to go forward is having a serious effect on the industry of the Commonwealth.

WEEKLY PAINT DEPARTMENT

Belief in Paint Prices Necessary

Attitude of Dealer Largely Determines Viewpoint of Customer — Suggestion That Prices Are High Places a Barrier to Sale—Should Talk of Justification of Present Prices

IT is not sufficient that you believe you have the best paint to be obtained on the market. It is also necessary that you believe that the price you are asking is commensurate and fair in accordance with present-day values of the commodities which enter into the paint. This is a different time in which we are living from any that has preceded. There is no standard or measure by which we can judge what the present should be as compared with the past. If paint prices are not the same as they were three years ago, there is a reason. That reason is to be found in the greatly increased cost of the raw materials that enter into the paint.

Paint manufacturers have perhaps not willingly advanced their prices. They have realized that with each successive advance there was always a chance for a diminishing trade once the people became imbued with the idea that paint is too expensive to place on their dwellings and property. There are three things which are very essential in the selling of paint. First of all you must believe in your line. Secondly, you must believe in your service, and thirdly, you must believe in your price. When you can feel that the line you are selling is quoted at a price that is in direct proportion to the very excellent quality of your paint then you have normal backing which cannot be downed because a prospective customer may think that paint is high in price.

PATIENCE NEEDED IN EXPLAINING

The dealer in paint is sufficiently aware of the reason for the advances in the price of paint. He has followed the articles in his trade paper dealing with this subject from time to time. The comparative costs of raw materials at the present time and in pre-war times are familiar to him. It is good paint salesmanship to take the trouble to explain these minute details to the customer when he apparently shies away at the price. A bold, strong assertion that "everything is high in price that enters into paint," does not quite satisfy the customer. If it is pointed out that linseed oil in normal times sells at 80c per gallon, whereas the present wholesale cost is around $1.85 per gallon, a tangible contrast is made. Other lines can also be instanced.

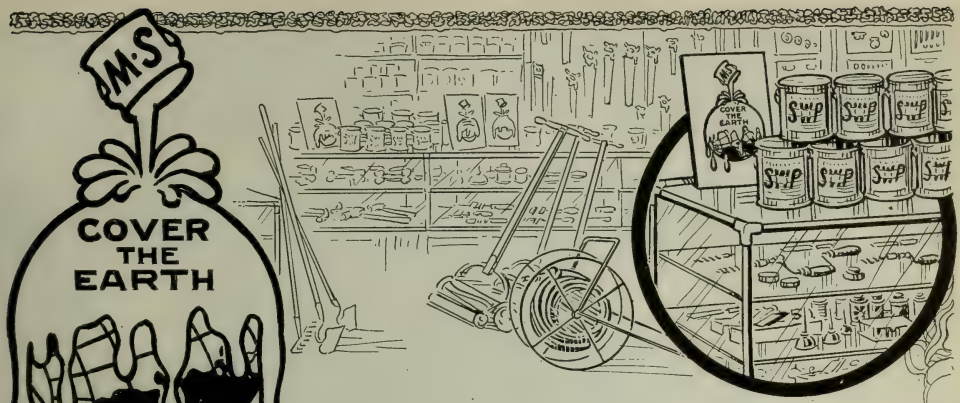
A contrast in the prices of the various commodities that enter into the manufacture of paint gives definite data by which the customer can form an idea for himself of the justice of the present prices of paint. It is necessary to lead the customer out to this viewpoint. It cannot be driven into his head like a spike can be driven into a piece of wood. He or she—the prospective customer—has a human brain that must be reckoned with. That brain is something like the balky horse—it can be led to water but it cannot be made to drink against its will.

FUNCTIONS OF A TEACHER

In the exercise of good salesmanship in selling paint all the functions that characterize a good teacher should be manifest. The customer has come to learn something about paint. If the paint dealer cannot give it to them they become as the sheep "that look up and are not fed." Now that teacher has the greatest power to convince who with patience and tact endeavors to make his customer see the situation as he really sees it. A dogmatic assertion that the paint is high in price and is so because raw materials warrant it will not win the customer into buying paint.

Full details are required — as full as it is possible to give them. And the more complete they are the more easily will the paint sale be made. Before the argument is half over, lo and behold the prospective customer may slide rapidly to the same opinion that you hold. You must first see the situation in order to make him see it and in order to convince him that he is getting full value according to present day standards.

Of course the problem arises then as to whether he can be made to buy even when he is convinced that the price is not too high compared with present day standards. Then salesmanship takes on a new phase. It should be shown that it is cheap insurance for his buildings at the present high cost of all building materials.



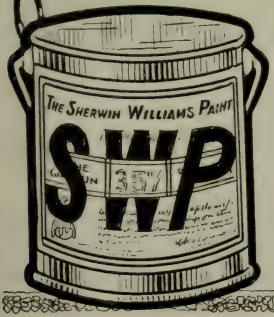
GOOD STOCKS
MEAN
GOOD BUSINESS

The only way to prevent the loss of a sale is to have the goods your customers want right in stock. Have you ever figured out the amount of business you have lost by not being able to meet the demands of your customers?

Delays are displeasing, as well as costly; let your good business judgment see that your shelves carry a well assorted stock of

S W P

The paint that is nationally advertised, and universally known as the best paint to meet the requirements of your customers. Our big advertising campaign is now running in the leading Magazines, creating a demand for paint, and presents a big opportunity for the merchant who has a good stock to do some profitable business. Don't let this chance slip by, but see that you can supply the demands of your customers.



Write us to-day if you are not familiar with our Agency Proposition.

If interested, tear out this page and keep with letters to be answered.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 23.—Paint markets are very firm this week, but there have been no definite changes in prices. Turpentine shares interest with linseed oil, and both are firm. The former supply is down to the vanishing point with many, and even though there is some in sight, this will be needed by the paint makers and to supply orders already in their hands from the retail trade. The position on linseed oil is one of continued strength, with the outlook for a maintained price for some time. Mixed paint sales are good, as are those of various specialty lines of shelf goods. The demand for kalsomines and wall coatings is good this year. Altogether the markets are decidedly active, with repeat business manifest everywhere.

Strength Still Shows In Linseed Oil Market

Montreal.

LINSEED OIL.—There is one general feeling, and that is that oil will hold its present position for some weeks, and perhaps for several months. If the stocks of seed at the head of the lakes are what can be sized from the reports of holdings there is a great decrease as compared with this time last year. Last week's storage there is reported as 606,000 bushels, while the corresponding date last year shows that the supply of flaxseed was about 2,000,000 bushels. Of this former quantity some will surely find its way into United States points. On the other hand, if seed can be secured through imports from the Argentine there will be an easing of the position on oil later. The question is that of tonnage. In the meantime the position here is a strong one, and prices are held without change. Some do not care to quote prices at all, but a few small lots are supplied as required at full prices.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.82-$1.86	$1.84½-$1.88½

Little Turpentine In Sight; Price Firm

Montreal.

TURPENTINE.—There is very little encouragement in the position on turpentine as compared with that of last week. In fact, the supplies that are expected to reach here are pretty well spoken for. Manufacturers will need much of the available stocks themselves, and other orders from outside await filling when the turpentine arrives. In the meantime the situation is a very strong one, with the market practically bare of supply and no one quoting prices at all. With prices well held in New York and a general good demand in many Southern markets there is little probability of change for the better just now. Present demand is above normal, and will probably be so for some weeks.

Turpentine—	Per Imp. Gallon
1 to 4 barrels	....
5 barrels and over	....

Small quantities 10c advance over 1 bbl. prices.

Putty Is Firm; May Go Higher

Montreal.

PUTTY.—While there is no change in the situation and no immediate cause to suggest an advance, the undertone of the putty market is firm. Not only is this a result of the high price on linseed oil, but the outlook for whiting is not any too promising, and if the supply be not replenished in the next few months some think putty will go to higher levels. In the meantime sales are maintained on a fair basis, limited quantities going forward to the trade at various points.

Standard Putty—	Per 100 lbs. 5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.70

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

Fair Demand For White Lead In Oil

Montreal.

WHITE LEAD IN OIL.—Little change is recorded in this commodity. There is some sale for it, but with oil so scarce there is a noticeable decrease in immediate demand for lead when oil is so hard to get. The position on pig lead is rather firm. For what trade there is the following prices are quoted here:—Five-ton lots, per cwt., $15.50; ton lots, $16; and small lots, $16.35.

Steady Demand For Mixed Paints

Montreal.

MIXED PAINTS.—There is a good demand for mixed paint, quite as active as the paint makers can take care of The business to hand reflects a general activity throughout the country, as sorting orders received are in good volume and come in with better regularity. For the shelf goods there is also a better sale. Prices are fully maintained without change, and for the present materials have been forthcoming in sufficient quantities to meet the needs of manufacturers.

TORONTO

TORONTO, May 23.—Conditions in the paint trade have been very satisfactory so far this spring. Manufacturers report that the volume of business is exceeding that of last year and that there is a continued good demand for paint. People have evidently made up their minds that the present season is an opportune time to do their painting as a means of conservation of property. Conditions in the linseed oil market are improving, crushers being able to get better supplies of seed. Prices held steady. Turpentine is in firmer market, with advances recorded in some quarters.

Shipments Of Flax Are Coming Better

Toronto.

LINSEED OIL.—Shipments of flaxseed are coming through from the West in good volume, and price for the seed has held about stationary during the week. Crushers experience difficulty in getting sufficient labor to keep their mills running to capacity. Back orders that accumulated during the time when seed was unobtainable would make capacity output in order if the crushers were not handicapped through the labor situation. Demand for linseed for new business has been fairly good. Prices held steady during the week at a range of $1.86 to $1.95 for raw oil in single barrel lots.

	Raw, Imp.gal.	Boiled, Imp. gal.
1 to 2 bbls	$1.86-$1.95	$1.88½-$1.98
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Shows An Upward Tendency

Toronto.

TURPENTINE.—There was an upward tendency in turpentine in some quarters during the week, an advance of 3c per gallon having been recorded, mak-

"Top" Quality for the House "Top"

B-H Anchor Shingle Stain

MOST houses in Canada are roofed with shingles and to-day people are putting shingles on the sides of their houses as well. Throughout Canada, therefore, from town as well as country, Shingle Stain sales are growing rapidly.

B-H Anchor Shingle Stain is manufactured by the makers of B-H "English" Paint and Brandram's Genuine B.B. White Lead, which is, in itself, a guarantee of its superiority. Anchor Brand Shingle Stain has no superior on the market to-day, and besides, it is backed by the B-H reputation for quality products.

B-H Anchor Shingle Stain may be had in 19 beautiful shades—a shade for every conceivable colour scheme.

Order your Anchor Brand Shingle Stains now. Price list, colour cards and sample slats on request—also full particulars of the B-H Agency proposition, without obligation.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST JOHN TORONTO WINNIPEG CALGARY EDMONTON VANCOUVER

ing the range in single barrel lots from 72½c to 78c per gallon. Conditions in the primary market show a firm tendency owing to the decreased production. There is a good demand in the local market and stocks are light. Some dealers were out of the market entirely during the week, but fresh supplies were expected during the latter part of the week.

	Imp. Gal.
1 barrel	$0 72½-$0 78
2 to 4 barrels	0 72½- 0 77
5 gallon lots	- 0 88

Fair Movement White Lead In Oil

Toronto.

WHITE LEAD IN OIL.—Reports indicate a fair movement of white lead in oil, though this is by no means heavy. The situation generally remains without any change, and nothing of a particularly interesting nature has developed. Prices hold firm and unchanged on the following basis: Pure, in ton lots, $16.20 per 100 pounds; smaller quantities, $16.55 per 100 pounds.

Good Demand Continues For Mixed Paints

Toronto.

MIXED PAINTS.—Mixed paints are very active and from all sources indications are that the volume of trade is reaching splendid proportions. Repeat business is coming along freely, and manufacturers and jobbers expect that with the advent of good warm weather a stimulus will be given to the use of paints. Prices are holding firm at figures shown in current market quotations.

Some Glass Arriving; Putty In Light Demand

Toronto.

GLASS, PUTTY.—Some shipments of glass from manufacturing centres to the South are reported in. Stocks generally, though reported low, are considered ample for present demands, and it is thought supplies as a whole will be available before any real shortage develops. Prices shown in current market quotations are unchanged.

Putty is in light demand; very little moving out at the present time. Stocks are in good shape and prices holding firm as follows: Standard bulk in casks, $4.55; 100-lb. drums, $5.30 to $5.40; bladders in barrels, $5.45 to $5.65 per 100 pounds. Pure putty is $2 per 100 pounds higher than above quotations on standard.

Good Sorting Trade On Brushes; Brooms Firm

Toronto.

BRUSHES, BROOMS.—A very good sorting trade on paint brushes is reported during the week, though no new developments in the markets have been recorded. Prices are holding firm and unchanged.

An advance in some quarters on scrub, shoe and nail brushes, etc., is reported, the new prices ranging between 5 and 10 per cent. up.

Brooms are moving forward fairly freely, though increasing difficulty in getting supplies of corn is manifest. However, a fair production is reported, and even at high prices ruling sales apparently are made for the entire output with comparatively little trouble.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

83. **Caustic soda, resin, etc.**—An Italian firm in Bari, on the Adriatic sea, makes inquiry for caustic soda, silicate of soda in crystals and resin (colophony).

84. **Manufacturers of iron and steel, chemical products, wood pulp, men's and women's hosiery.**—A Florentine firm would be glad to hear from Canadian houses disposed to export to Italy wood pulp, manufactures of iron and steel, chemical products and men's and women's hosiery.

85. **Chemical products.**—An Italian firm in Bologna with established connections for the sale of chemical products would be pleased to enter into negotiations with Canadian exporters of phosphates and superphosphates, sulphate of copper, potassium salts, seed oilcake, dry blood and other animal residue, etc.

87. **Lumber, salted fish and metals.**—An important firm of commission agents in Catania, Italy, with good references and one of whose proprietors is the Belgian consul in Catania, is desirous of entering into relations with Canadian houses prepared either now or after the war to export to Italy lumber for construction purposes, salted fish and metals.

88. **Metals, wire, beams and shovels.**—A firm in Florence with Italian Government connections and branches in Bologna and Leghorn is disposed to treat with Canadian manufacturers of copper and brass in small tubes or sheets, copper wire, antimony, nickel, zinc, shovels, iron beams for construction purposes, iron wire and brass wire.

89. **Chemicals, foodstuffs and hardware.**—A house of representatives in Genoa, Italy, is anxious to establish a regular course of business with Canadian firms either now or after the war in such commodities as the following: Chemicals (commercial and industrial) greases and tallows, dried and salted fish, general food products, files, rasps, tools and general ironmongery and hardware.

96. **Copper, steel and nickel wires and similar products, sheet steel, electrical steel sheets, etc.**—A well-established British company, having excellent references, wish to act as European selling agents after the war for the following articles made in Canada: Copper, steel and nickel wires and similar products; sheet steel, particularly tea-tray stock, in sizes approximately from 28-inch to 40-inch and 28-inch gauge; electrical steel sheets in various sizes, standard size being gauge 26, measuring 30-inch by 108-inch manufacturers should give particulars as to watt loss per kilogramme at 50 cycles.

99. **Machinery.**—An important import and export house in Japan wishes to buy gear planers in Canada.

147. **Builders' supplies.**—A London firm of joinery and moulding manufacturers, wishes to undertake the representation of a Canadian manufacturer of building requisites or similar lines.

154. **Cast-iron pipes.**—A London, England, dealer in iron and steel products and cast-iron pipes of all kinds asks to be put into touch immediately with Canadian manufacturers of cast iron rainwater and soil pipes.

155. **Marbleized slate mantels.**—An old established firm in St. John's, Newfoundland, asks for the names of Canadian manufacturers of marbleized slate mantels or marbleized slate.

162. **Colors**—A Johannesburg, South Africa, firm asks for samples and quotations on colors ground in oil.

163. **Leather**—A South African firm of commission agents, with sub-agents in all centres, asks for the representation of Canadian leather manufacturers for the boot and shoe and saddlery trade, also sundries for the boot and shoe trade.

169. **Tools**—A South African commission agent, covering all centres of South Africa, with permanent sample rooms in Cape Town and Johannesburg, is prepared to take up Canadian representation of tools of all kinds.

170. **Paints, oils and brushware**—A South African manufacturers' agent, calling regularly on the trade, is prepared to take up the representation of Canadian paints and oils, also brushware. Immediate correspondence requested.

171. **Wallpaper**—A South African agent covering all centres of South Africa is prepared to take up the representation of Canadian wallpaper.

172. **Machinery for wood-turning**—A Cape Town firm makes inquiry for the supply of a small wood-turning machine for turning out wood-blocks of several sizes. Sample of standard size of block with the Department of Trade and Commerce.

173. **Polished wood blocks.**—A Cape Town firm of electricians asks for samples and quotations on 3½-inch wood blocks, stained walnut. Other particulars may be obtained from the Department of Trade and Commerce.

174. **Hardware**—A Cape Town manufacturers' agent, with permanent sample room in Johannesburg, is prepared to take up Canadian lines of household, builders' and general hardware.

175. **Cultivators**—A South African firm with a special department devoted to agricultural machinery and implements makes inquiry for the supply of adjustable arch walking cultivators. They request catalogues and price lists.

177. **Electrical fittings**—A Cape Town firm with branch stores, making a specialty of electrical goods, asks for catalogues and price lists from Canadian manufacturers of electric stoves, heaters, irons, toasters, switches, tumblers, and other household electrical goods.

178. **Drag harrow**—A Johannesburg firm specializing in agricultural machinery asks for catalogues and price lists from Canadian manufacturers of drag harrows.

179. **Gang ploughs**—A Transvaal firm specializing in agricultural machinery wishes catalogues and price lists from Canadian manufacturers of gang ploughs.

180. **Wire**—A Johannesburg firm requests samples and quotations of plain and barbed wire.

185. **Lubricating Oils.**—A firm in St. Kitts, British West Indies, requests to be put in touch with Canadian manufacturers of lubricating oils.

191. **Enamelled Goods.**—A large firm in St. Kitts, British West Indies, would like to receive quotations from Canadian manufacturers of enamelled goods.

196. **Leather.**—A firm in St. Kitts, British West Indies, invites correspondence from Canadian manufacturers of leather.

199. **Broom Handles, etc.**—Canadian manufacturers of materials used in the manufacture of brooms, whisks, and hearth brushes, including wire, twine, etc., are asked to communicate with a Newfoundland inquirer.

World Dominance for Germany in 25 Years, But—

BUT Germany made the irretrievable error of going to war. Between the Kaiser and World Autocracy there stands to-day the Allied Line—Canadians adding their strength and steel to its unbreakable fibre of magnificent manhood, and most modern war metal. Nevertheless, Sir John Willison, Chairman of the Canadian Industrial Reorganization Association, said in dead earnest to the Toronto Branch of the Canadian Manufacturers' Association, that Germany would have achieved world dominance in 25 years at the rate she was progressing without going to war, because the other countries were not protecting their resources.

Tariff and Industries Essential to Canada

This you can read in THE FINANCIAL POST of May 18th on page 1 under the heading "Prosperity of Canada Demands a Tariff Policy.' Here is a powerful contribution to the constructive thought of Canada to-day for war-problems and after-war problems. This is an article worth your closest, most businesslike attention. Get a copy of THE POST and see it. You'll enjoy it. You'll value it. Merely the mention of some of its matter in a circle of keen business men will start conversation worth listening to. Try this. Then you'll realize quickly one of the big benefits of a regular subscription to THE FINANCIAL POST, the Canadian Business Newspaper, that makes business men bigger and more prosperous. Here are some other headlines from THE POST of May 18th:—

How Canadian Exports Help Allied Cause.
Our Investment Relations With the States.
Violation of Contracts by Courts a Menace to Canadian Credit.
Activity of Our Industries Will be Continued.
Eastern Cities Show Decided Improvement.
War Tax Subscriptions by Conscription.
Earlier Closing in Banks Brings Other Changes.
How Bank Managers Analyze Customers' Statements.
Canadian Crop Reports—Alberta Record Coming.
B. C. Legislature and Mortgage Amendments.
Browning "Gun-man" for U.S. Army.
News of Securities.

By no means all the interesting features of business value in this number of THE POST are here given, but enough to indicate to you the scope of THE FINANCIAL POST. THE POST is a paper you'll like. Try sending for a test subscription by filling up this coupon.

The MacLean Publishing Co.,
153 University Ave., Toronto.

Send me THE FINANCIAL POST each week till further ordered. I will send subscription price ($3.00 per year) on receipt of bill, or you may draw on me for this.

Economizing Helps the Sale of Specialties

The nation-wide impulse for economy means that many motor cars will go unfinished this season unless the owners adopt the *"Berry way,"* which makes the cost nominal.

Berry Brothers'
Auto Color Varnishes

are made especially for the unskilled varnisher, and with his garage for a workshop any man can produce a handsome, lasting finish on his car in just the colors he prefers, without any finisher's bill to pay.

We furnish an attractive cutout for counter display, and descriptive folders giving explicit directions for the amateur varnisher, telling how much varnish it takes, and showing in colors how cars look when refinished. A real selling help.

Ready to Ship Assortments

We have all ready put up, well selected assortments of colors that we can ship promptly. Order one to-day and get in the field early. You will sell it quickly and want more. Write for further particulars anyway.

BERRY BROTHERS
(INCORPORATED)
World's Largest Varnish Makers
Established 1858
Walkerville, Ont. (651)

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

Jamieson "Reputation"

Makes Easier Sales

YOU

Don't have to push Jamieson's Paints and Varnishes — they sell themselves.

Don't have to apologize to the man who buys our line. He is satisfied.

Don't have to order much, on spec. Your sales demand it. The stock moves quickly.

WE

Make the best paints and varnishes that experience, invention and genius will permit.

We may make better paint to-morrow, but it is impossible to-day.

Progress may teach us to-morrow, as it has taught us to-day.

SALES

Are made easier when you give the customer, client and friend what is BEST for his needs.
Get our line on your shelf quick — They'll need our paint to-morrow.

Write us about the Agency in your town.

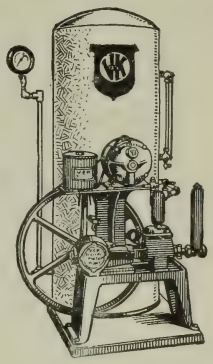
Empire Water Supply Systems

A good, modern water supply system in the country home and for homes in the village or suburban district is not now considered a luxury, but a necessity.

The successful performance of Empire Systems is, in a very great measure, due to the fact that each system is planned separately and specially to meet the requirements of the home or institution in which it is placed.

Empire Water Supply Systems consist of Hand Pump, Gasoline Engine and Electric Outfits.

We have just issued a very interesting booklet, entitled "The Empire Way." Write us for a copy.



EMPIRE MFG. CO., LIMITED

LONDON TORONTO

Superior to any other wall Finish

When you can say *"Superior"* about any products and have a guarantee behind it, it invariably means sales and profits for you, plus super-satisfaction for your customers. Muresco brings sales because of its common-sense qualities—Utility — Durability — Convenience and Economy. To sum all up in one word—Superiority.

Muresco wears well—looks well—is easily applied, and is guaranteed to be a superior Wall Finish for use in Cottage, Mansion or in Public Building.

We have a proposition that will interest you, Mr. Dealer.

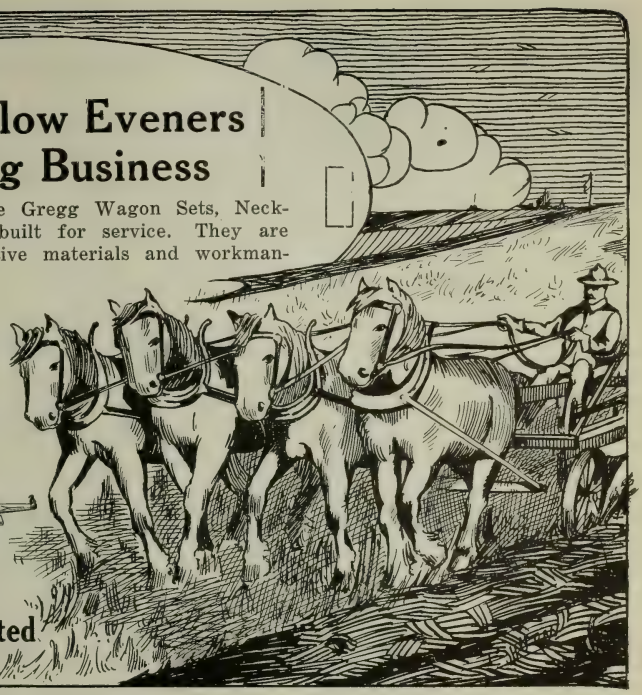
Gregg Plow Eveners Pull Big Business

Gregg Plow Eveners, like Gregg Wagon Sets, Neck-yokes and Hitches, are built for service. They are guaranteed against defective materials and workmanship.

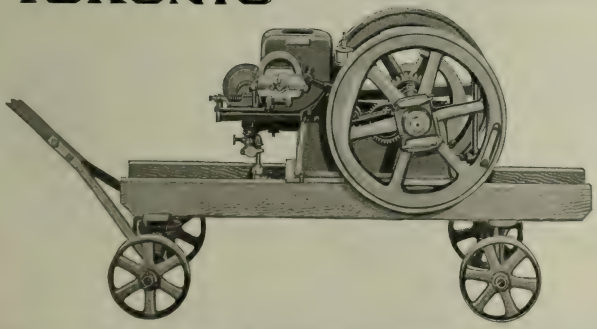
Send for copy of catalogue describing our full line.

Any jobber in the Canadian West can supply you with Gregg Goods.



Gregg Mfg. Co., Limited
WINNIPEG

ONTARIO WIND ENGINE & PUMP CO. LIMITED
TORONTO $1\frac{3}{4}$ **H.P. ENGINE**



One of these engines is equal to half a dozen chore boys. They pump water, drive a fanning mill, run pulper, turn grindstone, operate washing machine. "TORONTO" Engines are light and powerful, and use little fuel.

TORONTO DOUBLE-GEARED WINDMILLS have brought windmills back into favor. The power is FREE; materials and workmanship of such quality to insure minimum of noise and wear; and maximum efficiency. First cost reasonable; will outlast any appliance on the farm.

ONTARIO WIND ENGINE & PUMP CO. (Western Branch) LTD.

Warm Weather

Means

Paint Weather

Here is your opportunity to increase your business and to secure good and satisfied customers. House-cleaning and renovating have started, so has our Big National Advertising Campaign. Your customers are looking for the Paint that will give them wear, durability, and a beautiful finish, they know

CANADA PAINT

will produce these results and, therefore, want it. Your customers know that if their buildings are painted with Canada Paint they will be protected from the severe Canadian weather

AND

are also looking for the most sanitary finish for inside walls and woodwork. It is only natural that the same high grade and standard is what they want. This is assured if Canada Paint Co.'s

SANITONE

is used. A high-grade oil-paint that dries with a soft, velvety finish for walls, ceilings and wood-work that can be washed and is easily kept clean.

See that your stocks contain a good supply of these products, and you will reap big returns on your investment this spring.

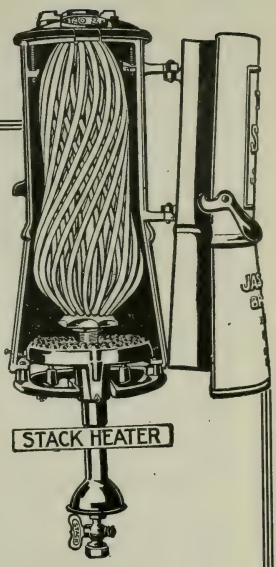
FAR IN ADVANCE OF ANY OTHER HEATER



Users of Stack Water Heaters who have used other makes will tell you that the Stack will produce a hot water service which is far in advance of any other tank heater. The reason is so simple and apparent as to be easily missed.

Hot water naturally rises immediately upward—not sideways, but up—straight up.

The Stack is built more nearly to allow this direct, straightway upward movement than any other heater.

Test for yourself the truth of this statement.

Write for booklet.

Easily sold. Big profits.

The James Morrison Brass Mfg. Co., Ltd.

93-97 Adelaide Street West - TORONTO

Buy Now

The copper situation is acute, and we strongly advise stocking up.

Our coppers are made from the finest grade of Lake Superior copper.

Insist on the "B-B" on every copper. Your jobber handles them in all sizes.

A Phenomenal Increase

During the last eighteen months the sales of AutoStrop Safety Razors have increased over

Four Hundred Per Cent.

This is positive proof of the exceptional shaving qualities of the AutoStrop and demonstrates beyond any doubt that it is the leading safety razor.

You Will Appreciate

that this increase was caused by men, both soldiers and civilians, realizing that shaving under such extraordinary conditions, as those of to-day, requires the most perfect razor obtainable.

Entire Battalions Use the AutoStrop

In one instance, a member received an AutoStrop from his wife. The ease and comfort with which he shaved under every condition soon convinced the other boys that it was the only satisfactory razor for active service and every member of that battalion now owns an AutoStrop.

Be Prepared

to cash in on our national advertising by prominently displaying AutoStrop Razors in your windows and thereby link up your store with this advertising which is telling the AutoStrop story to every man in your locality.

Do not allow your assortment of AutoStrops to run down to a point where your sales will be affected. Under the present pressure of business it is impossible to maintain the quick service as heretofore and we ask for your co-operation to the extent of anticipating your wants as far in advance as possible.

Order from your jobber or direct.

AutoStrop Safety Razor Co., Limited

83-87 DUKE STREET **TORONTO**

Here's a Line That Spells Sales

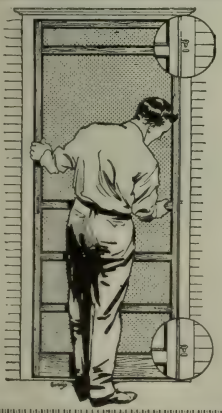
Reed's Plastic Asphalt Roof Cement should find a ready sale just now when weather permits of outside repairs. Leaky roofs that started during the hard winter can now be quickly and permanently repaired, no matter whether of slate, metal, shingle or composition.

This means sales for the dealer—sales without effort, too. All you need do is place this line in a prominent place. It will be its own salesman.

Order from your jobber.

GEO. W. REED & CO., Ltd.
Manufacturers
MONTREAL

FREE—A "movie" slide, beautifully colored, with your name, or an electro, such as shown below, or both, to every dealer handling "Kasement" Screen Doors.



Hanging Screen Doors has always been a nuisance

But it's easy to hang a KASEMENT DOOR

Come in and let us show you this new door. It is guaranteed not to sag or warp, and costs very little more than the ordinary door.

Dealer's Name Here

KASEMENT SKRENE DORE CO., 183 Church Street, TORONTO

Sell Handles that are Most in Demand

STILL'S

There are more of STILL'S HANDLES sold in Canada than any other make. What's the logical conclusion of this fact?—*they are the best.*

There's a Still Handle to meet every need: Axe, Pick, Sledge and Hammer Handles; Cant Hook and Peavie Handles.

There's nothing like selling the best of everything. Good profits in our handles, too.

Sharples is a Standard Investment for the Dealer!

There are so many advantages in a Sharples Suction-feed Separator, over all other separators, that even the most critical buyer is interested.

For example, what more appealing argument could be advanced to a prospective customer than "Sharples will *skim clean at any speed,* saving you many dollars in butterfat." This can be said of no other separator.

Or could there be a more telling point than "Within a year (and generally within less time) your Sharples will pay for itself by saving butterfat *wasted* by ordinary separators when turned *under speed.* Sharples gives you years of efficient, profit-increasing service."

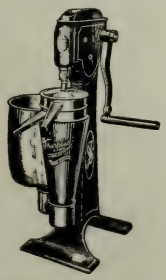
Sharples national advertising is letting your prospects *know* what the Sharples will do that no other separator or method can do.

SHARPLES
SUCTION-FEED CREAM SEPARATOR

—the *only* separator that skims clean at widely varying speeds.
—the *only* separator that skims faster when you turn more quickly.
—the *only* separator that delivers cream of unchanging thickness—all speeds.
—the only separator with just one piece in the bowl—no discs, easiest to clean.
—the *only* separator with knee-low supply tank and a once-a-month oiling system.

This will be a big Sharples year, so don't get caught by late deliveries.

Embargoes, freight congestion, scarcity of raw materials make it increasingly difficult to get goods thru. Wise dealers are taking precaution of ordering early and ordering enough Sharples Separators to meet *abnormal demand.* Nowadays goods delivered are half sold.



If not now handling Sharples ask about the *Extra Bonus Contract.* Write nearest office to-day.

MARTIN-SENOUR
PAINTS AND VARNISHES

MADE IN CANADA

SOLD ON MERIT

100% PURE QUALITY---EFFICIENT SERVICE
and
ABSOLUTE SATISFACTION

These three headings sum up completely the Martin-Senour Exclusive Agency Proposition.

Every can of Martin-Senour paint is full to the brim with quality. Every can is full of merit that means absolute satisfaction to every customer. With every can of 100% Pure Paint sold you provide your customer with 100% Efficiency.

Every Martin-Senour Dealer-Agent is directly benefited by our efficient service. Martin-Senour advertising and sales promotion work is of the strongest possible kind. We do everything in our power to create business for you, because the better your business the larger the demand for our goods.

No better time than now to get details of our profitable proposition. Drop us a line.

Always Sell Quality

And to make sure of best results sell INTERNATIONAL Quality.

When a customer asks for Varnish don't be content with handing out something at a cheap price, but sell an International Quality Varnish — one that will make a satisfied customer — one that will bring you in repeat business.

The Four Following High-Grade International Products placed on your shelves will put you in a position to serve your customers with absolute satisfaction. Their trade-winning properties have been proven by years of service.

"ELASTICA"

FLOOR FINISH. An exceptionally fine preservative that retains its lustre and protects the wood under severest wear and washing.

"KLEARTONE"

ACID OR OIL STAINS for finishing new wood. Made in a wide range of effective shades and very easy to apply. Ideal for use on interior woodwork.

"SATINETTE"

The immaculate White Enamel for the very highest grade interior finishing. Equally good for all exterior use. No better white enamel made.

"LAQUERET"

A VARNISH STAIN of exceptionally high quality. For renewing the finish on all articles of furniture or for new work. Good for floors too.

Every International Product is a High Quality Product. The International line of varnishes is most complete, and the dealer who has a well assorted stock of these goods on hand can easily secure the lion's share of the varnish business in his locality.

Write for prices—We invite your correspondence.

Electrical

WHERE POWER IS AVAILABLE

IN nearly every home, whether urban or rural, there is power of some kind available; either electric, gas, gasoline, steam or wind.

The housewives of these homes are all prospective buyers of the "Seafoam" Washer and Wringer, with the exception of those who have already bought the "Seafoam." Even these exceptions are useful to you, because every owner of a "Seafoam" is glad to recommend it.

If you will send us a list of such prospects, we will mail "Seafoam" circulars to them and refer them to you.

The "1900" Cataract Electric Washer

The Washers the Women Want

The articles that are in demand are the profitable ones, from the Hardware Man's standpoint. Those that are hard to sell—the unknown ones—prove less lucrative, in the long run.

It's Profits That You Want

and you can get them from "1900" Washers.

For more than twenty years we have been making and selling nothing but washing machines—the very best that can be made. Our whole attention has been centred on "1900" Washers, on perfecting and developing new models.

With the addition of our two newest and greatest models, the "1900" line is complete.

The "1900" Cataract Electric Washer

These most modern washers, as well as the other "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" dealers as have proven their worth in their different territories.

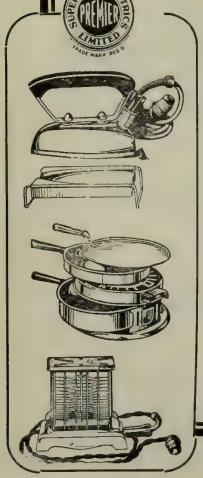
The "1900" Agitator Electric Washer

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the wholesale Department.

The "1900" Agitator Electric Washer.

THE "1900" WASHER COMPANY
357 Yonge Street Toronto

Quickest Success in the Trade



THE PREMIER dealer organization is filling rapidly. Indeed, no line of electrical appliances ever won such quick response from the trade.

There is sound reason for this.

Every dealer who has looked into the PREMIER proposition sees something better than he has ever been offered before. He gets better appliances, more sturdily built, more handsome in design, easier to sell.

The merit of PREMIER appliances is "all that the name implies"—merit that is establishing the line.

And behind the goods is an organization of men who have grown up with the industry; men who are known throughout the trade as progressive, men who believe in fair dealing, in giving value, in backing up the dealer's faith by live advertising.

Get into the PREMIER organization while there is still room. Don't wait till the other live man in your territory has seized the opportunity first.

Delay brings no profit. Write for facts and figures, and illustrated literature, at once. Tear out this ad. Write now.

NEW SAFETY STOVE PIPE

The lock that holds

Despite the many new and practical features of the "New Safety Stove Pipe," it can be sold at practically the same price as ordinary stove pipe; in fact, if desired, it can be used with ordinary stove pipe. That's one reason why the pipe appeals so strongly to the hardware trade. There are many other features. Read the following:

No. 1—Costs same as ordinary pipe.
No. 2—Made in 6 and 7-inch sizes.
No. 3—Made of 29 gauge iron.
No. 4—Telescope pipe does away with half lengths.
No. 5—No wiring needed. Can't be pulled apart.
No. 6—Pipe is nested, saving freight rates and storage room in store.
No. 7—Eliminates all danger of pipe falling down; easy to put up; absolutely leak-proof; cannot come apart; locks automatically; good appearance.
No. 8—New patent lock effects saving on each pipe, making a saving of one length in every 12 of ordinary pipe.
No. 9—Can be used any place where ordinary pipe is used, or can be used along with ordinary pipe.
No. 10—Patented in Canada an dthe United States, and "Made in Canada" by Fairgreave & Son, Toronto.

Orders should be booked now for next winter's business.

Patenaude & Berini - Timmins, Ont.

Manufactured by Fairgreave & Sons, Toronto, Ontario.

"HENDRYX"

Parrot Cages

The cage that satisfies both the consumer and dealer at once. The former demands quality, the latter—profits.

The cups are of tinned iron, non-rusting and indestructible.

Order a stock for May and June—the parrot season.

COMMUNITY PLATE

Modeled Handle KNIVES

An Exclusive COMMUNITY Feature

THE popularity of the new and exclusive Community Modeled Handle Knife has brought an enormous increase in sales. Dealers everywhere find this a winner, both because of its unusual beauty and exceedingly low cost.

The handle of this new knife is moulded from soft steel by our exclusive process—then welded permanently to a crucible steel blade, highly tempered to afford keenness and flexibility. Every curve and delicate outline—even the "feel"—of the most expensive knife—is retained. Yet the cost is comparatively low. For instance: A set of six medium modeled handle knives sells to the consumer for $5.00.

Furnished in Adam, Patrician, Sheraton and Georgian designs.

RIXSON

GARAGE DOOR HOLDER

The device that stops the slam of the garage door—locks the door automatically and positively—acts as a top bolt if desired.

Have you any idea of the casualties among the automobiles of your town and vicinity caused by the wind slamming the garage door just at the wrong moment, catching a fender, a lamp or a hub?

If you're a motorist you will appreciate the advantages of having your garage door held when it is required. The **Rixson** No. 60 will do it.

No. 60 will hold the door open at about right angle and also at 45 degrees beyond right angle—locks the door automatically and positively by simply removing a screw. Doors so locked cannot be opened from outside.

No. 60 may be applied to right or left-hand doors without mechanical change.

It will act as top bolt as well as a lock, thus saving the inconvenience of having to use an extra bolt. Your enquiry will get our prompt attention.

TORONTO LOCK MFG. COMPANY

Manufacturers of the Famous "Rixson" Door Checks, Checking Floor Hinges, Builders' Cabinets, Refrigerator and Structural Hardware.

Complete catalog of To-lo-Co. lines sent on request.

Factories: PATTERSON PLACE, TORONTO

DOUBLE DUTY

in name and in service

BEST for the merchant to handle

"LEWISITE" Roofing

BEST for the builder to use

Supplied with cement and nails

MADE from pure Wool, Felt and Asphalt, and this is all you pay for.

¶ Many brands sell at much higher prices. None are better and all are lighter in weight.

¶ The weight of Lewisite Roofing is 40, 50 and 60 lbs. per square for 1, 2, 3 ply respectively.

¶ This is 5 lbs. heavier than any other brand of prepared roofing sold in Canada.

¶ It is fire-resisting, as it not only withstands extreme heat but live sparks and burning embers will not ignite it.

¶ Positively contains no tar and will not taint nor injure rain water.

Write us for particulars.

National No. 801 Garage Door Set

Combining beauty, simplicity and strength

The No. 801 Set is easily attached and once up will swing, latch and lock the heaviest garage doors. The No. 27 Latch that is included in this set is a beauty both in appearance and simplicity and certainty of action, 3 pair 8-inch loose pin, reversible "T" Hinges are supplied that will swing the doors true and give a close-fitting weatherproof job. A No. 5 Heavy Door Pull is provided for inside of door and the locking devices are one No. 820 Chain Bolt for the top and one 830 Foot Bolt for the bottom.

As you can see by the illustrations this set presents a neat, smart appearance—a right, tight job is assured every time they're used.

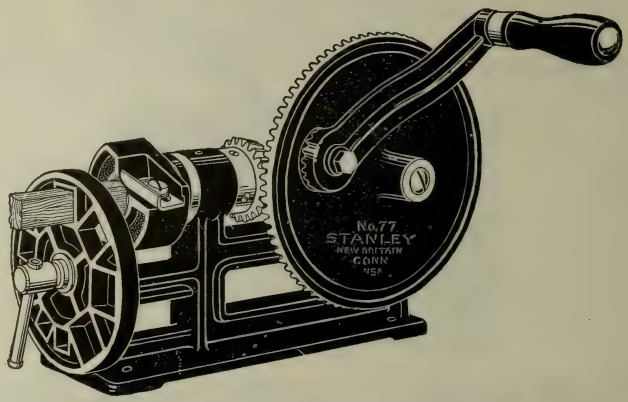
Stanley Tools



STANLEY
DOWEL AND ROD TURNING MACHINE

No. 77

A tool that will appeal to Carpenters, Cabinet Makers, Pattern Makers, Furniture Manufacturers and especially to Supervisors and Instructors of Industrial Education, in fact to anyone interested in woodworking.

It will not only cut dowels of varying sizes and lengths to perfect dimensions, but with it one can also form rods of practically any length.

Ready made or stock dowels have a tendency to warp and shrink, making them very unsatisfactory to use where a close fit is desired.

With this machine the workman can cut his dowels when he is ready to use them and furthermore of the same material as the wood being worked.

One cutter head complete for making dowels or rods ⅜ inch in diameter is furnished with each machine.

Additional cutter heads with cutters 1-4, 5-16, 7-16, 1-2, 9-16, 5-8, 11-16 and 3-4 inches can be furnished at slight extra cost.

A workman whose tool equipment includes one of these machines and a Stanley Doweling Jig can make doweled joints with surprising quickness and accuracy. The List Price is $8.50.

A Profitable Tool for you to Carry.

Butterfield

Your customers constitute the jury

Though the mechanic is speeded up to increased production these days, yet all his work is subject to rigid inspection.

Especially is this so in drilling steel, etc., which, to pay, must be done with tremendous accuracy and speed.

In using Butterfield's Twist Drills, both employer and employee know that they can be worked to "the limit," and will stand up under heavy usage with minimum of grinding and practically no breakage.

That's why **a heavy demand** always requires most dealers to constantly keep a wide variety of sizes and styles on hand. Suggestion: Is your stock running low?

"Carbon and high speed twist drills, our business."

Inspection

that really inspects

Every "Famous Five" File that leaves our works is mechanically perfect.

The steel itself is carefully inspected when it comes to us from the mills.

Every file is inspected after each process. Special care is given to the shape of the teeth. After hardening, every file is tested on a piece of hardened steel; and if a file shows the slightest defect, at any stage, it is rejected.

That is why every file is mechanically perfect when it leaves our works.

And that's why it pays you to specify "Famous Five" files when ordering from your jobber.

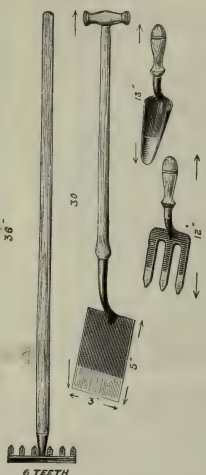
Ward & Payne

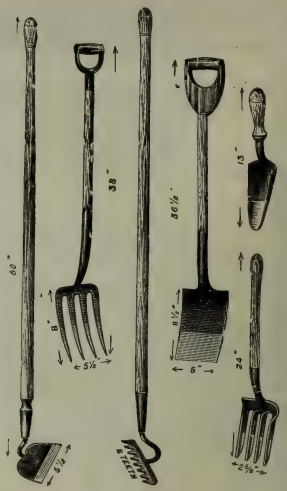
W P

Sheffield



Why sell one tool where you can sell a set?

Many a man who comes into your store to buy a rake, or a hoe, or a spading fork has a present need for other garden tools and can be persuaded to buy a complete set. Point out to him that the cost is not prohibitive, that it is wise to have all his tools of uniform quality, that a complete outfit means better results from less labor, and that he cannot get better tools than are made by Ward & Payne.



Make up your mind to sell sets instead of individual tools wherever possible. You'll be surprised at the amount of extra business it will mean.

An N. C. R. System will solve your war clerk problems

Canada's merchants are face to face with new and serious problems.

(1) Salespeople are very scarce. To make up for this deficiency it is now necessary for storekeepers to adopt modern methods that will produce better clerks.

(2) Clerk hire is much more costly than formerly. To meet this condition it is necessary for clerks to serve more customers and complete more sales.

(3) Salespeople now to be had are new to the work. They have had little or no training. They are less skillful. They are not as good business producers as they might be. To overcome this handicap the merchant is in urgent need of store methods that will instruct and assist the newcomers to become highly efficient.

The merchant with these problems on his hands owes it to his business, his family and himself to instal an N.C.R. System without delay.

A National Cash Register will give you protection, quick service and economy.

It will enforce accurate, unchangeable records. It will speed up your service so that more sales can be made per clerk. It will stop guesswork and losses. It helps make good salesmen.

A National Cash Register will soon pay for itself out of what it saves

———————*For further information fill out this coupon and mail it to-day*———————

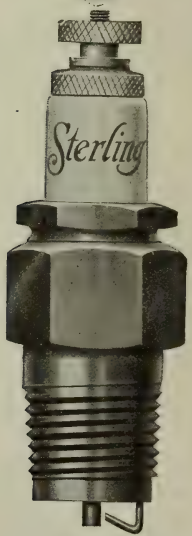
The Dealer Knows!

When the dealer recommends Sterling Spark Plugs he knows he is doing you a service because he knows the value of Sterling Plugs and knows he can personally guarantee their performance. That is worth while.



A size and style for every car

Sterling Spark Plugs

If your car was not originally equipped with separable spark plugs you will replace them eventually. Then put in Sterlings and you will appreciate their distinct advantages. When carbon accumulates wipe the porcelains with a cloth or waste and the plugs will give service equal to new ones. Separated, the porcelains are bare—from top to bottom. No doubt about their being **positively** clean. Sterling Plugs are sold by progressive garages and supply dealers.

"Lively and Lasting"

NUMBER TWO

JOHN P. HOLLAND

ON August 12, 1914, two weeks after the outbreak of the European War, John P. Holland, inventor of the submarine, died at his home in Newark, N. J. Holland was born in Ireland in 1842—and at the age of 20 he commenced to concentrate on the submarine idea. He came to America in 1864; and in 1898 completed his first successful submarine at Elizabeth, N. J.

Holland's entire life was dramatic and in a sense, tragic. As a result of his great genius, he will become immortal as the inventor of the most terrible war-machine the world has ever known.

The dominant trait in this wonderful man's character was

CONCENTRATION

As Holland's invention has gained the approval of practically every nation, so has the Victor Hack Saw Blade won the admiration and confidence of mechanics and technicians all over America—and all over the world.

Like Holland, we have concentrated on one thing. For over twelve years we have been experimenting, testing, improving. In practical tests, the Victor Hack Saw has seldom been equalled—and never excelled. It is the result of a large organization of technicians and skilled mechanics concentrating on one idea—which is—to make the most honest and efficient hack saw blade in the world. We do not scatter our energies. We make hack saws for every metal-cutting purpose.

VICTOR SAW WORKS, Ltd.
HAMILTON, CANADA.

Gilbert
Machine Gun For Summer Business

Here's the biggest opportunity you ever had to do a profitable summer business on toys. Boys everywhere want a practical toy with which they can play war. And the Gilbert Machine Gun meets this demand. Your customers are going to want them this summer.

We have improved and perfected it until it represents the best value possible —it is genuine in its realistic uses—and ideal for summer play.

We have planned an advertising campaign in the boys' publications to appear during June and July and have a particularly attractive proposition to offer you in conjunction with it. It is a new idea in Toy marketing and will enable you to make your Toy Department pay you a profit during its usually dull season.

Our representatives are now on the road and will be glad to call on you —or we will give you complete information direct.

Sales Methods Bring Good Trade in Ranges

Dundas Firm Sells Twenty and Have Twenty More in Stock Since October of Last Year—Co-operation From Manufacturers Valuable in Helping Introduce — Purchasers Often Become Best Salespeople.

RALPH & WILSON, hardware merchants of Dundas, Ont., are greatly pleased with the results of their selling campaign on stoves. In October of last year they took on the agency for the FiReCo range which heretofore had not been introduced very extensively in the eastern part of the Dominion. The range had been introduced into the West, and had met with approval there as attested by the number of sales which had resulted. But it was a comparatively new venture to introduce them to Eastern buyers. A new idea was embodied in the construction of the range, and it was not yet manifest how the conservative East would take to it. This Dundas hardware firm was doubtful as to the feasibility of swinging people away from the generally-accepted principle in connection with stove construction. But after a talk with the manufacturer's representative they became convinced that it was a line worth trying. "The salesman representing the manufacturers, the Hall, Zryd Foundry Co., Limited, Hespeler, knew his business well, and had the faculty of being able to close a sale in a difficult situation," said H. E. Wilson. "He succeeded in getting ourselves enthusiastic over the possibilities of the range because of his ability to place the range before us in such a way that its good features were apparent.

Points in Favor of Range

"We of necessity had to become acquainted with the talking features of the FiReCo range in order to become enthusiastic over the qualities. The claim made by the manufacturers was that it was the first real big deviation from the old principle used in ranges in that it was strictly airtight. This point, it was claimed, was accomplished through the use of a patented sand joint. With this principle of a sand joint it was possible to introduce an entirely different flue system which does away entirely with dampers and baffle plates. The absence of dampers is one which can hardly be understood as feasible by the housewife until its workability has been fully demonstrated. But the manufacturers make the claim for the FiReCo range that the scientific principles covered by their patents, effects a saving in fuel of fifty per cent. and greatly reduces the operating labor. Furthermore, the ashes are reduced to about one-third in that complete combustion of the coal is possible.

"There is nothing complicated in the construction of the range, as the operation is controlled by one slide draft. The top of the stove is one solid plate with the exception of two lids over the firebox which are used to get the fuel into the range. Most ordinary ranges have about six removable lids in the top of the stove. The manufacturers, the Hall, Zryd Foundry Co., Hespeler, Ont., claim that much valuable heat is allowed to escape through the cracks around the lids of the average range and so prevents the range from having an airtight heating chamber. One of the outstanding claims made for the FiReCo range by the manufacturers is that it will hold fire overnight with wood, and for ninety hours with coal. That means with coal as fuel a fire can be kept in for almost four days without replenishing.

Demonstration Starts Sale

"When we took on the agency the company sent their representative to our store and we put on a demonstration as to what the FiReCo range would do. That demonstration started a good many people to think about the principle involved, with the result that sales were made shortly afterwards. We have sold quite a number to the farmers of the district. Every range that is introduced we consider a good salesman for other stoves. Neighbors in a farming community are always interested in the purchase of a range by their friends, particularly if that range embodies a new feature or principle. They are naturally sceptical at first but they think for themselves and can be shown. The women folk on the farm are naturally a good advertising medium when a range has been placed which gives satisfaction.

Townspeople Become Boosters

"But the farming community is not the only source from which we drew our trade for this FiReCo range. There was one woman who lives in Dundas and who required a lot of convincing before she became a valuable asset to help us make sales. A FiReCo range had been installed for her and apparently she was not getting the results she had anticipated. She became what is usually referred to as a "knocker." She told her neighbors that she could not get satisfaction out of the range, and it was hurting our sales. She had the faculty of being able to get a hearing among her friends and acquaintances and her line of talk was at first very damaging. We were confident that she had not become acquainted with the method of operation of the FiReCo range and we wrote to the manufacturers asking them to send their representative, who would be able to explain the workings of the stove thoroughly. In the meantime this woman had decided to get in a range modeled along familiar lines.

"When the representative of the Hall, Zryd Fdry. Company arrived he made a thorough examination of the range and proceeded to give the woman proper instructions. It was necessary to use a great deal of tact with this woman for she had already ordered one of the ordinary lines, and it was just hanging in the balance whether or not she would allow the new model to remain in her home after it arrived.

"'I tell you what to do,' stated the manufacturer's representative. 'You let the other range come along. Set it up and try them both out. If our FiReCo range does not give satisfaction when you follow the instructions as we have outlined them, we will take our range out. If it will do what we claim it will do, and you want to dispose of the other range, we will take it out and dispose of it.'

"The result of that situation was seen when some time later the woman ordered the range modeled on the old principle to be removed. Now that woman is one of our enthusiasts, and the result has netted us a number of sales because she talked the stove and its advantages to her neighbors. It was just a case of giving the right instruction to this woman. As soon as she knew how to operate the stove its advantages were manifest immediately. From a positive detriment to our sales she became a real asset and has been the means of our selling a number of stoves in her immediate district.

Playing Fair in Competition

"One of the essentials to secure the confidence of that woman was to play fair in competition with the product of the other manufacturer. The salesman of the FiReCo line advised that the other stove be allowed to come forward and that a fair trial be given of both stoves. This appealed to the sense of fair play in the woman with the result that the FiReCo Range won out. During the first six months we had the agency for this particular range we have made twenty sales. There is a good profit on the line, being in the neighborhood of $20 on each sale. We now have an additional twenty ranges in stock and expect these will find ready sale.

Know Your Goods

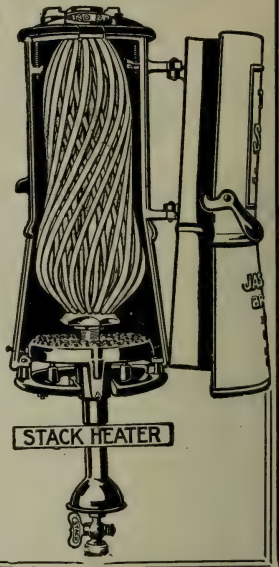
"Our experience in this respect goes to show that the Retail Stove Dealer should know his goods thoroughly, and by having a FiReCo range on his floor in actual operation, he is in a position to prove and demonstrate all his arguments, which are so convincing when the range is seen in actual operation before the prospective customer that there is no difficulty in closing the sale," said Mr. Wilson.

The reason of Stack Superiority is easy to explain

All that is usually necessary in making a Stack Sale is the opening up of a Stack Heater to show the prospect.

The big feature of the Stack Gas Water Heater is the near perpendicular tubes in which the water is heated.

The water in Stack tubes is subjected to intense heat from the time it enters the heater until it is passed out of the coil. Small columns of water will heat much more quickly than a large coil, especially when heated from all sides. That's why it's so easy for the Stack to heat water in one minute. Just open the heater for your next prospect. It won't take so long to show him **why** he's getting the best heater on the market.



James Morrison Brass Mfg. Co., Ltd.
93-97 Adelaide Street West - TORONTO

HOYT METALS

Nickel Genuine stands up under extreme heat

In foundries, glass works, etc., where machinery bearings are subjected to intense heat from without, in addition to the heat produced by friction, a peculiarly hard babbitt must be used. The mixing of such a metal is an exact science — a science rarely crowned with such a success as Hoyt's Nickel Genuine. This wonderful heat defier is made with scrupulous care, is always correct in mixture to an ounce, and can be relied upon to give best results where bearings are subjected to exceptional heat. **If you've had trouble with soft bearings try Nickel Genuine.**

For Those Who Want the Best

—the shot shell that has made its name so rapidly by having the quick punch that blows the clay targets into dust and brings home the finest bags.

Canuck
is the choice

Examine the loading of the Canuck by slicing the side with your knife. Notice the firm crimp with the proper bevel that insures positive operation in repeating shotguns. The body paper is tough but not brittle and will not crack at firing. Test the shot for roundness, hardness and uniformity of size.

Call special attention to the wads. Notice how well they are seated, the cupping, the quality of the felt. Properly seated wads have a tremendous effect on the shooting qualities of a shell. The cleanliness and even granulation of the powder should not be forgotten when showing the loading.

This demonstration of quality will interest your customer and make sales.

All Dominion Shot Shells will stand this test.

STANDARD Floor Dressing

Aids the Tidy Storekeeper

IT is a means of freshening and brightening the whole store. It aids in keeping the shelves and the goods on them always fresh looking and attractive in appearance. It maintains the floor itself in smoother, better and more sanitary condition.

No mop or feather broom can control the dust as Standard Floor Dressing does. When spread evenly and economically over the floor surface, it catches and holds fully 90% of the atmospheric dust in the store. All that is necessary to keep the dressed surface in good order is regular sweeping of the accumulated dust and dirt with a stiff brush or broom.

As a material Standard Floor Dressing is sanitary and preservative. A gallon will effectively treat 500–700 square feet of surface and will last for months.

The dressing is sold in one and four gallon cans and in barrels and half barrels. It is easily applied with an ordinary floor sprayer.

NEW SAFETY STOVE PIPE

There's the patent lock effect that saves your customers trouble and expense

THIS lock feature is only one of many new ideas embodied in the "New Safety Stove Pipe."

HARDWARE dealers will make no mistake in ordering sufficient "New Safety Stove Pipe" for next winter's business. Here are a few reasons why it will sell—

Telescope pipe eliminates half lengths.

No wiring needed. Can't be pulled apart.

Costs same as ordinary pipe. Made in 6 and 7-inch sizes. Made of 29-gauge iron.

Pipe is nested, saving freight rates and storage room in store. Eliminates all danger of pipe falling down; easy to put up; absolutely leak-proof; cannot come apart; locks automatically; good appearance. New patent lock effects saving on each pipe, making a saving of one length in every twelve ordinary pipes. Can be used any place where ordinary pipe is used, or can be used along with ordinary pipe.

Patented in Canada and the United States, and "Made in Canada" by Fairgreave & Sons.

Order your winter supplies now.

Success and Your Associates

ALWAYS associate with men who are earning more money than you are. Such is the advice given by a man whose name is known the world over for his own success and the business which he created. It is good advice of a certainty, but we are not urging that it is the best advice. At the same time it is wise to associate with better or bigger men than you are yourself, because you are likely to be lifted up to their levels.

Most of us would probably like to be the intimates of J. P. Morgan, or of John D., or of Charlie Schwab, or Canny Andrew. If we had a speaking acquaintance with John Wanamaker, or Lord Beaverbrook, or Lord Shaughnessy, and with other distinguished and successful men, we would take comfort from the fact.

And most of us would feel rather small and uncomfortable if we were placed beside President Woodrow Wilson at a dinner table, or beside Sir Robert Borden, Sir Herbert Holt or Sir Wm. Mackenzie. And the reason would probably be that we know so little of the knowledge that really counts. If these successful business men engaged us in conversation we would probably find ourselves knowing very little about the things that matter.

This will illustrate the point:

Here's a true story. A Toronto manufacturer found himself on a train going to Albany in company with a number of distinguished Americans about to attend the inaugural ceremonies of a State Governor. A washout led to a delay, and the Canadian was thrown into close association with senators and congressmen and prominent lawyers. They bantered the little Canadian about Canada. He had the pluck of a bigger man. He had been a constant reader of THE FINANCIAL POST, and had absorbed many facts about Canada. He surprised his American travelling companions with his positive, well-informed and wide knowledge of Canada. When the company reached Albany, the Canadian was persuaded to attend the ceremonies and was introduced as the man who knew all about Canada. The Governor was interested in Canada, and said so, and the little Canadian found himself telling the story of Canada very ardently to a very attentive listener, much to the amusement of his friends who introduced him.

This man made a hit on that journey, and many friends. One of the company gave him a stock market tip worth a fortune.

The point of this story is: You, as a Canadian, can make yourself informed very fully and intelligently if you become a regular reader of THE FINANCIAL POST. You can make yourself a worthy companion and intimate of presidents and magnates. The world likes to listen to men who know something well, and who can talk interestingly and informingly on the subject of their study.

You can become worth listening to if you know your Canada well. And you can get the kind and amount of knowledge concerning Canada which will make you interesting to others if you will read THE FINANCIAL POST regularly each week.

IF you read THE FINANCIAL POST REGULARLY you will find yourself keeping company with the highest paid staff of editors engaged on any publication in Canada—trained men who know how to make others know what they know and learn.

You will find yourself living in a most interesting world—the great, throbbing world of business. You will have your thoughts tremendously stimulated and helpfully directed. You will find yourself becoming a fit table companion for big men — this because you will have knowledge of a quality that will keep you from shame.

What is it that keeps you and THE POST separated? It cannot be its subscription price of $3. Probably it is because you are not very well acquainted with this paper.

We are going to put it to you this way: If you have the desire to be worthy of association with big men, then prepare yourself for such association by reading THE POST, and to make acquaintance easy, we provide the coupon below. It offers you THE POST for four months for a dollar bill.

The MacLean Publishing Company, Limited,

Dept. F.M., 143-153 University Avenue, Toronto.

Send me / us THE FINANCIAL POST for four months for One Dollar. Money enclosed / to be remitted

Auto Accessory Sales Help Other Sales

Ralph & Wilson, of Dundas, Ont., Have Recently Added a Line of Motor Accessories and Are Pleased With Results—Line Brings People to Store, and Sales of Other Hardware Lines Often Result

View of Exterior of Store of Ralph & Wilson, Dundas, Ont., Showing Display of Automobile Accessories and Paints. This Firm has Recently Added Auto Accessories and Finds that it is a Good Line.

IT has been pointed out before in these columns in giving the experience of various dealers that the sale of gasoline brings customers to the store that would otherwise not come. Ralph & Wilson, of Dundas, Ont., have found that the handling of the regular line of automobile accessories, such as goggles, cement, repair outfits, wrenches and the numerous other articles that go with such a line have an intimate bearing on fostering of trade in the regular hardware lines.

When the purchase of gasoline is made the buyer very often does not have occasion to enter the store. He draws up to the curb, gets his tank filled and drives away again. But with the other lines of accessories he must actually get out of his car and go into the store. There he examines the various automobile accessories and has a chance to look around the store at the same time.

This factor has been a tangible asset in helping the trade in regular hardware lines. It has been the experience of this firm in the past that considerable trade went to their competitors in the nearest city because of the proximity of those stores and because of the ease with which they could be reached. A short drive of five miles would take them to those stores. When they were in need of auto accessories the owners would drive to the larger city to get them and their other purchases of hardware lines were invariably placed where they purchased their accessories.

The number of car owners in the Dundas district is considerable and since the placing of a stock of auto accessories by Ralph & Wilson many of these car owners have found that they could purchase their supplies just as well nearer home. The farmers of the district are becoming owners of automobiles in an ever-increasing number and the sale of accessories is helped out in turn with them because the hardware store is invariably a frequent port of call with the farming community. In this way the two lines have been found to interlock—the sale of auto accessories has

helped sales of regular hardware lines, and vice-versa.

The idea is not a new one, as the department store has worked this principle out to perfection. Trade in one branch begets trade in another branch. The problem is to get the people into the store. When that has been accomplished a big step has been made toward roping and tying the sale. The multiplicity of lines attracts the crowd of people because they have such a wide selection. In a lesser degree this is what happens in the relation between the regular hardware lines and automobile accessories.

Enthusiasts Over Stove Sales

Ralph & Wilson have had a somewhat unique experience in handling a particular line of range. The line which they have been handling had met with favor in the West, but the conservative East had not yet taken up with the idea, largely because the manufacturers had not pressed their sales in the Eastern district. Now, however, the manufacturers are getting after the Eastern trade and this Dundas firm took on the agency for this particular kind of range.

"We have sold twenty of these ranges since October of last year, at which time we took on the agency," stated H. B. Wilson, of Ralph & Wilson, to a representative of HARDWARE AND METAL. "The manufacturers have given us good assistance in putting on a sales campaign and we are greatly pleased with the results we have so far attained. We now have twenty more of these ranges in stock and expect that they will find ready sale.

"The manufacturers claim they have embodied a new principle in their range and from reports we have had from our customers we are led to believe that their claims are justified.

Started Sale With Demonstration

"The sale of these ranges was started off with a demonstration of their qualities. This demonstration was advertised and a representative of the manufacturer was on hand to make a thorough explanation of the range. In this connection we must take our hats off to that particular salesman who represented the manufacturer. He knew his business as a salesman and he knew his range. With the gift of putting his arguments and facts in such a way that the attention of the prospective buyer was arrested that demonstration resulted in some initial sales. That was the starting point from which we have been able to go on and develop the trade.

Value of a Pleased Customer

"One of the big factors in helping us introduce this range has been the advertising resulting from sales. When a range was placed in any particular district it usually happened that other sales were in order in that immediate vicinity. One customer that was pleased with the range would invariably tell her neighbor. Being a new principle applied to a kitchen range the neighbors were naturally interested to know what kind of work it would do.

"On the other hand a customer that is not thoroughly pleased with her purchase comes to be a big detriment to other sales in that particular district. This was forcibly brought to our attention by the attitude assumed by one woman who on the start had not been able to get the satisfaction from the range that she had anticipated. She frankly told her neighbors that she was disappointed in the way the stove was working. And it was hurting our sales. We felt sure that she did not understand the thorough working of the stove and we advised the manufacturer that his representative should be sent down to explain.

"This was done by the manufacturer. But in the meantime the woman had ordered another range of the ordinary type, which range was soon due to arrive. When the new range was thoroughly explained the woman felt somewhat better over the prospect, but was still in doubt as to its ultimate efficiency. The manufacturer's representative advised that she should allow the other range to come forward. 'Try them both out. If you follow the instructions as I have given them and are still dissatisfied with our range we will take it out. If you come to like our range better than the other after you have had a chance to compare them we will take the other range and dispose of it.'

"This line of fair talk appealed to the woman and she decided to give both ranges a trial. The result was that our range was allowed to remain and the one built on the ordinary principle was taken out. This woman has since that time become one of our best sales mediums. Through the recommendation that she has made to her neighbors we have sold a number of these ranges in her immediate district. This instance served to show us that it pays to play fair in competition."

Roofing Sales Gratifying

Ralph & Wilson have found a good sale for ready roofing in their district. They have linked up with the advertising campaigns of the manufacturers and their trade has been steadily increasing for this product. The farmers are one of the chief sources of trade. One of their difficulties had been to sell the manufacturers of the town, who have invariably been of the opinion that they could buy direct from the manufacturers at a better price than they could quote them. "As a matter of fact they could buy only at the same figure that we could sell them at. The resale price in this particular commodity is a protection afforded by the manufacturers and they do not go back on the dealer they have appointed for a particular district."

Holds Trade When District Changes

Macedonians and Bulgarians Crowd Out English-speaking Residents, but E. A. James Continues to Have Increased Hardware Trade in Eastern Toronto District —Confidence of Foreigners Big Factor

E. A. JAMES, hardwareman on King Street East, Toronto, has had an unique experience in that while the character of the district in which he has lived for the past twenty years has undergone a marked change in the class of people with which he has to deal, at the same time his trade has continued to steadily increase. From an English-speaking district it has changed largely to a Macedonian and Bulgarian district. It is a factory and shipbuilding district in the vicinity of the waterfront. About eight years ago the English-speaking residents began to leave and the Bulgarians and Macedonians moved in and took their places. For a time it seemed that this hardwareman might have reason to think that his trade would also shift or drop off. But such ideas were not entertained for very long as these foreigners soon started to purchase large quantities of enamelware, spades and shovels and other articles. Just about that time Mr. James began to lay more stress on the development of trade with the factories in that district and this more than compensated for the loss in the English-speaking trade. It soon became apparent that there would be no need for him to shift his place of business because of the fact that the English-speaking element had shifted.

Gets Confidence of Foreigners

"The fact that we have been able to get the confidence of these foreigners has been the biggest factor in helping to win their trade," stated E. A. James to a representative of HARDWARE AND METAL. "When these people first started to come to our store they were interested primarily in enamelware and tinware. When they started their housekeeping operations on arriving in this country they were naturally in the market to buy household utensils of various kinds. They were making good money at the various factories and were in a position to pay cash for these articles. There was a marked tendency on their part at first to want to haggle over the price. Evidently it was part of the business system in the

There is Neither East Nor West When Strong Men Meet in Fair and Upright Business Dealings

In this Story Inhabitants of the Near East are Shown to Place Perfect Confidence in a Hardware Man of the Western World

lands from which they came to haggle and dicker over the price. They wanted to do the same when they first started to deal with us. But we were firm in our attitude and gave them to understand that we had but one price. We would never deviate the slightest from the price which we first announced to them. Had we deviated or shown that we would take a different price than the one originally announced their confidence in our prices would have been destroyed."

Learns Language of Foreigners

E. A. James is one of the two or three English-speaking business concerns to still remain in that district after the character of the district started to change. One of the factors that helped him to get into the good graces of the people of the district was the fact that both he and his wife learned the language of the people. At least they learned sufficient to know the names of many articles in their hardware stock and also to count their money in their native language. The confidence which these people placed in this firm is exemplified by the fact that they have on more than one occasion asked them to hold their money for them for safekeeping. The firm invariably told them to take it to the bank, where they could have it kept safely as long as they cared. Among themselves these foreigners showed a disposition to mistrust their own people and preferred to rely upon English-speaking people in matters of trust once they were convinced of their integrity. It was a somewhat slow process at first to educate those people to the one-price idea, but Mr. James is firmly convinced that that was the only proper method toward gaining their confidence. When they came to realize that there was but one price as time went on they never questioned the quotation. And they would buy good articles, the highest-priced, especially in enamelware, for they came from lands where the art of enameling was carried on and they knew what constituted good enamelware. In spades and shovels they also wanted the best grade.

Furthermore, they were invariably ready to pay cash for any commodities purchased. They are industrious workers and seem to know how to take care of their money. Their investments in the best grades of goods would incline to the opinion that they are thrifty buyers. They realize that the best article is invariably the cheapest in the long run. There are very many English-speaking people who fail to realize the merit of buying the best goods rather than the cheapest goods. Hardwaremen can do much toward retaining their trade and in getting repeat orders by always keeping this fact in mind. It is quality the people will remember long after the price is forgotten. Good value in any commodity is always a good investment, no matter what the price may be.

Started in Plumbing Business First

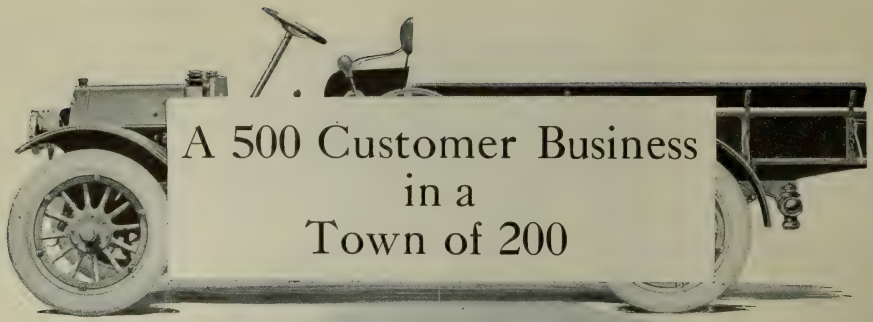
E. A. James originally started in the plumbing business in that district some twenty years ago, as he was a plumber by trade. At one time before he started to add a hardware stock he employed as many as eight and nine plumbers. Gradually he added to his stock of hardware and with the falling off in building some three or four years ago he allowed the plumbing end of his business to occupy less of his time. At the present time he keeps but one man for the plumbing business and devotes the major portion of his activities to the hardware trade. His one plumber is kept busy on repair work for the foreigners of the district. His plumber is able to speak the language of the people and always makes it a policy to collect part of the money before he begins a plumbing job. When he is called in to look at a certain job he tells them how much it will cost and how much cash deposit will be required before the work is started. This cash deposit usually comprises the greater proportion of the payment. Mr. James asserts it is much easier to collect a bill of $15 or $20 when they are in need of the work than to wait for collection after the work is installed. At the time they are in need of the work they are ready and willing to pay for it. Once it is installed and they have had the advantage of its use for some time there is a tendency to forget how much they appreciated the repaired condition when the work was completed.

There is a lot of psychology in this method of doing business. For it is very often human nature to appreciate a thing more before it is actually possessed than after it passes into one's possession. This is the strong point in favor of the cash system of doing business as compared with the credit system of trade. When the article is used for a time and becomes worn there is not the same interest manifested in desire to pay for it. If the transaction is completed while the customer is in that psychological state of mind that makes him ready to trade his cash for the article it is always a much easier proposition to extract the cash from him at that time.

Shipbuilding Trade Increases

With the recent impetus to shipbuilding activities throughout Canada the Toronto shipbuilders have shared in this prosperity. Some shipbuilding plants are located on the lake front in the neighborhood in which the James store is located. Workmen engaged in those shipbuilding plants have become a source of trade for tools peculiar to that trade. Slicks, lip-edged adzes and other articles are now finding a ready sale. It took Mr. James some time to secure a stock of these articles as the wholesale houses had not been in the habit of carrying them. At the time HARDWARE AND METAL'S representative visited the James store these lines were being prominently displayed in the window. With continued growth in these shipbuilding activities Mr. James looks

Continued on page 47.)



A 500 Customer Business in a Town of 200

IT is not a city, not a large town, not even a small town where W. R. Browne & Son conduct their thriving store; it is in Cherry Valley, one of Ontario's many bright villages having a population of about 200. At first glance it would appear that there was a very limited scope for big business, and if the members of this firm were content to sit back and wait for customers to come to them, most certainly they wouldn't be doing the business they are to-day. It is by extending their territory, by going out after the trade that W. R. Browne & Son are to-day doing a volume of business which would do credit to a town or city many times the size of their village.

Trading With the Farmer

The bulk of trade handled is that done with the farmers as they are situated in a farming community. But how to get the trade of farmers who are nearer the county town or some other shopping centre was the point to be considered. The idea of a limited scope for their activities did not appeal to the members of this firm, so first of all a wagon, loaded with staple groceries, hardware, dry goods, etc., was sent out and brought the goods right to the farmers' doors. The farmer in whose district Browne's wagon went did not have to face a long drive in disagreeable weather; Browne's driver became a regular caller and rendered a measure of service which the farmer was quick to appreciate.

Dobbin Replaced by Motor Truck

The horse to-day has been supplanted by a motor truck and a day's round trip now means about a 45-mile drive—20 to 25 miles away from headquarters and back by another route. That is covering territory and as Philip Browne states is the only way in which they can get and hold the trade for their store.

Deliver Orders to Farmers' Doors

But they are getting it and holding it, too. On the day's trip, orders for the following week are taken—the farmers can intimate what they are going to need, be it a package of tacks, a pound of tea, a spool of thread or an automobile tire and the following week it will be delivered to their door. Think what a measure of service this is to the busy farmer, especially during his spring seeding or fall threshing when every hour, every minute on the farm is fully occupied and a half day's trip after supplies can ill be spared.

> IF you lived in a village of 200 souls would you figure that you had a chance? Would you figure that it was possible to serve 500 customers?
>
> Well it is. And here is the proof—Cherry Valley, Ontario, is a small town of not more than 200 people, and Browne & Sons' customers number upwards of 500. Not all of them come to Browne's store to deal. Browne goes to them. He goes with a motor truck loaded to meet their every need.
>
> Browne's store is located five miles from the county town and railway station, but Browne sells goods right in that town and to the municipal officers of that town. Browne goes out after business and gets it.

The delivering of orders, however, is not the only function of the motor truck and its load. As stated above, staple articles in everyday use are carried on the truck for sale and items which the farmer may have overlooked are usually available. The average wholesale value of goods taken out each day is $700.00, and it can be seen that a fairly wide range of merchandise could be included. The driver is more than the man who guides the wheel of the truck, he must also be a salesman and one of tact in handling the many types with whom he meets.

The Driver a Drummer

Speaking then of the man who looks after this end of the business as a salesman, it is to be noted how he drums up new business. In calling on John Jones he learns that a near neighbor is anticipating building a barn, remodeling his house or talking of painting. Down in his little book goes a memorandum and if possible he secures further details from this neighbor. Failing in this, however, he turns in this man's name at headquarters and action to secure this business, whatever it may be, is at once started.

Following Up Prospects

Mr. Browne used as an illustration of their follow-up system the matter of roofing. Assuming that Frank Burns was going to put a new roof on his house, this firm sit down and write to the manufacturers of the roofing which they handle and a circular letter outlining the many points of value in connection with this brand of roofing goes direct to this man Burns from them. Browne & Son are named as agents in the district and they also send out a circular letter, along with prices and samples. When these have gone forward, one of the members of the firm usually steps in his car and makes a personal call on the farmer. The result may not always be a sale, but at least a friendly spirit has been created, for Burns likes to feel that his business is appreciated.

Now It's the Motor Truck Salesman-Buyer

The motor truck salesman is also a buyer—truly a man of many activities He buys the eggs and butter which the farmer's wife has to sell, he pays her as much as though she drove five, ten, or twenty miles into town, besides assuming all risk as to breakage in transit. This business is handled either in trade or in cash. By that is meant if the farmer's wife has any purchases to make and wants her eggs or butter to pay for them, that method is satisfactory, or Browne & Son will purchase the eggs or butter outright and give her the cash. There is no obligation to trade in their produce. Practically all of the eggs which Browne & Son handle are shipped away to the

larger consuming centres. In the peak of the producing season, this firm ships on an average about 3,000 dozen per week.

Making the 'Phone Work

Since the 'phone has become so universally distributed throughout the country, this method of placing orders is used extensively by the farmer's wife. The day prior to a trip over a certain territory is usually a busy one on the 'phone from residents along the route. But this firm do not expect too much of the farmer or his wife in this respect. They have specials to offer quite often, so they get busy on the 'phone and acquaint their customers of the fact. The results are obvious—when the truck calls the next day it is loaded with orders taken over the 'phone in addition to those secured the preceding week on the trip.

Close Tab Kept on Credits

Asked as to whether it was found necessary to do much credit business, Mr. Philip Browne replied in the affirmative. "Our heaviest calls for credit," Mr. Browne stated, "are from February 15 to June 1. This period is rather a non-productive one as far as the farmers are concerned, and to the limit of our ability we are willing to help them out. However, we are able to keep a very close tab on all goods going out and probably our knowledge of our customer's means is more intimate than most storekeepers. This is accounted for by our weekly calls right at his home. There are those to whom we are willing to extend all the credit they want—there are others again upon whom we set a limit and beyond that limit we will not go. Accounts are sent out every two months and if returns are not forthcoming we make use of a follow-up system in addition to having our truck salesman-buyer and now collector watching matters closely. The loss we sustain through poor credits is practically nothing at all. We are easily able to tell whether a man is buying goods elsewhere instead of giving us a fair share of his business. When he is a strictly cash customer, he is entitled to buy goods wherever he likes, but when he owes us money we make it a point to see that he doesn't give the other fellow all the cash and us the credit."

Truck Headquarters a Thriving Store

But though the road business is a big end of the trade handled by this firm, Mr. Browne states that the business they do in the store itself is outstripping the other materially. "We are now well known, and the range of goods we carry in the store is most certainly larger than can be handled on a truck. The farmers and their wives are coming in increasingly large numbers to the store where we have a wide selection of goods for them to choose from. I do not think we will dispense with the truck, however, for some time to come. The truck reaches some customers whom we very rarely, if ever, see in the store. We cannot expect farmers twenty miles away to come to us when they can reach our county town by driving half the distance. That is why we go to them—we have that competition to meet and it is the only way that we can overcome it."

Where Aggressive Tactics Win Out

Aggressive tactics, coupled with service, have built up the Browne & Son business to its present standard. Looking into the hardware department, how has this been exemplified? The question of roofing as outlined above is one example and in the new branch of the hardware department—automobile accessories—is found another. A year ago last February this firm received advice from the manufacturers that an advance in automobile tires was to be put into effect.

Worth While Tire Business

They immediately secured a list of car owners in the town and county from the license issuer and with this made use of the telephone. In that month they sold $1,300.00 worth of automobile tires —over the 'phone. They protected their customers against the advance in price

A man whose business is worth going after.

which was to come and secured tire business right in the county town where the stiffest opposition might be expected to develop. During the past year this firm sold between $5,000 and $6,000 worth of automobile tires and intimated that the net profit from this department during 1917 was greater than their total sales of the previous year. It was a case of going after the business and getting it.

Browne's Interpretation of Service

The little word "service" though only containing seven letters, can be built into big meaning. Mr. Browne quoted two or three instances where customers in motoring had experienced tire trouble during their summer's travels. They remembered the 'phone call of February and in turn 'phoned to Browne's to see if they could help them out. Browne's did—though it may have meant a trip of four or five miles; this was part of their service and a new tire was dispatched to the scene of disaster post haste.

Wholesalers in Some Lines

Browne and Son handle oil and gasoline in a wholesale way. They also have a tank wagon containing 310 gallons which they send out from the store and do a very big business with the fishermen. Their business in all amounts to about 14 carloads a year.

In addition to oil and gasoline they handle wholesale tobaccos for the county. They have two warehouses in town—where all shipments come and in which they keep their surplus stocks. It is only necessary for their customers in the town to 'phone their orders in and delivery of same will be made in about 20 minutes' time if it's a rush order. Cherry Valley is located about five miles from the county town, but the service rendered to their town customers does not suffer as a consequence. It must be remembered, of course, that all orders handled are not rush orders, and delivery of orders can usually be made on the regular trips to town. All this firm's goods have to be trucked to their store, which means that trips to the town are frequent.

Selling Sweets

The candy end of the grocery department has been a big one. Up until one and a half years ago when the help question became so acute, this firm manufactured 90 per cent. of the sweets they sold. However, for the present they depend on outside manufacturing but when more help is again available, the local product will again be in evidence.

Groceries, Flour and Feeds

The grocery department is carefully arranged and a display counter with thirty-six sectional glass fronts behind which the usual class of goods is shown greets the customer on entering. Across the back of the store biscuits are similarly displayed. Getting the goods out where the customers can see them is the policy of the store. Separate display cases are used to show cigars and cigarettes, cheese, candies, dry goods, cutlery, auto accessories, etc.

Sales of flour and mill feeds are made in large quantities. A separate room for flour, free from dust and dampness, is provided. Mill feeds move out pretty freely, one case (an exceptional one) being cited where a car recently reached town on Monday and was all sold on the following Saturday. A carload usually lasts from two to four weeks.

Making Use of Display Windows

The display windows in the store are used largely in the display of many lines of hardware. They are kept clean and a bright, attractive arrangement of seasonable lines is always provided for. The displays are changed every week or ten days and are carefully watched by the passer-by.

The advertising done by this firm consists of both newspaper and circulars. Circulars are used more extensively owing to their covering more directly the territory covered by this firm's ac-

tivities than the town newspapers. From one to three a month are sent out according to the season, and the range of goods which it is wished to cover.

Stock the Goods the People Want

This firm believes in carrying a complete stock. This was cited in reference to automobile tires and lenses. "We carry all sizes of automobile tires from 30 x 3½ to 37 x 5 inch," stated Mr. Browne, "in both plain and non-skid types. The same can be said of lenses of which there are many different sizes for the many kinds of cars. It is only by carrying a complete line that we secure and hold our trade and our customers are reasonably certain that we will be able to supply their needs at all times. These are only two items, but our stock throughout is marked by its completeness."

Hardware Department in New Quarters

The hardware department is in a new wing of the building. The business developed so rapidly that this action became necessary and there are already evidences that present accommodations are inadequate. In front of the store a gasoline filling station has been installed and Mr. Browne is now planning a "free air" service for motorists, many of whom pass through the village on pleasure trips as well as for business. The farmers throughout this part of the county are great motor adherents too, and appreciate the little touches of service in evidence in this store. Owing to the frequency of calls which the Browne truck makes on the farmer, a personal interest in the store sending out the truck is created and the farmer now motors in to the store to supplement the visits of the truck.

Standing Back of the Goods

When replacements are necessary or goods are to be exchanged, it is done with the greatest possible cheerfulness. "We make our customers feel and we want them to know that we are at all times willing to adjust matters to their entire satisfaction, and no questions asked. We exchange goods or refund the cash and try to impress on our customers we are as willing to do this when necessary as to sell them a $1,000 bill of goods," stated Mr. Browne.

A special room is devoted to the sale of wall papers. This enables the buyer to select papers without any interruptions and that this method of selling is appreciated is evidenced in the growth of business in this department.

The Personal Element Again

The personal element has been a strong factor in building up the Browne business to its present status. The farmer to-day appreciates service. The advent of the motor means that he is not confined to a small compass to do his trading and it is by keeping in close touch with him that the farmer responds and gives his trade to the merchant who goes after it. It is the attitude of "go-get-it" that has built up the Browne business and that attitude will always succeed when the "waiting" game remains just "waiting."

Galvanizers May Not be Able to Get Sal Ammonia

"Concerns who do galvanizing in Canada may find themselves short of sal ammonia in the near future if the recent embargo placed on the export of all salts of ammonia by the United States Government is maintained," stated A. Nieghorn, manager of the Nichols Chemical Co., Toronto, who are importers and manufacturers of ammonia salts and other chemicals. "This measure has been in effect now for some two weeks and may seriously affect the manufacturers of batteries. White sal ammonia is used extensively in the manufacture of batteries, while grey sal ammonia is used by galvanizers, such as makers of wire fence and galvanizers of metal sheets of various kinds. We understand that the matter is now being referred to the Government by some of the galvanizers, who state that it would be impossible to get along without this product. Sal ammonia is used by galvanizers to obviate what is known as splashing. In other words, it is used in the galvanizing tank in order to cause the zinc to spread evenly and adhere to the metal surface. In our opinion it would not be a serious handicap in the case of the galvanizers, as muriatic acid is being used successfully by one large manufacturer in Hamilton, and others could undoubtedly use this substance as a substitute for sal ammonia."

Current Events in Photograph—No. 22

AN AMMUNITION DUMP

Every now and then in the official communications from the front comes the word that this or that ammunition dump has been bombed. Very few people have any idea just what an ammunition dump looks like. In the accompanying official Canadian photograph is seen one of these dumps behind the Canadian lines. It gives some idea of the havoc that might result from high explosive bombs dropped in such a location.

Co-operation Will Increase Paint Sales

Charley Wright, of Acme Hardware Co., Gives Pronounced Opinions in Conversation With Jim Rogers, of Spreadit Paint Co.—Thinks Elimination of Needless Colors in Order—Advises Co-ordinated Sales Effort by Manufacturers

THERE is needless waste and lost effort in the selling and marketing of paint at the present time, according to views expressed by those closely in touch with the paint trade. There is a big field right here in Canada for a great increase in trade if the manufacturers, dealers and others will only get together in co-ordinated efforts along this line. The following article has been contributed to HARDWARE AND METAL with a view to opening up an intelligent discussion of the best way to proceed in fostering this lost paint trade. This is the third in the series of these articles, the previous ones having appeared in our issues of April 13 and May 4. Opinions from various branches of the trade on the feasibility of this project will be welcomed.—Editor.

JIM ROGERS knew too much of the paint business and the condition of many dealers' stock to attempt any serious counter argument. Wright had stirred a sleeping dog that he had often felt would some day rouse up and show its teeth. Here in plain language was set forth a condition of paint selling and distribution that had wrinkled the brows of altogether too many dealers. In some respects he acknowledged himself guilty for these conditions. To tack on to an order unnecessary colors, sizes and sundries was a temptation he had never been quite able to overcome. It helped to swell his personal business, it looked like good business for the house, so why not load on all the traffic would bear? Still he always felt in the bottom of his heart that his customer could get along just as well without them. He knew his competitors were doing it; there was no restraint from an economic standpoint—except occasionally when that far-sighted, figure twisting, tight-fisted credit man back home put a crimp in some of his overly weighted orders,—and the wordy bouts he enjoyed with him trying to put it over, but Jim was in his element in any scrap of that nature. His Saturday mornings in the office would have been too dull-drab if he couldn't have a verbal run-in with somebody.

Rogers, however, was listening to Wright to learn and not to combat as had been his custom. Sober reflection on this question of distribution when linked up in its relationship to capital overhead charges and shelf space brought an undeniable argument for some form of lessening a burden which both retailers and manufacturers had been laboring under for years. Wright had brought it closer home by putting it up to him, if his own hard earned cash were involved in the investment of a paint and varnish department. He was forced to ask if he would sell to himself as he had sold to others? He had to admit that where his treasure might go, his heart, head and whole thinking apparatus would be tagging pretty close behind—a mighty sight closer than they would to the other fellow's money. And the chances would be ten to one that he would exert pressure on the house to discard the non-essentials rather than increase them. The more deeply he imagined his own course of action with his own money, the more seriously he took to Wright's contention. After all, was this lopping off of unnecessary business to make way for sounder business and healthier turnover contradictory—or was it not? The more he mulled it over in his thoughts, more clearly came the answer—it was not! It assayed just about 99.9 per cent. pure common ordinary every day horse-sense. The puzzler was why he hadn't had backbone enough to admit it before. It was the sort of weeding out that would develop more robust, healthier growth in everybody's garden patch.

Elimination of the Needless

"What's more," broke in Wright again, "if this sort of elimination is good for war time conditions, will there be any argument for forgetting it again when we get back to normal? If you paint people can forget this petty scrambling to outstrip each other in useless and burdensome details and look to the larger interests of the trade, we can keep it up. If this concentration and condensation of our paint and varnish stocks can save a dollar now and make two grow where one grew before will there ever be any reason for wasting them again by the old scatteration system? Why didn't we all look at it this way before? Why not keep on looking at it this way? I want to tell you that those dollars will clink just as loud in my bank account, war or no war, and I am convinced that we dealers responsible for your retail distribution will probably have more to say in keeping you fellows in the straight and narrow than we've ever had before. If the present economic magnifying glass has been good enough to pick out the imperfections of the past, let's keep it focused to avoid the same faults in the future. You paint fellows ought to frame a little motto 'Nevermore,' and take a long, lingering glance at it whenever you are tempted to exploit something that can actually be done without. There's plenty enough necessary detail in your business at any time without scouting around for stuff that is not absolutely essential. You fellows may miss a few odd dollars here and there—but you'll be like the gentleman with the seventh cocktail under his belt—far better off without the eighth or a sorry looking figure with it."

Wright's machine gun of ideas was by no means suffering for lack of ammunition. It was steadily peppering Rogers' former smug stronghold of complacency and letting in daylight from every direction.

Competition of Keenest Kind

"Another thing," continued Wright, after a pause, "sooner or later we're going to hang up our muskets, gas masks and helmets and every nation will whet its pruning hooks and polish its plow shares for a commercial strife that will put all past competition deep into the shade. Canada is going to be into that scrap just as surely as she is into the present one. Essentials and not non-essentials, will be the things that count. Co-operation and co-ordination will be the life breath of our efforts. Our present Munitions Board is an example of the big thing that can be done when all factors are properly co-ordinated. Already our banks are getting together pleading the necessity of a big institution to handle a big situation. Any single man or any single branch of any trade that thinks that this game can be gone into single-handed is going to land into a corner, with a beautiful dazed notion of having had something hit them. Even war is a game that no single nation is fool enough to tackle alone. You paint fellows will probably find that those figures I gave you last fall will spell opportunity to somebody outside and then first thing you know international competition will be walking right into your own bailiwick without so much as a please or thank you.

Canada's Low Paint Consumption

"Now, it looks to me that you ought to make mighty well sure that you're cock o' your own roost first by a little co-operation. You don't have to go beyond the shores of Canada for more worlds to conquer. Canada's low per-capita consumption of paints points to the possibility of greater production right here at home. As I understand it production based on the home market will be the fortification from which you'll have to shoot if you are going to get into the big game outside. You won't do it by sitting around waiting for something to happen. You'll have to get up and make it happen. And you'll have to make it happen altogether. One man at an oar and another on his knees praying is mighty little use in bringing a lifeboat ashore. Everybody pulling on his oar in unison with

the rest will stand a better chance of weathering any sort of a storm."

It is difficult to describe the mental state of a man who has been suddenly jolted loose from a fixed, deep-rooted notion of his trade and suddenly awakened with an earthquake of ideas such as Wright had been stirring up. Especially so when those ideas have had no time to crystalize into definite shape in relation to the new viewpoint offered.

To picture Jim Rogers' present mental state under Wright's assaults would probably have upon the reader an impression as clear as the average futurist conveys with his conglomeration of lines and angles and kaleidoscope of color. But as we shall see those ideas did evolve into definite shape and form and were pretty free of void when they did leap into action.

Camouflage in Business

Wright's breaking up of Rogers' established attitude clearly illustrated how that all too frequently petty, infinite detail camouflages a man's own business to himself by the simple expedient of keeping up a close unremitting relationship between his nose and the ceaseless round of the grindstone. For those whose heels never leave the comfortable feel of mother earth the horizon is limited to fixed and definite dimensions. To a certain extent Jim's fixed notions of his trade in the past could be described in this manner.

Already many erroneous divine right ideas had been cleared away and left revealed clearly the potent value and possibilities of the paint and varnish trade in Canada. Jim dimly began to see that too long he had been tied root and branch to the traditional trellises of his trade. He had heard the word expansion, liked to throw out his chest and dwell upon it in the limited meaning of his previous understanding of increasing business. But expansion in the light of Wright's schemes extended far beyond any horizon he had yet explored. He knew that in his own factory, scarcity of raw materials, prices, labor—everything that had to do with production had uprooted, reformed and renovated many long standing and fossilized modes of procedure. That a similar revolution might be possible in the selling, distribution and advertising of that production was being revealed for the first time in a manner that could not be denied. Wright's proposals and outline for a more paint campaign had come like a short arm jolt that lifted Rogers' gaze a few pegs higher than he had ever gazed before and joggled his notions to the direct benefit of himself and his trade in general.

Following a considerable pause in Wright's discourse, during which Rogers continued to add to his already lengthy abstract of their conversation he looked up grinning, "Now that you've got the lid off Charley and the steam coming out, what else have you got stewing in that reform pot of yours?"

Where Co-ordinated Effort Comes In

"Do you remember some three or four years back when you spent a perfectly good and otherwise fruitless hour trying to convince me that I ought to move my paint department up to the front of the store and keep it there?" enquired Wright, striking off at a new tangent in his more paint argument.

"Yes! and it still sticks in my crop how all-fired stubborn you were about it," reminded Rogers, "but where do we go from here?"

"And you've never smoked out any explanation for the stubbornness?" continued Wright.

"Nope."

"Well, it was about like Mr. Post's coffee reform—there was a reason—and that reason was against you then, is yet, and it's up to you fellows to say whether it shall continue or not. Incidentally that very same reason is going to show you where a thoroughly co-ordinated more paint effort horns in on this discussion from another angle.

"Along about that time you paint fellows began to feel a mild injection of more paint business in your blood. You were something like a lot of duck hunters in September, the atmosphere made you just naturally feel as though you had to start gunning for something, somewhere. First one of you would blaze away with one idea, then another with a different idea till it pretty much sounded like a duck marsh at 4 a.m. New methods of getting paint business seemed to be the game you were after, and so you went to it with double-barreled guns all oiled up, decoys, dogs and all the rest of the paraphernalia. One fine morning some fellow suddenly woke up and conceived the brilliant idea that 'fall painting' would be a great business booster to relieve the epileptic spasm we have in the spring trying to crowd a whole year's business into April and May and June. Then another chap rolled out of the hay and questioned all and sundry if it wouldn't be 'some shooting' to have all year round painting. 'Blaze away!' was the indifferent response from under the other blankets. One or two set their sights for a 'Clean-up and Paint-up' campaign. Scarcely any one of you were concerned about what the others went after so long as you bagged your own game. And the result was none of you got very much out of all the noise that was made. Some few of you like yourself sent up supplications to us paint dealers to shove our paint departments up front to trap Mr. and Mrs. Paint User in season and out."

"And you were one of the fellows that refused to set your decoys for this business," responded Rogers pointedly.

"I did," retorted Rogers, "because as I say you paint fellows, who were the big boys in the game, let bang into the air hit and miss, packed up your guns, beat it for home without stirring up or bagging anything worth while."

"Seems to me you'll have to bear part of the blame then, after the admission you've just made," chided Rogers.

Concerted Action in Advertising

"Yes and No," admitted Wright, "the real reason, however, existed in the lack of concerted action in your advertising as I pointed out to you last fall. Now, mark you, I thought then and still think that everyone of these ideas are good—good as the wheat. But because you failed to get together and make a united drive to impress these ideas indelibly upon the public, to just that extent you failed to get me to put my paint department where it would be of all-season service to myself and my customers. I couldn't see then nor I don't see yet any reason why I should do it until something positive is done to get the public fixed into these habits."

"Which I suppose led to your statement that our advertising failed to hit the Bull's Eye," broke in Rogers.

"Exactly! No single branch of the trade can hope to alter the trend of public habit with any show of success. It will take the united efforts of every man jack of you to start the ball rolling in the right direction."

"For the sake of your argument let me appoint you our advertising manager pro tem," suggested Rogers, "and let us see how you would go about it."

Handicaps of Advertising Managers

"I refuse the job for two reasons," objected Wright. "In the first place my contention has placed me in the position where not only do I want to see results for myself—but I want to share the benefits equitably with every other branch of the trade—and so far I have been disappointed in the light of the figures given you. Now an advertising manager, no matter how important a niche he fills, is doomed to disappointment in any endeavor to carry out my ideas because he is more or less handicapped by the present methods of going it alone. Secondly, any man that undertakes seriously to put such a job over must be firstly the servant of all the combined elements of the trade and secondly must be backed by their co-operation both in finances as well as moral and active support. To my way of looking at it he should be foot free to turn loose on all these opportunities which, as I've shown you, actually exist."

"A pretty large sized job, Charley, apparently you want to be high Mucki-Muck and general factotum to dictate just what should and should not be," exclaimed Rogers with unconcealed admiration for Wright's ambitious scheme.

"Of course you couldn't shoulder the whole thing on one man, such a position would have to rise out of a proper organization," qualified Wright.

"Go ahead and organize," encouraged Rogers.

Suspicions That Hinder Trade

"I'll have to admit hands down," laughed Wright, "that it's just here that putting this scheme of mine into action becomes a real he-man's job. The fellow that can do it gets the problem by the scuff of the neck and the seat of the pants and has a down hill haul. Like nearly every other industry the paint and varnish trade has its different associations each endeavoring to perform certain functions in the interests of its members. No doubt about it that

many are doing very useful work in their individual spheres. But there is too much lack of co-operation amongst them and this condition makes it difficult to get co-ordinated, representative action in the interests of the trade as a whole. What is needed to weld them more closely together is some object of common interest towards which representative action of every branch may be taken. Not infrequently you find one organization working with suspicion that some of the others have daggers up their sleeves for their particular pet projects. That sort of attitude must be laid aside. The time has come when every branch of the trade with all their associations should meet on common ground and have these misunderstandings threshed out and the common interests of each set into a definite objective, clear cut, and prepared for progressive action. It's in the air, Jim! sooner or later this trade of yours will have to come to it—eventually, why not now? Yet with this necessity staring us in the face, it gets me how in the Sam Hill so many persist with such childish delight in packing around their petty little whims, biases and prejudices which only serve to blind them to their own advancement. To get these individual units together and kick their feet under the same table so that such an understanding may be reached just about rivals Russia after Nicky got his walking ticket."

"Let's grab this organization of yours out of thin air for the time being and suppose that you have got them cheek by jowl at the round table, what then?" suggested Rogers.

How Co-operation Could Work

"The usual parliamentary procedure," answered Wright, "appoint a committee. But I'd want them to do the unusual unparliamentary thing of getting into action—quick! Of course, no committee running true to form could proceed without setting the stage with a whole lot of investigation, statistics and other precautionary scenery, which is all very well and good if they evolve a worth while plot from such surroundings. They'd have to comb over little bumps of apprehension and fear persistent with some of the chief actors and use the rouge stick and powder to tone down the prejudices of others. They'd find quite a few chaps afraid of the dark, untrodden paths because nobody in their particular branch had gone that way before and some would have to have their courage screwed up for fear their associates would use a billy on them when they weren't looking. Your committee would run about the same gauntlet as a diplomatic mission into Mexico. However, if they can ever approximate a Missouri mule's determination to stand pat on the object of their organization, I'd have no fear of the outcome. Do you know, Jim, that if we had Columbus amongst us he'd get heartsick searching for some one in any trade organization that would have the nerve and heart to sail on some uncharted ocean of trade effort? Mighty few of us will do it of our own free will, till old Mother Necessity pushes us out into it, when it's a case of jib your sails or take to the cat boat. This committee will just naturally have to inject itself with persistency, perseverance, stamina, determination, diplomacy, confidence and inspiration and harness itself to a never ending flow of electrification if it intends to come out top dog in its efforts."

"Then let's suppose you've got the skids all greased and your committee slipping things into real action; what then?" persisted Rogers.

"Appoint a permanent executive bureau representative of all branches, guiding and being guided by some one who will devote his whole time to the direction of your more paint publicity," added Wright with finality.

"Oh ho! so that's the job you're after," exclaimed Rogers.

"I've picked out the job, but it's more likely it would have to do some considerable chasing to run to ground the man capable of filling it," answered Wright quietly.

"You realize of course, Charley, that this scheme of yours would cost real big round dollars? Do you think it would be worth it?" questioned Rogers.

Oil Up the Machinery

"Haven't any doubts about it. If your present capitalization of something approaching nine and a half millions, bound up in paint and varnish manufacturing, would double or treble your present per capita production of $1.05 by a more paint campaign, wouldn't it be worth while? Doesn't it look to you as though some sort of publicity organization properly directed would be a pretty wise and comparatively inexpensive investment. So far as expense is concerned it would be a mere flea bite when you look over the amount and size of the organizations that are now occupied in present methods of distribution and advertising. Think it over from this angle, Jim, and figure it out. Are you fellows making the dollars in your capital investment earn their utmost. There is just as much reason why the earning capacity of the nation's dollars should be conserved and cultivated more intensely as there is need for paint to conserve our property and prolong its interest drawing ability. As I've pointed out there has been rather too much friction and lack of co-ordination and it appeals to me that a 'more paint' campaign, in which everyone is interested, would oil up the machinery considerably."

"The added expense of such a bureau, considered in the light of the existing relations between investment and production, would be slight if your production with present capital investment could be increased as I think it should be."

To Make the Dollar Earn More

"I'm no capitalist, Charley, and I've never thought about advertising as a means of conserving the dollar nor increasing it's earning capacity from this collective standpoint. Nor have I ever looked beyond the interest of the individual in the dollar to that of its national importance. At the same time I can see that where for every dollar in capital invested we might be earning two or more; while under existing conditions we're not quite getting back an even dollar in goods produced."

"Look at it this way too, Jim, that it would increase the productive capacity of the money invested by jobbers, retailers, master painters, supply houses and anyone else that has scraped together a few odd dollars and looks for returns from the paint and varnish trade."

HOLD TRADE WHEN DISTRICT CHANGES

(Continued from page 40.)

forward to an increasing trade now that he has secured a source of supply.

Business Growing Steadily

Owing to the steady increase in business and the necessity of carrying a fairly heavy stock the James store has become somewhat restricted in amount of space available. The proprietor has long ago realized the necessity of larger quarters but his natural line of expansion is to the eastward, where the property has been mounting steadily upward. Basement is fully utilized as storage space, a warehouse in the rear of the lot is connected with the store by an underground tunnel, and is fully utilized. Even some of the living apartments upstairs have been taken over as storage space.

Caters to Factory Trade

One of the good trade sources for this store is the factories of the district. At the time the character of the district commenced to change, Mr. James devoted his attention to this trade. He has been able to get almost his usual selling price from the factories. It often happens that some of the smaller dealers lose much of this trade in their district to the larger concerns on account of the more favorable price which the latter are able to quote. This has not been the case with the James store. A good trade has resulted from the factories because a well-assorted line is always kept in stock and delivery is made promptly once the order is received. This business is done almost entirely over the telephone as the factories send in their orders without the necessity of a personal canvass from the hardware dealer or without a visit to the hardware store. This business can be transacted with a minimum loss of time and payment is invariably made promptly.

W. H. Westman of the Chatham Malleable & Steel Co., Chatham, Ont., has purchased the plant of the Exeter Manufacturing Co. and will remove part of the machinery to Chatham. The balance of machinery is to be sold locally.

EDITORIAL COMMENT

EDITORIAL BRIEFS

THREE hundred million dollars' increase in wages has been granted to railway employees on 184 railroads in the United States. Uncle Sam is going to spend as lavishly among his workers as he is doing on war orders among his manufacturers. Apparently his good right hand is not questioning about the doings of his left.

* * *

THE new German super-submarines are reported to be 450 feet in length, 36 feet beam and have 20,000 horsepower, with speed of 28 knots above surface and 15 knots submerged. Wonder if Von Tirpitz thinks he can scare the British seaman back into port by the size of his monsters?

* * *

THE millers perhaps chuckled when the flour hoarders were compelled to disgorge. Miss McKenna's report on their war-time hoardings in the shape of profits, together with a remedy to be applied, will undoubtedly give them a new interest to cogitate over.

* * *

THE United States now has over 2,000,000 men in her army, with upwards of half that number now on the Western front. The military junkers still boldly assert to their people that the submarine campaign is an effective bar to their participation in the war. A million or two men is apparently only a flea-bite for the supreme German Egotist.

* * *

COPPER producers will have to go back and bide their time for another chance to get the Government to increase the price. For the second time the price has been fixed at 23½c in the face of an optimistic anticipation each time that the price would be increased. It is really too bad.

* * *

MANUFACTURERS of shelf hardware in the United States are getting supplies of steel for further operations from the mills. But reports seem to indicate that supplies are forthcoming only when their stocks have been exhausted through demands from war sources. There is a string attached to all commercial orders for steel.

* * *

TIN prices in the New York market have stopped in their upward flight to take a breath. Tin is quoted around $1 per pound in that market. Tin to arrive two months hence is even quoted at 90c. Prices of $1.50 per pound were thrown in occasionally in the Canadian market by way of an attenuated thriller.

COPPER PRICES HAVE BEEN FIXED

IT is now definitely established that the price of ingot copper to the producers in the United States will be the same as that prevailing for several months past, namely, 23½c per pound. The Price Fixing Committee of the War Industries Board will so recommend to President Wilson.

Decision with respect to this price came as a surprise to the producers as they generally expected that an advance would be allowed over that figure. They had met the price-fixing committee and in a session lasting eight hours had covered thoroughly the problem of advancing costs of production.

However, it was intimated that some consideration might be given later to those high-cost mines in order that they might show some profit on their operations. It was not stated what form this consideration would take.

All the copper that can possibly be turned out by the various interests of the country is greatly needed. The Government is not desirous that production should decline, but rather that it should increase. The price of 23½c is to continue for 75 days, or until after August 15th.

COPPER PRODUCTION AHEAD IN 1917

REPORTS made by the United States Geological Survey show that the amount of copper produced in 1917 in the United States was 2,428,546,171 pounds as compared with 2,259,387,315 pounds in 1916.

Of the total there was produced from mines in the United States in 1917, 1,873,546,171 pounds while 555,000,000 pounds were produced by foreign mines. Part of this amount produced in foreign countries came from Canada.

The total value of the copper output of that country at the average price of 27.3c per pound was $514,910,956, as against $474,288,000 in 1916. Stocks of copper on hand January 1 of this year were less by some 13,000,000 pounds than they were at the corresponding period in 1916, the amount at the first of the present year being 411,000,000 pounds as compared with 424,000,000 pounds in 1916. Stocks include refined copper, blister copper and material on hand.

With the great war activity there is need for every pound of copper that can be produced.

OUTLOOK FOR COMMERCIAL STEEL UNCERTAIN

THE burning question at the present time on the part of all those who are in any way interested in the iron and steel industries is the possibility of a cessation of supplies for commercial uses. So far as the United States is concerned it would seem that the War Industries Board is bent on seeing that all needs of the Government and Allies for war purposes are supplied first before any iron and steel can be diverted into commercial uses.

A joint steel committee has been appointed to investigate the entire steel industry, which committee is comprised of members of the Iron and Steel Institute and the War Industries Board. It will be one of the duties of this committee to recommend with all possible speed the extent to which curtailment of supplies for less essential industries may be carried out.

A statement by Bernard H. Baruch, chairman of the War Industries Board, that the shipbuilding program for the United States in 1919 would require steel for 12,000,000 tons of shipping. For this amount of shipping the steel industry will be required to furnish 4,000,000 tons of steel plate. In addition to the twelve million tons of steel ships there will be built 3,000,000 tons of wooden ships.

The stand taken by the War Industries Board virtually means commandeering of the iron and steel industries and placing them under Government control. To get on with the war is becoming more and more the single aim of the United States.

Canadian industries dependent on iron and steel from the United States and importers of finished products will watch with unusual keenness the recommendations of the joint committee.

THE WINNIPEG STRIKE

STREET car men, telephone operators, freight handlers, railway employees, totalling 40,000, went on strike last week in Winnipeg, tying up business considerably. Freight sheds were congested, and it was impossible for jobbers to fill the orders for country merchants. The latter must have suffered considerable inconvenience, but will understand why when they realize what it means for 40,000 men to go on strike.

On Saturday morning, May 25, when the strike had been partially settled, and some of the strikers were at work again, a Winnipeg jobber issued the following message to the trade:

"The strike is over. This is the message that has just come to hand. The negotiations pending for the last few days have resulted in a successful winding up of what threatened to be a most disastrous calamity.

"In so far as we as merchants are concerned the freight tie-up is the most serious thing that we have had to consider. In conversation with the railroads to-day, we learn that the amount of incoming freight held for distribution is something stupendous, and it is very doubtful whether they will be able to move any of these cars that are to be delivered to wholesalers in Winnipeg for some days.

"Now that the strike is over, all outgoing freight will be rushed to destination, and any orders placed with us will be given extra attention so that delivery will be made to you at the very earliest moment. The first shipments leaving Winnipeg may be the only ones that will get through in anywhere near regular time; authorities say the congestion may be most felt after the freight service is resumed."

THE CLERKS' CONTEST

ON page 53 of this issue of HARDWARE AND METAL there appears the announcement of a contest for the clerks. It is to be hoped that every clerk will consider this proposition carefully, will feel that it is addressed to him personally and will decide to enter this contest. The idea of the contest is to prove first and foremost that the clerk is a large factor in selling goods. That is in the clerks' interest beyond a question. Moreover, it is in the interests of the clerk that he should let people know that he is a selling factor. We believe that many a hardware clerk is a live, aggressive salesman who need not take off his hat to the best salesman in any other branch of work. We are asking the clerks themselves to prove it and we are expecting a generous response. Don't put this matter off, do it at once.

WELSH TINPLATE SHUT OFF

ONE of the shifts in trade occasioned by war conditions is the shutting off entirely of Welsh tinplate from the Canadian market. Arrangement has apparently been reached between Great Britain and the United States to the end that the United Kingdom would cease to ship tinplate to countries to which the United States is now exporting.

The output of the Welsh mills has been greatly curtailed since the outbreak of war. Last year the output was estimated at 350,000 tons compared with 825,000 tons in 1913. The British output is taken up for munition requirements for herself and some of the Allies, for the Board of Agriculture and Fisheries, the Ministry of Food, the Railway Executive Committee, the High Commissioners for Australia, South Africa, New Zealand, the crown agents for the colonies and the Egyptian State Railways.

It will be seen that with the decreased output of the Welsh mills there is quite a sufficient demand from other sources to forego the Canadian trade in favor of United States mills. The United States will also supply South America and the East with tinplate.

EVENTS IN THE TRADE

Business Changes

Paynton, Sask.—James W. Bone, hardware, has sold out.

Ernfold, Sask.—R. P. Eades, hardware, has dissolved firm partnership.

Eyebrow, Sask.—S. Bookhalter, general store, has sold his hardware business to Mrs. E. M. Booth.

Galt, Ont.—C. M. Brown, who for some five years was manager of the McMurtry & Co.'s hardware store, has purchased the general store of E. M. Bond at Sheffield, Ont. E. B. Litz, who has been manager of the St. Thomas store of McMurtry & Co., is to take charge of the Galt store.

Ayton, Ont.—The hardware and tinware business of James Walch of Ayton, Ont., has been sold to F. W. Meyer & Son of Neustadt, Ont., dealers in stoves, ranges, tinware and graniteware, who will conduct the business as a branch store. The new firm would like catalogues and prices from wholesale houses addressed to them at the Ayton branch.

Obituary

Herbert Sheridan Blackstock, formerly a traveller with Beatty Bros., Fergus, Ont., died recently at Thornton, Ont.

William B. Rogers, who had been postmaster of the city of Toronto since 1903, died suddenly of heart failure recently. Mr. Rogers commenced his business career as a clerk with Rice Lewis & Son, wholesale hardware, Toronto.

Fire Losses

Montreal, Que.—The King Radiator and Boiler Company's premises were badly damaged by fire on Friday, May 24, which broke out in the George Hall coal yards. The flames leaped across the street from the coal yard and caught the buildings of the King company.

Personals

J. T. MacLennan, Dunchurch, Ont., called on the wholesale trade during the week.

N. A. Malcolm, Malton, Ont., was in Toronto during the week on a buying trip.

J. M. Shellenberger, representing Baeder, Adamson & Co., Philadelphia, Pa., and branches, was calling on the trade during the past week in the interests of his firm.

James Dandie, hardware merchant, Streetsville, Ont., was a visitor in Toronto on Tuesday of this week.

The trade will be pleased to learn that Mr. G. F. Stephens, paint and varnish manufacturer, Winnipeg, is feeling much better after his holiday in California. He is returning to Winnipeg via Vancouver.

George Primm, who has been identified with the automobile trade for a number of years, has become connected with the Canadian Pneumatic Tool Company, Limited, of Montreal, as sales manager for their truck department. The company has opened new and well-equipped showrooms at 345 Craig Street West and will have in conjunction therewith an up-to-date and efficient service station.

Ontario News Items

The British America Nickel Corporation, Ltd., has announced that on or about June 1 the offices of the corporation will be removed from Toronto to the Citizen Building, Sparks Street, Ottawa, Ont.

Ingram & Davey Hardware, Ltd., of St. Thomas, have added a ton motor car to their delivery service. This gives them two motor cars and one wagon for delivering and carting freight.

The London retail hardware merchants started closing Wednesday afternoons this week, as usual during the past few years. This will continue until the end of August. One of the holidays in July will be used for their annual big picnic to the lake at Port Stanley.

J. H. McKee, hardware merchant, of Kincardine, Ont., recently moved his stock into the store formerly occupied by A. Shields, hardware. A. Shields sold his stock to Peter Shields.

The stock and fixtures of Parson's Fair and Hardware of Orillia, Ont., have been sold to Mr. Waite, of Orillia.

R. S. Nelson, the manager of the Parson's Fair and Hardware, has purchased the stock and fixtures of the Orillia Fair, and will take possession on June 8. The stock consists of china, notions, tinware, graniteware, and light hardware.

Incorporations

Stratford, Ont.—McDermid & Kyle, Ltd., has been incorporated with a capital of $40,000 to carry on business as hardware merchants, plumbers, etc.

Hamilton, Ont.—Walker-Vallance Ltd. has been incorporated with a capital of $40,000 to manufacture and deal in automobiles, bicycles and motor vehicles and accessories.

Montreal News Items

Mr. Gladman, with Taylor Instrument Companies, is in Montreal this week.

A. H. Jenkins, of A. C. Leslie & Co., spent a few days in the northern fishing grounds during part of last week.

James Kinsman, representing North Brothers Manufacturing Co., Philadelphia, was in Montreal this week calling on the trade.

W. J. Bland, sales manager for the Canada Paint Company at Winnipeg, was this week a visitor at the parent plant in Montreal.

The Montreal branch of the Canadian Manufacturers' Association elected officers for the coming year on Wednesday of this week.

George Henderson, president of Brandram-Henderson, Ltd., is on a Western trip. Mr. Henderson will visit Winnipeg and go through as far as Vancouver before his return in a few weeks.

W. H. Thomas, manager of the tire division of the Canadian Consolidated Rubber Co., has resigned his position and joined the forces of the King and Empire, going with the Royal Canadian Horse Artillery. He was made the recipient of a purse of gold by his friends.

Through the explosion of a gasoline tank on the premises of the Canadian Car and Foundry Co. a few days ago, Ville St. Pierre was killed. The smoking of cigarettes by fellow workmen is assigned as the cause of the explosion.

Leo McLaughlin, sales manager for the Canadian Roofing Manufacturing Co., Ltd., of Windsor, was a caller at the Montreal office of HARDWARE AND METAL this week. Mr. McLaughlin was through to Halifax and reports conditions there normal, with the outlook satisfactory.

B. Frankel, of Frankel Bros., scrap metal merchants, Montreal and Toronto, returned from a fishing trip in the north country. Mr. Frankel says that this is his first fishing trip there but so impressed with it was he, and so excellent was the fishing that he has already made arrangements to repeat his experience next year.

Sir Charles Gordon, in presiding over the annual meeting of the Dominion Textile Co. here a few days ago, stated that Canada would receive from the United States a great many war orders that would spell increased industrial activity for us. He bases his information on a talk he had had with Mr. Daniels, di-

rector and general manager of his company. One of the very gratifying improvements noted by Sir Charles in going over the matter was that of finding the adverse trade balance of $311,000,000 of last year was now reduced to $189,000,000 for the ten months of the present fiscal year.

The National Shotgun Association is this week holding an "Old Timers'" shoot on Saturday next in Notre Dame de Grace at its grounds. It is being held in honor of the old veterans, and prizes are being awarded by the Dupont Powder Company of Wilmington, Del. Bronze buttons also will be distributed as souvenirs of the shoot.

After a trip of several weeks in Western Canada, H. Kearns, sales manager for B. & S. H. Thompson & Co., Ltd., returned last week. Mr. Kearns was as far west as British Columbia. Asked by HARDWARE AND METAL as to his impression of conditions there, Mr. Kearns stated that if conditions continue favorable there will be a great crop and that the farmers and tradesmen of the West will be very prosperous as a result. "There is a considerable amount of activity around Calgary in farm properties, and this is a good sign. In a general way the outlook is splendid, and the only problem that may become a great one is that of labor to take off the crop which is expected," was Mr. Kearns manner of sizing up his view of the situation.

Branch Managers Changed N.B. News Notes

William A. Church, who has been New Brunswick manager for Brandram-Henderson, Limited, with headquarters in St. John, for several years, has left for Medicine Hat, Alberta, to manage new interests acquired by the company there. Carl B. Fraser of Parrsboro, N.S., who has been on the company's travelling staff, will replace Mr. Church in St. John.

W. H. Thorne & Co., Ltd., have sent a cheque for $100 to the St. John firemen's relief fund in recognition of the excellent work of the firemen at the time of the recent fire in their hardware store.

It is the intention of the majority of the merchants in St. John to observe the King's birthday on June 3 as a full holiday, this decision being made partly in the interests of the men who wish to give the time to work in war gardens. As the holiday comes on Monday, the summer half-holiday season will not commence until the following Saturday.

The Enterprise Foundry, Sackville, closed down for two days last week to enable their men to assist in the work of greater food production, either by working in their own gardens or by assisting farmers in the surrounding country. The results were satisfactory.

George W. Hoyt, for many years employed with W. H. Thorne & Co., Ltd., St. John, and who went to Sussex, N.B., six years ago to take charge of the hardware department of the Sussex Mercantile Co., Ltd., died last week after a short illness.

The common council of the city of St. John has been engaged lately in an attempt to determine what is paint and what is not. The question has arisen over a bill for painting a city warehouse, which totalled more than $1,300. The allegation was made that the material used for painting the structure was "dry red," mixed with gasoline and japan. The city has invited the contractor to enter suit for the amount of his bill.

The announcement that the Government was to sign the $7,000,000 contract for the construction of a dry dock, steel shipbuilding and repair plant and for the construction of steel steamers in Courtenay Bay two weeks ago evidently was premature, but R. W. Wigmore, M.P., now announces that the contract will be signed in a day or two.

Returns Money After 38 Years

A. A. Westman, formerly proprietor of the Westman's hardware in London, Ont., but who recently disposed of his interests in the firm, was greatly surprised to have thrust into his hand the sum of $75 as the first instalment of $600, which the donor claimed he had stolen from Mr. Westman when he had burglarized his store some 38 years ago. The surprise came to Mr. Westman while he was working in his garden on Victoria Day. At the time of the burglary Mr. Westman refused to yield to the pleadings of the boy's parents that the charge be withdrawn and the offender had to spend two years in the penitentiary. The man in question stated those two years were sufficient to separate him from his evil companions and started him on an upright way of living. The man is now in Toronto, and is embarking on a new business venture. He stated that he did not wish to feel that he had wronged anyone.

Iron Merchants are Now in New Quarters

The general offices of the Drummond-McCall Co., 373 Front Street East, Toronto, were moved this week into the handsome new quarters just completed, immediately in front of their premises. The office fittings, lighting schemes, and general arrangement of the layout are all that could be desired, and will be much more convenient for the carrying on of the business. The old office upstairs, and in rear of the new one, will still be used for a portion of the work.

View Showing Fancy Dress Bicycle Parade Held in Winnipeg, Man., on May 4, as a Preliminary Event in Bicycle Week. Reports from the West Indicate the Bicycle Trade Has Started Well.

WOULD ATTRACTIVE HEADLINES HELP YOU?

Merchants Have Stated They Often Find it Difficult to Get Attractive Headlines for Their Advertising Material—Some Suggestions Are Offered —Put News in Your Headlines in Order to Attract

MANY merchants are imbued with the advisability of getting attractive headlines for their advertisements. It is comparatively easy for them to make the appeal once the advertisement is started off with a catchy heading. It is with a view to offering some suggestions that HARDWARE AND METAL presents herewith some timely phrases that might be used to good advantage in advertisements:

Paint for the Sake of Insurance.
Paint to Protect Your Building from the Summer Sun.
Plant Your Garden Without Delay.
Lawns Now Need Cutting.
Get Your Lawn Mower Sharpened.
Garden Hose Essential to Good Crop.
Screen Doors Are Needed Now.
Keep Out the Fly Pests.
Flies in the House Are Dangerous.
Protect the Baby from the Flies.
Garden Trowels Make Better Flower Beds.
Stepladders Help You Houseclean.
Stepladders Save Time and Reaching.
Your Car Needs Accessories.
Make Night Driving Safe by Using Proper Lights.
Make Your Car Comfortable With Accessories.
What is Use of Driving Car if You Cannot Drive in Comfort?

Bicycle Business in Western Ontario Good

"The bicycle dealers in Western Ontario are in a very optimistic state of mind at present," stated B. B. Halladay, sales manager of the Canada Cycle & Motor Company, to HARDWARE AND METAL, on his return from a short business trip into Western Ontario, during which time he visited the cities of Chatham, Windsor, and London. "Business is in splendid shape in that section of the province. Bicycle week had much to do in getting the trade started right. Big bicycle events were held in Chatham and in Brantford on May 24, when the old-time races were again revived. At Chatham an exciting performance in racing was made by one young man, who rode fifty miles to the meet and then cleaned up all the feature events. Reports of conditions in British Columbia are very promising. Our branch manager in that province recently sent in a sorting order for a carload of 315 bicycles to take care of the additional trade that has developed in that province. In Ottawa one bicycle dealer sold no less than twenty bicycles on May 11 up to five o'clock in the afternoon."

Indications That More Munitions Orders Coming

Large wholesale jobbers in machines for making munitions and for machine tools report an increased inquiry from munition makers for additional tools for this purpose. It is reported that additional large orders from the United States are seeking placement with Canadian firms and should these contracts be placed it will mean the extension of the plants of some of the Canadian concerns. On this account the munition makers have been making inquiries as to the possibility of their being able to secure the necessary equipment to turn out these orders. Present conditions seem to indicate an increased activity in making of munitions.

Canadian Manufacturers Elect Officers for Year

The Montreal branch of the C. M. A. elected last year's officers for a second term and the following are therefore returned for 1918, with the exception of Wm. Rutherford, resigned, and who presided at to-day's meeting: Chairman, C. Howard Smith; vice-chairman, Lt.-Col. W. J. Sadler; executive committee, G. F. Benson, A. H. Brittain, B. W. Coghlan, N. R. Feltes, Art Harries, Michael Hirsch, A. D. Huff, W. Jamieson, R. H. McMaster, H. E. Moles, S. J. B Rolland, Eugene Tarte, John Lowe (Valleyfield) and F W. Stewart.

Representation to the executive council of the C. M. A. is made through the following personnel: Wm. Rutherford, George A. Slater, J. R. Colby, W. A. Desbarats, S. W. Ewing, D. J. Fraser, Chas. E. Frost, Lawford Grant, Geo. W. Sadler, J. H. Sherrard, R. E. Jamieson and Fred Van Bruyssell.

CONTEST FOR CLERKS—$10 FIRST PRIZE

IS the clerk a real salesman? Does he merely hand goods across the counter or does he actually make sales?

We are asking the salesmen and salesladies behind the counter to answer these questions from their own experience.

Here is a contest in which we are anxious that every clerk shall join.

What is the selling power of the clerk?

For the best answer to this question, based on a definite experience, HARDWARE AND METAL offers a prize of $10. For the second best answer a prize of $5. That no clerk may think that this is wasted effort, we will pay $1 for every reply that we are able to use in our news pages.

In this contest literary merit counts not at all. We don't care in what form your answer comes. The prizes will be awarded on the value of the idea and how it actually sold goods. The idea may be a window display, a sales talk, an idea of following up former sales, anything in fact that produced results in sales.

The only conditions of the contest are these:

1.—That the contestant shall refer to sale of some definite line of goods.

2.—That these goods shall have been sold at regular and not cut prices.

3.—That there shall be stated the amount or value, or both, of goods sold within a certain specified time.

HARDWARE AND METAL believes that every retail salesman has used ideas to sell goods that have been real winners. Tell us about these ideas.

The contest closes June 22, 1918, and the winners, with their experiences, will be announced in the June 29 issue—an issue that will feature articles of special interest to the salesman behind the counter.

Coming into this contest, giving your story of the best selling experience you have ever had, will make you even a better salesman. Tell in your own words what sales talk you used to create the demand for the line of goods you select. State what quantity was sold in a definite time, such as a day, a week, a fortnight, etc.

Everybody come in!

Rebuilding of Halifax Will Make City Prosperous

There is still a great deal of activity in Halifax, and this will be greater when the plans to rebuild now being considered by the government are completed. Such is the opinion of Leo McLaughlin, sales manager for the Canadian Roofing Mfg. Co., Ltd. of Windsor, Ontario, who has just returned from a three weeks' trip through the Maritime Provinces, and who was interviewed on his way through Montreal by HARDWARE AND METAL.

In a general way conditions are probably somewhat quieter just now through parts of the country in the Eastern Provinces, but the outlook as reported by Mr. McLaughlin is good and there will be considerable business improvement later in the season. The greatest need, and particularly in Halifax, is for goods. These are wanted in large volume and price is no barrier if the merchants can secure what they require. Care is still exercised in the selection of the stocks carried and as a general thing the better grade of merchandise meets with the best reception. There will be an active trade for the better building materials when permanent building plans are available, and Mr. McLaughlin states that there will apparently be ample funds to carry out this programme.

"One of the greatest difficulties confronting the dealers in Halifax at the present time is that of warehousing accommodation," said Mr. McLaughlin. It appears that the need for housing is so great that neither time nor material can be at present spared to afford the much-needed protection for goods brought in. This will be available later, of course.

Tax on Second-hand Cars Still in Effect

According to advice received by dealers in second-hand automobiles in Stratford, Ont., recently, the report was made that second-hand automobiles are not to be taxed. The Inland Revenue office at Toronto states that they have received no notification from Ottawa that second-hand cars in dealers' hands are not to be taxed. The last information advised that second-hand cars in dealers' hands were taxable.

J. U. Vincent, Deputy Minister of Inland Revenue, was in Toronto during the present week, and gave instructions to the Toronto office that the tax was still in effect on second-hand cars in dealers' hands.

No Contracts Can be Placed in United States

"It is impossible to place contracts for steel commodities of any description with producers in the United States at the present time," stated Lorn D. Campbell, Toronto manager for B. & S. H. Thompson & Co., Limited, dealers in metals, chemicals and glass. Mr. Campbell has recently returned from a short business trip to the Province of Quebec. "Business conditions in the Eastern province are good in spite of the handicap with respect to raw materials," stated Mr. Campbell. "Supplies of raw materials are, of course, being allowed to come into Canada from the United States under permit from the War Trade Board at Washington, acting in conjunction with the same body in Canada. Any hardware lines that it is shown are essential to the carrying on of the war are being taken care of with sufficient supplies. In this class would come such articles as cooking utensils, preserving utensils and railroad supplies and numerous other articles which in any way contribute to the efficiency of the country in this war time."

Great Future for Steel Trade After War

W. D. Ross, vice-president of the Nova Scotia Steel and Coal Co., has returned to Toronto after spending some time at the properties in the East. In referring to the talk of a deal whereby the Scotia and Dominion companies would come together in a merger, Mr. Ross stated very definitely that the proposal was out of the question now. "It is absolutely off," was the way he stated the case to HARDWARE AND METAL.

The Future of Steel

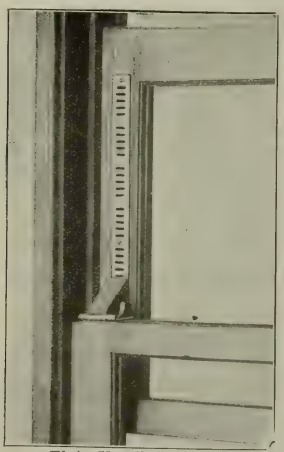
"I have no two opinions in regard to the future of the steel business in Canada," stated Mr. Ross. "My contention is that for almost four years the steel companies of the world have produced very little of a real or permanent nature. You may argue that the plants are all running to capacity, but what is being done with the capacity production? It is being largely sent to the bottom of the ocean or shot off in the air. We are living in a period of destruction, and it must of necessity be followed by one of construction."

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

NEW WINDOW VENTILATING LOCK

A new window lock that, it is claimed, is entirely unlike the usual window fastener has recently appeared on the market called the Elgin ventilating lock, and is being manufactured by the Elgin Lock Company of Elgin, Illinois. The company claims that the new lock has at least two distinct advantages: namely, that it will lock a window in an open as well as a closed position, and that the design of the new lock makes it much more secure than the ordinary type of window fastener. It is asserted a window equipped with an Elgin ventilating lock need not be in any particular position, when open, to be locked, but may be changed to suit climatic conditions, and that in whatever position the window is locked there it is bound to stay.



Elgin Ventilating Lock

Any attempt to force the window open farther only makes the lock hold more securely. By withdrawing the operating key, it is claimed, the lock becomes proof against a would-be housebreaker reaching in the open window and releasing the lock. The operating key is at the base of the lock at the right, the operating principle of the new lock being somewhat similar to the old-time stick placed between the window sashes. It is claimed the screws which hold the lock in place are so situated that whatever strain that comes on them is at right angles to them, which makes it practically impossible to pull these screws out in trying to open the window.

Goss Coffee Flask

NEWFORM CAN CUTTER

The Louis McLain Company, Limited, 451 Portage Avenue, Winnipeg, is placing on the market two new commodities—one the Lo-Vis Newform can cutter and the other the "Goss" workman's coffee flask. For the can cutter it is claimed that it is made of 80 per cent. carbon cutlery steel, ground to a chisel edge and highly nickel-plated, the handle being of cocoa-bola wood. It is claimed for it that it is entirely sanitary and will remove the top of a can and form a smooth lip, thereby permitting the contents to be removed in its whole formation.

Lo-Vis Newform Can Cutter

The "Goss" workman's coffee flask is asserted to be non-breakable, and that contents can be heated on any hot surface without removing the bottle from the guard. The glass flask is protected by a removable metal guard which may be utilized as a drinking cup.

CAST IRON TANK HEATER

The Anthes Foundry, Limited, Winnipeg, have just placed a new cast iron tank heater on the market, which is to be supplied to the retail trade through jobbers. Some of the features claimed for it by the manufacturers are that it will not leak, burn out or rust out, being constructed entirely of high grade cast iron. The tanks are made in two sizes, diameter 12 inches, height 22 inches, weight 125 pounds; and diameter 14 inches, height 24 inches, weight 150 pounds. The new Anthes tank heater is constructed on the principle of an air-tight stove, the draft is outside the main body, thus leaving the fire box free from obstruction. The top can be removed and the grate and ash pan easily taken out for cleaning. It is furnished with a length of pipe fitted with a spark arrester. It is self-sinking, but support rods are supplied for the purpose of anchoring it securely in position when used in a wooden tank.

Anthes Tank Heater

EIGHTY-FOUR YEARS IN BUSINESS

T. McAvity & Sons, Ltd., St. John, N.B., have just completed their eighty-fourth year in business. The business was first established on May 19, 1834, by Thomas McAvity, Sr. During that period the company have made changes in quarters and the firm now employs 1,000 hands. The younger generation of McAvitys are quite prominent in military circles, and, as pointed out in previous issues of HARDWARE AND METAL, members of the McAvity family are taking a prominent part in connection with the great war.

Albert Hancock, of the office staff of Stark, Seybold and Co., is this week reporting for service with the King's forces.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

THE trade is still rather upset as regards the future outlook of steel as it affects sheet and manufactured products. From some local sources there are intimations that sheets are coming along in very good quantities, and reports are to the effect that Canada will receive a very fair share of supplies. Orders are being accepted by at least one mill on a delivery basis of September-October.

Interest is apparent in work of the joint committee appointed in the United States by the Government and the steel makers, which is now endeavoring to improve the steel situation. Their work will be to determine amount of steel available and how long it will take to consume each batch. It will then be possible to arrive at some conception as to how far distribution has to be regulated, and whether it will be necessary to allocate supplies other than those going directly into war work.

There is a feeling in the steel trade to the South that developments will show there is enough steel for most of the commercial industries, and better service in the matter of supplies is looked for in the near future. The situation in Canada, however, contains no little element of uncertainty, and that war work will get first call on all supplies is without question.

Ingot metals have held firm and unchanged during the week. Tin is very scarce, and although declines have been registered at primary points, this has not been reflected here. Lead holds firm, with little commercial demand existing. Spelter is in very dull tone, with prices unchanged.

The high price on pig tin, along with scarcity, is given as reason for very firm tone in retinned ware. As a matter of fact all tinware is strong, and the sheet situation is reflected to a large extent in enamelware. Supplies are hard to get and that higher levels may be reached in quotations is thought quite possible.

There have been few changes in prices on miscellaneous lines during the week. Agricultural wrenches are again up, along with cobblers' sets and garden barrows. Hay forks, pulleys and rafter brackets are also up in price. Prices on wire nails are very firm, and higher levels are expected almost daily. A new list of extras on railroad spikes has been issued. Business generally is reported good.

MONTREAL MARKETS

MONTREAL, May 30. — Price changes have been fairly numerous during the week, and include pumps, seine twines, brush hooks, sleigh bells, coil chain and pipe wrenches. Several lines of automobile accessories have been marked up as well, the lines to undergo revision being hot blast torches, piston assemblies, fan belts, motometers, reboring machines and steering wheels. Conditions generally in the trade remain about normal, a very fair amount of business being transacted and markets holding firm.

Torches, Assemblies, Roller Bearings up

Montreal.

TORCHES, PISTON ASSEMBLIES.—New prices showing an advance have been arranged as applying to Samson hot blast torches. In lots of three-style 204 were $6.84 and are advanced to $8.35, and in single lots the old price was $7.20, and is now $8.80. No. 418, selling in the three-quantity lot before at $8.83 each, is advanced to $9.65, and in singles from $9.30 to $10.15. Piston assemblies are up from $1.68 each to $2.08, this applying to the various numbers. Roller bearings of the drive shaft and rear axle varieties are higher, the advance being from 10 to 25 per cent. On all these lines special discounts apply.

Pump Prices up; Also Seine Twines

Montreal.

PUMPS, SEINE TWINES.—Advances are being made this week in the prices of various pumps. These will include pitcher spout and force cistern, and also well pumps. In some cases the increase is as much as 15 per cent. over former prices. Seine twines are very high, and a 2½c advance was made this week, new prices being as follows:—No. 6, per pound, 75c; No. 9, 71½c; No. 12, 68½c; Nos. 15 to 36, 68c; and Nos. 42 to 100, 67½c.

Fan Belts and Cleansers Higher

Montreal.

FAN BELTS, CLEANSER.—Detachable leather fan belts are revised and prices are higher. These are for 1909-1916 Fords, and the former prices of 33 1/3c each trade, 31½c for lots of 25, and 29c for 100 lots have been advanced to 40c, 37½c, and 34½c respectively. A discount of 33 1/3 per cent. applies. Buckeye cleanser sold in 5-lb. cans previously for $1.33 in single cans, $1.25 in case lots, and $1.15 per can in four-case lots. The new prices respectively are $1.50, $1.40, and $1.30. The same comparative prices for 10-lb. tins are: Old, $2.67; new, $3; cases, $2.50 to $2.80; and four cases, $2.30 and $2.60. Twenty-five-lb. tins: $6.34-$7.00, $5.95-$6.50, and $5.47-$6.00. The dealer's discount is 33 1/3 per cent.

Brush Hooks up; Sleigh Bells, Locks

Montreal.

BRUSH HOOKS, BELLS, LOCKS.—Among the advances recorded this week is that of a new price for brush hooks of the cast steel variety. These sold at $14.50 formerly and now are $15.75 per dozen. Certain lines of padlocks are further advanced, some of the Corbin line being affected. The latter change is small, however—only a very few cents per dozen. Sleigh bells, back and body, have registered an advance of about 10 per cent.

Motometers and Machines, Steering Wheels Advance

Montreal.

MOTOMETERS.—Special model Boyce motometers are up. The advance is about 15 per cent. Old prices were $2.63 trade, $2.45 for lots of 6, and $2.27 for lots of 24. The new list prices are $3, $2.80 and $2.60; a special discount applies. Heiser improved cylinder reboring machines are now quoted at $68.85, as against the former price of $60.16. A special discount applies here as well, as also with plain steering wheels, which have advanced from $2.73 to $3.32 for single lots, and from $2.60 to $3.15 for lots of six.

Coil Chain Advances Seven and Half Per Cent.

Montreal.

COIL CHAIN.—Further readjustments of prices on coil chain have been made. It is only a few weeks since these were readjusted. The new prices will be found in the current market quotations, and the advances recorded this week approximate about 7½ per cent. They become effective immediately.

Pipe Wrench Prices Show an Advance

Montreal.

PIPE WRENCHES.—Perfect handle pipe wrenches record an advance this week of about 15 per cent. Eight-inch price before in dozen lots was $1.25 each, and is now $1.44 each. Similar comparative prices for 10-inch are $1.41-$1.63; 12-inch, $1.87-$2.15; and 18-inch, $2.30-$2.65; the discount applying to this line is 33 1/3 per cent.

Locally Gasoline and Coal Oil Steady

Montreal.

COAL OIL AND GASOLINE.—While there has been some inclination outside that an upward revision of petroleum prices would be made, the local situation is without feature and prices rule as quoted last week. For coal oil there is still a fair demand in the province, and the greater use of oil stoves in the city also makes a trade difference. Royalite still is quoted at 19c, while Electroline and Palacine are 22c per gallon. The greater use of gasoline is a feature, and this is held still on the same price basis—34c per gallon.

Wares And Stoves Still Sell Well

Montreal.

WARES, STOVES, ETC.—The season has been a particularly good one for some of the ware lines made here. Dairy supplies in particular have bulked large in sales, and until the present there has been an ample supply to meet requirements. For milk cans, etc., the demand is easing down somewhat, but orders still sift through. Sales of oil stoves have been large this spring, and deliveries pretty well made to the retail trade. For ranges and stoves some demand exists, although the high prices have made a more careful purchasing of requirements essential.

Complete Rope List Firm With up Tendencies

Montreal.

ROPE AND CORDAGE.—The whole tendency of the rope situation savors of firming features. As has been pointed out in these columns, the situation on soft fibres has been a constantly changing one, each week usually reporting several advances. Consequently jutes are high, and prices on twine rule high, and will be higher. In the matter of rope it is expected that advances will have to be made ere long. In the meantime there are no actual changes, pure Manila base price being 39c and British Manila 33c, while sisal holds at 27½c per pound. For binder twine the demand has somewhat lessened until the crop prospect is more clearly defined.

Hoop Steel Scarce; Iron and Steel Firm

Montreal.

IRON AND STEEL.—"I cannot see anything but that higher prices are likely to rule for iron and steel products.". Such was the statement of a heavy goods manager to HARDWARE AND METAL this week. For the immediate present there has been no change of any kind in the regular lines used from day to day. There is much scarcity of hoop steel, however, and in view of this the price has advanced. Trading is fairly well maintained for the other lines and delivery has been good from the mills thus far.

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80

Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

New Nail Prices Now Effective

Montreal.

WIRE AND NAILS.—The new base price on wire nails is now generally adopted here. The market rules with a firm undertone, and sales are made in fair volume, with all sizes obtainable. The outside demand is better than that within the city, as the farmers are prosperous and have the money for repairs and new work. Standard wire nails are based at $5.35; cut nails at $5.60 per 100 pounds, and the base of $6.25 per 100 pounds still holds for smooth steel wire.

Sheet Trade Quiet With Firming Outlook

Montreal.

SHEETS AND PLATES. — While there is not a great deal of movement in sheets and plates this week, some trade is reported for odd lots. Prices for the most part give promise of firming somewhat, for the supply is not being replenished to any extent; in fact, shipments coming to hand are reported as almost nil. In view of the situation higher prices may be effected ere long.

BLACK SHEETS—		100 lbs.
10 gauge	$9 50	$9 00

Little Movement In Lead, Solder or Zinc

Montreal.

LEAD PRODUCTS.—In view of the high ruling market for all products containing tin there is little trading reported. Those who need solder will buy only as much as is required for immediate use. Lead lines in a general sense are quiet and trading confined to a small compass. Solder holds firm, but without change, although a revision on the part of a wholesale jobbing house was reported.

Cast Iron Centre of Old Metals Interest

Montreal.

OLD MATERIAL.—The one feature of interest, and that which has been of most central mention for some time, is that of old cast iron. The demand for this is constant, and for the heavier and better grades a good price is being paid. In a general way the movement of old scrap is not marked, but at the same time there is some activity—probably a little improvement—over past weeks. No changes of any kind have been made, and prices through the line will be found in the list following.

Tea lead	$ 0 05	$0 06½

Ingot Markets Steady; Spot Tin Very Scarce

Montreal.

INGOT METALS.—The week has not brought forth any changes, and trading operations are about what they were for the last two or three weeks. The spot situation on tin is a tight one, and little is obtainable at any reasonable price. No outstanding feature is reported in any of the items in the list.

COPPER.—The settling or continuing of the price basis as it is for another period of 75 days has settled this interesting point. Some trading is done here on the unchanged basis of 29-30c lb.

TIN.—The man wanting tin at its present high price is the only one buying, and for the most part there is little doing. Prices range from $1.15 to $1.30 per pound, according to grade and quantity.

SPELTER.—Fair business is reported, and the price has firmed a little for present delivery. For future 10c per lb. is quoted.

LEAD.—The outside markets have firmed somewhat and the "Independent" prices are now quoted higher than those of the "Trust." Locally sales are made at 9½-10c lb.

ANTIMONY.—Stocks of this are just fair, with only slight trading going on at 15c to 16c lb.

ALUMINUM.—No changes of consequence are made, and with respect to trading and price this applies. Quotations are still made at 50c lb.

TORONTO MARKETS

TORONTO, May 30.—Very few changes in prevailing quotations have been noted during the week, all markets holding firm. Rumors of an advance in galvanized sheets are floating around in some quarters and a stiffening of the price on nails is expected before the end of the week. Ingot metals have held unchanged, tin remaining scarce and other lines uninteresting. An advance in practically all lines of jute and hemp twines has been recorded of from 2c to 5c per pound. Enamelware and tinware are very firm and an advance would not come as any great surprise. Miscellaneous lines to change include agricultural wrenches, cobblers' sets, garden barrows, hay fork pulleys, rafter brackets and Canton hoists, advance being reported in each line. Business is said to be very good.

Sportsmen's Specialties To Advance 10 Per Cent.

Toronto.

SPORTSMEN'S SPECIALTIES.—With the exception of two or three lines, the first advance to take place in Marble specialties for sportsmen since war started is announced for August 1. Prewar prices have been maintained, until conditions have now reached a point where a change has become necessary and this will be taken care of in an advance of 10 per cent. on the list for the entire line. List prices only will change, it is said, discounts remaining the same as at present. This change will affect hunting axes, hunting knives, match safes, compasses, cleaning rods, etc.

Hay Fork Pulleys; Sheaves Register Advance

Toronto.

HAY FORK PULLEYS, SHEAVES.—New prices have been named on hay fork pulleys during the week which provide for an advance over previous ruling quotations. The present scale of prices is as follows: No. 319, $8.35 dozen; No. 317, $6.95 dozen; No. 433, $5.40 dozen; No. 434, $6.65 dozen.

Wood sheaves only have also come in for revision in price, 6-inch now being quoted at $2.00 dozen, which represents an advance.

Hoists Go Higher; Rafter Brackets Up

Toronto.

HOISTS, RAFTER BRACKETS.—A revision has been made in quotations applying on Canton hoists. The present scale of prices is higher than that formerly ruling, the No. 34 now selling at $5.50 and the No. 40 at $3.75.

Rafter brackets have followed the general trend of other lines and quotations now being made of 95c dozen for No. 424 and $1.50 dozen for No. 640 reveal an upward trend. Hooks for wood track are also higher, 10-inch selling at $1.45 dozen.

Higher Prices Named on Wrenches, Clamps

Toronto.

WRENCHES, CLAMPS.—A new discount has been named on agricultural wrenches of 37½ per cent., the former discount being 42½ per cent. Wrenches of practically all kinds have shown steadily mounting prices and present change is in line with others recently mentioned in HARDWARE AND METAL.

Quilting frame clamps are being quoted at $1.10 per dozen for No. 30 and $1.30 per dozen for No. 50, which is an advance over former figures. Another line of lamp burners to be affected by change noted in these columns last week is the Ontario, size A selling at 95c dozen and size B at $1.15 dozen.

Garden Barrows Up; Door Knobs Higher

Toronto.

GARDEN BARROWS, DOOR KNOBS—Indications are that boys' garden barrows are very hard to get. Prices have registered an advance during the week to $39.00 per dozen, which represents a new high level for this line.

The prices now prevailing on white and jet porcelain knobs, established when recent advances on builders' hardware went through, is given as $2.50 per dozen pairs.

10 to 15 P.C. Advance In Cobblers' Sets; Stick-Fast

Toronto.

COBBLERS' SETS, STICK-FAST.—A 10 to 15 per cent. advance in cobblers' sets has become effective during the week, establishing new high levels for the lines affected.

Stick-Fast paste has also gone to higher levels and prices established are as follows: Barrels, $10.50 per 100 pounds; kegs, $11.50 per 100 pounds; 50-pound boxes, 14c per pound; 25-pound boxes, 15c per pound; 2-pound packages, $24.00 gross; 1-pound packages, $19.00 gross.

New List Extras on Rail Road Spikes

Toronto.

RAILROAD SPIKES.—A new list of standard extras has been adopted on railroad spikes, under date of April 20, 1918. This is as follows:

Diam.	Lgth., in.	Per 100 lbs.
9-16 in.	5½	Base
½ in.	3, 3½, 4, 4½	$0.15 extra
7-16 in.	3½, 4, 4½	.25 "
¾ in.	3, 3½, 4, 4½	.40 "
5-16 in.	2½, 3, 3½	.95 "
5-16 in.	2	1.30 "

Other lengths than list 25c extra per 100 pounds in addition to standard extras.

Higher Enamelware and Tinware Possible; Stoves

Toronto.

STOVES, ENAMELWARE.— The movement of all summer lines of stoves continues big. The outlook for the future on cast and steel stoves and ranges contains a decided element of uncertainty, and manufacturers generally evince little desire to book orders for very far ahead.

The situation on tinware and enamelware is very firm. Sheets are scarce and hard to procure and the price of pig tin to-day, in addition to its scarcity, adds materially to the cost of the retinned ware. Manufacturers generally intimate that higher prices would not occasion any great surprise and under existing conditions advances are looked for nearly any time.

Twines Make Further Advances; Cordage Firm

Toronto.

CORDAGE, TWINE.—Further advances are reported in prices applying on both hemp and jute twines, the new quotations ranging from 2c to 5c per pound over previous figures.

Cordage has held unchanged during the week. The demand is rather light and prices firm at 39c base for pure manila; 33c base for British manila; and 27½c base per pound for sisal.

Binder twine orders are coming to hand quite freely and booked orders are already moving forward. A good busi-

ness in binder twine is looked for. The price, 500-foot basis, remains steady at 23½c per pound.

Splendid Movement Oils and Gasoline

Toronto.

OILS, GASOLINE.—Sales of coal oil have been maintained at a high average during the week, and dealers all report business in a flourishing condition. Prices have been firmly held, the Royalite selling at 18c per gallon and Palacine at 21c per gallon. Lubricating oils are also moving out very freely, the motor oils particularly enjoying a heavy sale. Prices have held firm at levels reached a couple of weeks back. Gasoline is also in good demand, and a heavy consumption is manifest in the free movement of this commodity. The price of 33c per gallon is unchanged.

Nails Expected to Reach Higher Point

Toronto.

NAILS, WIRE.—A further strengthening of the market on wire nails is noticeable during the week, and that an advance of 10c or 15c will be made before the week is out is confidently expected.. This is in line with views expressed in HARDWARE AND METAL a couple of weeks ago, when attention was drawn to the firm tone of this line, and intimating that an advance was not beyond the realm of possibility. The base of $5.20 per 100 pounds is now ruling, while cut nails have a base of $5.65 per 100 pounds.

Smooth steel wire, though firm, is not expected to undergo any revision at the present time. The base of $6.25 per 100 pounds is held, with rather a light demand in evidence.

Iron and Steel in Ample Quantities

Toronto.

IRON AND STEEL.—Indications are that iron and steel bars are available in sufficient quantities to take care of present requirements. The demand is only fair, and orders are being filled with reasonable promptness. The range of prices has held firm and unchanged.

TORONTO—		Per 100 lbs.
Common bar iron	....	$ 5 25

Advance in Corrugated Sheets Looked for

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—That higher prices may rule on corrugated sheets and other lines of manufactured sheet metal is the view held by manufacturers of these products. Some difficulty in getting shipments through is expressed, and doubt as to the future seems to be growing. Quotations during the week are unchanged on corrugated sheets, as shown below.

Conditions in eavetrough and conductor pipe will be largely governed by the situation in sheets, and whereas present stocks are in very fair shape, how long this state of affairs may last is uncertain. The demand shows a little improvement. Prices shown in current market quotations are unchanged.

TORONTO—	Per 100 Sq. Feet Galvanized	Painted
No. 28 gauge	$ 8 25-$ 8 75	$6 75-$7 25

Discount 7½%.

WATCH YOUR CORDAGE STOCKS

In speaking this week with the manager of one of the largest cordage companies in Canada, HARDWARE AND METAL gathered some interesting tendencies which are likely to be large factors in affecting supplies later in the season.

At the present time the markets are firm. This has been repeatedly pointed out in these columns, and the reasons for a strong undertone are several and all important ones. Take soft fibres in particular. These come from the Far East, and while it was expected that they might be obtained in quantities sufficient to meet the demand, in many cases it was ascertained later that the needs of Great Britain were such as to require even larger supplies than had been arranged for. As a consequence some shipments have been diverted to meet this demand.

"During the past month or six weeks advances in soft fibres have been frequent and many. This has had an immediate effect on the price of twines and certain kinds of bags. And it is altogether probable that there will be further advances."

Continuing, this infcrmant stated that there was every indication of a strong market for all lines of rope. "These are in demand and will be so to an increasing extent by the United States Shipping Board. With the increased turnout of boats more cordage will be required and all lines of rope there used to a greater extent than ever before. In my opinion the merchants of the country will not be amiss in looking well to their stocks and keeping themselves protected against a market that gives every indication of becoming a rising one."

Sheets are Firmly Held; Supplies Fair

Toronto.

SHEETS, PLATES.—A very firm tone is evident in respect to sheets, and in some quarters an advance in galvanized is hinted at. One large importer refuses to worry over the outlook, intimating that their source of information is authoritative and convincing in that supplies will come through, as there is no desire to put Canadian firms out of business. It is recognized that war work is, of course, essentially first, but there is a feeling that production will reach a point where commercial requirements to a fair degree will be taken care of. Good-sized shipments are in transit, which will keep stocks in very good condition. Other sources indicate that great difficulty is being experienced in getting shipments through and look at the future with foreboding. Some mills are accepting a limited amount of sheet business with a shipping date of September and October. Prevailing quotations follow:

BLACK SHEETS—		Per 100 lbs.	
10 gauge	....	$9 50	$12 00
12 gauge	7 15	9 60	10 00

Wrot. Iron Pipe Unchanged; Boiler Tubes

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—There is little new to report in respect to wrought iron pipe during the week. Supplies of raw materials are hard to obtain, but prices on standard buttweld and lapweld are unchanged. An advance in extra heavy and double extra heavy pipe is reported. Prices are shown in current market quotations.

Boiler tubes are unchanged for the week. Supplies are not available in any more liberal quantities than heretofore, and all orders are subject to approval before shipment. Quotations follow:

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00

3½ inch	77 00	60 00
4 inch	90 00	75 00

Solder Holds Firm; Manufactured Lines Steady

Toronto.

LEAD AND ZINC PRODUCTS.—Solder has shown no further change during the week, prices holding at high levels recently established. The tin market holds firm locally, and supplies are very scarce. Manufactured lead and zinc products remain in an uninteresting position, with prices holding firm and demand within narrow channels. Quotations are shown herewith:

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 16

Solder, wire, lb.	0 65	0 70
Zinc sheets, per lb.	....	0 26

Uninteresting Tone in Old Materials

Toronto.

OLD MATERIALS.—Another week shows no change of interest in the situation as regards old materials. There is little moving and prices have held unchanged at figures shown below. What the future may bring forth is very uncertain, and there are none who will hazard a guess.

Tea lead	$ 0 04½	....
Heavy lead pipe	0 07	0 07½

Waste Holds Firm; Oakum Unchanged

Toronto.

WASTE, OAKUM.—Little new business is offering in waste, but manufacturers are very busy filling contracts on hand. Prices have held firm and unchanged for the week, as shown in current market quotations.

Oakum is rather quiet at the present time, orders being none too free and quantities rather limited. Prices shown in current market quotations are unchanged.

Ingot Metals Hold Firm and Unchanged

Toronto.

INGOT METALS.—All lines of metals have held firm and unchanged during the week. Tin remains in scarce supply, with price unchanged. Indications point to an unchanged position on copper for another three months at least. Spelter is dull, with only a fair amount moving. Lead is unchanged.

COPPER.—Indications point to the established price of 23½c per pound in the United States being maintained for the next three months' period. This will result in the position locally remaining steady, though little change had been expected. The local price is around 29c to 30c per pound.

TIN.—Supplies of tin grow increasingly scarce, and though primary points report an easing off of prices, this has not been reflected locally where price remains around $1.50 per pound. The outlook is uncertain and not altogether satisfactory.

SPELTER.—The market is very dull, with quotations holding around 9c per pound. The very free offering of this metal in an endeavor to force sales has kept prices at a low point and resulted in more or less stagnation.

LEAD.—Primary points report lead as firm, and the same condition may be expressed as applying locally. Quotations range around 9¼c to 9½c per pound, with demand for commercial requirements at a comparatively low point.

ALUMINUM.—No change is shown in existing conditions. The demand is light and prices unchanged at around 50c per pound locally.

ANTIMONY.—A very light demand is reported for this metal, and the situation locally is without feature. The price of 16c per pound shows no change over last week's figure.

PIG IRON.—Reports indicate that little pig iron is available for commercial uses. Production is being speeded up, but heavy demands for Government work are absorbing the output very largely. There are no new features to report.

LONDON MARKETS

LONDON, May 30.—Locally price changes have been fairly numerous during the week and advances are provided for in new quotations prevailing on bevels, bit braces, planes, levels, gauges, mitre boxes and screwdrivers and automatic drills. Sweat pads have also gone higher and new levels have been reached on lamp and lantern burners. The hardware trade here continues exceptionally good. The warm weather has speeded up the sale of summer goods wonderfully. Merchants find it hard to take care of all the business offered at present.

Advance in Planes, Levels Braces and Other Tools

London.

PLANES, LEVELS, BRACES,ETC.—New prices issued on Stanley tools range from 5 to 15 per cent. higher than former quotations. The advance includes tee bevels, bit braces, gauges, levels, mitre boxes, planes, plane parts, screwdrivers and vises. New net prices on some of the best selling numbers of planes and recvised figures on Hurwood screwdrivers are given herewith:

Planes—No. 3, iron smooth, $2.85 each; No. 4, $3.15; No. 5, iron jack, $3.60; No. 9½, iron block, $1.50; No. 9¾, 4 in., $1.80; No. 17, $1.85; No. 18, $1.80; No. 19, $1.90; No. 101, 28c; No. 102, 54c; No. 103, 77c; No. 110, 74c; No. 120, $1.07; No. 130, $1.10; No. 26, wood bot., jack, $2.10; No. 27, $2.40; No. 28, $2.70; No. 35, wood bot., smooth, $2.40; No. 36, $2.70.

Stanley Hurwood Screw Drivers.—No. 20 x 3 in., $2.90 doz.; 4 in., $3.50; 5 in., $4.10; 6 in., $4.95; 7 in., $5.30; 8 in., $6.10; 9 in., $6.85; 10 in., $7.60.

Sweat Pads Higher; Rope Unchanged

London.

SWEAT PADS, ROPE.—A new price has been established on red edge sweat pads during the week of $7.20 dozen, which represents an increase. No change in Ventiplex is reported, quotations holding firm at $6.00 dozen. Rope has held firm and unchanged with the demand within rather narrow limits. Prices are as follows: Pure manila, 39c base per pound; British manila, 33c base per pound; New Zealand hemp, 33c base per pound; sisal, 27½c base per pound.

Screw Drivers in Upward Movement

London.

SCREWDRIVERS, AUTOMATIC DRILLS.—An advance of about 7½ per cent. is reported in Yankee tools which affects among other lines ratchet and spiral screwdrivers, chucks and drills for saw and automatic drills. The new prices established on these lines are given below:

Ratchet Screw Drivers—No. 11 x 2 in., $5.55 doz.; 3 in., $7.15; 4 in., $7.80; 5 in., $8.55; 6 in., $10.05; 8 in., $11.45.

No. 12, $9.10 doz.

No. 15 x 3 in., $6.90 doz.; 4 in., $7.45; 5 in., $7.90.

Spiral Screw Drivers—No. 20 x 1 in., $18.80 doz.; 2 in., $21.40.

No. 30, $28.10; No. 31, $37.50; No. 35, $21.50; No. 130, $41.60 doz.

Chucks and Drills for Yankee Spiral Drivers—No. 30, $9.35 doz.; No. 31, $9.35.

Countersink Bits for Yankee Spiral Drivers—$2.15 doz.

Sets of Screw Driver Bits for Yankee Spiral Driver—50c per set.

Yankee Automatic Drills.—No. 40, $26.80 doz.; No. 41, $26.80; No. 42, $20.45; No. 43, $13.40, No. 44, $29.75.

Drill Points for above, assorted sizes, $1.10 doz.

Drill Points in Sets—75c per set.

Garden and Harvest Tools Moving Out Freely

London.

GARDEN, HARVEST TOOLS.—Sales of garden and harvest tools are being maintained at a good average and prices have been firmly maintained at the discount of 17½ per cent. Spades and shovels are also moving out in very good quantities at a maintained discount of 50 per cent. Some question as to prices ruling on D spade and shovel handles has been raised, and quotations ruling are given at $5.00 dozen locally, with no higher prices having been reported as yet.

New Prices Named on Lamp and Lantern Burners

London.

LAMP, LANTERN BURNERS.—Quotations have been revised on lamp and lantern burners and prices named herewith are advances over former figures. The present range of prices is: Lamp burners—Correct, A, $2.00 doz.; B, $2.25 doz.; Banner, 0, $1.50 doz.; A, $1.50 doz.; B, $1.90 doz.; D, $3.75 doz.; Ontario, A, 95c doz.; B, $1.20 doz. Lantern burners, No. 2 Cold Blast, $2.00 doz.

Nails Moving Freely; Scythe Stones Firm

London.

NAILS, SCYTHE STONES.—A very good sale of nails is reported during the

week. A very firm undertone to the market is noticeable and indications point to higher price levels being reached. The present basis of quoting is for wire, $5.20 per 100 pounds, and for cut, $5.60 per 100 pounds, while from the miscellaneous wire list the discount remains at 60 per cent. Scythe stones are holding firm and some movement is reported. Quotations now being made on a couple of lines are: Carborundum scythe stones, No. 190, $2.04 doz.; No. 191, $3.00 doz.; No. 192, $3.00 doz. list. Carborundum files, No. 57, $9.00 doz. list. All subject to a discount of 15 per cent.

White Lead in Light Demand; Glass, Putty

London.

WHITE LEAD IN OIL, GLASS, PUTTY.—Sales of white lead in oil are rather inclined to be light at the present time and dealers report a very restricted movement. Quotations are unchanged as follows: Pure, in ton lots, $16.20 per 100 lbs.; less than ton lots, $16.55 per 100 pounds. Pure Elephant, in ton lots, $16.70 per 100 pounds; in less than ton lots, $17.05 per 100 pounds. A fair movement of glass is reported but this is not expected to reach large proportions for some time to come. Prices remain firm on the following basis: Cases, single dia., 25 per cent.; double dia., 25 per cent.; cut lights, 10 per cent. Putty holds steady on an unchanged basis of prices and the movement is within narrow channels. Standard in 100-lb., 50-lb., and 25-lb. drums holds at $5.40 per 100 pounds, with pure $2.00 per 100 pounds higher.

Turpentine Scarce; Linseed Oil Moving

London.

TURPENTINE, LINSEED OIL.—Turpentine is in light supply and shipments are not coming to hand very freely. The price has now reached a 78c level in 1-bbl. lots. The demand is reported good and difficulty in taking care of orders noted. Prices now ruling are: 1 brrl. lots, 78 cts.; 2 to 4 bbl. lots, 77c; 5 gal. lots, 88c per Imperial gal. Linseed oil is in fairly good demand and no change in prices herewith have been made: 1 to 2 bbls, raw, $1.95; boiled, $1.98 per gal.; 3 to 5 bbls., raw, $1.94; boiled, $1.97 per gal.; 6 to 9 bbls., raw, $1.92; boiled, $1.95 per gal.; less bbls. add 10c per gal.

Wood Tubs and Pails Move Up Again

Winnipeg.

WOOD TUBS, PAILS.—Manufacturers of wood tubs and pails have just issued new selling prices covering their products which show heavy advances over previous figures. Present prices adopted on some sizes of wood tubs are higher than fibre. Prices now in effect are: Wood tubs: No. 3 $14.00, No. 2 $16.40, No. 1 $18.80, No. 01 $2.35 dozen. Wood pails: $4.30 dozen.

Higher Levels Reached In Lubricating Oils

Winnipeg.

LUBRICATING OILS.—Price adjustments have been found necessary on many lines of lubricating oils, coal oil, gasoline, etc., brought about by the recent advance in freight rates combined with increased production costs and container costs. Prices now ruling are shown in the Winnipeg current market quotations.

WINNIPEG MARKETS

WINNIPEG, May 30.—Price changes again show an upward trend affecting the following lines: Lubricating oils, coal oil, gasoline, cordage, bar iron, Reach sporting goods, Vulcan anvils, bevels, braces, levels, planes, screw drivers, try squares, wood tubs and pails.

Business for the past week has been at a standstill due to the strike of the freight handlers both at the head of the lakes and Winnipeg, but a settlement has been arrived at and shipments are again moving forward.

Bar Iron Moves Up 25c; Cast Steel Too

Winnipeg.

BAR IRON, STEEL.—A further revision is recorded on bar iron due to manufacturing conditions, with the result that the base price is advanced from $5.25 to $5.50 per 100 pounds. Prices on steel with the exception of cast tool remain firm at former quotations which are given herewith: Sleigh shoe steel, $5.80 base; spring steel, $6.50; machinery steel, $8.00; angle steel, $5.35; harrow tooth steel, $5.50; tire steel, $5.60; mild steel, $5.75 base per 100 pounds. Cast tool steel, both octagon and square, has advanced from 18c to 20c per pound.

Striking Bags, Boxing Gloves, Etc., Up 10 P.C.

Winnipeg.

STRIKING BAGS, BOXING GLOVES—Due to the extreme shortage of leathers, combined with the advancing prices, new lists have been issued covering Reach striking bags, boxing gloves, shin guards, etc., on which the advance is from 5 to 10 per cent. New prices just announced are quoted herewith:

Striking Bags, Single End, Doz.—No. S1 $32.00; No. S3, $45.00; No. S5, $52.00; No. S7, $64.00; No. S8, $72.00.

Striking Bags, Double End, Doz.—No. S1D, $36.00; No. S2D, $45.00; No. S3D, $52.00; No. S4D, $60.00.

Striking Bag Cables.—No. 16, $4.80 doz.

Basket Balls.—No. 1½, $6.00 each.

Basket Ball Goals.—No. 6P, $4.50 each.

Boxing Gloves, Doz.—No. B0, $36.00; No. B2, $48.00; No. B3, $57.00; No. B6, $72.00; No. B7, $81.00; No. B9, $96.00.

Shin Guards, Doz.—No. 023, $10.80; No. 024, $12.60; No. 026, $21.00.

Striking Bag Platforms.—No. 01, $9.00 each.

Cordage Goes to Higher Levels

Winnipeg.

CORDAGE.—Prices on cordage, which have remained firm since last September, again show a marked increase in price. New quotations are more in line with prices ruling in United States markets. For comparison, both the old and new prices are quoted as follows:

	Old Price Per lb. base	To-day's Price Per lb. base
Pure Manila	0.38½	0.39¾
Sisal	0.27½	0.28¼
British Manila	0.32½	0.33¾
Lath yarn	0.27½	0.28¼

10 P.C. Advance in Vulcan Anvils

Winnipeg.

VULCAN ANVILS.—Prices on Vulcan anvils again move up in price approximately 10 per cent. due to increased costs of production. New prices now effective are as follows: No. 8, $14.40 each; No. 9, $16.20 each; No. 10, $18.00 each; No. 11, $19.80 each; No. 12, $21.60 each; No. 13, $23.40 each; No. 14, $25.20 each; No. 15, $27.00 each; No. 16, $28.80 each; No. 20, $36.00 each.

Bevels, Braces and Other Tools Higher

Winnipeg.

BEVELS, BRACES, OTHER TOOLS.—A general revision in prices has become effective on Stanley products, new quotations showing only a moderate advance over former figures. To-day's ruling prices on a number of the more familiar lines are shown below:

Sliding "T" Bevels—

	6 in.	8 in.	10 in.
No. 25, doz.	$4.45	$5.00	$5.70
No. 18, doz.	7.45	9.50	10.40

Bit Braces—

	10 in.	12 in.
No. 923	$36.25	$37.60
No. 946	15.35	.....
	8 in.	**10 in.**
No. 966, doz.	$8.30	$8.60
No. 975, doz.	.....	14.90

Pocket Levels, Doz.—No. 38½, $6.25; No. 39½, $7.50.

Plumbs and Levels.—No. 102, $4.90; No. 103, $6.65; No. O, $10.45; No. 3, $18.40; No. 00, $9.40; No. 104, $7.10, doz.

Plane Irons, Single, Each.—2 in., 42c; 2⅛ in., 45c; 2¼ in., 48c; 2⅜ in., 49c; 2⅝ in., 53c.

Planes, Each.—Nos. 3 and 3C, $2.90; Nos. 4 and 4C, $3.20; Nos. 4½ and 4½C, $3.65; Nos., 5 and 5C, $3.65; Nos. 6 and 6C, $4.70; Nos., 7 and 7C, $5.35; No., 24, $2.00; No. 35, $2.45; No. 26, $2.15; No. 27, $2.45; No. 27½, $2.50; No. 28, $2.75; No. 31, $2.05; No. 32, $3.15; Nos. 603 and 603C, $3.30; Nos. 604 and 604C, $3.55; Nos. 605 and 605C, $4.10; Nos. 606 and 606C, $5.15; Nos. 607 and 607C, $5.95.

Block Planes, Each.—No. 101, 29c; No. 103, 78c; No. 110, 75c; No. 130, $1.10; No. 220, $1.10.

Hurwood Screw Drivers, Doz.—No. 20: 3 in., $3.05; 4 in., $3.65; 5 in., $4.30; 6 in., $5.15; 8 in., $6.35; 10 in., $8.00; No. 21, 1⅛ in., $2.65.

Spoke Shaves, Doz.—No. 51, $4.00; No 52, $4.00; No. 53, $5.10; No. 55, $3.50; No. 65, $6.85.

Try Squares.—No. 12: 6 in., $4.85; 8 in., $6.15; 10 in., $8.05. No. 20: 4¼ in., $3.90; 6 in., $5.25; 7½ in., $5.70; 9 in., $7.35.

Linseed Oil Steady; Turpentine Firm

Winnipeg.

LINSEED OIL, TURPENTINE.—Prices on linseed oil still hold firm despite a drop in flax seed, being quoted to-day at $2.00 per gallon for raw and $2.03 per gallon for boiled.

Turpentine prices again show no change over former figures. Ruling prices are given herewith. Barrels, 80c gallon; ½ barrels, 83c gallon; 5-gallon lots, 85c gallon; 1-gallon lots, 85c; plus the usual extras for containers.

PITTSBURG MARKETS

PITTSBURGH, Pa., May 30.—Production continues to increase in both pig iron and steel. The Carnegie Steel Co., easily the largest single producing company, has put one more blast furnace in operation in the week and is now operating 54 of its 59 stacks. For a few days last winter it was down to 29 furnaces actually in operation, many being entirely out of blast while a number were banked. The company's pig iron production is now running at 94 per cent. of capacity and its steel ingot capacity at 93 per cent. of capacity. The fact that these percentages are so close together indicates that the company is fairly well supplied with scrap, despite the extreme scarcity of most grades of scrap in the open market. Without a full supply of scrap the steel production could not make as good a showing in proportion to the pig iron supply. It may be surmised that, as is the case with many steel producers, much shell discard steel and other material is being melted up for scrap by reason of the requirement of the government that there be maximum production of war steel. Otherwise the shell discards could in large measure be rolled into various merchantable products, including light rails, concrete reinforcing bars, bedstead angles, etc.

By-Product Coke

The scarcity of coke is now almost completely ended. While shipments of Connellsville coke are running at only about 340,000 to 350,000 tons a week, that is a gain of about 100,000 tons a week over the average in the early weeks of the year, and there is aid from some by-product ovens that have been completed and put in operation. The beehive coke produced, moreover, is of better quality. When car supplies were so irregular coke frequently had to be held in ovens 96 hours and longer, at the expense of quality.

New by-product coke ovens completed since the first of the year represent about 1,600,000 net tons of coke a year. Ovens to be completed in the next two or three months represent about 4,750,000 tons a year. Three additional contracts have just been let, involving ovens that will be rushed to completion as rapidly as possible, the three projects being 128 ovens at Clairton, in addition to the 640 ovens now almost completed, and which will begin making coke next month; 300 ovens for the Jones & Laughlin Steel Sompany. Pittsburgh, and 110 ovens for a merchant plant at Fairmont, W. Va.. the three plants having a total capacity of about 2,150,000 tons a year.

These and the other by-product coking plants can be counted upon to operate practically full next winter. Interruptions to coke supply last year were a matter of transportation, chiefly of the coke from beehive ovens. Two points are in favor of the by-product ovens, that the government is vitally interested in getting the by-products, and that the by-product plants can store coal in large quantities while with few exceptions they are located adjacent to the blast furnaces they serve. Thus it looks as though restriction in iron and steel production from shortage of coke is about ended and is not going to return. There has been very little restriction in output from any other cause.

New Price Regulations

Within the past few days changes have been announced by the Institute committee in charge of iron and steel prices. These relate chiefly to differentials for charcoal iron and silicon irons, and to extras for certain descriptions of tin plate and formed sheets. One important thing, however, is strictly new, and that is the adjusement of the band situation, which the hoop and band mills have claimed right along was very badly handled in the original price fixing. Bands had formerly been sold, as a rule, at the same base price as merchant steel bars, having of course their own list of extras. Hoops were sold at a separate base price, with their own extras, running from 13 gauge up, while the band card ran from 12 gauge down. The original prices fixed were 2.90c for both bars and bands, and 3.50c for hoops. This made it that 12-gauge bands were placed very much lower than 13-gauge hoops, and for a time at least the mills practically refused to sell bands. There is some reason to believe that they sold a material not visually distinguishable from bands, but designated by a different name and with a price that was derived from the hoop base price.

Under the new ruling hoops and bands are both put at the base price of 3.50c, with a new card covering all gauges. From 13-gauge up this card is practically identical with the old hoop card, while 12-gauge down it is practically identical with the old band card, minus 20 cents per 100 pounds, or $14 a ton. Thus, in substance, the base price of bands has been advanced $12 a ton and the extras reduced $4 a ton, making an advance of $8 a ton. There are some slight divergences, but in general these figures represent what has occurred.

Steel Supplies

There is no improvement in supplies of steel for ordinary commercial purposes. One cannot place new orders for steel, or secure deliveries of steel already on order, unless there is involved either a war order or an activity that will clearly aid very materially in prosecuting the war. There is quite a free distribution to industries that have already been given a clear preference, including the oil trade generally and the agricultural implement makers.

The joint committee appointed May 17, representing the government and the steel makers, is hard at work endeavoring to improve the situation and in particular to secure the fullest information bearing on steel supplies and requirements. It is considering the various war requirements, which hitherto have been stated chiefly in terms of the total tonnage required, in the light of the time it will require to consume each batch of steel and thus it is hoped to arrive at an idea of how much steel per month will be required for the direct war activities. With a study likewise of probable supplies, it will be shown in a measure how much steel will likely be left and it will then be possible to determine how far it will be necessary to go in regulating the distribution of steel, whether it will be necessary to allocate all the remainder to industries that are helpful in winning the war, in the order of their helpfulness.

The steel trade continues to entertain expectations that in the long run there will be enough steel for most of the commercial industries, and certainly for all that can show that they are distinctly helpful in an indirect way to the war work. The jobbers, who were getting somewhat better supplies a month or two ago, have lately been practically shut off, but they are likely to have much better service in the near future, as it is recognized that they have in large part depleted their stocks through furnishing material used in filling war orders, but without getting credit for such steel, by way of priorities for fresh deliveries from the mills.

CATALOGUES and BOOKLETS

Catalogue on Washing Machines

William A. Kribs, Hespeler, Ont., has issued an attractive twenty-page catalogue describing the various lines of washing machines manufactured by this firm. The line includes hand, water-motor, gasoline and electric washing machines. In the foreword to the trade the manufacturers state that they have made a number of changes in the design of their machines. The various models are minutely described, telling the various uses to which the machines are adapted. The catalogue is well printed on a fine quality of paper, with gray paper cover.

Issues Wall Circular

The Star Manufacturing Company of Carpentersville, Ill., has issued some attractive wall circulars for use of jobbers to send out to dealers and blacksmiths handling plow shares and steel shapes. These wall circulars are attractively printed in three colors, namely, red, black and blue. The circular on plow shares gives the various sizes and numbers manufactured by the company for the various makes of plow. The company is of the opinion that it is of vital importance that the farmer should be supplied with agricultural repairs at this time.

Colfax, Sask.—E. B. Cryderman, dealer in hardware and groceries, has sold his business to A. Canavan.

WEEKLY PAINT DEPARTMENT

Thrift Idea Should Sell Paint

People Are More Susceptible to Conservation Plea Than They Have Ever Been — Doctrine is in the Air, Because it is Being Preached From the Housetops—Paint is a Protector

PAINT keeps things as they are. It does not allow them to deteriorate. Deterioration means loss—loss in actual money. It is loss at a time when the country is imbued with the necessity for saving in almost every other field of endeavor. Paint properly applied fills the dry, hungry pores of the wood and seals the surface. In this way it protects and preserves. An application of this preservative stops deterioration that would otherwise take place.

"The annual loss through lack of painting exceeds the annual loss by fire," asserts Prof. H. H. King, of Kansas, who has spent several years in conducting tests of paint. The preventable fire loss in the United States amounts to $250,000,000 each year. The loss in Canada is proportionately as large, compared with the number of population. In other words the preventable loss from fire in the United States amounts to $2.50 for every man, woman and child in that country, taken on a per capita basis. On the same basis in Canada the preventable fire loss each year would amount to $20,000,000. If this amount were distributed over the various dwellings and buildings of the land it will be seen that the amount of deterioration through lack of painting is an astounding item.

THRIFT APPEAL IS STRONG

There can be no doubt that the thrift appeal is one of the strongest that can be made in this year of grace. People are not so much interested in the beautification of their homes. The seriousness of the war has caused them to get a more practical, saner viewpoint. An appeal that could previously be made to their aesthetic sense of beauty now largely loses its force. People in the bygone days before the war did not have to consider the practical things to such an extent. But the war has changed all that.

With the cost of the war money has become dearer and it is impossible to purchase the same amount of commodities for a given sum. This is a truism that is apparent to everyone who has in any way to deal with commodities, whether they be for the household dining table or for raiment or working tools for the household. The great central idea is revolving around conservation of that which we already have. And it is true economy. "A dollar saved is a dollar earned," runs the old adage. This is true of buildings no less than of every other commodity.

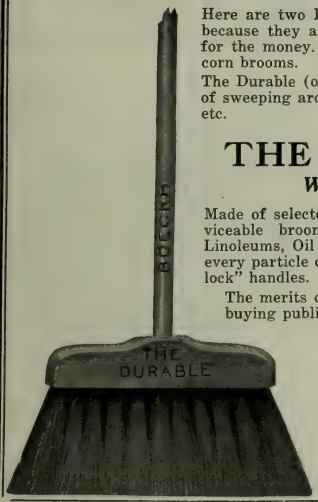
Perhaps the deterioration is not quite as apparent each year as the wear and tear on a suit of clothes. But it takes but a very short time for the actual process of disintegration to become apparent on walls and buildings. Suddenly and without warning the owner will awaken to the fact that his building has gone a long way on the down grade if he has neglected it for some three or four years.

VALUE TO THE NEIGHBORHOOD

There is another sense in which the painting idea can be made to hold up the value of property. Initiative along the line of painting will often start the upbuilding of the neighborhood values. For thrift and cleanliness and civic pride are contagious. The value of any house or building is made to a large extent by the environment in which it is placed. No matter how well a house may be kept in itself it will lose some of its value if all other houses in the neighborhood are in a poor state of repair. Real estate and building values are largely neighborhood values. The value of one poor building in a neighborhood counteracts on every other building in that immediate district.

And so it becomes a matter of selfish interest for each individual owner to see that his buildings are kept in the best state of repair possible in order that his property value might be maintained. This is a doctrine that can be preached by the paint dealer to excellent advantage.

Outlasts several corn Brooms It's a Boeckh, of course!



Here are two Boeckh products that are sure to outsell all other makes because they are the best and most serviceable brushes on the market for the money. One of these put to an actual test will outlast several corn brooms.

The Durable (on the left) is a floor broom admirably suited for all kinds of sweeping around the Home, Warehouse, Factory, Mill, Stable, Garage, etc.

THE "CLEAN SWEEP"

With "Screw Lock" Handles

Made of selected Grey Fibre, is a sanitary, economical and serviceable broom. Specially adapted for sweeping Carpets, Linoleums, Oil Cloths, Hardwood Floors, etc. Gathers forward every particle of dirt and dust. Buffed blocks, adjustable "screw lock" handles. Sizes 10, 12 and 14 inches.

The merits of these two brushes are sure to appeal to the buying public.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 30.—Paint is used on every hand these days, as evidenced by the healthy repeat business coming in to paint makers here. Many jobs have been deferred long and now are being completed, because it is generally realized that lower markets cannot be immediately looked for. Indeed, with all the factors considered prices would seem likely to hold on present levels for some time to come. Linseed oil is no easier, but the position is reported somewhat improved regarding supply. Turpentine still is scarce and no prices are quoted. In a general way the activity is greater than usual for the end of May and the only difficulty mentioned is that of getting ample supply of raw materials.

Middle of June for Oil Deliveries

Montreal.

LINSEED OIL.—The week has brought forth some little improvement. This is almost absolutely essential, as stocks have been low and demand great. Out of a 450,000 bushel lot of seed at the head of the lakes last week shipments of 150,000 bushels were made. The receipts by the elevators from outside were only 24,000 bushels, so that the reduction of the available supply there for shipment down the lakes to crushers here was very much reduced. What there is in the country for shipment to terminal elevators remains to be seen. In the meantime there is a good demand for oil, but some are not promising any delivery until the middle of June, feeling that they must in the meantime take care of the accumulated orders from their trade. Prices hold firm and unchanged. It is not expected that the slightly easier feeling at Duluth will be reflected here at present in any case.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.82-$1.86	$1.84½-$1.88½

Turpentine Outlook Says Relief Three Weeks

Montreal.

TURPENTINE.—There is very little change. The situation is still a tight one with stocks low. These will be short for some time, one large importer expressing his belief that there will be none to hand before three weeks, that is in quantities ample to meet the present accumulation of orders. No actual suffering is reported. However, there is no denying the fact that this is one of the commodities which is much needed, and paint manufacturers have had difficulty in securing what they themselves need. No prices are named in view of the present situation.

Turpentine—	Per Imp. Gallon
1 to 4 barrels	....
5 barrels and over	....

Small quantities 10c advance over 1 bbl. prices.

Putty Sharing in General Good Demand

Montreal.

PUTTY.—There is a general demand for putty supplies now that a large amount of outside painting is being done. Prices are held on an unchanged basis, with the undertone continuing firm. There is evidence of this ruling strong with all factors surrounding such as to make even an advance possible. Prices for various quantities are as follows:

Standard Putty—	Per 100 lbs. 5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.70

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

White Lead in Oil Firm, but Unchanged

Montreal.

WHITE LEAD IN OIL.—It might be said that some white lead in oil is always selling, and while some use less of this and more of ready-mixed goods than formerly, such a commodity is always required in greater or less bulk. The position is an unchanged one, but the undertone one of firmness. Five-ton lots are quoted at $15.50 per 100 pounds; ton lots at $16, and in small quantities $16.35 is asked.

Every Indication of General Painting

Montreal.

MIXED PAINTS.—There is more indication this year than ever that paint is recognized as an essential in the protection of one's property. As a consequence of deferred treatment of houses, barns, garages, and so on, the demand has shown particular activity. Very often about May 20 the season "breaks," and there is a gradual lessening of activity, but this year the condition is reported better and much business has come to hand from many quarters. The market is a firm one, and for regular colors and also shelf goods there is good demand and a healthy outlook.

TORONTO

TORONTO, May 30.—The heavy demand for all lines of mixed paints and wall coatings continues and prospects look bright for activity for some time to come. Wall coatings have registered an advance over previous figures. Linseed oil supplies are none too plentiful although some slight improvement in the movement of seed is reported. Turpentine is scarce and there is a tendency on the part of some dealers to withhold quotations. Business generally is reported good and the outlook encouraging.

Linseed Oil None too Plentiful

Toronto.

LINSEED OIL.—Supplies of linseed oil are none too plentiful. Shipments of seed are coming through in somewhat better numbers but with the heavy demand and accumulation of orders, jobbers and dealers have had little opportunity to provide for any surplus whatever and the market is rather bare of stocks. There is some hesitation about making quotations on account of short supplies, and figures shown below are only nominal. There is no effort being exerted to secure oil business, and in some quarters prices have been withdrawn altogether. Nominally quotations range as follows:

	Raw, Imp.gal.	Boiled, Imp. gal.
1 to 2 bbls	$1.86-$1.95	$1.88½-$1.98
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine in Scarce Supply

Toronto.

TURPENTINE.—This commodity is in very scarce supply and prices where quoted are very firm. There are some who have withdrawn quotations altogether until supplies are available, and orders are only being accepted subject to being able to supply. All-rail routing from southern points is the only means of transportation now and shipments are not coming through as freely as when water routes to New York were

utilized. The demand has been fairly free. Prices nominally range about as follows:

	Imp. Gal.
1 barrel	$0 72½-$0 78
2 to 4 barrels	0 72½- 0 77
5 gallon lots	- 0 88

White Lead in Oil Shows no Change

Toronto.

WHITE LEAD IN OIL.—There has been no change in the position of white lead in oil during the week. The movement is rather slow, the high price and scarcity of linseed oil undoubtedly being a factor in restricted sales of lead. Prices have been firmly maintained during the week on the following basis: Pure, in ton lots, $16.20 per 100 pounds; smaller quantities, $16.55 per 100 pounds.

Mixed Paints Enjoy Splendid Movement

Toronto.

MIXED PAINT.—Sorting business for mixed paint continues to come to hand in splendid quantities, and manufacturers and jobbers are being kept very busy taking care of the orders. Present conditions will, it is thought, continue for some time now that good painting weather has arrived. Prices shown in current market quotations are unchanged.

Higher Levels Reached in Wall Coatings

Toronto.

WALL COATINGS.—Higher levels have been established on Alabastine, new prices now ruling for colors and white in 2½ lb. packages, being $8.60 per 100 pounds, and in 5-lb. packages, $8.40 per 100 pounds; bulk in barrels takes a new price of $5.75 per 100 pounds. A very heavy demand is reported and orders are being taken care of as promptly as possible, though some trouble in getting materials through is reported. Another wall coating to make an advance is Muresco, the tints in 5-lb. packages now being quoted at $8.40 per 100 pounds and white in 5-lb. packages at $7.80 per 100 pounds. Difficulty in securing sufficient supplies of raw materials is said to be holding up orders to some extent. The volume of business is reported heavy and shipments are going forward as freely as supplies will permit.

Little New in Glass or Putty; Demand Light

Toronto.

GLASS, PUTTY.—The position of glass remains unchanged and no new developments are reported for the week. Supplies are ample for present demands which can be termed light. Prices are shown in current market quotations at figures ruling for some time past. Putty is only enjoying a fair sale. Stocks are equal to orders being received with prices unchanged as follows: Standard bulk in casks, $4.55; 100-lb. drums, $5.30 to $5.40; bladders in barrels, $5.45 to $5.65 per 100 pounds. Pure putty is $2 per 100 pounds higher than above quotations on standard.

Active Demand for Batteries; Supplies Short

The manager of one of the large manufacturing concerns on batteries reports that there is a keen demand for this class of goods at the present time. There is a shortage of help in some plants, and raw materials have been scarce and hard to obtain. One large plant is now working three shifts of eight hours each in order to keep up with the orders. A somewhat serious situation may develop in the manufacture of these goods as a resu't of the prohibitive order of the United States Government, which forbids the export of all ammoniacal salts. White sal ammoniac is one of the principal ingredients in the manufacture of batteries, and is being used extensively in the manufacture of munitions in the United States. There is a shortage of this product in Canada at the present time. If the embargo is not relaxed battery manufacturers may find themselves face to face with a serious problem.

Freight Shipments Hampered By Strike

Advice from the West by HARDWARE AND METAL'S representative located at Winnipeg states that the recent strike in the city of Winnipeg has had a bad effect on shipments of goods to points served by Winnipeg. With the resumption of work by a considerable portion of the strikers things were somewhat improved and it was expected that conditions would right themselves in a short time. Freight shipments of necessity had to back up in the warehouses and wholesalers were straining every effort to facilitate the distribution of the accumulated orders. A dispatch from Winnipeg on Thursday of this week stated that the freight handlers have agreed to settle and return to work.

Manitoba Retailers To Meet June 18 To 20

The Manitoba Branch of the Retail Merchants' Association of Canada will meet in convention in Winnipeg from June 18 to 20. Some excellent speakers have been secured and there is promise that the convention will be a very successful one. Among the speakers will be Thomas A. Knapp, formerly with the *Drygoods Economist* but now with Sheldon's; W. E. Hotchkiss, director of business education at the University of Minnesota; and H. M. Clark, hardware merchant of Lakefield, Minn. One of the features of the convention will be a display of merchandise showing the products in the course of manufacture.

U. S. FIXES GASOLINE PRICE

According to a dispatch from Washington the oil division of the Fuel Administration has fixed the price of gasoline to the Allies as follows: F. o. b. Gulf ports, 21c per gallon; f.o.b. Atlantic seaboard, 23½c per gallon. When the difference in the size of the gallon is taken into consideration this would make the price equivalent to 28c to 29c for Imperial gallon, the Canadian standard measure, for Atlantic ports.

An attractive paint display in a hardwareman's window.

GET RID OF GRAFT. GET ON WITH THE WAR

INSTEAD of a unanimous Government and Parliament we have today a mess of disgusting intrigue with outside groups of grafting hypocrites playing for power or near-power, control of Government or a share of the spoils.

Premier Borden strengthened himself with the country when he said to the House: "Stop this damnable intriguing, and let us get on with the war—or get another Government."

Conscript Big Executives

With sentences like these in a powerful leading article on page 1 of the issue dated May 25, THE FINANCIAL POST OF CANADA makes again the business-like suggestion that the best brains of Canada, the big business executives capable of carrying out undertakings unhampered by red-tape or the entanglements of political intrigue, should BE CONSCRIPTED for the country's help during the war. Get hold of a copy of this issue of THE POST. To miss this article is to miss a mighty contribution to **the kind of thought that is winning the war.** You can have a sample copy of THE POST for May 25th if you just send for it.

Other Valuable POST Artic'es

In the same issue of this outstandingly constructive business and investment newspaper of Canada the following important articles appear amongst others which would make a much longer list:—

Crop Outlook Holds Strong in All Canada.
Future of Steel Business After the War Assured.
Speculation as to Canada's New York Financing.
Benefits Are Won by British Labor.
Readjusting U.S. Exchange by Melting Down Dollars.
Japanese Banks Expanding to Philippines.
Banking's Place in Developing Foreign Trade.
Threatened Spoliation of Property Rights.
An Air-craft Maker in the Making.
Charter Amendments to Help Edmonton.
Deadlock in Montreal Over Property Tax.
House Shortage in Toronto Causes Concern.

These are just a few titles taken at random from THE POST of May 25 which contains much valuable business and investment information besides. Send for a samole copy and see, or order a trial subscription using this form:—

The MacLean Publishing Co.,
153 University Ave., Toronto.

Send me THE FINANCIAL POST each week till further ordered. I will send subscription price ($3.00 per year, or $1.00 for four months' trial subscription) on receipt of bill.

CATALOGUE "A" MAILED FREE ON REQUEST

THE VERY BEST BRUSHES YOU CAN SELL YOUR CUSTOMERS ARE "SIMMS' SET IN RUBBER" BRUSHES, for this process of holding bristles in the ferrule overcomes the most frequent difficulty experienced with brushes, viz.: the shedding of bristles.

In SIMMS' SET IN RUBBER BRUSHES the bristles are securely embedded in Hard, Vulcanized Rubber that is not detrimentally affected when used in any of the following solvents: alcohol, water, turpentine, grease, oil, benzine, naphtha, kerosene, crude oil, banana oil, varnish, paint, enamel, lacquers, boiling water, glue, paste.

Imitations under various proprietary names are offered, but are worthless when used in many of the above solvents.

SIMMS' SET IN RUBBER BRUSHES are made by skilled workmen under expert supervision and the methods and equipment used are unequalled in any other brush factory in the world.

The growing demand for Brushes made in this way is a very evident sign of the appreciation of Brush users.

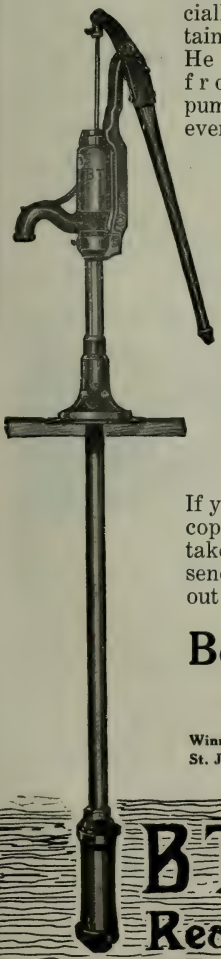
Your prospect is not confused

"7 Pumps that take the place of 700" means that your prospective customer has only seven pumps to choose from. He's not confused by an endless array of slightly different styles, shapes and sizes. He sees just seven pumps, all different, and each specially adapted for certain peculiar conditions. He can quickly select from the seven one pump perfected in every detail, that will do the work he has in mind better than any pump he has ever seen.



Specializing on seven pumps has enabled our mechanics to more nearly attain perfection, and it enables you to sell more quickly and to satisfy more completely.

If you have mislaid your copy of "7 Pumps that take the place of 700," send for another without delay.

DOUGALL NOGLOSS INTERIOR VARNISH

"the varnish that lasts longest"

when dry shows no lustre whatever. Is almost invisible, but develops the grain pattern.

It retains its velvety appearance. Will not become SHINY after repeated dustings.

Shall we send you further information about this remarkable varnish?

A postal card will bring you our proposition.

The Dougall Varnish Co. Limited

"the varnish that lasts longest"

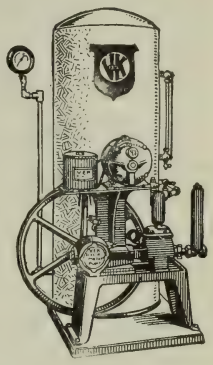
Empire Water Supply Systems

A good, modern water supply system in the country home and for homes in the village or suburban district is not now considered a luxury, but a necessity.

The successful performance of Empire Systems is, in a very great measure, due to the fact that each system is planned separately and specially to meet the requirements of the home or institution in which it is placed.

Empire Water Supply Systems consist of Hand Pump, Gasoline Engine and Electric Outfits.

We have just issued a very interesting booklet, entitled "The Empire Way." Write us for a copy.



EMPIRE MFG. CO., LIMITED

LONDON TORONTO

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

Stephens

It's so easy to apply

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Help your patrons to realize that Silkstone is in reality a specially prepared wall Paint — a flat finish peculiarly adapted to use on plaster. Then they'll understand why it is so easy to apply. So many people, when you speak of wall coatings, think of kalsomine and other distemper colors. Naturally they don't like the idea of mucking and splashing around with a big brush in a thin fluid that flies everywhere and spots everything.

We can send you a dandy booklet on Silkstone, and in handing it out we would suggest your drawing attention to the fact that Silkstone goes on just like paint.

We would like to know if there is no Stephens Paint Agent near you.

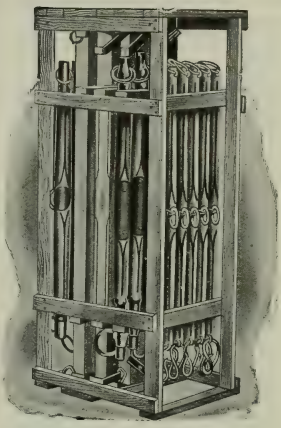
Protected by the Westwo Guarantee

Selling Westwo Painted Waggon, Implement and Plow Sets is satisfactory and profitable. They are made from selected No. 1 quality Oak and Hickory, are carefully painted (2 coats), striped and varnished, and are absolutely guaranteed against defects in material and workmanship. The best way to order Westwo Painted Sets is in crates of six sets. Then you're sure of getting them in perfect condition. —no bruised woods—no marred finish.



Guarantee

All Westwo Sets are guaranteed, and any defective part will be replaced free.

Send to-day for the Westwo folder that describes the various Westwo lines.

WINNIPEG
CALGARY

CUTLERS' COMPANY

SHEFFIELD ADVISORY COMMITTEE

A few years ago, the Sheffield Cutlers' Company, being aware of the great damage done to the City and Trade of Sheffield by the improper use by unscrupulous Manufacturers and Merchants in all parts of the World of the name **"Sheffield"** upon goods not manufactured there, established a Fund, with the assistance of the City generally, amounting to about £10,000, to enable action to be taken to suppress such frauds.

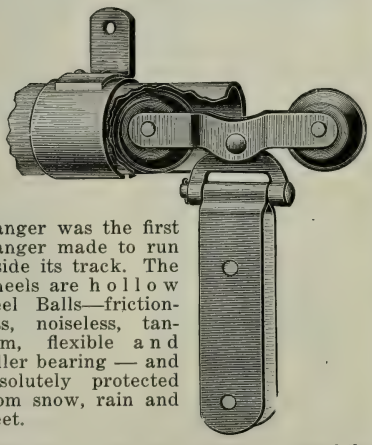
The Sheffield Advisory Committee, which administers this Fund, has already taken action through the Courts, and in other ways in various parts of the World, against Manufacturers and Merchants who have unscrupulously taken advantage of the reputation of Sheffield by using the name of Sheffield upon their goods.

The Cutlers' Company desires to bring the existence of this Fund before the notice of Manufacturers and Merchants all over the World, and to say that they will commence proceedings, without hesitation, against anyone who illegally uses the name of Sheffield upon goods which are not manufactured in that City, upon proof being furnished to them of the perpetration of such fraud.

The Cutlers' Company will be grateful if anyone in doubt as to the honest origin of goods supposed to be of Sheffield manufacture, will at once communicate any information in their possession to the Law Clerk at the Cutlers' Hall, Sheffield, England, so that the matter can be fully investigated.

(By Order)
R. T. WILSON, Law Clerk.

The Cannon Ball Barn Door



MEHASCO

ANOTHER MEHASCO MESSAGE 5

Hanger was the first Hanger made to run inside its track. The wheels are hollow steel Balls—frictionless, noiseless, tandem, flexible and roller bearing — and absolutely protected from snow, rain and sleet.

For a strong, serviceable Hanger to run outside we heartily recommend the 20th Century. Both these tracks can be conveniently carried under the counter in a hardware store as the Cannon Ball is put up in three-foot ends and the 20th Century in two-foot. This makes it very convenient for the consumer to take home in an automobile, buggy, or democrat.

DON'T WORRY

about the Embargo on Steel

For you know that wrought iron is better than steel for toughness, endurance, resistance to shocks and vibrations, because steel is crystaline, relatively brittle, difficult to weld, and has less resistance to corrosion.

London Bar Iron

is tough, fibrous as a rope, ductile, easily welded, resists corrosion, withstands vibration better than steel, and

"Delta" Files

—they'll make you many friends

When you pass a "Delta" File across your counter you offer your customer the best file service he can get anywhere. If he knows "Delta" he'll warm up to you right away. If he has never been fortunate enough before to meet up with a "Delta" you'll be introducing him to a degree of file quality which he has thought impossible of attainment. Whether he's an old "Delta" user or a new one he's going to gain a new conception of the quality of your stock and of your general business ability. The complete satisfaction which "Delta" Files give him will be reflected in his attitude towards you and your entire stock. He'll actually purchase other goods from you on the strength of "Delta" quality. Do you know our proposition?

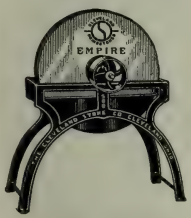
Cleveland Grindstones

It's in the Grit



Sandstone of commerce is made from sand, which is pressed together in Nature's wonderful laboratory.
There are about 20 different grades—from coarse to fine.
"Cleveland Grindstones" are carefully selected by experts of years' experience.
Ask your jobber for "Clevelands." Write for folder, "Selection and Care of a Grindstone."

James Hutton & Company

MONTREAL

GLUE

IN PACKAGES

Put up in the way that best appeals to the people—that's "Brantford" GLUE

It's an all 'round glue and makes good profits for dealers.
In ¼, ½ and 1 lb. packages at your jobbers.

CANADA GLUE CO., Limited, Brantford, Ont.

Standard Tube & Fence Co.

LIMITED

Manufacturers of

Woven Wire Fencing for Farm and Ornamental purposes, Farm and Ornamental Gates, Steel Tube Fence Posts, and a full line of fencing materials,

also

Butted and Welded, sizes ⅜" to 2", 14 to 20 gauge.

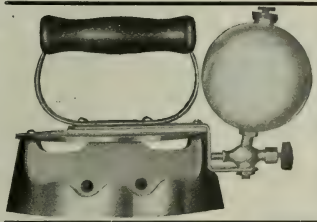
WOODSTOCK ONTARIO

Is there any other system giving a double check on all sales?

Is there another affording means for the saving of time and labor by obviating running—as it does?
Is there another placing the responsibility for the proper care of all money and charges on the custodian in your office—where it properly belongs?
Have you thought the matter over and considered how best these questions may be answered?
Our four-page leaflet tells crisply about it. A post card will bring one to you.

GIPE-HAZARD STORE SERVICE CO., LTD.,
113 Sumach St., Toronto, Can.

Big Spring and Summer Seller



Every housekeeper—city or country—a likely purchaser of the

"Comfort" Iron

Makes its own gas, two-pointed, self-heating, self-cleaning. Operates easily at low cost. Looks good and makes good, guaranteed. Sells fast.
Ask your jobber for particulars or write direct.

Dept. 16.

National Stamping and Electric Works

410-424 S. Clinton St. - - Chicago, Ill.

Bolts

We have a large stock of **Carriage and Machine Bolts** and **Coach Screws, Rivets, Nuts and Washers,** from which we can fill all orders immediately.
Prompt Shipments. Reasonable Prices.

London Bolt & Hinge Works

LONDON, CANADA

Salesmen Wanted

Men who have worked up a connection with the trade are far more valuable to you than inexperienced men. The way to locate them is through your trade paper because wide-awake salesmen read it. When in need of salesmen use the Want Ad Page; the rates are 2 cents per word first insertion and one cent per word for each subsequent insertion, a charge of 5 cents extra is made for Box Number to cover cost of forwarding replies.

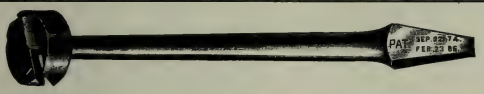
TARRED FELT

SPECIFY DOMINION BRAND

J. H. McCOMB, LIMITED Manufacturers of all kinds of Building Paper, Pitch and Coal Tar **MONTREAL**



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.

COLONIAL WIRE MFG. CO., LIMITED

A suggestion to get new business

Oily waste cans will materially reduce Factory Insurance Rates.

A Seasonable Suggestion Sanitary Garbage and Ash Cans

In summer garbage regulations are rigidly enforced, and sales in this line are usually heavy. Reed's Sanitary Garbage and Ash Cans are made of strong reinforced galvanized steel in popular sizes and styles for use in house, school, office, building, hotel, club and restaurants.

Each style is constructed to give the best service for which it is intended, and judging by repeat orders, our designs are giving first-class satisfaction. To appreciate the real merit found in these Reed Products, write for circular giving full description of various styles. Special Dealers' Prices.

Note: You should make it a particular point to enquire about Reed's Plastic Asphalt Roof Cement. Make a note to mention it in your letter.

GEO. W. REED & COMPANY LIMITED

37 ST. ANTOINE ST. MONTREAL

Rock Island Combination Forge, Anvil and Vise

FRAME—is steel angles.

FORGE — Pan is oval, 12 x 15 inches.

FAN — is driven by an accurately cut gear and pinion.

VISE — jaws are 3½ inches wide and opens 11 inches.

PIPE JAWS — take pipe and round rods up to 2 inches in diameter.

DRILL—takes ½-inch round shank drills; chuck is steel.

The machine weighs about 135 pounds. Order a sample. This tool will sell on sight.

If what you want isn't advertised in this issue, consult our Buyers' Directory. If it isn't listed in our Directory, write us and we will give you the information.

Bedrock in Auto Tire Prices

¶ No other **standard** make of tires can be purchased at lower prices than Dunlop Tires sell at. (If so, they must be "seconds.")

¶ No other **standard** make of tires can show reasons why they should be purchased at higher prices than Dunlop Tires sell at.

¶ Tires lower-priced than Dunlop mean a loss to you **in the end.**

¶ Tires higher-priced than Dunlop mean a loss to you **at the beginning** and **no gain to you in the end.**

¶ If anybody tells you they have lower-priced tires than Dunlop, tell them possibly so, but more than likely their tires are Unknown and Untried.

¶ If anybody tries to sell you higher-priced tires than Dunlop, ask them to name a single virtue in their product not found in Dunlop Tires—"Traction Tread," "Special," or "Plain."

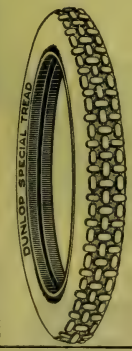
¶ Dunlop prices are standardized prices for standardized Quality. Dunlop Tires have been made in Canada since 1894. Therefore, Dunlop means "Dean of the Tire Industry."

ELASTICITY, QUALITY

Both are permanent with

DUNLOP SEAMLESS TUBES

Made by a patented process. It cost you no more to get the most in Auto Tube Merits.



The Dunlop Catalogue A. IA. gives a first-hand idea of the completeness of the Dunlop Line. You should have a copy that you may not only know more about Dunlop Tires and Tubes, but that you may also further appreciate the excellence of Dunlop Accessories.

Stop that Leak with an ADAMSON

It doubles the life of tires

90 per cent. of your customers' Tire troubles and expense can be saved with an Adamson Vulcanizer—cuts and injuries can be repaired in fifteen minutes **or less at a cost of a few cents.**

The Adamson Vulcanizer operates different from any other vulcanizer **and there are several times more of them in use than all other makes combined.**

Model "E," light and handy outfit for the quick repair of tube punctures on the road. Price $1.50.

Model "U" repairs tubes and casings without deflation or removal from car. Price $3.50.

Model "M," especially built for repairing Motorcycle, Bicycle, Ford and Cycle Car. Price $1.75.

Model "S" is largest and particularly designed for private garage and repair shop. With this vulcanizer a cut 15 to 20 inches in length can be repaired in from 15 to 20 minutes. Price $15.00.

Adamson's Repair Gum—is especially prepared for use with Adamson Vulcanizers—a high-grade repair stock for tubes and casings compounded to give perfect adhesion without the use of cement.

Why You Should Be A Michelin Dealer

No. 7

Michelin Tubes Outlast All Others

The photograph reproduced above shows one of the many definite proofs of Michelin superiority which the Michelin Dealer has at his command.

Each of the inner tubes shown was made by joining together half a Michelin Tube and half a tube of another make. The composite tubes were then run to destruction under normal driving conditions on the road.

Notice that the Michelin sections remained intact after all the other tubes had blown out. The test was repeated many times, and the result was always the same—conclusive evidence that Michelin Red Inner Tubes possess superior durability.

Most motorists use Michelin Tubes. Your customers, too, use them. Isn't it time to reorder?

Sell Your Customers the Revolver They Trust

Defense of Home and Defense of Country are receiving more serious attention than ever before in our history

Iver Johnson Revolvers are made primarily for Home Defense, and the public knows it.

"Hammer the Hammer" advertising has taught the country that an Iver Johnson is the safe revolver for the home that has women and children.

Your stock of Iver Johnson revolvers should be varied enough to give every customer the model he wants.

And don't overlook the good selling qualities of the rest of the Iver Johnson line — Shotguns, Bicycles, and Motorcycles.

Write for complete catalogues

The New Presto Necessity

Presto Body Brace *and* Running Board Support *for* Fords

Belongs on Every Ford

Every Ford car needs a Presto Body Brace and Running Board Support. Every Ford owner is an interested prospect.

The Presto Brace—**The only one of its kind**—sells like a shot, and knows no competition, because it is "strong as a bull" and we furnish two boards, each 3 feet long, with each brace. Stops vibration, avoids sagging of running boards, and prevents them breaking away from the fenders. Strictly a **quality** article, that your customers will thank you for selling them.

Popular with taxicab companies—a source of **quantity** business for dealers—with passenger-car owners and users of commercial Fords.

Price in Canada, $6.00. Satisfaction guaranteed. Order from your jobber, or write direct to us, if he cannot supply you.

JOBBERS: This new one is a knockout. **Ask us about it. Exceptional discounts.** Insist on having PRESTO Products. **Write** for free literature and cuts of all new products.

YOU
SHOULD SELL
WEED CHAIN JACKS

The most easily operated Jack on the Market

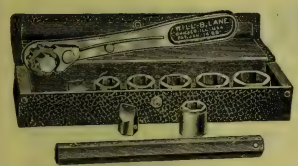
Weed Chain Jacks lift a car by a few pulls on a chain and lower by a few pulls in the opposite direction. The operator can stand away from the car, clear of the wheels, mud guards and tire carriers. This feature is especially noteworthy where cars are operated by women.

They are made of malleable iron, black enamelled; the base is extra heavy to prevent upsetting; the top is concave to prevent slipping of the axle. The lifting screw is cold rolled steel with square machine cut threads. The gear housing is stamped steel, and the chain is heavily plated to prevent rust.

A Weed Jack purchaser is a pleased customer.

GREAT WEST ELECTRIC COMPANY, LIMITED
WINNIPEG

Distributors for Laco Tungsten and Nitro Lamps. Our Auto Accessory Catalog is now ready, did you get your copy?



FORD SET

The Ford Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

STANDARD SET

Standard Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex nuts, as follows: U.S. Standards from ¼ to ½ in.; A.L.A.M. Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 in. to ⅝ in.

Autoists like that ratchet feature

Lane's Unique Ratchet Wrench is ideal for close work

The autoist who has once discovered a few of the hard-to-get-at nuts and screws on his car is only too pleased to have some one introduce to him Lane's Unique Ratchet Wrench. He sees at a glance how effective the ratchet feature would be in close quarters where an ordinary tool would be absolutely useless.

Play up this ratchet feature and so arrange auto accessory displays that when motorists get up against the tool problem they will remember Lane's Unique Ratchet Wrench and come to you for a set.

Trapshooting Is Increasing In Popularity

Every year more men and women are discovering the fascination that comes from the sport of Trapshooting. And every season the demand for duPont Sporting Powders increases. That is the reason why you should specify "duPont loading" in the shells you handle. It identifies your store with the famous duPont oval trade mark—the standard by which experts and professional shooters buy their powders.

All makers of ammunition use duPont Powder and you can gain a large and increasing sale among shooters by featuring and advertising that duPont products can be had at your store.

Diamonds cut Tire upkeep for two *good* reasons

And yet—if Diamond Tires were sold at so much per delivered mile their first cost would be among the **highest.**

Diamond Tires Cost Less to Run

For, after all, the purchase price **means nothing** if the tire does not wear well; if it **does not** cost less to run.

In buying Diamond Tires your customers begin to cut "tire upkeep" **from the first minute**—and keeps on cutting "tire upkeep" the more he runs it.

Diamond Dealers usually save time in making sales by just saying to their prospects:

"Mr. Customer, when your car is equipped with four Diamonds you are cutting 'tire upkeep' **four ways at once.**"

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

DREADNAUGHT

Steel Hames ***Doubletrees***

Designed and built on scientific principles. The two pieces of selected steel forming the body of Dreadnaught Hames reinforce each other, as do the steel rod and wood of Dreadnaught Doubletrees. They form a perfect Truss—the strongest possible construction. They are mechanically correct. For the heavy pulls and terrific strains of rough spring work they have no equal.

HELP THE FARMERS PLOW DEEP

We need big crops. Equip your farmers with Dreadnaught Hames and Doubletrees so they can do their bit. Write to-day for prices and description of these dependable, profit-making lines.

MONTREAL TORONTO NEW GLASGOW, N. S.

Sales Agents for Eastern Canada
United States Steel Products Company, New York

Delivery conditions become more uncertain every day. Transportation congestion and embargoes affect not only shipment of raw materials to the manufacturer, but delivery of finished product to dealers.

BE WELL-STOCKED WITH SHARPLES

To Keep Pace with Demand and Avoid Delivery Delays

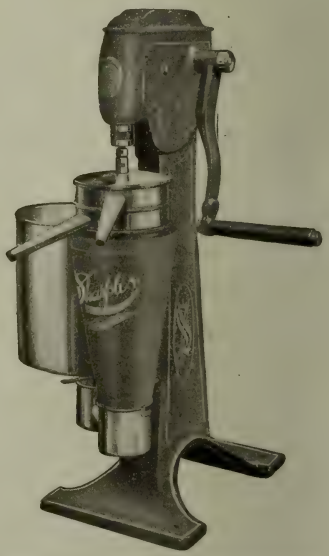
BY BEING well-stocked we do not mean that a dealer should overload. That is not the Sharples policy. On the other hand, every dealer should bear in mind that these are *abnormal times.*

Farmers are being urged from all sides to *"save the fats that will help win the war."* High price of butter-fat makes it doubly worth while to save it all in separating.

As there is only *one* separator—the Sharples—that saves all the cream, *skimming clean at any speed,* the Sharples is the one that farmers will want.

Be on the *safe side* by ordering *early* and ordering *adequately.* A Sharples is always a standard investment for the dealer just as it is for the farmer.

SHARPLES
SUCTION-FEED
CREAM SEPARATOR



"The Machine of the Hour"

The Sharples has selling points no other separator can even *claim.*

The Sharples suction-feed principle *alone* is a powerful sales advantage for dealers. It absolutely prevents butter-fat waste, no matter who turns a Sharples, and at what speed it is turned. This can be said of *no* other separator.

And, due to the scarcity and unprecedented demand for raw materials, etc., separator prices cannot possibly be lower than they are at present, for even several years after the war is won.

SHARPLES is the most profitable separator contract. EXTRA BONUSES!

Sharples offers the dealer just what he is looking for—a separator with selling points that *convince;* discounts that mean more *profit* for the dealer; protection for the dealer in selling policy—and as an *extra incentive,* a quantity bonus that brings a tidy sum. Order now and take advantage of Spring dating terms—extending payment until May 1st. Write nearest office *today.*

UNIVERSAL

Food Choppers, Bread Makers Coffee Percolators

Food to-day costs more. We are all out to make this food go just as far as possible. UNIVERSAL Food Chopper, Bread Makers and Percolators conserve food. We have spent thousands of dollars to impress this fact.

UNIVERSAL Bread Maker makes better bread than the baker at less cost. No loss of ingredients. Absolutely sanitary because hands do not touch the dough.

UNIVERSAL Food Chopper makes left-overs into palatable, nutritious dishes.

UNIVERSAL Butter Merger makes two pounds of merged butter from one pound of butter and one pint of milk.

The UNIVERSAL method excels all other ways of making coffee because the percolating process is practically completed and all the wholesome, aromatic and invigorating essence of the coffee is extracted before the water boils.

Realizing these facts, housewives everywhere are buying these goods. Put these articles where they can be seen and handled—it won't hurt them,—but will sell them.

Your jobber will be pleased to furnish you with UNIVERSAL show cards.

Landers, Frary & Clark, New Britain, Conn.

Genco RAZORS

A Square Foot of Selling Space

That Can Be Made Very Profitable In Your Store

THE space occupied by this Genco Razor Display Case is about one square foot. Besides containing and protecting the razors, it catches and holds the eye and gives the goods a pleasing display. As a salesman it is on the job every minute.

The case is made of pressed steel, with handsome Circassian walnut finish. It holds six Genco Razors of different design on constant display against a background of Royal Purple plush and there is ample room beneath for carrying stock.

All current Genco Razor advertising features this case prominently. It goes to work for you the minute it appears on your counter. Let it be a reminder to your customers of the 500 master cutlers who, in the largest high grade razor factory in the world, grind the quality in and the guess work out of Genco Razors.

We are making a special proposition which included one of those display cases free with your first order. Write for the details of this offer now, while the matter is fresh in your mind. It's quite a good thing. Mention the name of your jobber when writing us.

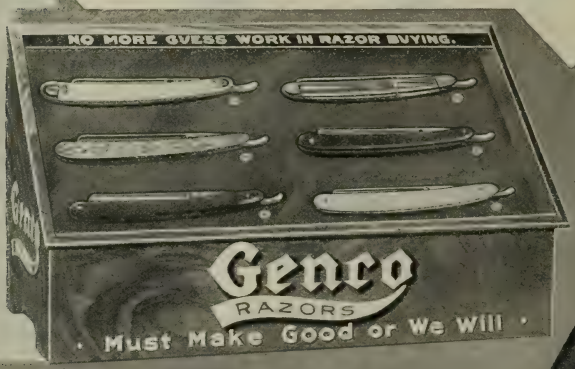
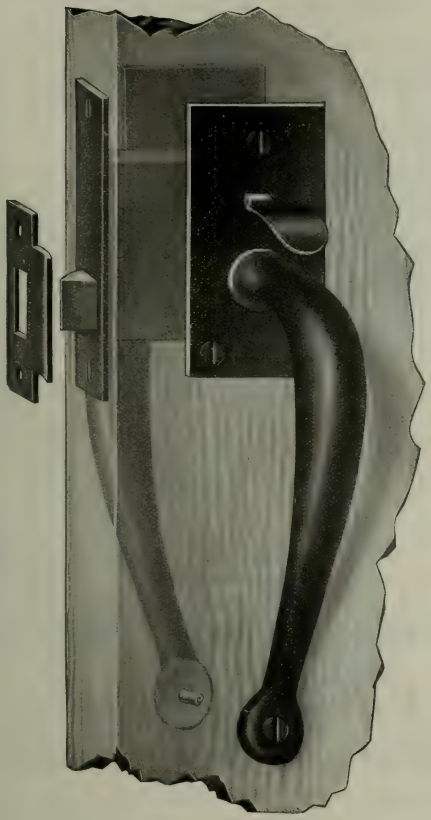
159 Gates Avenue, Geneva, New York



If interested, tear out this page and place with letters to be answered.



Here it is—the Aristocrat of Garage Door Latches

National No. 27 is just about the most handsome Garage Door Latch you could find. The long, graceful handles, one on either side of the door, give an air of distinction to any garage door. It has the appearance of being much higher grade than its price indicates.

It has a very simple mechanism with a sure action, and no complicated parts to get out of order or break.

Can be used for right or left hand door and is adjustable for doors from 1⅛th inch to 2¼ inch in thickness.

Packed the National sales-making way,—one complete latch with screws in a neat, strong box.

One dozen to a case, 36 lbs. to the dozen.

National Mfg. Co., **Sterling, Ill.**

If interested, tear out this page and place with letters to be answered.

The Hatch Garage Door Outfit

makes hinged doors

Sag Proof, Weather Tight and Open and Close Almost Automatically

Note the single hinged door which allows entrance to the garage without disturbing the other two.

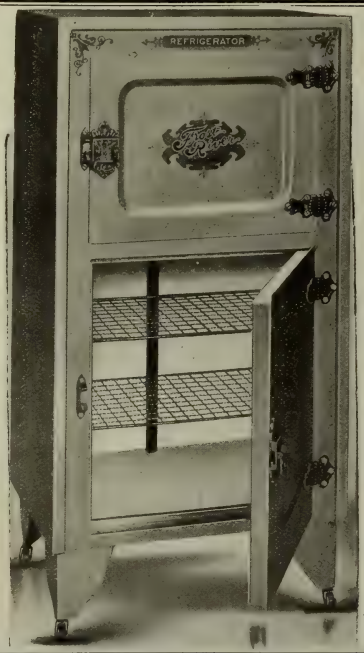
Efficiency, ease of operation and no waste space are outstanding features.

The smooth-gliding, swivel rollers hold the doors in place—take the bind off the hinges and roll the doors around the corner, on the inside of the building to the side wall.

This practical, inexpensive equipment affords a wonderful opportunity to increase sales and profits.

Canada Steel Goods Co., Limited

HAMILTON, CANADA



Davidson's Well Known FROST RIVER

Refrigerator shown herewith

Made entirely of Sheet Steel Galvanized

The exterior is Japanned French Grey, beautifully finished with neatly decorated panels and corner scrolls.

The Food Chamber is coated with white enamel, thoroughly hardened and baked on in an oven of high temperature.

All inside parts are removable for cleaning purposes.

The drip pipe for the waste water has been carried outside the body, and does not run through the Food Chamber—as usual in other refrigerators.

Made in three sizes, the largest with double doors.

NOW is the time to get your Orders in for these goods and ensure prompt shipment.

Greatly Increased Sales Follow Plymouth Window

GREATLY INCREASED SALES FOLLOW PLYMOUTH WINDOW

B. D. WILSON & COMPANY, Niotoze, Kansas, write that materially increased rope sales have followed the Plymouth Rope Window recently displayed. The interest created by the window was easily crystallized into sales by the talking points which the Plymouth dealer alone can bring to the support of the rope he sells. Talking points that are of vital interest to the buyer. Greater strength, greater durability, and the exact knowledge of what the rope will cost.

The material used by Mr. Wilson in his rope window was largely furnished by our Dealers' Service Department without charge. Window trim material is only one of the many sales helps available to the Plymouth Dealer.

If you are not a Plymouth Dealer we will gladly tell you the advantages of becoming one. A request for information places you under no obligation.

Why You Should Be A Michelin Dealer

No. 8

Michelin Advertising is Different and Better

Most tire advertising is very much alike, because most tires are very much alike.

But Michelin advertising is different and better — just as Michelin Tires are different and better.

Michelin advertising does not consist of wordy claims nor glittering generalities — but talks about **facts** that **prove** Michelins are more durable.

This superior Michelin advertising is appearing regularly in the leading Canadian magazines, farm journals and newspapers—as well as in many periodicals published in the United States and circulating extensively in Canada, such as The Saturday Evening Post, The Literary Digest and Life.

Is it any wonder that such advertising keeps Michelin Dealers busy?

Write today for Michelin's Dealer Proposition.

NEW SAFETY STOVE PIPE

Yes—It Locks!

Here is a stove pipe that needs no wiring—that cannot pull apart—a stove pipe that locks automatically—that is easy to put up and absolutely leak-proof.

It has other superiority features.

Here are a few of them:

No. 1—Costs same as ordinary pipe.
No. 2—Made in 6 and 7-inch sizes.
No. 3—Made of 29 Gauge Iron.
No. 4—Telescope Pipe does away with half lengths.
No. 6—Pipe is nested, saving freight rates and storage room in store.
No. 8—New patent lock effects saving on each pipe, making a saving of one length in every 12 of ordinary pipe.
No. 9—Can be used any place where ordinary pipe is used, or can be used along with ordinary pipe.
No. 10—Patented in Canada and the United States and "Made in Canada" by Fairgreave & Son, Toronto, Ont.

Just what you need for bigger sales next winter.

LIEUT.-COLONEL ———, the writer of the following letter, abandoned a lucrative business and joined the Canadian forces in August, 1914. He has never been out of uniform since. He has been in some of the heaviest fighting; has been wounded several times; was given up by the doctors; recovered and is again at the Front; was offered command of a brigade. He is regarded as a man of so much importance that he has been guaranteed a sure seat in the House of Commons and will be one of the chiefs, if not the leader, in the returned soldiers' movements in Canada.

Lt -Col. John Bayne Maclean, France, April 5th, 1918.
Toronto, Canada.

Dear Colonel Maclean:-

Yesterday I had handed to me by Captain———————a copy of MacLean's Magazine with your article on ''WHY WE ARE LOSING THE WAR,'' which has been sent to him by a lady from Edmonton because of the reference made in it, no doubt, to . . . . . I have read the article over carefully and so have many of my officers and I thought I ought to let you know how deeply impressed we all are with your array of facts and arguments and the manner in which you have marshalled them together in a brief that should bring envy from the best legal minds in Canada.

For a long time I have been filled with the same ideas with reference to the infantile handling of the great affairs of State by the big men of our country and as one who has been brought up in the greatest awe and respect for those high in authority in England I tried to fight against the gradual turn my mind and heart was taking towards these great leaders. Furthermore, being a soldier, I felt it would not be in keeping with my duty to make comment or criticize those in authority and perhaps also I lacked the courage lest I might bring about my ears criticism which must always follow attacks upon big men. I believe there are many others who have shared the same views and for the same reasons refrained from ''Talking out in Meetings.'' You have stepped into the breach and taken upon your own shoulders the burden of a whole people and in doing so I realize what it will mean to you and the courage and fearlessness which you must have in order to have taken this step. I know of no other man who has so boldly set before us Britishers our own case. You will, no doubt, having attacked these great leaders, find yourself in a maelstrom of criticism. You will be called disloyal and you will be vilified and abused, but the truth of your statements cannot be gainsaid and you must eventually stand out as a great and fearless citizen who was not afraid to place himself in jeopardy, that EVEN YET A ROTTEN SITUATION MIGHT BE TURNED INTO VICTORY BY PROPER HANDLING.

The history of this war has been a history of bungling on the part of the higher ups, interwoven with a history of devotion, loyalty and doggedness on the part of men in the ranks, which can never be excelled. It has been one continual panorama of ''light brigade'' episodes and our brave men still go on fighting knowing that ''someone has blundered,'' yet feeling that blunder or no blunder, we must fight and fight on that civilization may be preserved and British traditions maintained.

Some sections of the public here abuse Northcliffe, Lloyd George and Beaverbrook but having watched things closely for a few months I have come to the conclusion that in these three men and their associates lies the future of the British Empire. The old regime is fighting and dying hard. Incompetency is also tenacious and hangs on doggedly to the high positions where it has been entrenched for so many years in British public life. A few brilliant charges like yours will start such an onrush of public opinion throughout the Empire that sooner or later he will be dislodged, and brains having taken his place, we may look for results. Until that time comes, we need not hope for a change in the present state of affairs.

OUR MEN MUST HANG ON FOR THE TURN OF THE TIDE IN THE BRITISH PUBLIC LIFE FOR AT THE SAME TIME THERE WILL BE THE TURN OF THE TIDE TOWARDS VICTORY IN FRANCE.

Faithfully

Signed.....

Commanding.....

This letter was not marked "private," but for good reasons the name is temporarily withheld. If desired it will be given in confidence to Sir Robert Borden or Sir Wilfrid Laurier. MACLEAN'S MAGAZINE and THE FINANCIAL POST have outstripped all other Canadian newspapers and magazines in information on the big war and political problems of special interest to business men. Address MacLean Publishing Company, University Avenue, Toronto, Canada.

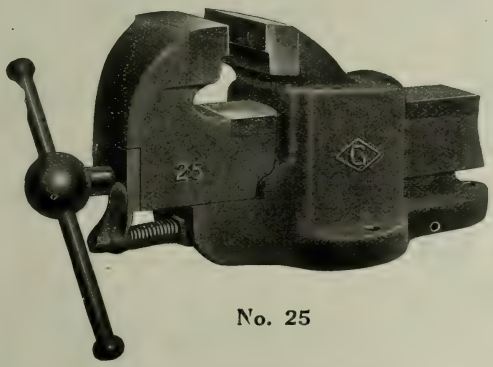
Iron Worker's Vise

QUICK ACTING



No. 25

Steel Faced Jaws Milled
Jaws 3⅝-in. wide
Jaws open out 5¼
Weight 50 lbs.
Stationary Base and Jaw
Painted

This Vise is fitted with a small thumb piece underneath the handle which releases the screw, permitting the front jaw to be instantly adjusted to any width of opening, doing away with time lost in old type of vise in working the screw to get the proper opening.

Complete stock of Vises of all sizes and styles

Produced at The James Smart Plant

Brockville, Ont. Winnipeg, Man.

A Nickel-Plated Kettle, or this Oakville Seamless Aluminium Kettle?

The present high cost of Nickel-plated Tea Kettles makes it easier to sell the more profitable Oakville Aluminium Kettle. If you were your customer you'd rather have the Seamless Oakville Kettle, wouldn't you, especially when the extra cost is so slight?

It isn't good business policy to overlook this opportunity for greater profit for you and added satisfaction for your customer. Any woman is bound to be pleased with a dealer who shows her how to obtain a more beautiful and durable utensil at very slight extra cost.

Push Oakville Kettles, Teapots, Coffee Pots, Sauce Pans, Pudding Pans, Double Boilers, and all the rest of the Oakville Family. Get the complete catalogue and learn all about them.

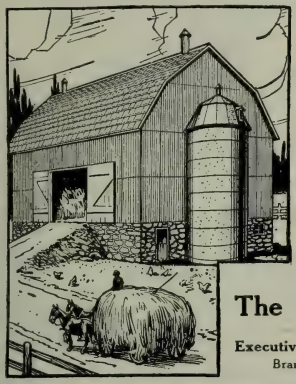
PEDLAR'S

"GEORGE" Shingles and "OSHAWA" Shingles

FOR THE BARN FOR THE HOUSE

The Roofing That Will Satisfy Your Customers



THESE shingles, when laid, are locked on all four sides and are proof against all the elements. They are absolutely guaranteed to be wind, water and storm proof on any roof having a fall of three inches or more to the foot. They are simple to lay and will last a lifetime, because they are made from the best grades of steel, heavily galvanized.

"George" Shingles are 24x24 inches in size, and are especially adapted for roofing large buildings such as: barns, warehouses, schools, churches, etc.

"Oshawa" Shingles have a covering size of 16x20 inches, and are particularly recommended for house roofing, the standard model 660A being very handsome in appearance.

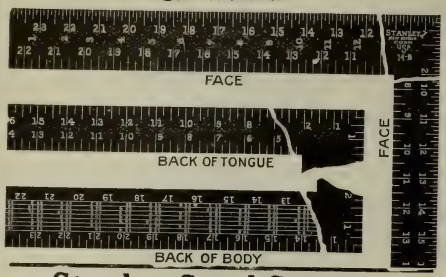
Stanley Tools



Stanley Steel Squares

Every Stanley square is weldless, or, in other words, made from ONE piece of steel, and all four edges are machined. Particular attention is called to the finish of all numbers and the depth and accuracy of the graduation.

Special care has been given to the simplifying of all tables used, so that the workman can get the measurements he desires with ease and rapidity.

They can be furnished in a number of different styles, and the variety of finishes offered include Royal Copper, Blued, Nickel Plated, Galvanized and Polished. All Royal Copper and Blued finished Squares have white enamel figures and graduations.

Each Square is packed in an anti-rust wrapper and this stamp

appears on the surface of all numbers.

Send for special circular containing complete description.

As soon as they see the Daisy"

BT

Put a BT "Daisy" on your floor alongside of any other churn and put the choice right up to your customers. Leave it to them to say which takes their fancy. They'll invariably demonstrate that the bright, clean finish and neat appearance of the "Daisy" is a real sales asset.

Now, you won't sell "Daisy" on appearance; you don't even try to, but just the same, that appearance creates a friendly feeling towards the "Daisy" that results in sales when all its other features are made known.

As soon as they see a Daisy Churn on your floor your customers are interested. They want to know all about that beautiful churn, and if you just tell them the plain truth you're bound to make a sale.

Ask us to tell you some of the features that help to sell the "Daisy."

GARDEN HOSE

When the demand for Garden and Lawn Hose comes upon you, it is some satisfaction to know that a prompt service is assured if your "hurry-up" order is placed with the Dominion Rubber System. Our nearest branch will take care of such orders in a way that will be eminently pleasing to you and to your customers.

Whenever service and quality go hand in hand, there is double reason for buying the Dominion Rubber System products. In that respect, our leading lines of Hose are very popular this season. Our *"Canadian" Corrugated Hose* and the *"Dominion" Moulded Plain Hose* have no equal for the money, while our *Multiple Fabric Garden Hose* (*No.* 300—3 *ply, No.* 400—4 *ply, No.* 500—5 *ply, and No.* 600—6 *ply*) is pleasing the trade more than ever.

It will pay you well to have these lines in stock. Our nearest branch will give you further particulars.

KNOW YOUR GOODS— AND SHOW THEM

Know your most profitable lines. Find out their good points. Tell your customers about their merits.

You know O-Cedar Products are profitable. Their merits are being constantly advertised, but by calling your customers' attention to some of these merits, you can increase sales surprisingly.

O-Cedar Products lend themselves to attractive store display—put these displays where the customer can see, and handle the merchandise. People quickly buy things they can handle. Have an O-Cedar Polish Mop where your customers can handle it—thus you will sell more mops.

An O-Cedar Polish Mop is an essential to modern housekeeping. Its long 54-in. handle eliminates stooping and bending, or getting on step-ladders and chairs to dust high places.

It is treated with O-Cedar Polish and packed in a tin container which may be used later for re-treating the mop. Two styles, round and triangular in shape, price $1.50.

O-Cedar Polish Mop and O-Cedar Polish are indispensable to Housecleaning. Since we always have dust and dirt to clean—O-Cedar Products sell all the year round. Put in Window Displays of O-Cedar Products. Worth pushing as they pay a real net profit.

Ask your jobber for O-Cedar Products.

Weekly Half Holidays in Canada

Canvas Made of Dominion by Hardware and Metal Gives Interesting Information for Use of Travelers and Others Concerned—Many Towns Observe Half Holiday Each Week

AT this season of the year much interest is manifested in the question of the weekly half holiday and particularly so by wholesale firms with travelers on the road. It is often the cause of much annoyance and lost time when travelers do not know that the stores are closed on certain days each week. In accordance with past custom and in order to serve the travelers, HARDWARE AND METAL has made a canvass of the various towns and cities and presents herewith the information obtained. This information will be reproduced in booklet form and copies will be supplied free to travelers and business firms on request. All those desiring booklets are asked to send in requests as early as possible.—EDITOR.

LEAMINGTON, Ont.—All merchants close Friday 12 o'clock, May to September, inclusive. Closed Monday, Wednesday and Friday evenings.

LISTOWEL, Ont.—No half holiday. Close evenings, Saturday excepted.

LANSDOWNE, Ont.—No half holiday. Close evenings, except Tuesday, Thursday and Saturday.

LANCER, Sask.—No half holiday. Close evenings at 6 o'clock except Saturday.

LINDSAY, Ont.—All stores close Wednesday afternoon, June, July and August.

MADOC, Ont.—Hardware stores close 12 o'clock Thursday, during June, July and Agust. All other merchants included. Close three evenings each week, Tuesday, Thursday and Saturday exceptions.

MOUNT FOREST, Ont.—No half holiday. Close evenings, Wednesday and Saturday excepted.

MARMORA, Ont.—All stores close Wednesday 12 o'clock, July and August. Close three evenings each week, Tuesday, Thursday and Saturday excepted.

MILTON, Ont.—All stores close Wednesday 12.30, June, July and August. Close evenings 7, except Saturday.

MIDLAND, Ont.—No half holiday. Close evenings except Saturday.

MEAFORD, Ont.—All stores close Thursday afternoon, May 15 to September 15. Close in evenings.

MOOSE JAW, Sask.—All stores close Wednesday 12 o'clock, June, July and August. Close evenings 6 o'clock except Saturday.

MAPLE CREEK, Sask.—No half holiday. Close evenings 6 p.m. except Saturday.

NIAGARA FALLS, Ont.—All merchants close Wednesday afternoon, June, July and August. Close evenings 6 p.m., excepting Saturday.

NEW LISKEARD, Ont.—No action taken as yet. Close evenings, except Saturday.

NIAGARA FALLS, Ont.—Some hardware stores close Wednesday, others do not. Some May to September, others June to September. Other merchants adopt same principle. Close evenings, except Saturday.

NAPANEE, Ont.—All stores close Wednesday afternoon, June 15 to September 7. Close evenings 6 o'clock except Saturday 10.

NEWMARKET, Ont.—All stores close Wednesday 12 o'clock, June, July, August and September. Close evenings except Satuwrday and evenings preceding holiday.

NEW GLASGOW, N.S.—All stores close Wednesday afternoon, June 15 to September 15. Close evenings at 6, except Tuesday and Saturday.

NEW WESTMINSTER, B.C.—All stores close Wednesday 1 p.m. all year. Close evenings at 6 o'clock with exception of Saturday.

NAPANEE, Ont.—All stores close half day June 19 and 26 and all day Wednesday during July and August. Close evenings except Saturday.

NEWMARKET, Ont.—All stores close Wednesday 12. Close evenings except Saturday.

NORTH BAY, Ont.—Stores close Wednesday 1 o'clock, June, July and August. Close evenings except Saturday.

ORANGEVILLE, Ont.—All stores close Wednesday at 12, June, July, August and September. Close evenings except Saturday.

Current Events in Photograph

THE GALLANT VINDICTIVE

A WEEK or so ago came the word that the Vindictive had completed the work at Ostend that she had tried at "The Mole," and that she now blocks the entrance of that port of marauding submarines.

The photo shows some of the survivors of the "Mole" fight standing on the deck of the battered but still ready "Vindictive"

just before she started on her last glorious exploit.

OSHAWA, Ont.—All stores close 1 p.m. Wednesday, May to September. Close evenings evcept Saturday.

ORANGEVILLE, Ont.—All stores close Wednesday 12 o'clock, June, July, August and September. Close evenings except Saturday.

PENETANG, Ont.—No half holiday observed. Closed each evening with exception of Saturday.

PETERBOROUGH, Ont.—Hardware stores close Thursday at 12 o'clock. All other merchants close on same day except grocers, confectioners, tobacconists. Close evenings with exception of Saturday and evenings before holidays.

PORT HOPE, Ont.—All merchants close Wednesday afternoon, June, July, August and September. Close evenings at 6.30 o'clock.

PRESCOTT, Ont.—All merchants close Wednesday 12 o'clock, June, July and August, with exception confectioners and fruit stores. Close evenings 6 o'clock except Saturday.

PARIS, Ont.—All stores close Wednesday 1 o'clock, May, June, July, August. Close evenings at 7 o'clock, with exception Friday at 9 o'clock and Saturday 10.

PARRY SOUND, Ont.—No half holiday. Close evenings except Saturday and evenings before holidays and on pay days.

PALMERSTON, Ont.—No half holiday. Close evenings except Saturday.

PARKHILL, Ont.—All stores close Wednesday afternoon, June, July and August. Close evenings except Saturday.

PORT ARTHUR, Ont.—No half holiday. Open generally in evenings.

PRELATE, Sask.—No half holiday. Close evenings except Saturday.

PORT ELGIN, Ont.—All stores close Thursday 12.30, May 1 to October 1. Close evenings at 6 except Wednesday and Saturday.

PETERBORO, Ont.—All stores close Thursday afternoon. Close evenings except Saturdays and evenings before holidays.

PEMBROKE, Ont.—No half holiday. Closed evenings at 6 p.m., except Saturday.

PARRY SOUND, Ont.—No half holiday. Close evenings except Saturday.

RENFREW, Ont.—No half holiday. Close evenings except Saturday.

RICHMOND, Que.—No half holiday. Close evenings, except Tuesday and Saturday.

RIDGETOWN, Ont.—All stores close Wednesday 12 o'clock, May 1 to September 15. Close evenings Mondays, Wednesdays and Fridays; open Tuesday, Thursday and Saturday.

RODNEY, Ont.—No half holiday. Close in evenings Monday, Wednesday and Friday. Open Tuesday and Saturday evenings.

ST. MARY'S, Ont.—All merchants close 12.30 p.m. Wednesday during June, July and August. Close each evening at 6.30 except Saturday and evenings before holidays.

SUDBURY, Ont.—No half holiday. Close in evenings except Saturday.

SOUTHAMPTON, Ont.—No half holiday. Close evenings 6.30 o'clock except Saturday.

SIMCOE, Ont.—All stores close Thursday 12 o'clock, June, July and August. Close evenings at 6.30 except Saturday.

SMITH'S FALLS, Ont.—All stores close except drug stores, fruit and confectionery, Wednesday afternoon, July and August. Close evenings except Saturday and evenings prior to holidays and on 5th and 20th each month.

STURGEON FALLS, Ont.—No half holiday.—Close evenings except Mondays and Saturdays.

SIOUX LOOKOUT, Ont.—All stores close Thursday afternoon 1 o'clock, May to September. Close evenings, except Monday, Wednesday and Saturday.

SUSSEX, N.B.,—No half holiday. Close three evenings each week at 6 o'clock; Tuesday, Thursday and Saturday excepted.

SPRINGHILL, N.S.—All stores close Wednesday 12 o'clock all year. Close evenings except Monday and Saturday.

SACKVILLE, N.B.—All stores close, with one or two exceptions, Thursday 1 p.m. during June, July and August. Close evenings except Monday, Wednesday and Saturday.

ST. THOMAS, Ont.—All stores close Wednesday afternoon, May, June, July, August, September.

SEAFORTH, Ont.—All stores close Wednesday 12.30, June, July and August. Close evenings except Saturday.

SAULT STE. MARIE, Ont.—All stores close Wednesday 12, with exception dry goods, boots and shoes, clothiers. Close evenings except Saturday.

SWIFT CURRENT, Sask.—No half holiday. Close evenings except Saturday.

TROUT CREEK, Ont.—Hardware stores do not observe half holiday. Close evenings 6 p.m., except Saturdays.

TRENTON, Ont.—All merchants close Wednesday 12.30 p.m., June, July and August. Close evenings, Saturday excepted.

TOTTENHAM, Ont.—No half holiday. Close evenings 6 p.m. Monday, Wednesday and Friday.

THESSALON, Ont.—All stores close Wednesday 12 o'clock, June, July, August and September. Usually close evenings.

TILLSONBURG, Ont.—All stores close Wednesday 12 o'clock, June, July and August. Close evenings 6.15 except Saturday.

VANCOUVER, B.C.—All stores close Wednesday 1 o'clock all year. Close evenings except Saturday.

VERNER, Ont.—No half holiday. Open evenings.

WALKERTON, Ont.—No half holiday. All stores except hardware stores close in evenings, Saturday excepted.

WINDSOR, Ont.—No half holiday in hardware stores. Some butchers and grocers close Wednesday, but majority of grocers close Thursday. Hardware stores close evenings with exception of Saturday.

WATERLOO, Ont.—All stores close Wednesday during June, July, August and September. Close evenings, except Saturday.

WEBBWOOD, Ont.—Hardware stores close Thursday afternoon, July, August and September. Close 6 p.m. Saturday.

WHITBY, Ont.—All stores close Wednesday at 1 p.m., June, July and August. Close evenings at 8 o'clock except Saturdays and evenings preceding holidays.

WOODSTOCK, Ont.—All stores close Wednesday afternoon, July and August. Close evenings 6 o'clock, except Saturday at 10 p.m.

WESTERHAM, Sask.—No half holiday. Close evenings except Saturday.

(Continued on page 44)

Inspects Roofs to Get Trade in Roofing

Kent, Garvin & Co., Limited, Hamilton, Do Not Wait for Trade to Come to Them—They Go Out and Look it up—Keep Track of All Buildings Being Erected in Their City—Kindly Interest of Friends Helps Business

KENT, GARVIN & CO., Limited, Hamilton, Ont., are not content to wait for trade to come to them. They take the initiative in the matter as part of a sound business principle and go out after it. This firm specializes in builders' hardware but are retailers of a number of regular hardware lines. The decline in building was not occasion for them to stop looking for trade. They went after business all the harder. Their method of developing the roofing business is a good illustration of the way they are looking out for trade. Recently one of the members of the firm, acting in conjunction with a representative of the manufacturers of roofing materials, made what they termed a "spotting" trip between Hamilton and Burlington Beach. This trip was made in the springtime when people were about to move out to their summer cottages at the Beach, as many Hamilton business men do. It was a time naturally when they should look over their cottages to see if they needed repair.

Above Illustration Shows Part of Interior of Store of Kent, Garvin & Co., Limited, Hamilton, Ont. Observe the Tiled Rooms on the Left, Erected for Purpose of Showing Different Styles of Tiling. Bathroom Fixtures Are in Section to Rear of Tile Display. Paint Display is Arranged in Left Rear with Office in Centre of Display. The Store Interior is Very Attractively arranged.

Interior of Store of Kent, Garvin & Co., Limited, Hamilton, Ont., Showing Right Rear Section Containing Tool Display and Various Lines of Hardware. The Store is Built on the Square Plan and Affords Fine Opportunity for Display. Display of Builders' Hardware is situated at Righ Front Side of Store.

This work of inspection was carried out by Kent, Garvin & Co., without an invitation from the owners. Where the owners had already moved to their cottages permission was obtained to make the inspection. If the roof was found in need of repair a card was left which read:

"Are you aware of the fact that your roof needs re-shingling? After inspection, we suggest that you reshingle with —— shingle in red or green colors. We keep them in stock. Yours truly, KENT, GARVIN & CO., Limited."

If the roof did not require repairs of any kind another card was left which read:

"We keep in stock —— shingles and ready roofing, wire screen, window screens, screen doors, etc., etc., locks and hinges, nails, paint, and varnish, etc., fire place fittings, tiles, baskets, coal and wood grates, garden hose, garbage cans and lawn mowers. KENT, GARVIN & CO., 20 Catharine St. North, Hamilton, Ont."

Thinks Big Field for Hardwareman

"We are of the opinion that there is a big field for the hardwareman in the developing of roofing sales," stated E. Kent of Kent, Garvin & Co., to a representative of HARDWARE AND METAL. "At the present time we are a little too close to the actual work of inspection to see what good will result in the way of getting business. But there are already signs that the work will be fruitful in getting trade."

This instance is but one that might be cited as the business methods followed by this company. Recently one of the hotels at Burlington Beach was burned down. This firm did not wait until the owner came round to inquire if they had building materials. One of the members of the firm got in his auto and went right over to interview the proprietor, almost immediately the news was out that the hotel was burned. The result was that an order for $1,400 in rough hardware, nails, wallboard and roofing was forthcoming. This was but the initial order and the management anticipated that there would be need for other lines before the building was completed and that they would stand very good chance of increasing their amount of sales from the fact that they had already succeeded in getting some.

Method of Keeping Track of Work

Kent, Garvin & Co. have a graphic way of keeping track of the various buildings that are in course of construction or about to be constructed. Near their office on the second floor a large wall map is placed in easy access to their salesmen. With a system of colored pins they are enabled to know the exact condition of their orders for the various buildings being erected throughout the city.

White pins signify new permits have been issued.

Black pins signify that regular business is coming from the job, orders coming along.

Green pins indicate that all the business in connection with the job has been landed. That is, all builders' hardware ,tile work, paint, and other lines in connection with the building of the house have been secured.

Brown pins indicate the firm is getting some business from a particular job but have also lost some of the various lines.

Red pins cause grim facial contortions for they indicate that no orders whatever have been secured from that particular job.

"We are able to tell at a glance the exact condition of our business throughout the city," stated Mr. Kent. "It is the duty of our city salesmen to keep this map posted up. If we hear that a new building is about to be erected we can go to the map and see what our prospects are. If a red sign is posted we immediately call our salesmen to explain why we are not getting some business."

Friends Can Assist Trade

Kent, Garvin & Co. follow the principle that it is good to have as many lines cast out for business as it is possible to have. In this way their friends understand that they will always be glad to get a tip on any particular work that may come under their observation. While the HARDWARE AND METAL representative was in their place of business at Hamilton a woman called on the telephone to inform them that she had heard of certain work that was likely to be done. The member of the firm who received the message gave her to understand that they greatly appreciated the information. "We will have our salesmen get right after that," he stated.

"Such tips have on more than one occasion netted us some good business. We do not lose time in getting after a job once we hear of it."

Store Arrangement Very Attractive

The interior of the store of Kent, Garvin & Co. is a very attractive one, as will be seen by reference to the accompanying photographs. Immediately on entering the front door one is confronted with a small booth, built in the form of a small house and constructed from wallboard. A young woman is stationed therein whose duty it is to answer questions and give information with respect to various departments and those in charge, and to attend to other clerical duties. One of the striking features of the store interior is the exhibition of the various styles of tiling for bathrooms. There are two bathrooms fitted up, each of which embodies from four to five different styles of tiling. The customer can tell without guessing as to what their bathroom will look like Immediately to the rear of the tile rooms is the display of bathroom fixtures, neatly arranged on the wall in a section set apart. In the left-hand rear corner of the ground floor is the paint display, in the centre of which Mr. Kent has his office. Nearer to the centre of the store and in front of the paint section are some of the regular hardware lines such as lawn mowers, hose, window screens and doors and other lines.

To the right in the rear are arranged the tools and lanterns and some of the smaller lines such as door pulls and numerous other articles. One of the features of this section of their store is the fine display of tools in cases, showing planes, oil stones, measuring tapes, hack saw blades, screw drivers, breast drills, glass cutters and other lines. The store is built on the square plan and gives plenty of space for display and for the customers to move around and examine the goods. To the right at the front is the display of purely builders' hardware such as lock sets and similar lines. A table with chairs is placed in the centre of this space so that the customer may sit down and take his leisure at making a selection.

In the rear of the store on the ground floor is a good-sized room for storage of such bulky articles as nails and other commodities. Basement is also used for storage of similar lines. The stairway leading to the second story is in the centre of the store and is attractive, built as it is of oak and with a landing at the turn of the stairway about halfway up. On the landing is a fireplace and mantel, which gives some intimation of the display that can be expected upstairs. The second floor is devoted almost entirely to a display of mantels and fireplaces. There is plenty of room to move around among these lines and a good selection of styles is kept on hand. Third storey is used for storage and also has machine shop, which has recently been installed in order to give service when a special kind of fitting or design may be required.

Store Windows Very Spacious

The store windows of the company are large, extending the full width of the building. On the day when the visit was made to their store a display of paints was placed in one of the large windows, and mantels and bathroom fittings in the other. The firm has developed their trade along the line of getting the larger jobs wherever possible. In roofing, paint, bathroom fittings and tile work they have been equipped to handle the work throughout the building. The screen doors, windows, lawn mowers and hose are considered part of the business that should be looked after.

Pays Commission to Develop Trade

Paris, Ont., Hardwareman Finds Added Incentive of Additional Income Means Increased Trade for Him—Pays 10 Per Cent. Commission in Addition to Regular Salary—Believes in Keeping Prices Up to Minute

D. SINCLAIR, hardwareman of Paris, Ont., has found that an incentive to his workmen in the shape of an extra ten per cent. commission has been a big factor in helping him develop his trade in electrical goods. "We have had a constantly growing trade in electrical work," stated Mr. Sinclair to HARDWARE AND METAL, and we attribute much of it to the fact that our workmen have been made to feel that it is really to their own interest to look after the trade in these lines. We pay our men their regular wages but in addition they are given to understand that any sales of electrical fixtures or electric lines of any kind that they may be instrumental in making will mean more money in their own pockets. This has made them keen to look after the selling end. They have done good work along this line. We have had no desire to pare their earnings down when it became manifest that they could earn more through the commissions paid. It would cost us money to sell these goods by other means. If it were necessary for us to put an extra salesman on the work or take the time to do it ourselves the amount involved would probably be more than we pay to our workmen. They have felt that there was something in it that made it really worth while to exert themselves toward making sales.

"We have, of course, been somewhat handicapped by the fact that the Hydro-Electric Commission has not been making any new installations recently owing to the big demand for power for industrial purposes. But with the development of the power system of the province this is a condition that will soon right itself and we will again be able to go after fixture business in an energetic manner."

Electric Washers Sell Well

One of the electrical lines that Mr. Sinclair has found to be a popular one is that of electrical washing machines. Mr. Sinclair has sold in the neighborhood of fifty of these machines during the time since he has taken on the agency, and carries the record for number of sales made by any hardwareman in Ontario for that particular make of machine. He has made an energetic canvass of the trade in his town with the result that a good trade in these machines has been developed. "We went over our list of acquaintances and those whom we considered should be prospects for the sale of washing machines. Then we concentrated our attention on those likely prospects. We classified those who regularly employed a washwoman and made the appeal to them on the ground that the saving in the washwoman's wages would soon pay for the difference between the cost of an ordinary machine and an electric machine. It was pointed out that most families would have a washing machine of some sort, usually of the handpower variety. To those people who had the services of a washwoman it was pointed out that they had to give considerable of their own time in assisting the woman, even though none of the actual hard work were being done. With the aid of an electric washing machine they would not have to do any more work themselves and it would dispense with the services of the workwoman.

Urges Trial of Machine

One of the factors that has helped materially in placing this large number of machines in the various homes around Paris has been the readiness with which Mr. Sinclair has allowed the people to make a trial of the machine. "If any kind of unwilling assent were given no time is lost in getting a machine into that particular home. After the trial has been made it has invariably turned out that we made the sale. It was just as easy to demonstrate the machine in their homes as it is to show it in the store and there was an infinitely stronger possibility that a sale would be made once it was in working order in the house."

The fact that Mr. Sinclair has had an electric machine in his own home has

D. Sinclair, Paris, Ont., has made a success of selling fixtures and electric washing machines. Following story tells how he did it.

been of great assistance in helping to explain the details of the working of the machine. He has been enabled to talk with much greater certainty and to know his machine more thoroughly because of the work which it has done in actual operation from day to day. These details which he has been able to supply have had an important bearing on getting the prospective customer to give the machine a trial.

Plumbing Lines Also Sell Well

D. Sinclair has a plumbing department in connection with his store and here again he follows the same principle with respect to giving his workmen a commission on any goods they may sell. If they are the means of making a sale of bathroom fixtures or plumbing goods of any kind they are allowed a commission of 10 per cent. on all sales in addition to their regular wage. In this department also the sales have been good and show a steady increase as a result of the incentive given to the workmen. Building operations have been at a minimum in Paris, the same as they have been in most towns and cities. Only the very necessary buildings have been erected. When building operations again become more general the system followed by this firm will undoubtedly mean much in the way of securing any available trade.

Pneumatic Water Systems in Demand

Mr. Sinclair has found that the farming community in the vicinity of Paris and in the neighboring villages where they have no sewage or water systems has offered a good field for the sale of pneumatic water systems. "There is a steady sale for these goods," said Mr. Sinclair. "It is a line that has given good satisfaction to our customers and very rarely have we had any complaints. When our plumbers are out doing a piece of work they are on the lookout to make sales of these pneumatic water systems. In the farming community they are coming more and more to be considered a necessity. With the modern ideas that have permeated the farming community it is becoming less difficult each year to sell them comforts for their homes. With prosperous conditions in the farming communities it is now a comparatively easy matter to interest them in such projects. The farmer is just as keen for these things as the city or town dweller, but he may be a little slower in putting the idea into effect. These water systems are easy to instal and there is small danger of their getting out of order once they are properly put in.

System in Changing Prices

D. Sinclair is a firm believer that retail prices should change immediately in conformity with wholesale costs. "There is no reason why I should allow the other fellow to have the benefit of the profits that accrue on the stock which I had invested money in. If you allow the customer to have this benefit it is not appreciated and in our opinion it is legitimate profit that the dealer is entitled to. In order that we may keep our prices in harmony with the wholesale costs we make it our stated policy on our electrical and plumbing goods to change the retail price in conformity therewith as soon as we are advised of the change. We have a system of changing these prices which greatly simplifies the matter. When the wholesale price is changed we receive sheets that indicate what the retail selling price should be in order to get a certain margin of profit. We have found this works out most satisfactorily. It looks more businesslike to our customers for them to see that we consult our price book, for they naturally come to gain the opinion that we have the one price for all.

Some Lines of Sporting Goods Barred Out

Order-in-Council Passed During Week Will Affect Numerous Lines Handled by Hardware Stores—Ammunition, Rifles and Roller Skates Principal Lines to be Affected

BY an order-in-council passed during the week certain sporting goods are to be barred entrance into Canada from the United States. The list includes pleasure boats, skiffs and canoes, sporting guns and rifles and ammunition, game bags and cartridge belts, skates of all kinds, including roller skates, pistols, revolvers and other firearms except for war purposes, together with wood fishing rods. The measure has been taken with a view to helping out the money exchange. The measure will have a pronounced effect on the trade of hardware stores in these various commodities. Practically all sporting rifles and shotguns and revolvers are brought in from the United States. A considerable part of the ammunition used in this country is also bought in the United States. Ice skates are manufactured in Canada but almost the entire supply of roller skates comes from the United States. Automobiles in value of $1,200 and more for pleasure purposes are also to be denied entrance.

It is intimated that these goods will be allowed in under the license system through the War Trade Board, but the implication has also been made that those articles which are in the nature of non-essentials toward the carrying on of the war will find it difficult to get in through the stringency that will be exercised in granting permits.

The effect of the order will soon be felt in the Canadian trade as this is the season of the year when stocks are somewhat low after deliveries have been made for spring and summer trade. Orders will soon be placed with jobbers for the fall trade and it is understood that stocks of ammunition in jobbers' hands are not

(Continued on page 44)

Do You Know What Electricity Is?

Volt is Defined as Pressure, While Watt is Amount of the Current Consumed—One Horse-power Equals 746 Watts on Ordinary No. 14 Copper Wire—Definitions Are Very Elusive

By Hal Nicholson

EVERY live retail hardware merchant is confronted every day with propositions to increase his business. Many in the trade have concluded that electrical supplies are rapid movers and constantly in demand, and with no limit to the possibilities of greater development for their business. Yet there are some who hesitate and make the statement: "I am not familiar with electricity. In fact I'm afraid of it." It is for the purpose of making such a one more familiar with the basic principles and fundamentals that a series of articles has been planned with this in view. The hardwareman who understands some of the fundamentals of electricity will be a better salesman of the goods he handles.

Recently one of Canada's foremost electrical engineers was asked the question: "What is Electricity?" and the astounding reply was that he did not know. But he was familiar with formulas and terms or units which made electricity.

Current Passes Through Conductors

The first fact that we must remember is that all electrical phrases or words are derived from mechanical units. Realizing this we have to bear in mind that current has to pass through conductors and that in nearly all cases for ordinary work must be copper wire, insulated with a composition containing rubber and cloth. These wires of course vary in size according to the amount of power that must travel through and the amount of electricity consumed. The sizes range from what is known as Brown & Sharpe's standard gauge of No. 18 to 0000, and from the latter size to as heavy as 2,000,000 circular mills. For house wiring under ordinary conditions No. 14 wire rubber covered single braid is the standard size used. For these reasons there is only a small pressure of current traveling through the pair of wires to the article that is to consume the supply. That article is in fact the magnet. We have often heard of the magnetic power of electricity, and when we mention the word magnet with article it may comprise incandescent or tungsten lamps of all types, toaster or irons, and we arrive at the two most common units of measurement namely, volt and watt. Therefore a volt is the electro-motive force or pressure, and watt is current consumed. In Canada for ordinary house work the average volts traveling through No. 14 wire are 110 or 115, and the watts depend entirely on the home equipment; for example, the average electric iron consumes 550 watts per hour.

What are Volts and Watts

The term volt has perhaps been a somewhat elusive one for the people to understand. Many have considered it simply an "electrical term," and have been content to let it go at that. A definition would be as follows: A volt is electro-motive force or pressure. As we speak of so many pounds water pressure in a pipe, so we speak of the "electrical pressure" of so many volts. The watt is the amount of current consumed. In Canada for ordinary housework the average volts traveling through No. 14 wire are 110 or 115 and the watt depends entirely on the home equipment.

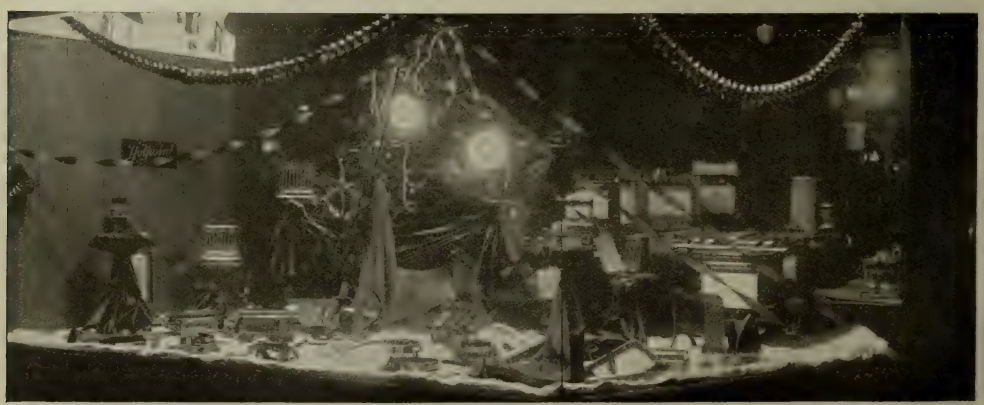
For example, the average electric iron consumes 550 watts per hour. Other electric appliances will consume various amounts.

House wiring is divided into two circuits or branches and on each pair of wires you are only allowed 660 watts or 110 volts, which is a Hydro-electric rule. These circuits are distributed from main lines. The reason for the small allowable quantity is merely for the sake of protection. Using an appliance that would magnetize or consume 1,500 watts, house wiring is divided into two circuits or branches and on each pair of No. 14 wires you are only allowed 660 watts or 110 volts. This is a Hydro Commission rule. These circuits are distributed from main lines. The reason of the small allowable quantity is merely protection, because using an appliance that would magnetize or consume 1,500 watts would either blow a fuse or overheat wires and cause a fire. It is for this reason that a heavier installation is required when an electric range is being used.

What Horsepower Is

The term horsepower is used to describe the amount of work that can be accomplished with a given amount of power. One horsepower is equivalent to 746 watts on 115 volt pressure. The amount of energy used is equivalent to raising 33,000 pounds one foot per minute.

Kilowatt is another term that is in common use and signifies 1,000 watts, which is equivalent to about one and one-third horsepower.



Selling Electrical Goods depends to a large extent on an attractive display. Above window offers a suggestion

Salesmen Show Your Mettle!

Tell How You Made a Success of Selling Some Line of Goods

$10.00 for First Prize

IS the clerk a real salesman? Does he merely hand goods across the counter or does he actually make sales?

We are asking the salesmen and salesladies behind the counter to answer these questions from their own experience.

Here is a contest in which we are anxious that every clerk shall join.

What is the selling power of the clerk?

In this contest literary merit counts not at all. We don't care in what form your answer comes. The prizes will be awarded on the value of the idea and how it actually sold goods. The idea may be a window display, a sales talk, an idea of following up former sales, anything in fact that produced results in sales.

For the best answer to this question, based on definite experience, HARDWARE AND METAL *offers a prize of* $10. *For the second best answer a prize of* $5. *That no clerk may think that this is wasted effort, we will pay* $1 *for every reply that we are able to use in our news pages.*

The only conditions of the contest are these:

1.—That the contestant shall refer to sale of some definite line of goods.

2.—That these goods shall have been sold at regular and not cut prices.

3.—That there shall be stated the amount or value, or both, of goods sold within a certain specified time.

HARDWARE AND METAL believes that every retail salesman has used ideas to sell goods that have been real winners. Tell us about these ideas.

The contest closes June 22, 1918, and the winners, with their experiences, will be announced in the June 29 issue—an issue that will feature articles of special interest to the salesman behind the counter.

Coming into this contest, giving your story of the best selling experience you have ever had, will make you even a better salesman. Tell in your own words what sales talk you used to create the demand for the line of goods you select. State what quantity was sold in a definite time, such as a day, a week, a fortnight, etc.

Everybody come in!

EDITORIAL COMMENT

TINPLATE is in active demand. That was a foregone conclusion when the word was passed out that it was going to be scarce.

* * *

AN INCREASE of 25 per cent. in freight rates goes into effect on the United States railroads on June 25. Instructions to deliver all unfilled orders before that date will now be in order.

* * *

DAYLIGHT saving has meant a heavier consumption of gasoline. Farmers will point to this as another vindication of their stand against the daylight saving scheme.

* * *

CANADIAN railroads have asked the United States Government for permission to increase their freight rates on business done on their lines within the Republic. Trust the Canadian railroads to be sure and call round when any melons are going to be cracked.

* * *

HUN submarines have found a rich poaching ground along the Atlantic Coast. They must have been somewhat amazed when they found the activity that was still going on in shipping on this side. Poachers usually find a limit to their cable tow—and get brought up with a jerk.

* * *

HARVESTING of wheat is on in Texas, will be started in Oklahoma within a week and will be quite general in the South-western States within three weeks. It would seem that Nature had foreseen the possible exhaustion of wheat supplies early some particular years and had made provision therefor.

* * *

THE United States Government is now using all rejected steel that is at all possible. This seems to knock the last hope-prop from the non-essential industries. Some of them hoped they would be able to pick up such crumbs and so keep running. But the word is nay, nay.

* * *

DU PONTS BRANCHING OUT

AN interesting bit of news is contained in the announcement elsewhere in this issue to the effect that the Du Pont Powder Company of Wilmington, Del., may become a factor in the Canadian paint trade. This concern has acquired the Flint Varnish and Color Works, whose headquarters are at Flint, Mich., with a Canadian branch factory at Toronto.

The Du Pont Company is already engaged in the ready-mixed paint business in the United States through one of their subsidiary companies and it seems within the range of possibility that they may become a factor also in the Canadian paint trade.

While the company they have purchased is engaged exclusively in the varnish business, it is stated on good authority that one of the developments of the future might be a decision to engage in the ready-mixed paint business.

The Du Pont Company has shown a disposition to extend its operations into various fields. Recently they have undertaken the manufacture of dyestuffs. It is but a logical step to embark upon the manufacture of the various raw materials for paints and to take up the manufacture of paint itself. The Canadian trade will watch with interest the developments in this field.

PROHIBITORY MEASURE ON SPORTING GOODS

THE Order in Council prohibiting the importation of sporting goods into Canada will have a very material effect on the trade in those lines. The order provides that all pleasure boats, skiffs and canoes, sporting guns and rifles, ammunition, game bags and cartridge belts, skates of all kinds, pistols and revolvers and fishing rods will be affected.

Sporting guns and rifles, pistols and revolvers, certain kinds of skates, ammunition and fishing rods will be the lines which will cause the greatest inconvenience to the hardware trade. Almost the entire stock of sporting guns and rifles, pistols and revolvers now come into Canada from the United States. Large quantities of ammunition are brought in, although this commodity is also manufactured in Canada.

Game bags and cartridge belts are being manufactured in Canada at present and the new order will not affect those lines to the extent that a shortage will be caused. The order is made to include all kinds of skates and interpretation is quite generally placed on this as embracing roller skates. Almost the entire stocks of roller skates come from the United States. Ice skates, however, are manufactured in considerable numbers in Canada.

The order comes at a time when wholesalers' stocks of these goods will naturally be somewhat low as the spring and summer shipments have already

been made. First advice did not intimate that such lines as baseball gloves, footballs, golf balls, tennis rackets and similar articles are to be included. Further details are awaited.

PIG IRON FROM BRITISH COLUMBIA

AN event of more than passing interest took place during the past week in the smelting of the first pig iron in the Province of British Columbia by the electrical process. This historic event took place at Port Moody, when some cast iron scrap metal was turned again into pig iron.

This is undoubtedly but the forerunner of a greater development that is yet to be in our far Western province. British Columbia is rich beyond the wildest dreams in the amount of electrical power available. Her wild mountain cataracts which are there in abundance but await to be harnessed. Her scarped cliffs contain iron ore in great quantity. Coal is also a part of her great wealth.

There can be no doubt but that shipbuilding is going to be one of the great industries of the West Coast. To be highly successful in these endeavors British Columbia must have her own source of iron and steel close at hand. The smelting of pig iron in British Columbia shows the trend of present development and is but an earnest of bigger things.

CRUDE OIL PRODUCTION FALLING

ADVICES from Washington during the week indicate that the production of crude oil for the month of April was 3.6 per cent. below the amount for March of this year, although it showed a net gain of 7.8 per cent. as compared with April, 1917.

While production has been less in April as compared with March of this year, consumption has apparently greatly increased. Consumption has apparently increased 4.3 per cent. in April as compared with consumption in March. As compared with April last year the consumption is 19.9 per cent. greater in April of this year.

Stocks of crude oil are being rapidly depleted. During the month of April they were reduced by 1,450,000 barrels, while the total depletion of stocks since April 30, 1917, is in excess of 15,000,000 barrels.

This is a situation which is working toward much greater firmness in all petroleum products. With source of supply diminishing and consumption rapidly increasing a condition is being brought about which may cause a shortage.

Certain points have already felt a shortage in gasoline within recent weeks, but this has been caused more through scarcity of tank cars than an actual shortage in available supplies of gasoline.

The reported strike of oil in Dover township near Chatham is being watched with interest. It is asserted that one of the wells is producing at the rate of 400 barrels per day.

ELECTRICAL LINES MOST PROMISING

THIS is the age of electricity. It follows that electric appliances will more and more come to be a profitable line for the hardwareman to handle. For with the development of electricity as a motive power and for heating and cooking there will also be improvements and developments in the instruments that will utilize that power.

The hardwareman has already shown perception in taking on a number of electrical lines. He has found therein a good profit for his efforts. They are clean lines to handle and permit of displays that should attract trade.

One of the strong appeals that can be made for electrical lines is on the ground of labor-saving. Washing machines, vacuum cleaners, toasters, and similar lines all hold possibilities of an appeal through their ability to save labor. With the shortage of help for the home very pronounced at the present time there is all the more reason why electrical lines should have their innings.

And this shortage of help for the home is not going to disappear when the war is over. Women and girls have drifted into other lines of work and the chances are they will prefer to remain there.

STILL WESTWARD GOES THE GLEAM

FROM the earliest records of the trading days of the human race the course of that trade development has been steadily westward. The trade caravans of the ancient Medes and Persians pressed westward. Now the most westerly continent looks out toward the farthest East and anticipates the trade possibilities.

The recent agreement of the Chinese and Japanese for the purpose of protecting the Far East against German trade aggression offers a peculiar opening for Canadian expansion. Canada is already linked to the Orient by a magnificent line of steamers, owned by one of the greatest corporations in the world.

The development of China with an area of 4,376,000 square miles will need in the neighborhood of 300,000 miles of railway in order to reach the development which her territory and population require. Steel, lumber, rails, rolling materials, hardware of many sorts, will have to be furnished to Asia to assist in that development.

Our far-seeing transportation kings have long ago foreseen what possibilities there are in the country. They did not hesitate to span the broad Pacific with their lines of commerce. Perhaps they builded better than they knew. For by so doing they have given Canada an enviable advantage in developing her trade in that quarter.

Canadian manufacturers should look well to the West—even to the West that fades away into the East. The broader our vision in looking toward the trade beyond our own confines, the greater will be our ability toward holding our own home markets.

EVENTS IN THE TRADE

Business Changes

Hamilton, Ont.—Frank B. Wright, dealer in new and rebuilt second-hand stoves, at 14-16 York street, has disposed of his interest to E. C. Hancock.

Obituary

Mrs. Walter H. Cottingham, wife of President Cottingham of the Sherwin-Williams Co., died at the family home on Lake Shore boulevard, Cleveland, O., after an illness of ten days. Mr. Cottingham and all her children, two daughters, and her two sons who are in the national service, were with her in her last hours.

Personals

G. W. Berney, Caledon East, Ont., was a recent visitor to Toronto.

J. L. McDonald, Thornhill, Ont., was in Toronto one day early in the week.

R. Blain, hardware merchant, Brampton, Ont., was in Toronto during the week on business.

H. S. McIntosh, Locust Hill, Ont., spent some time in Toronto during the week on a buying trip.

M. Doneff, of Grant, Ont., spent a couple of days in Toronto during the past week on a buying trip.

J. M. Gunn, superintendent of the foundry, McClary Mfg. Co., London, Ont., was a Toronto visitor during the week.

J. B. Mitchell, Goldlands, Ont., was a Toronto visitor during the past week, calling on the wholesale trade while here

C. Dixon, sales manager Hyslop Bros., Toronto, left last Saturday evening for Winnipeg and other Western cities on a business trip.

O. B. Henry, hardware merchant, Drayton, Ont., who was in Toronto during the week, reports his health greatly improved from his recent trip South and since he returned home.

Frank Odell, representing the Atlantic Tubing Co. and Rhode Island Rubber Co., Providence, R.I., was calling on the wholesale trade in Toronto during the week in the interests of his firm.

News Notes

The Guelph Tire Sales and Vulcanizing Company, of Guelph, Ont., has taken up the sale of bicycles in connection with the tire business.

R. S. Drysdale, hardwareman of Arnprior, Ont., has added a stock of automobile accessories and gasoline and is now urging the sale of these commodities.

CAPTAIN C. M. ACKLAND,
Member of the firm of D. Ackland & Sons, Winnipeg, who has been promoted.

The Vokes Hardware Company of Toronto, has been appointed distributors of K. & S. tires and will share the Ontario field with Wood, Alexander & James of Hamilton.

The National Association of Window Glass Manufacturers will meet in convention in Atlantic City on July 23-25. Some of the manufacturers' agents in Canada will be in attendance.

D. A. Watson, bicycle dealer of Thamesville, Ont., has reorganized his business by forming a partnership with Matthew Ruckle, and the new firm will be known as Watson & Ruckle.

The Canada Cycle & Motor Company employees and their friends will hold an old-fashioned picnic at Grimsby Beach on June 22. There will be races, ball games and other attractions. Toronto, Hamilton and St. Catharine dealers in this firm's goods are expected to be in attendance. The factory and offices of the company will be closed on that day.

Montreal News Notes

A. B. Thomson, assistant manager and a director of Th. de Schryder Ltd., Auckland, New Zealand, was in Montreal last week. While here he spent considerable time with the Thos. Davidson Co. of Montreal, for whom the Th. de Schryder Company is New Zealand representative.

James Hossack, manager of the Lufkin Rule Co. at Windsor, Ont., was in Montreal this week calling on the trade.

Winnipeg Industrial Chief Dies in Minneapolis

John McKechnie, president of the Vulcan Iron Works, manufacturers of various kinds of fabricated steel and hardware lines, died in Minneapolis on his way home to Winnipeg after having spent the winter in California. He was one of the pioneer manufacturers of the West and his plant at the time of his death covered several acres of ground and provided employment for a large staff of skilled workmen. He was born near Loch Lomond in Scotland, 1844. His plant was started in Winnipeg in 1874.

Assumes Charge of Auto Accessory Department

Goulter Merrick, son of Jos. A. Merrick, secretary-treasurer Merrick-Anderson Co., Ltd., Winnipeg, has been given charge of the automobile accessory department with this firm. Mr. Merrick's experience in the automobile accessory game dates back many years, he being associated with John Millen & Son, Winnipeg, and more recently with one of the largest accessory houses in Minneapolis, Minn. The Merrick-Anderson Co. intimate that they are extending their range of automobile accessories to embrace a complete line and will be issuing a catalogue at an early date. Added warehouse space has been provided to take care of their growing business.

Rolling Mills Plant Has Been Purchased

The Manitoba Rolling Mills Company has been sold to the Manitoba Bridge and Iron Works, according to a despatch from Winnipeg during the week. Announcement has been made that the Manitoba Rolling Mills Company will operate without any change in the present administration. The Manitoba Bridge and Iron Works was organized in 1903 with Thomas R. Deacon as president, and H. B. Lyall as secretary, with head offices at Winnipeg.

Hardwareman Wins Promotion at Front

News was recently received from the front that Captain C. M. Ackland had been promoted. Captain Ackland is well known in Western Canada as a member of the firm of D. Ackland & Sons, Ltd., who went overseas as major, and second in command of the 222nd Battalion, but reverted to the rank of lieutenant in order to get to France. Another son of J. W. Ackland has enlisted, and is now in training at Calgary. Dudley Ackland is not yet out of his teens, having left school to enlist. He was one of sport captains of Kelvin School, Winnipeg, being captain of one of the best known basketball teams in the city, and is recognized as a champion shot. He wanted to go to the front two years ago, but as he was only sixteen years old his parents refused to hear of it. After a lapse of two years he took matters into his own hands and enlisted in the Strathcona Horse. Mr. Ackland also has a brother a sergeant in the Army Service Corps now in France. He has been wounded once but is back again at the front.

DUDLEY ACKLAND, Son of J. W. Ackland, of firm of D. Ackland & Sons, Winnipeg, a champion shot, who is now in training.

Glass Situation is Becoming More Serious

"It is quite apparent as time goes on that the fifty per cent. reduction in output of window glass, at the instigation of the Federal Fuel Adminstration of the United States, is going to make it difficult for factories to supply the demands for home consumption." stated Joseph Taylor of Joseph Taylor & Son, manufacturers, agents and representatives of the Johnston Brokerage Company of Pittsburg, who are big factors in window glass in the United States. "On May 18 one of the large factories having completed its quota, shut down, and several others since that have been closed and from now on others will be doing so. You will see from this that the jobbers will make no mistake in placing their orders at once."

Mr. Taylor states that some 26,000 boxes of glass which should have been shipped to them in February have not yet arrived and there is no indication when they will get here. It would seem that there might be difficulty in getting sufficient stocks to go round.

New Valve Factory Organized in Montreal

A new company was organized in Montreal this week and will be known as Crane, Limited. The organization was effected on Tuesday and with the following officers: President, R. T. Crane, Jr.; first vice-president, J. B. Berryman; second vice-president and secretary, E. C. Townsend.

It is understood that Crane, Ltd., are to erect a factory at once in Cote St. Paul, on St. Patrick street. This will be placed on the unit system so that additions may be made later as conditions warrant. When completed, the company will be in a position to manufacture a complete line of valves and fittings, and with the facilities of their new plant will be able to meet a considerable demand.

Steel Barn Erected on Ontario Farm

What is stated to be the first steel barn to be erected in the district around West Luther, Ont., is shortly to be erected to replace one recently destroyed by fire. The building is to be 50 x 60 ft. in dimensions, and will cost $2,700. It is stated this price compares favorably with the cost of a frame barn at present prices for lumber and shingles. The building is being erected on the farm of Joseph Seymour and will be put together complete by six men in twelve days. This shows a trend in farm buildings in which the hardware man will be interested, as many already handle metal shingles and siding.

Du Pont Company Acquires Varnish Plant

Powder Concern Has Acquired Flint Varnish and Color Works Both in Canada and United States—Du Pont Company Already in Mixed Paint Business in United States

THERE is a strong probability that the E. I. Dupont de Nemours Company of Wilmington, Del.,will soon be an active factor in the mixed paint business in Canada. While no definite announcement has been made to this effect the intimation is made that certain developments can be anticipated as a result of the purchase of the Flint Varnish and Color Works, both in the United States and Canada.

The Du Pont Powder Company has recently completed the purchase of the Flint Varnish & Color Works, the head office of the company being located at Flint, Mich. The purchase of this company entails the transfer of the Canadian branch factory as well. The Canadian branch was incorporated in December, 1915, and building operations were started early in 1916 and plant was completed and ready for operations in December, 1916. The Canadian plant is located on Perth avenue, West Toronto. The company has been manufacturing carriage and automobile varnishes and various other lines of varnishes.

The Du Pont Powder Company is already a manufacturer of ready mixed paints in the United States through one of their subsidiary companies, the Harrison Bros. Company of Philadelphia and Chicago. The fact that the company has now acquired the Flint Varnish and Color Works with the Canadian branch presents an interesting trend in the varnish and paint business in Canada. While definite confirmation could not be secured by HARDWARE AND METAL that it was the intention of the company to start the manufacture of ready mixed paints at their Canadian plant, it was intimated that certain developments were contemplated in connection with the organization of the company. At present no announcement is being made by the company in this respect.

The business of the Flint Varnish and Color Works, it is understood, will be continued under the same firm name as heretofore, with the same officers. The Canadian manager of the company is W. T. Glidden, who is located at Toronto.

It is understood some of the prominent stockholders will retain their interest in the Flint Varnish & Color Works, among them being R. S. McLaughlin, president of the McLaughlin Motor Car Company of Oshawa, Ont. Some of the other stockholders are:

John N. Willys, president of Willys-Overland Co.; W. C. Durant, president of the General Motors and Chevrolet Motor companies; C. W. Nash, president of the Nash Motor Car Co., and W. W. Mountain, president of the Flint Varnish & Color Works. It is stated that they will retain a large portion of their stock, the rest being taken by the General Motors Co. and E. I. du Pont de Nemours & Co.

ENTHUSIASM OVER MONTREAL BICYCLE RUN

While the activity of the bicycle season has been in swing for some time the scheme of holding an annual "run" proved a great stimulant in Montreal. This brought out a great crowd, and several hundreds of enthusiasts entered the recent race. It is quite evident that cycling is already enjoying a return of old-time interest and popularity.

Under the direction of Fred St. Onge this year's run was one of the most successful ever held in Canada, and one of the best held at any time in America. In speaking with him, HARDWARE AND METAL was assured of the great popularity of these annual affairs and of the decided benefit that was traceable in connection with the better sale of bicycles here and at other points where runs had been conducted.

Of added interest this year was the entrance of several old veterans, and in the twenty mile distance covered they seemed to enjoy the return to their old-time pleasure of cycling. At the close of the meet, announcement was made of a probable patriotic meet later, and due announcement of this will be forthcoming. Montreal is the centre of much bicycle activity and there seems to be also a growing demand for ladies' wheels as reported.

LONG SERVICE BADGES GIVEN BY RUBBER COMPANY

As a token of appreciation for service, the Montreal office of the Canadian Consolidated Rubber Company awarded to many employees a few days ago a long service gold badge. This applied to those in the firm's service for twenty-five years and upward, and seventy-two employees were thus remembered. Six of the seventy-two are now pensioners of the company, and of these, Adolphe Groleau has been in the service of the Dominion Rubber system for fifty years. One of the long service employees is a son of Mr. Groleau, who has been with his firm for thirty-two years.

The presentation function took the form of a dinner which was presided over by President T. H. Rieder and attended by other officials of the Montreal office and some invited guests. In his address, President Rieder stated that it had been the company's endeavor to make the employees' surroundings and work the most pleasant possible. Their decision to suitably remember employees, particularly when they had completed twenty-five years of service, he felt was well deserved, and in connection with this they had concluded several months ago to institute the pension scheme.

Upon completion of that part of the function during which long service badges were presented to the many employees entitled to receive them, President Rieder was in turn made the recipient of an illuminated address conveying to him the appreciation of his staff for the consideration he had exercised toward them.

SPORTING GOODS BARRED OUT

(Continued from page 37)

heavy at present. Likewise stocks of sporting rifles and shotguns in jobbers' hands are not heavy, and the same holds true with the respect to pistols and revolvers. Canadian manufacturers of ammunition will practically have the field for their products.

In game bags and cartridge belts the order will not be felt as keenly as in some other lines, for these lines are already manufactured in this country. One of the commodities of the hardware stocks that will be hit rather heavily is the roller skates. Practically all of the supplies used in this country come from the United States and the order will cause a shortage in those lines unless the manufacture is undertaken in this country.

WEEKLY HALF HOLIDAYS IN CANADA

(Continued from page 34)

OAKVILLE,ONT.—All stores close Wednesday 1 o'clock, May, June, July, August and September. Open evenings except Wednesday.

HANOVER, ONT.—Half holiday not observed. Close evenings 7 o'clock except Saturday.

YOUNGSTOWN, ALTA.—Half holiday not observed. Close evenings except Saturday.

HARDWARE LETTER BOX

Manufacturers of Twine

J. L. Demers, Thetford Mines, Que.—Will you kindly give us the names of Canadian manufacturers of fine polish twines?

Consumers Cordage Co., Montreal; Doon Twines, Ltd., Kitchener, Ont.; Shurly & Derrett Co., Toronto, Ont.—Editor.

CATALOGUES and BOOKLETS

Booklet on Cream Separators

The Sharples Separator Company of West Chester, Pa., through their Canadian branch at Toronto is distributing to the Canadian trade a very attractive booklet called "Velvet for Dairymen." The booklet comprises sixteen pages and cover, and is printed on a fine quality paper in two colors, red and black. There are some fine illustrations and graphic sales talk embodied in the illustrations. One of the striking photos is that showing the actual number of pounds of butter lost in a year from one cow if a separator is not used. The main selling points are attractively set forth in the text of the booklet. The cover is striking in appearance in red, green and white.

Issues Complete Price List

The Merrick-Anderson Company, Limited, Winnipeg, Man., has just issued the June number of their "Jubilee Traveler," which gives the complete net price list of this concern's goods. The price list contains a number of illustrations although these are not quite as numerous as in the usual wholesale hardware catalogue. The "Traveler" is confined largely to giving prices. In the foreword to their customers the company states: "We do not advise our customers to buy heavily, but it would be prudent to keep stocks well assorted and to take deliveries of fall goods as early as jobbers are in a position to make shipment."

Trade Inquiries

202. **Handles, Brushware, Shovels, Wire Nails, Wire Fencing, Piping, Mining Material, Machinery Tools, Iron and Steel, Rock Drills, Wheelbarrows, Belting of Balata, Hose, etc.**—A Johannesburg firm with buying headquarters in London, England, requests that catalogues and price lists of the above articles and of other lines suitable for the mining trade be submitted to their London house.

203. **Motor Cars.**—A South African commission house with a full knowledge of the motor-car trade, now acting distributors for one American make, is prepared to take up the representation of Canadian-made automobiles, and request immediate correspondence from manufacturers.

204. **Farm Specialties.**—A South African commission house, accustomed to specializing in requirements for farm purposes, are prepared to consider agency offers from Canadian manufacturers.

205. **Building Board.**—A South African commission house, with offices in each of the principal centres, can place to advantage an agency proposition for large quantities of prepared building board, and asks for samples and other particulars immediately.

206. **Structural Steel.**—A Johannesburg house, specializing in iron and steel for structural purposes, seeks the representation of a Canadian firm.

209. **Carbon Electrodes.**—A Rhodesian manufacturer asks for quotations on carbon electrodes for the manufacture of carbide. Sizes required are 6-inch to 12-inch wide and 12-inch long.

211. **Bolts and Nuts, Wire Nails, Axes, Hatchets, Stoves, Steam Fittings, Barbed and Plain Wire, Wire Netting, Hardware, etc.**—A manufacturers' agent, with headquarters in Johannesburg and a permanent sample room in Durban, also covering all other sections in South Africa, is prepared to take up Canadian agencies for the above articles and kindred lines suitable to the hardware and iron and steel trade. Catalogues, price lists, and other details are requested in the first communication.

222. **Woodenware.**—A Pretoria firm of wholesale importers requests catalogues and prices, also samples when possible, of Canadian woodenware, handles and cart and carriage material, such as hubs, rims and wheels.

225. **Leather.**—A Pretoria firm of wholesale importers requests samples and prices on leather suitable for the boot and shoe and saddlery trade, also sole bends and sole squares.

Maritime Manufacturers Meet

W. S. Fisher, of Enterprise Foundry Company, Was Re-elected President of Eastern Association—Shortage of Railway Cars and Embargoes Were Up For Discussion

MATTERS of interest to all business men as well as those directly engaged in manufacturing were discussed at the annual meeting of the Maritime Provinces Branch of the Canadian Manufacturers' Association which was held in Moncton, N.B., on May 29. The subjects considered included such matters as the embargo on freight cars, vocational education, workmen's compensation, development of hydro-electric power and Maritime union.

W. S. Fisher, of Emerson & Fisher, Ltd., St. John, wholesale and retail hardware and proprietors of the Enterprise Foundry, presided as retiring chairman and was re-elected to that position for the coming year. Other officers chosen were as follows: Vice-chairman, E. E. Shaw, Sydney; L. W. Simms, St. John; C. C. Starr, Halifax; executive—S. E. Elkin, G. McAvity, St. John; C. D. Dennis, Amherst; A. D. Ganong, St. John; Angus McLean, Bathurst; W. F. Humphrey, Moncton; H. S. Crowell, Yarmouth; A. R. McPherson, Windsor; George Tilliam, Halifax; C. M. Crockett, New Glasgow; R. H. McKay, J. T. Cumming, New Glasgow; C. S. Cameron, Sydney; A. G. Robb, Amherst; W. D. Piercey, Halifax; J. A. Reid, Fredericton; C. S. Sutherland, Amherst; H. R. Thompson, Amherst; secretary ex-officio, George T. Douglas, Amherst; Archibald McCall, New Glasgow.

Addresses on workmen's compensation were given by F. J. G. Knowlton, of St. John, chairman of the New Brunswick Workmen's Compensation Commission, and F. W. Armstrong, of Halifax, a member of the Nova Scotia board. The association expressed its appreciation of the services of L. W. Simms, of St. John, and J. A. Reid, of Fredericton, in connection with the passage of the new compensation act by the New Brunswick legislature at the last session.

E. B. Saunders, of Chicago, field secretary of the National Safety Council, representing the Eastern branch of that organization, addressed the gathering on the subject of accidents and of means of preventing them, dwelling upon the importance of educating employees in this matter.

Hon. O. T. Daniels, attorney-general of Nova Scotia, presented arguments in support of the demand of the Maritime Provinces for federal subsidies for educational purposes as an offset to the land grants given the Western Provinces for this purpose. A resolution was adopted endorsing this proposal.

After a discussion of the delays caused by the shortage of railway cars and the effects of the embargo on the use of Canadian cars for shipments to the United States, the sentiments of the association were embodied in a resolution as follows:

Whereas, there is a very heavy movement of merchandise on our railroads, particularly on shipments to United States and,

Whereas, the railroads are unable to supply necessary equipment fo rmoving the business on American owned cars and,

Whereas, the railroads refuse to allow loading of Canadian-owned cars for the United States in spite of the fact that there is a surplus of these Canadian-owned cars at present on the railways and,

Whereas, the movement of empty Canadian-owned cars as practised at present from points where they can be loaded to points where they can secure loading for Canadian destinations, is not economical, and further tends to congest traffic:

Therefore, be it resolved that this convention request removal of restrictions refusing permission to load local Canadian-owned cars for United States points, and,

Further, be it resolved that we urge upon the railway authorities to take the necessary steps to arrange with the United States authorities for an exchange of cars so that all unnecessary movement of empty equipment be avoided.

Vocational training and its importance to the future development of the industrial and commercial life of the country was the subject of a thoughtful address by Fred. Magee, P.P.P., of Port Elgin, who was chairman of the New Brunswick committee on technical education and who introduced the modern legislation which was placed on the provincial statutes at the last session. The hearty approval of the meeting was expressed as follows:

Whereas the association is deeply interested in the subject of vocational training as advocated at the last convention of the association and again on the occasion of the most interesting and valuable address delivered by Mr. Magee, representative in the New Brunswick Legislature. Therefore, be it resolved that we re-affirm the resolution passed at the last meeting and urge that every effort be made to put into practical effect the wise and advanced legislative measures with this object in view passed at the last session of the Legislature of New Brunswick.

There was considerable discussion of ways and means of taking advantage of the new act and it was decided that committees should be appointed to confer with the school boards in the larger centres to urge them to make vocational training an integral part of their school system.

Water power development was the subject of an address by Dr. Archibald, of Acadia University, who spoke particularly of the power which might be generated by harnessing the tides at the head of the Bay of Fundy to supply the adjoining provinces. The association went on record with the following resolution:

Whereas, at the last convention of the association the question of utilizing the water power of the Maritime Provinces was discussed and considered, and it was resolved that legislative assembly of New Brunswick be requested to appoint a commission to survey and to assist in any way toward the development of the water powers of the province, and,

Whereas, we are pleased to learn that this step has been taken by the New Brunswick Government, and the matter has again been brought to the attention of the association in the address at this meeting by Prof. Archibald, of Acadia College, who described the possibilities of harnessing of the tides of the Bay of Fundy at Cape Split, which gives promise of development of tremendous electrical power and should it prove that such power can be transmitted economically its value can hardly be estimated;

Resolved, that the Legislatures of New Brunswick and Nova Scotia be urged to follow up actively these lines of provincial interest.

Hon. J. B. M. Baxter, M.P.P., of St. John, and H. J. Logan, of Amherst, spoke in support of the project of Maritime union, urging its adoption on the grounds that by combining their forces as one province the people of the Maritime Provinces would carry more weight in national councils than as members of three smaller bodies. The economy of administration, the unity of aim and the greater ease in systematic development of the provincial resources was also urged. The convention approved the proposal in an emphatically worded resolution and called upon all members to further the project.

FIRST PIG IRON PRODUCED ON WEST COAST

Advice from British Columbia during the week stated that the first pig iron to be produced in that province from an electric furnace was run off on Saturday, June 1. The company manufacturing the pig iron is the Aetna Iron & Steel Company, located at Port Moody, B.C. This pig iron is being manufactured from scrap cast iron. It is expected that the Province of British Columbia will be a great iron producing district in the not distant future as the raw materials in the shape of ore are available in large quantities and there is an abundance of water powers for electric smelting in addition to fine supplies of coal.

RUBBER SUBSTITUTES HAVE BEEN PROHIBITED

The War Trade Board of the United States recently restricted the amount of crude rubber that could be imported into that country and has now amplified that order to restrict four commodities possessing some of the characteristics of rubber. The commodities are capable of being used as substitutes for rubber and are as follows: gutta joolatong, gutter sisk, gutta percha and balata. Importations of gutta percha and balata will be restricted for the coming year to 650 tons of the former and 1,400 tons of the latter. The importations of the other two commodities will be prohibited entirely. This will affect the manufacture of articles into which these commodities enter, some of which are sold in Canada.

MANUFACTURERS MAY HAVE TO SUSPEND

As a result of the avowed intention of the United States Government that practically 100 per cent. of the iron and steel production of the country shall be turned into essential war work, some of the leading authorities in that country are of the opinion that before many months quite a number of the manufacturers will have to suspend operations. Steel makers anticipate the seriousness of this factor when they are again in a position to turn steel into the regular channels as they realize that their old trade may not be in a position to start in buying where they left off. The beginnings of readjustments along this line are already starting in the United States.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

STOCK FEED COOKER

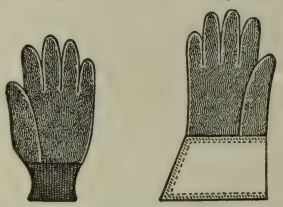
The Anthes Foundry, Limited, of Toronto and Winnipeg, has placed on the market through its Winnipeg branch a new feed cooker. It is stated the cooker consists of a high grade cast iron cauldron of uniform thickness and nicely finished, placed in a heavy sheet steel jacket which is reinforced at the bottom by a heavy band iron rim. The door and frame are of cast iron tightly fitted and bolted to the jacket. The door is fitted with a sliding damper, which when closed, it is claimed, makes the fire pot practically air tight, and in this way it will hold fire for an indefinite period. On the inside of the jacket just below the flue is placed a flame deflector, this is in the

Anthes Feed Cooker

form of a cast iron angle about 18 inches long securely bolted to the jacket; this causes the fire to pass around the kettle before entering the flue. Handles are cast on the kettle for the purpose of lifting it in or out of the jacket, and heavy wrought iron handles are riveted on to the sides of the jacket making it convenient to handle. Cast iron bases with legs and also coal grates are supplied with this cooker if desired. They are made in the following sizes 20-30-40-50-60-75 gallons, and are built to Imperial measure capacity, thus conforming with the new Government regulations.

WORKMEN'S GLOVES

R. R. Kinread, manufacturers' agents, Ryan Commercial Building, Winnipeg, is putting a new line of workmen's gloves on the market. A number of claims are made for this glove which it is asserted should interest the trade, viz.: they will not shrink when wet, the wearing surface will not peel off ,and they are absolutely waterproof. The manufacturer also claims that this glove will outwear a dozen pairs of the ordinary canvas



New Workmen's Gloves

gloves. He states that they should meet with a big demand from railway men, mechanics, and farmers. They are made in knit wrist, band top, and gauntlet styles.

LOCK FOR CHEVROLET CARS

Homer & Wilson, 1-5 Lancaster street, Hamilton, Ont., are the manufacturers of a new lock for Chevrolet cars which it is claimed is a most effective device to prevent the car from being stolen. The device is stated to be easy and very simple to operate and furthermore is very compact in size, being small enough to carry in the vest pocket. The company is prepared to furnish full details and give information as to cost to those unable to secure them from their dealer.

Lock for Chevrolet Cars

IMPROVED SPARK PLUG

Herz & Co., 245 W. 55th street, New York City, assert that two recent developments in the construction of their Herz spark plug are important features. The first and most important invention is named as the production of the oil-proof soot-burning mica core. Mica has been used heretofore as insulating material with indifferent success, because while mica itself is the ideal insulation when new and dry, it is asserted it deteriorates and breaks down electrically when subjected to the combined action of oil and heat. The problem has been to prevent the oil from eating its way between the layers of the mica. The lucky eyelet—the new patented Herz process of building mica cores—it is asserted solves this problem. A tube of Ruby mica 1-16 inch in thickness formes a wall around the centre electrode. Ruby mica washers are built up around this mica tube, and compressed under very high pressure. A stack of mica washers held between a copper eyelet is placed on the bottom of the core for a double purpose; first, the eyeleted washer stack, it is claimed, acts as a buffer against which the subsequent mica washers are placed and pressed; second, the copper eyelet acts as a heat accumulator which burns away the soot that would settle on the lower part of the core.

It is claimed these mica washers are so

Herz Spark Plug

tightly compressed under hydraulic pressure that the tightly wound mica core and the highly compressed mica washers become practically one solid mineralized mica unit, held absolutely rigid against the copper eyelet. It is asserted oil cannot possibly get between the layers.

The second important invention is asserted to be the oil guard. This guard is a copper insert in the spark plug shell which, it is claimed, through its peculiar shape prevents the oil, when splashing against the spark plug, from entering into the cavities of the plug.

MOVING PICTURE SLIDES

The Kasement Skrene Dore Co., 98 Kingswood Road, Toronto, is supplying the trade with an attractive series of motion picture slides featuring the Kasement Skrene Dore.

These slides have been finished up in attractive colors and not only show an illustration of the door, along with brief details regarding the features of the product, but also has space provided for the dealer's name and address. The company states that firms who are interested can secure these slides by applying direct to the company.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

THE hardware trade has been hit very seriously by the restrictions placed on importations of sporting goods from the United States. This includes guns, rifles, ammunition, skates of all kinds, and other lines which bulk largely in fall sales. Whether orders already placed for these goods will be permitted to come through is not yet known, and until a complete interpretation of the Order-in-Council is available the trade is rather upset and can express no convictions on probable effects.

It is estimated that practically all the steel plate and 10 and 12-gauge blacks sheets for warehousing purposes has been received, and a firmer tendency has developed as a result. Plate is up $1, and the two gauges of sheets mentioned 50c per 100 pounds in some quarters, and it is thought the present scale of prices will be maintained for some little time.

Adjustments in prices on iron and steel in the United States are thought possible when advanced freight rate of 25 per cent. becomes effective on June 25. This must be considered in conjunction with the recent 15 per cent. advance and a wage increase in April. It must also be remembered that one ton of finished steel means the moving of practically five tons of raw materials, so steel would likely undergo a bigger average increase than iron.

The weakness of the flax seed market, which has resulted in substantial declines during the past week or ten days has brought about a revision downward in linseed oil of 5c per gallon. Supplies are none too plentiful, though an improvement in the moving of seed to the crushers is resulting beneficially in this respect.

Turpentine is becoming increasingly scarce, and the question of securing further supplies has not been improved any by the bringing of the sub. campaign to American waters. A large percentage of turpentine was formerly handled by the coastwise ships, but little can be expected until this menace is well in hand. Prices have advanced 2c per gallon during the week.

Many important price changes have taken place during the week, carpenters' tools going to higher levels, the lines affected including planes, braces, automatic and ratchet screwdrivers, hand and breast drills, expansive bits, etc. Saddlery hardware, including bridle bits, snaps, harness rings, clevises and clips and rings are also represented in list of advances. Other lines to reach higher levels are glass cutters, wrenches, blacksmiths' tongs and hand tools and wire rope clips.

MONTREAL MARKETS

MONTREAL, June 6..—The announcement from Ottawa regarding the prohibited import articles has been somewhat of a surprise to the jobbing trade, but they accept the ruling as one of those considered necessary at this time. Price changes have been made on various lines of auto accessories this week and on lamp and lantern burners, rosin, indurated fibreware and cutlery prices are higher. There also have been new advanced quotations on Meyers polishes, jute twines and lumbering tools. The tendencies on many lines are very firm. Steel sheets are a little higher and will probably be further revised. Little pig tin is to be had, and the price is ruling around $1.35 for Chinese. Lead is firm also, and iron pipe and roofings are scarce and may go to higher levels. Jenkins valves are higher, and a new list is being prepared. It is expected that further advances on various items of shelf hardware will be made in the immediate future. Trading conditions are satisfactory from the country in particular.

Rosin Higher; Glue Down; Lumbering Tools Up

Montreal.

ROSIN, GLUE, LUMBERING TOOLS —Advances are made in the price of rosin, full barrels formerly listed at $4.25 are now $4.40, and smaller lots are selling at $5.50 per 100 pounds. Glue prices are revised also; this is a decline of 3c per pound, white No. 2 now selling at 33c; G. S. S. 26½; Gold Medal 33c, and broken 24c per pound. Lumbering tools are higher, the old quotation of net list being advanced by the addition of an extra 5 per cent.

Pocket Knives Higher; Indurated Ware Also

Montreal.

CUTLERY, FIBREWARE.—There has been much difficulty in maintaining cutlery stocks and much substitution has had to be resorted to from time to time. This week an advance of approximately 25 per cent. is made in the price of Rodgers' cutlery, the lines affected being pocket and penknives, pruning knives and razors. Eddy's indurated fibreware tubs and pails have been revised also, this amounting to an advance of 8 per cent.

Polishes, Twine up; Valve Prices Withdrawn

Montreal.

POLISHES, TWINES, VALVES. — Presaging an advance of price, the quotations on Jenkins' valves are withdrawn and new lists will be available within the next few days. In the meantime prices will only be quoted on application. Jute twine is higher by three cents a pound, the price in cones now being 50c per pound. Owing to the extra cost of containers, etc., a ten per cent. advance is made in Meyer's polishes.

Lamp Burners Advance; Scales and Egg Crates

Montreal.

LAMP BURNERS, SCALES.—A very material advance is recorded this week

for lamp and lantern burners, and this is no less than 25 per cent. B lamp-burners are now quoted at $1.90 per dozen; No. 1 lantern at $1.25, and No. 2 at $2.05. Following the recent changes on one or two lines of scales further re-adjustment of prices is being arranged and the lists will be available in the immediate future. Humpty Dumpty egg crates show an advance from $4.20 to $4.50 per dozen.

Spot Lights Higher; also Curtain Lights

Montreal.

SPOT AND CURTAIN LIGHTS.—Advances this week are shown in spot lights. This applies to "Millenium" make and in lots of 24 the new price is $6.47 against the old, $4.85; lots of 6 are $7.04 against the old price of $5.27, and smaller or single lights are now $7.50, and were $5.63 before. These prices are for the number 30036. The comparative prices for No. 30037 are: New, $5.75 in 24 lots; old, $4.25; lots 6, $6.25 from $4.62, and single lights $6.67 from $4.93. Rear curtain lights are now 60c in 24 lots, the old price being 43c; lots 6, 66c, against 47c, and single lots 70c against 50c. The discount is 33/1-3 per cent. to the trade.

Clamps and Holders up; Tire Levers Higher

Montreal.

LICENSE CLAMPS, TIRE LEVERS.—Clamps for attaching license numbers both of the rod and spring clip varieties are higher. The comparative prices are 20c against 15½c for lots of 48; 22c against 17c for lots of 12, and 25c against 23½c for small quantities. This is for the rod style. The spring clip style are advanced from 11½c to 20c in 48 quantity lots; 12½c to 22c, and 13½c to 23½c. Tire levers have taken on various advances ranging from about 30 to 60 per cent. The usual 33/1-3 per cent. discount applies.

Bumpers are Lower; Hydrometers Advance

Montreal.

AUTO ACCESSORIES—A considerable decline is registered in the price of Lyon resilient bumpers No. 102. For quantity lots of 24 the old price was $14.95, and this is reduced to $11.30. Lots of six sold formerly at $16.06 each and are now $12.18, while single lot comparative prices are $17.21 and $13.05. A special discount applies. Breaknot hydrometer syringes are up about 10 per cent.

Fuel Oil Active; Coal Oil, Gasoline Steady

Montreal.

GASOLINE AND OILS.—The free movement of gasoline continues and a very great quantity is used in this district. Quite the same might be said of coal oil, which is called upon by many now for use in oil-burning stoves, etc. Prices are unchanged with motor gasoline price at 34c and Royalite coal oil at 19c. Electroline and Palacine coal oil prices are unchanged at 22c. A very active demand exists here for fuel oil which is coming into greater use than ever in the Province of Quebec. Many farmers are now making greater use of power machinery so extensively used in Ontario and throughout the West.

Firm Market for Wares and Stoves

Montreal.

STOVES AND WARES.—The position of the markets as affecting stoves and general stamped ware and pieced goods continues to rule with a steady but firm undertone. Retinned wares especially are very firm, and so long as tin holds its present position this will be the case. Stove sales are still fairly good even at the high prices which have to be asked. Repeat business to a certain extent is coming forward for oil stoves and these are as popular with many as ever. No changes are recorded for the week.

FAIR OUTLOOK FOR STOVES AND RANGES

In an interview with J. M. Gunn, superintendent of the foundry, McClary Mfg. Co., London, Ont., HARDWARE AND METAL was informed that prospects for a very fair production of stoves and ranges seemed quite bright. "The greatest difficulty we have to contend with at present," stated Mr. Gunn, "is the question of labor. We have lost heavily in the matter of man-power and it is in this respect that we are suffering most at present. We have been fortunate in securing very good supplies of raw materials and we look forward to about normal production with a number of our lines. However, we have cut down the number of lines we are manufacturing, only the very best sellers and sizes being produced to-day. We are rather doubtful as to whether we will be able to take care of the demand—in fact, I may say that I hardly think we will. Prospects for a heavy trade are bright."

Cotton Rope is High; all Others Firm

Montreal.

ROPE AND CORDAGE.—The markets are decidedly firm. Especially is this the case with regard to cotton rope of all kinds which are changing frequently. The output of binder twine supplies has been quite considerable although this has slackened of late. All sisal and manila products still are firm and all indications would suggest a revision of prices upward. Pure manila base price still remains at 39c per pound; British manila at 33c and sisal at 27½ per pound.

Firmness the Feature in Bar Iron and Steel

Montreal.

IRON AND STEEL.—The markets are very firm but no price changes have been made. Up to this time it has been possible to secure the wants of the trade and from the country fair business comes. It would not be surprising to see some revision to higher levels at any time for the surplus available is not great after the continued large requirements are met for war purposes.

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80

Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Orders for Nails and Wire are Fair

Montreal.

WIRE AND NAILS.—Fairly good orders are received still for nails and for various kinds of wire. The country trade has the advantage of being situated where money is freer and consequently certain building and repairs may be proceeded with to a greater extent. No changes are announced though the position is a firm one, cut nails selling at a base of $5.60; wire nails at $5.35, and for smooth steel wire the base price of $6.25 per 100 pounds still rules.

Sheets are Firmer; Some Supplies Received

Montreal.

SHEETS AND PLATES.—The receipts of sheets have been better in one respect. Supplies which had been due here many weeks ago have only begun to arrive, the transportation having been such until now as to have held these back. When these are absorbed the story will be different say the importers, and sheets will be much harder to obtain. Trade needs for different gauges are supplied fairly well just now, but these requirements are naturally not very great. Black sheets are somewhat firmer sizes from 14-gauge and lighter being advanced 25c per 100 pounds.

BLACK SHEETS—		**100 lbs**
10 gauge	$9 50	$9 00
12 gauge	9 25	9 65
14 gauge	7 25	9 00

16 ga.		8 70

Solder up Again; Lead Products Firm

Montreal.

LEAD PRODUCTS.—There is some activity for various commodities in the manufactured lead list, and for the most part all items are firm and likely to rule, in some cases, higher. For the week, interest centres again in solder, and all grades are advanced. Strictly is now quoted at 60c per pound, and advances are also made for the lower grades and

for wire solder. Traps, bends, lead wool, etc., are firm in sympathy with the position of pig lead.

Lead pipe, lb.	....	0 14
Lead waste pipe, lb.	....	0 15

Munition Orders May Improve old Metal List

Montreal.

OLD MATERIALS.—There is very little change to report in the position on old material. The supply of various products varies from time to time, but there is not any great demand excepting for old heavy copper and heavy cast iron. These are on an unchanged basis. Dealers state that the receipt of munition orders here would result in more activity for copper and iron scrap, and this would also have a firming effect for these. The spelter products might be considered as a little more active than usual.

Tea lead	$ 0 05	$0 06½

Bicycle tires	0 04¼	....

Tin Quoted at $1.35; Lead also Firmer

Montreal.

INGOT METALS.—The week has been interesting in that ingot tin has continued its upward trend notwithstanding the easier tendencies outside. This is explained from the fact that spot spocks are very short, and in fact there seems to be little but Chinese and a very small amount of this. The position of other ingots is generally firm, lead being higher and copper firm. Some trading is being done in most commodities.

COPPER.—With very little, if any copper available excepting from the Canadian producers, trading is done on limited stocks. There is some demand and jobbers state that there is the probability of an advance in the near future being decided upon.

TIN.—New York and London have recorded declines of several points during the past week. Notwithstanding this the local situation is a very firm one, and what tin is to be had is being sold at around $1.35 per pound. There is little indication of any improvement from the present outlook.

SPELTER.—There is not a great deal of spelter available. From reports gathered this will not be available in any too large lots for some time and prices are held with a firm undertone at 10c per pound.

LEAD.—Tendencies in the pig lead market are very firm. A 25c advance was made to-day in the trust price, and locally there is a firmness although trading operations are not very active. Ten cents per pound is being asked.

ANTIMONY.—In sympathy with freight rates about to be imposed on an advanced scale, and in view of the abolition of the commodity freight rate, antimony is very firm and 16c to 17c is asked this week.

ALUMINUM. — Little interest and confined trading. Price held still at 50c per pound.

TORONTO MARKETS

TORONTO, June 6—Several important changes have taken place during the week among which will be noted a substantial advance in Rodgers' pocket cutlery. This follows in the wake of an advance on other of their lines such as butcher knives, carvers, etc. Other items affected are bit braces, expansive bits, scales, wrenches, sash weights and carpenters' tools such as hand drills, coping saws, chucks, etc. Fibre ware is another line to reach higher levels during the week and a revision upward in black steel plate has been made.

Business generally is reported very good, automobile accessories moving forward freely along with some repeat orders on screen doors, windows and wire cloth. A little more interest is manifest also in building materials.

SCARCITY OF IRON PIPE

In speaking this week with a large jobber, HARDWARE AND METAL was informed that the difficulty of maintaining stocks of iron pipe is becoming more acute from week to week. In fact it is expected that there will be some real difficulty in procuring needed supplies **of certain sizes and that the scarcity will probably be greater before there is an improvement. The market is firm but without change. In view of the scarcity prices may go to higher levels though an immediate change is not anticipated.**

17½ Per Cent. Advance Made in Pocket Cutlery

Toronto.

POCKET CUTLERY.—A heavy advance, approximating 17½ per cent. has been made in Joseph Rodgers & Sons' pocket cutlery during the week. This follows revised prices recently issued on butcher knives, carvers, etc., and shows the tendency of the steel markets in the Old Country. Quotations on some of the more familiar numbers are given herewith:

Pen Knives. — A16000, $15.40 doz.; A17749, $12.75; A17749-I, $12.75; A17751, $26.40; A23167-P, $35.20; A25967-I, $23.75.

Pocket Knives.—A32341, 3 in., $7.50 doz.; 3¼ in., $7.95; 3½ in., $8.80; A32342, 3½ in., $8.80; 3¾ in., $9.25; A32345, 3 in., $10.55; 3¼ in., $11.90; 3½ in., $13.20.

Cattle Knives.—A18322, $10.55 doz.

Pruning Knives.—A18358, $24.65 doz.; A32306-4, $12.75.

Erasers.—A18149, $10.55 doz.

Snaps, Harness Rings, Bridle Bits Higher

Toronto.

SNAPS, RINGS, BITS.—New prices representing advances have been named on snaps, harness rings and bridle bits during the week. Square eye snaps are now being quoted as follows: ⅞-in., $4.50; 1-in., $4.50; 1¼-in., $7.65; 1½-in., $8.50; 1¾-in., $9.40; 2-in., $10.60 per gross. Figures named on black harness rings for ¾-in. are 80c; for 1-in., $1.15 and for 1½-in.,$2.20 gross. Two of the familiar bridle bits are also quoted to provide a basis for the advance throughout the line. No. 37 is selling at $1.38 and No. 47 at $1.50 per dozen.

Wrenches Record Substantial Gains

Toronto.

WRENCHES.—Substantial gains have been made in new prices named on a couple of lines of wrenches during the week. The Bull Dog are now being offered at the following figures: No. 1, $1.55; No. 2, $6.20-$6.30; No. 3, $14.15-$14.40; No. 4, $21.50-$21.75 per dozen, and the Twin at $8.40 per dozen. A revision upward is shown in quotations herewith on Crescent wrenches, the 4-in. and 6-in. selling at $10.90; the 8-in. at $13.40 and 10-in. at $16.75 per dozen.

Horse Cards Up; Clevises Also Higher

Toronto.

HORSE CARDS, CLEVISES.—Revised prices have been made on horse cards, the No. .04 selling at $2.25 per dozen and the No. 4 at $2.85 per dozen. Clevises are also in the advancing class, Nos. 395, 430 and 555 now selling at 15½c per pound and the No. 2808A at 19c per pound. Clips and rings represent another line to move upward. The No. 3520D are quoted at 16¾c and No. 3520B at 20c per pound.

Fibre Pails and Tubs Make Advance

Toronto.

FIBRE TUBS AND PAILS.—The advance provided for in prices given below on fibre pails and tubs amounts to approximately 8 per cent. over former figures. Quotations now being made to the trade are on this basis: Pails, $5.00 dozen; tubs, No. 0, $22.70; No. 1, $19.40; No. 2, $16.25; No. 3, $13.75 per dozen.

Sash Weights Up; Blacksmiths' Tongs Also

Toronto.

SASH WEIGHTS, BLACKSMITHS' TONGS.—A 20 per cent. advance in solid

sash weights is provided for in new quotations named during the week of $3.60 per 100 pounds. Sectional have also recorded a good increase in new prices of $5.15 per 100 pounds. Blacksmiths' tongs show a very big increase over previous quotations of about 25 per cent. Blacksmiths' hand tools, comprising such lines as hardies, flatters, cold and hot chisels, take a new price of 45c per pound.

Bit Braces, Planes, Other Lines All Up

Toronto.

BRACES, PLANES, ETC.—A ten per cent. advance has been made in P. S. & W. bit braces which reveals net prices for some of the more popular sellers as follows: No. 5006, $46.30; No. 7010, $49.15; No. 8010, $59.75 per dozen. Another revision upward in the Stanley line has been made, gauges, levels, braces and planes being affected. New prices on half a dozen planes are given herewith: No. 110, 74c; No. 120, $1.07; No. 3, $2.85; No. 4, $3.15; No. 5, $3.60; No. 5½, $4.05 each.

Wire Rope Clips Go To Higher Levels

Toronto.

WIRE ROPE CLIPS, COBBLERS' SETS.—A change affecting prices on wire rope clips has been made and the present scale of figures for these is given as follows: ¼-in., $7.65; 5/16-in., $8.50; ⅜-in., $9.55; ½-in., $12.35; ⅝-in., $15.25; ¾-in., $19.05; ⅞-in., $24.70; 1-in., $30.40 per 100. Advice of an advance of from 10 to 15 per cent. in cobblers' sets was contained in these columns last week, but net prices were not available at that time. Two of the bigger sellers with present quotations are: Economy, $10.25; Home, No. 1, $21.00 dozen sets.

New Prices on Expansive Bits, Padlocks, Globes

Toronto.

EXPANSION BITS, PADLOCKS, LANTERN GLOBES.—Quotations have been revised on these three lines and the tendency has been upward in each instance. No. 5 expansive bits now sell at $14.85 and No. 10 at $21.50 per dozen. Corbin padlocks recorded an advance of 10 per cent. on practically the entire line. The selling price adopted on cards No. B2 of $4.90 and on SD of $2.60 each reveal the general trend of quotations. Ruby lantern globes at $4.35 dozen register a substantial increase. Glass cutters No. 024 are higher at $1.20 dozen.

Carpenters' Tools Reach High Levels

Toronto.

CARPENTERS' TOOLS.— Revised prices have been issued on many lines of carpenters' tools. The Miller's Falls line is up about 10 per cent., their hand drill No. 1 now selling at $2.90 and coping saw No. 42 at $20.00 per dozen; Star chucks are in the upward movement, No. 15 selling at $2.10, No. 16 at $3.00 and No. 17 at $3.90 each. Quotations on Yankee tools have also been sent to higher levels as will be noted from figures given on a few of these goods: Auto drill No. 41, $26.80; screw driver No. 30, $28.10; No. 130, $32.20; No. 15 x 2-in., $6.35; 3-in., $6.90; 4-in., $7.45 per dozen; breast drills No. 1540, $6.40; No. 1550, $7.45, and No. 555, $8.75 each.

Stoves and Ranges in Fair Demand; Enamelware

Toronto.

STOVES, ENAMELWARE.—A very fair demand is being felt for stoves and ranges though this is not reaching large proportions as yet. From all sources reports as to the movement of summer lines indicate a good movement and ready sale from the retailers' floor.

Tinware and enamelware are unchanged during the week, the market holding firm with prospects for the future containing no little element of uncertainty. Business is good and orders are going forward as freely as stocks will permit.

THE NEW FREIGHT RATES AND STEEL

The 25 per cent. increase in freight rates in the United States, effective June 25, will undoubtedly have considerable effect on steel and iron coming to Canada from United States points. Already some speculation exists as to just what the effect on pig and steel may be. It is apparent that new rates will affect steel more heavily than iron. In a ton of finished steel it is required to move almost five tons of new material to the furnaces, while in the case of pig the amount of basic ingredients is not nearly so great.

This recent advance must be considered in conjunction with the recent 15 per cent. advance in addition to a wage increase put through in April. It will then be seen that when the quarterly adjustment of iron and steel prices scheduled about the end of June is brought up, that these increases must exert an influence. It is estimated that by the new tariffs pig iron costs will be elevated from $1.00 to $1.50 according to location of producer.

Hard to Move Oils and Gasoline

Toronto.

OILS, GASOLINE.—Great difficulty in getting railways to handle tank cars is reported by one large oil dealer, with the result that at from 40 to 45 points, a distinct shortage of gasoline has developed and oil is little better. There is no scarcity at distributing centres and the situation hinges on the transportation companies, who, working shorthanded, can only give an indifferent service. A very heavy demand for gasoline is apparent and the same is true of lubricating oil. Imported oils are coming through rather irregularly, it is stated, but hopes are expressed that orders on hand will be taken care of shortly. Coal oil is enjoying an almost phenomenal sale for this season of the year which indicates its greater use as fuel during the period of hot weather now developing. Gasoline price is unchanged at 33c gallon and Royalite coal oil at 18c and Palacine at 21c per gallon show no revision for the week.

Revision in Nails Yet to Come; Wire

Toronto.

NAILS, WIRE.—The revision in wire nails freely hinted at last week has failed to materialize as yet, though it is maintained that this is almost sure to come at any time. The situation remains very firm with quotations unchanged at $5.20 base per 100 pounds for the wire, with cut nails steady at $5.65 base per 100 pounds. Sales are reported fair, though the movement is by no means heavy.

The position of smooth steel wire holds firm and unchanged during the week with little movement reported. Prices hold at a base of $6.25 per 100 pounds.

Some Heavy Bars Reach Local Market

Toronto.

IRON AND STEEL.—An announcement in some quarters is to the effect that some very good shipments of heavy bars have been received and stocks generally are in very fair shape. Some movement to outside points is reported and each day brings its quota of orders to the jobbers for these lines. Prices are unchanged with the market firm.

Corrugated Sheets Hold; Eavetrough Moving

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—There is no change to report in the situation on corrugated sheets for the week. Manufacturers indicate that some difficulty is apparent in getting supplies but present stocks are equal to present demands. Quotations below are being held steadily.

Some improvement in the demand on eavetrough and conductor pipe is reported. This would indicate that some building is being done and repair work undertaken. The volume of trading is not great as yet. Prices hold firm and unchanged at figures shown in current market quotations.

Plate Advances $1.00; Demand for Sheets Good

Toronto.

SHEETS, PLATES.—Plates and 10 and 12-gauge black sheets have undergone revision upward during the week, the advance on plates amounting to $1.00 per 100 pounds and on sheets 50c per 100 pounds. Some supplies have been coming through but little more for warehousing purposes is expected. Shipments of galvanized and black sheets have been coming along in quite liberal quantities which would indicate that existing contracts are being taken care of. Stocks on hand locally are considered very good and the demand quite satisfactory. Prevailing quotations follow:

BLACK SHEETS—		Per 100 lbs.	
10 gauge	....	10 00	$12 00

Wrot. Iron Pipe Holds; Boiler Tube Situation Acute

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—The position of wrought iron pipe shows little change during the week, prices holding firm and unchanged with the question of supplies increasingly difficult. Whereas present demands are being taken care of largely, supplies of raw materials are not coming through and if this condition continues, the situation as regards stocks can be easily determined. Prices appear in current market quotations.

The situation in boiler tubes is termed acute. Very limited supplies are getting through and the outlook for an improvement in this respect is not encouraging. Warehouses are practically bare of 2-inch, it is intimated, and there are many instances it is said where tubes are required to make necessary repairs but supplies are not forthcoming. Prices are holding at figures herewith:

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00

3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

No Change in Solder Or Lead Products

Toronto.

LEAD AND ZINC PRODUCTS.—There has been no further revision made in prices on solder, during the week. Supplies in some quarters are considered ample for present requirements. The tin market remains unchanged with supplies becoming increasingly scarce and any sales made being at high levels.

The lead market shows increased strength, but this has not been reflected in any advance on the manufactured article, for which the demand continues light. Quotations on all above products follow:

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼

Zinc sheets, per lb.	....	0 26

Cordage Trading Light; Twine Moving

Toronto.

CORDAGE, TWINE.—There is little activity as regards movement of cordage stocks and prices have held firm and unchanged on the following basis: pure manila, 39c per pound; British manila, 33c per pound; sisal, 27½c per pound.

A very good movement of binder twine is reported, booked orders being filled and dealers showing a willingness to order in liberal quantities. The basis of 23½c per pound, 500-foot length, is unchanged.

Leather Belting Holds Very Steady

Toronto.

LEATHER BELTING.—Prices on leather belting which have remained steady for some time past are unchanged though a decided element of firmness is reported as applying to the market. No advice, however, of any price revisions has been made though an advance would not be entirely unexpected. Conditions to-day, it is said, look very much like higher price levels for this commodity.

Position of Waste and Oakum Same

Toronto.

WASTE, OAKUM.—There are no new developments in the position of either waste or oakum from all accounts. A very good volume of orders for waste is going forward and prices are unchanged. Oakum is not moving quite so freely. Quotations on both lines appear in current market quotations.

No New Developments in Old Materials

Toronto.

OLD MATERIALS.—New developments are still awaited in these markets and the time when these may be expected seems as far away now as it did some weeks ago. There is very little trading going on just now, but prices have been firmly held at unchanged figures. Business generally is at a standstill.

Tin Strong with Weaker Tendency; Lead up

Toronto.

INGOT METALS.—Tin is undoubtedly very strong, but the declines at primary points provide for an easier undertone; supplies are becoming increasingly scarce. A somewhat firmer tone has developed in respect to lead and price is up ¼c though little improvement in the demand is to be noted. Copper is unchanged, a good demand on producers being made but almost entirely for government work.

COPPER.—No particular item of interest has marked this market during the week. From producing centres come advices of a very good demand but further investigation reveals this to be on government account, direct or indirect, commercial transactions being small. Price locally is unchanged at 29-30c per pound.

TIN.—Nominally quotations are said to range about $1.07-$1.10, but no sales are being effected on this basis. Tin is not being offered at less than $1.25 and quotations run up from there. This metal grows increasingly scarce, arrivals being practically nil. Primary points show decided declines with little apparent buyer interest.

SPELTER.—The situation is unchanged, prices locally holding firm around 9c per pound and very little movement reported. Reports from the United States intimate that buying on government account has been quite liberal, but figures are not divulged.

LEAD.—An advance of ¼c, bringing prices locally to 9½-9¾c per pound featured this market during the week. The demand for commercial uses is very light, with supplies apparently ample for other requirements. Primary points quote this metal firm.

ALUMINUM.—In the United States a new base price of 33c per pound f.o.b. producing points for 50 tons and over for ingots of 98 to 99 per cent. has been established by the War Industries Board, effective June 1. This has not influenced the local market which holds around 50c.

ANTIMONY.—Quiet reigns supreme locally, quotations remaining unchanged around 16c per pound with a light demand in evidence.

PIG IRON.—In spite of high prices the demand continues heavy and supplies are by no means equal to calls being made. Some difficulty supplying shops working on war orders is being experienced and scrap material which might relieve the situation to some extent is not forthcoming in quantities sufficient to help very much.

LONDON MARKETS

LONDON, June 6.—Prices continue firm with the exception of linseed oil which is down five cents per gallon.

Business continues good. All summer lines are in good demand. Garden cultivators, screen doors, screen windows, refrigerators, Paris green and oil stoves are the leading sellers at present.

There is a shortage on some lines although stocks are in pretty good shape.

Collections are exceptionally good at present.

Food Choppers, Bread Mixers Make Advance

London.

FOOD CHOPPERS, BREAD MIXERS. — New prices have been named on food choppers which represent advances over previous quotations. The high price of pig tin with which these are retinned is considered a probable reason along with continually mounting producing costs. The Universal are now being quoted for No. 0—18.00; No. 1—21.50; No. 2—27.00; No. 3—35.00.

Tin plate being high and scarce may be considered a factor in the advance on bread mixers the Universal selling as follows to-day; 4 loaf, 33.00 doz.; 8 loaf, 37.50 doz.

Oil Stoves Moving out Freely; Alarm Clocks, too

London.

OIL STOVES, ALARM CLOCKS.—The demand for oil stoves continues to represent a very healthy volume of business and quotations given herewith on the New Perfection hold firm though unchanged. 2 burner, 12.75 each; 3 burner, 16.50 each; 4 burner, 21.00 each. Wicks for above 2.50 doz. Ovens: Perfection No. 21 G 4.00 each; No. 22 G, 5.00 each; No. 42 G, 5.00 each. McClary, No. 70, 4.25.

Alarm clocks are another line which are enjoying a heavy sale just now. Prices on some of the familiar lines are given—they are unchanged: Good Morning, 1.15 each; Lookout, 1.50 each; Sleep Meter, 1.65; Lark, 1.80 each; Big Ben, 2.92 each; Baby Ben, 2.92.

Potts' Irons Higher; Garden Hose Selling

London.

POTTS' IRONS, GARDEN HOSE.—A further advance in prices applying to Mrs. Potts' sad irons has been made which brings quotations on these to a decidedly high level. Present quotations are: No. 50 nickel plated, 2.20 per set; No. 55 polished, 2.10 per set.

Rubber garden hose is selling at present, the volume of business being considered fairly satisfactory. Quotations have held firm and unchanged on the following basis for some time past:

Corrugated—½ in., 15¾c; ⅝ in., 18¾c; ¾ in., 21½c; 1 in., 31½c per foot, less 5 per cent. in full rolls of 500 ft.

No. 33, 3 ply x ½ in., 9c; ⅝ in., 10¾c; ¾ in., 12½c per ft. No. 44, 4 ply x ½ in., 11c; ⅝ in., 12¾c; ¾ in., 14½c per ft. No. 55, 5 ply x ½ in., 13c; ⅝ in., 15c; ¾ in., 17c per ft.

Wrenches and Files Take New Discount

London.

WRENCHES, FILES.—Agricultural wrenches are again on the upward trend as will be noted in new discount named of 37½ per cent. for this line. The new net prices figured on the basis of this discount are: 6in., 6.25 doz.; 8in., 7.50 doz.; 10in., 8.75 doz.; 12 in., 11.25 doz; 15in, 15.00 doz.

A revision in the discount on files has been made, Black Diamond and Nicholson showing an advance in the new discount of 32½ per cent. now prevailing. This covers the entire range in each make, mill and flat bastard, tapers, rounds, squares, warding, etc.

Paris Green, Arsenate of Lime Moving Freely

London.

PARIS GREEN, ARSENATE OF LIME.—A splendid movement of Paris Green is noticeable during the past few days and arsenate of lime used for spraying potatoes is also going forward in very good quantities. Prices on these two lines have shown no change as will be noted in the following figures: Paris Green, C. P. Co. make, ½ lb. pkgs., 66½ cents lb.; 1 lb. pkgs., 64½ cents lb.; 25 lb. drums, 62½ cents lb.; 50 lb. drums, 61½ cents lb.; 100 lb. drums, 61½ cents lb. Arsenate of Lime —½lb. pkgs., 1.75 doz.; 1 lb. pkgs., 3.00 doz

Good Sale Grass Shears; Electric Fans Sell

London.

GRASS SHEARS, ELECTRIC FANS.—The sale of garden shears continues in good volume and prices have held unchanged at the following figures: Ladies' No. 107 x 2 in., $1.65; plain, No. 100 x 8 in., $1.30; notched, No. 101 x 8 in., $1.50; plain, No. 100 x 9 in., $1.60; notched, No. 101 x 9 in., $1.80 each.

With advent of warm weather electrical supplies are also moving with a little more freedom. This is shown in sales of electric irons, grills, fans, and washing machines. There has been no change in prices recorded as will be seen in quotations on a couple of items given herewith: Polar Cub electric fan, 6 in., $6.25 each; in lots of 12, $5.95 each; Connor's Perfection electric washing machines, 25 cycle, 110 volt, $65.10 each.

Nails Hold Firm; Rope Unchanged

London.

NAILS, ROPE.—The situation on nails shows no change during the week, prices holding firm and the demand only fair. The basis of quotations for the wire nails is $5.20 per 100 pounds, and for the cut nails $5.60 per 100 pounds. Rope is moving rather slowly, and no change in the situation has developed in any direction. The present range of quotations is for pure manila, 39c base per pound; British manila, 33c base per pound; New Zealand hemp, 33c base per pound; sisal, 27½c base per pound.

Linseed Oil Declines; Turpentine Advances

London.

LINSEED OIL, TURPENTINE.—The continued decline in the price of seed has been reflected in quotations on linseed oil and prices are down 5c per gallon to $1.90 for raw and $1.93 for boiled. A very good sale is reported and supplies show some improvement. The present range of quotations is given herewith: 1 to 2 bbls, raw, $1.90; boiled, $1.93 per gal.; 3 to 5 bbls., raw, $1.89; boiled, $1.92 per gal.; 6 to 9 bbls., raw, $1.87; boiled, $1.90 per gal. Less barrels add 10c per gal. A distinct shortage of turpentine exists and reports from distributing points to the south are not encouraging as far as the question of securing further supplies is concerned. An advance of 2c per gallon has occurred, 1 bbl. lots being now quoted at 80c per Imperial gallon and 5-gallon lots 90c.

WINNIPEG MARKETS

WINNIPEG, June 6—Price changes for the week are again on the upward trend, the following lines being affected: bread makers, blacksmiths' hand tools, Model food choppers, agricultural wrenches, brush hooks, grass shears, rope halters, Elgin wrenches, floor wax, wrecking bars, riveting machines, pipe vises, black sheets and oil stove ovens.

Winnipeg business, which for the past two weeks has been tied up due to the strike of the freight handlers, is again in full swing, the strike being settled last Wednesday. Delays, however, are to be expected for a few days owing to the large accumulation of freight, but railway companies are doing everything possible to relieve the congestion and get goods moving to destination.

Breadmakers Make Ten Per Cent. Advance

Winnipeg.

BREADMAKERS.—Due to the ever-increasing price of tin plate, further advances are announced on bread makers, Both the Canuck and Universal prices show an increase of approximately 10 per cent. New prices ruling to-day are as follows:

Canuck, 4-loaf, $2.50 each; 8-loaf, $3.00 each.

Universal, 4-loaf, $3.00; 8-loaf, $3.50 each.

Food Choppers Go to Higher Levels

Winnipeg.

FOOD CHOPPERS. — Model food choppers registered the first advance in price in the past two years during the week, moving up about 10 per cent. over former quotations. These are quoted today f.o.b. Winnipeg as follows: No. 5, $1.50 each; No. 6, $1.60 each; No. 7, $2.35 each.

New Stocks Grass Shears are Higher

Winnipeg.

GRASS SHEARS.—Orders for grass shears since the opening of spring have been heavy and replacement of stocks at higher prices has made higher resale prices necessary. New prices show an increase of 10 per cent. over old quotations, making to-day's selling price as follows: No. 100 x 7½-in., $1.20; 8-in., $1.35; 9-in., $1.65 pair. No. 101, Border, $2.35 pair; No. 104, $2.35 pair.

Brush Hooks Up; Rope Halters Too

Winnipeg.

BRUSH HOOKS, ROPE HALTERS.—Brush hooks, which have shown steady advances during the past year, have again moved up in price, and are selling to-day as follows: Regular pattern, $15.75 dozen; B. C., heavy pattern, $17.00 dozen.

Recent heavy advances in sash cord have forced an advance in the price of Johnson rope halters and prices now in effect are as follows: No. 1, $12.75 doz.; No. 2, $11.25; No. 3, $10 20 doz.

Oil Stove Ovens Reach Higher Levels

Winnipeg.

OIL STOVE OVENS.—New prices have just been announced covering new Perfection oil stove ovens which move up 25c each. Sales on all kinds of ovens and stoves are reported as exceptionally heavy, due to the large number of campers this season. Prices now ruling on New Perfection are as follows: No. 41G, $4.25 each; No. 42G, $5.25 each; No. 141G, $4 25 each; No. 142G, $5.25 each.

Wrenches, Wrecking Bars Record Advances

Winnipeg.

WRENCHES, WRECKING BARS.—New prices have just been announced by the manufacturers showing a further increase in the prices covering agricultural wrenches due to increasd manufacturing costs and are selling to-day at 35 per cent. off list. Net prices are as given herewith: 6-in., $6.50; 8-in., $7.80; 10-in., $9.10; 12-in., $11.70; 15-in., $15.60 dozen.

Wrecking bars show a slight revision in price during the week, and have moved up from $5.40 dozen to $5.75 dozen.

Some Gauges Black Sheets are Higher

Winnipeg.

BLACK SHEETS.—Due to the demand for black sheets in 12, 14 and 16 galvanized and the very limited stocks available prices have been forced to higher levels. These three gauges are now quoted at $8.75 per 100 pounds.

Riveting Machines Revised; Pipe Vises

Winnipeg.

RIVETING MACHINES, PIPE VISES.—Prices on riveting machines which have remained firm for some time past have undergone a revision as new stocks arrive to take care of the fall trade. Prices now ruling on some of the more familiar lines are as follows: "Plymouth," $8 00 dozen; Ideal, $8 00 dozen; Rex, $10.80 dozen. Another advance has just been recorded on Reed's pipe vises. The new prices are named at a figure in the neighborhood of 10 per cent. New net prices are given herewith: No. 71, $4.00; No. 72, $6.60; No. 73, $9.00 each.

Blacksmiths' Hand Tools Go Up 11c Pound

Winnipeg.

BLACKSMITHS' HAND TOOLS.—Further advances in the price of the higher grades of steel coupled with the shortage of same has again influenced the price of blacksmiths' hand tools, including hardies, flatters, hot chisels and cold chisels. The present advance amounts to 11c pound, which brings to-day's market to 47c per pound.

12½ Per Cent. Advance In Adjustable Wrenches

Winnipeg.

ADJUSTABLE WRENCHES.—Prices on Elgin wrenches which have remained firm for some time past have just been revised. Present prices move up approximately 12½ per cent. This will make to-day's selling prices as follows: Elgin wrenches, $10.80 dozen; extra jaws for do., $2.70 dozen; extra dies for do., $5.40 dozen; threading attachments for do., $9.00 dozen.

Floor Wax Undergoes Revision Upward

Winnipeg.

FLOOR WAX.—Due to the difficulty of obtaining raw material, coupled with the recent advance in the duty which is now 35 per cent., floor wax prices have been revised. Prices now in effect are as follows:

Johnson's No. 1, $6.60 dozen; 2-lb., $13.20 dozen; 4-lb., $26.40 dozen.

Old English, No. 1, $6.60 dozen; 2-lb., $13.20 dozen; 4-lb., $26.40 dozen.

Johnson's powdered wax, medium, $5.40 dozen; large, $9.00 dozen.

Old English powdered wax, medium, $5.40 dozen; large, $9.00 dozen.

Linseed Oil Steady; Turpentine Unchanged

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices still hold firm on the local market, being quoted at $2.00 gallon for raw and $2.03 gallon for boiled, while the demand is about normal for this season of the year.

Turpentine prices on the local market still hold firm despite advances in Eastern markets. Prices ruling are as follows: Barrels, 80c gallon; ½-barrels, 83c gallon; 5-gallon lots, 85c gal'on; 1-gallon lots, 85c gallon; plus the usual extra for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., June 6.—The joint committee of representatives of the war industries Board and the steel makers appointed May 17 is progressing with its work of determining the probable monthly steel requirements of the various war activities and the prospective supplies, but no information whatever as regards the nature of its conclusions is forthcoming. It is improbable, indeed, that anything will be made public except through the medium of such action as the War Industries Board may take upon receiving the report. This action may be in the nature of the board's taking over complete control of the allocation of all steel. but that is quite improbable and would occur only in the event of its being shown that there will be very little steel left after the direct war requirements are covered. It is more probable that the finding will be that in the long run it will not be necessary to divert to the war activities as much steel as is now being shipped in that direction, while the mills are operating under their 100 per cent. pledge of war efficiency.

It does not follow that there is any possibility of the steel left after actual war orders are taken care of being allowed a free movement to whoever desires it. Some measure of control is certain to be exercised, for nothing is clearer than that the Washington authorities regard the commercial requirements in steel as of widely varying shades of importance, with respect to the aid they may give indirectly towards winning the war.

ALUMINUM PRICES FIXED BY PRESIDENT

Producers of aluminum in the United States have agreed with the War Industries Board to sell their product to the United States Government, to the public, and to the allies at the maximum price of 38c per pound, in lots of 50 tons or more. The price received the sanction of President Wilson. The new price is effective June 1, and will continue until September 1. Differentials for sheet, rod and wire will be increased by about 12½ per cent.

WEEKLY PAINT DEPARTMENT

Sell Service as Well as Paint

Profit Only Begins to be Made When First Sale is Made—If Real Needs of Customer Are Considered Dealer Will Find Out What Use Paint is Intended For —Should Give Intelligent Direction

THE art of paint salesmanship does not begin and stop with selling the paint. That is, the bargain is not complete when the customer's money is secured and the paint handed over. That is only the beginning of the bargain. The transaction is projected into the future and to the time when the customer uses the paint. If he finds that he has secured something that did not meet his needs, future sales are invariably doomed forever. But if he has been given entire satisfaction when the paint is applied the transaction is but the beginning of many more sales.

All of this leads up to the point that the dealer should see that his customer gets what is the best for his particular job. In order to do this he must know something of the painting business himself. As an intelligent salesman and dealer in merchandise this is knowledge that he should have. He is the point of contact between the manufacturer and the customer. If the dealer does not fulfill his proper function in seeing that his customer is supplied with the right kind of material to do his particular piece of work, it is hard to expect the manufacturer to project himself forward as a counsellor with the customer as he is often hundreds and perhaps thousands of miles distant.

SERVICE WITH EVERY CAN

It should be the guiding principle of every paint dealer to see that he knows what his customer requires. It does not always turn out that the thing the customer asks for is what he requires. The customer who asks for one thing and in reality should have something else invariably blames the paint or the dealer. He fails to realize that he himself was to blame in not explaining the purpose for which he intended to use it. Of course, he conceived the thing he thought he required out of the emptiness of his own inexperience. He was not an expert in any sense, as he had very limited experience in the proper handling of paint. Perhaps he erred because he so firmly believed that what he conceived was the proper thing.

It requires tact on the part of the salesman very often to find out the use to which the paint is going to be put. Offence may sometimes be caused in the attitude which the dealer adopts in trying to find this out. To adopt a "know-it-all" attitude will often give an affront to the customer. Suggestion as to the proper thing to use is often more effective than a bold statement that what the customer asked for is unsuitable. "Better results would probably come if you use this kind of material," would probably strike the customer less forcibly or offensively than, "You're all wrong there. You don't want that kind of paint."

REAL SALESMANSHIP REQUIRED

As a matter of fact the customer may want that particular kind of paint but it may not be the kind that he should have. There is a sort of reflection on him in his own eyes if it is put in a bald way. This art of leading the customer to see what he really needs without giving offence constitutes real salesmanship. It is salesmanship that is looking to the future for trade. It is building for the morrow. It is not a catch trade, but a steady and increasing trade that will mount up as the years go by.

But the first condition necessary to this sort of salesmanship is a proper study of painting problems. The dealer or his clerks cannot be expected to attain this knowledge without some effort. Long association with paint comes to give a store of knowledge that should be turned to the benefit of the customer. The dealer should not be satisfied that he himself is master of some of the finer points of the painting art. He should see that his salesmen also become proficient in this respect. It usually happens that as "the boss is, so will his clerks be." Clerks have a way of imbibing the methods of the manager or proprietor. If they have not that power of assimilation the sooner they are changed the better. Often some patience is required with clerks to get them to adopt this attitude of careful study of a product. But it is effort that counts for it will mean real service to customers in the days to come.

Your Business Increases

If You are an Exclusive Agent for

CANADA PAINT

The paint that is best known in Canada. A Canadian product for Canadian people, backed up by the best knowledge, and experience in paint making, is offered to you for exclusive sale in your district. By being a Canada Paint Agent, you not only handle the best line of paints and varnishes, but are supplied with a full line of advertising features that make sales easy. Link up with our big National Magazine Campaign.

Let us tell you about our proposition. It is a paying investment for every good live merchant.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 6.—Paint circles this week report a healthy demand for their lines and for mixing paints and varnishes in particular there is considerabele movement. The oil situation is somewhat better as crushes have received seed from the West and have overtaken some of the accumulated business. There is still room for much improvement, however. Turpentine is very scarce yet but within the next ten days or so hopes are expressed that this will be improved. Shellacs are higher, both white and orange. No change was made in the differentials on lead and putty as applying to other points.

Shellacs Advanced 25c to 40c Gallon

Montreal.

SHELLACS, VARNISHES. — The position on shellac is one characterized by firmness to the extent that one paint maker has advanced prices twenty-five cents a gallon on orange and forty cents per gallon on white. The cost of raw materials and the various other factors of added costs are said to have made this essential. New prices are now effective. The varnish market is a firm one and while no new prices have been quoted there is a possibility of this being considered ere long.

More Oil Reaching Trade; Little Easier

Montreal.

LINSEED OIL. — The week has brought about a much desired improvement in the matter of supply. This cannot be stated as considerable but in view of the situation as obtaining for some little time it is appreciated all around. Those needing supplies are taken care of much better than it was possible to afford a week ago. Seed delivery down the lakes was better and the crushers therefore had more oil for the distribution to the jobbers. It may be said that the relief will perhaps continue for a few weeks but if the stocks of seed at the lake head are no larger than information to hand would indicate oil will not decline very much. Some have quoted $1.80 per gallon for raw but there is a general maintenance of price on an unchanged basis. The demand is good.

	Raw, Imp. gal.	Boiled, Imp. gal.
Linseed Oil—		
1 to 4 barrels	$1.82-$1.86	$1.84½-$1.88½

Some Turpentine Looked for in Ten Days

Montreal.

TURPENTINE.—Better delivery than was thought possible a week ago will mean that some supply of turpentine may be expected here inside ten days. The situation may even be better within a week. In the meantime the market is bare and some will not have any to spare for a couple of weeks at least. In the meantime the position is firm and some suggest that the recent activity of submarines on the United States coast may have a real bearing on the immediate future of turpentine. Those shipments made in cooperage usually come forward a great part of the way by boat and these may have to be diverted to all rail routes. Higher freights therefore and probable delays will obviously make for higher costs to lay down. The position looks at present like a continued firm one here although there was a shading of quotations in the southern markets.

Turpentine—	Per Imp. Gallon
1 to 4 barrels	....
5 barrels and over	....

Small quantities 10c advance over 1 bbl. prices.

Putty Commanding a Routine Demand

Montreal.

PUTTY.—The position is altogether unchanged as far as the local market is concerned. The change in differentials made for the Maritime and Toronto markets do not apply here. Trading is not unusual in any way, the regular demand being evident for seasonal requirements.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.76

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

Lead in Oil Firm but Unchanged

Montreal.

WHITE LEAD IN OIL.—The use of white lead in oil will probably be more general for some purposes with freer supplies of oil to hand. These are not improved so that there is yet a surplus but the position is better. Changes have not been made in the matter of price, five ton lots of standard still being quoted at $15.50 per 100 pounds; ton lots at $16 and less quantities at $16.35.

Paints Sold Well in Month of May

Montreal.

MIXED PAINTS.—The position of mixed paints is unchanged and the activity still continues for many lines. One manufacturer stated to HARDWARE AND METAL this week that their business for May was very large and this reflects the expression of many others. Prices have been fully maintained and the undertone still is a firm one. The new regulations with regard to sizes of containers will soon be coming into force now and the regulation of one's stock will be in order. Conditions are reported to be quite satisfactory and recently the procuring of supplies of raw material has been less awkward with some.

VARNISH MARKET VERY FIRM

The difficulties of securing at present all the necessary materials used in varnish making and the general outlook for the future in this respect point to a maintenance of prices and to a general firming of prices. Such was the opinion of a large varnish maker as expressed to HARDWARE AND METAL this week. For the present containers are available in fair quantities but tinplate will be scarcer still, so that to bank on the future is very uncertain.

Another matter pointed out is that of the disappearance after July 1 of the pint and half gallon containers. This is a very important point which many have considered undoubtedly. However, if retail stocks decline to the point where these are eliminated all at once by the retailer he will find it costing him more to fill an order for a pint or a half gallon of varnish in supplying two half pints or two quarts. It would seemingly be an opportune time to look over one's stock.

TORONTO

TORONTO, June 6.—Featuring the markets locally as far as prices are concerned is a decline in linseed oil of 5c per gallon and an advance in turpentine of 2c per gallon. Freight differentials between Toronto and Montreal show an increase resulting in prices on white lead in oil and putty locally

An Unusually Attractive Varnish Proposition

In order to introduce our varnishes, especially to our newer agents, who may not be as familiar with their excellent qualities as our older agents are, we have made up a proposition that is both unusual and attractive.

A special discount of 40% will be allowed on Everlastic, Dependon, Gold Medal and Maritime Spar Varnishes, as well as China-Lac and B-H Auto Enamel, and further rebates as follows:

To any agent who purchases within 1 year $250.00 worth of any or all of these six varnishes, a rebate of 5% will be allowed; if $500.00 is purchased within one year, a rebate of 10% will be allowed; if $800.00 a rebate of 15% will be allowed.

Maritime Spar
For boats, masts, outside doors, etc.

These Varnishes and Specialties are in keeping with the high quality which is found throughout the entire line of B-H products, and, like the rest of the B-H family, are in constant demand. They are money-makers —you should stock them.

Ask the B-H Salesman for particulars or write your nearest branch.

Dependon
A light hard oil finish.

Gold Medal
A general purpose Varnish for inside and outside work.

B-H Auto Enamel
Makes automobiles like new.

Everlastic
A Perfect Floor Varnish—lasting and elastic.

China-Lac
The perfect Varnish Stains and Enamels for general household use.

If interested, tear out this page and place with letters to be answered.

moving up 5c per 100 pounds. Turpentine is very scarce and great difficulty is being experienced in getting shipments through from the producing centres. Linseed oil receipts show some improvement but supplies generally are pretty light. Mixed paint is moving out freely and business on the whole may be considered very satisfactory.

Linseed Oil Declines 5c; in Light Supply

Toronto.

LINSEED OIL.—The seed market continues to decline and prices on oil have been affected to the extent of a 5c lowering of quotations. The decline in seed for No. 1 N.W.C., cash price, for the week from Wednesday last is 12c, bringing yesterday's quotation to $3.58. The movement of seed shows some slight improvement and crushers are taking advantage of all receipts to catch up with their orders. In some quarters it is intimated that supplies are still scarce and shipments to retailers held up awaiting oil to complete the orders. The present scale of quotations is given as follows:

	Raw, Imp.gal.	Boiled, Imp. gal.
1 to 2 bbls.	$1.84-$1.90	$1.86½-$1.93
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine up 2c; Supplies Very Light

Toronto.

TURPENTINE.—An advance of 2c per gallon has been made in turpentine during the week. This is due largely to scarcity of this commodity, supplies reaching the vanishing point on this market with some sources entirely out of stock. Difficulties in getting shipments through from producing centres seem to be multiplying. The sub. campaign now carried to United States seaboard practically eliminates coastwise service on this line which might have helped, and rail shipments take as long as two months to reach destination. Those are existing conditions and the future, as outlined some weeks ago in HARDWARE AND METAL, presents uncertainties and difficulties regarding the matter of supplies. The present range of quotations is as follows:

	Imp. Gal.
1 barrel	$0 74-$0 80
2 to 4 barrels	.....
5 gallon lots	..... - 0 90

White Lead in Oil Changes Slightly

Toronto.

WHITE LEAD IN OIL.—A change in freight differentials between Montreal and Toronto has been made during the week. The Toronto prices under the new arrangement being 25 cents higher than Montreal or 5 cents above previous differential. This brings quotations on pure, in ton lots, to $16.25 per 100 pounds and in smaller quantities $16.60 per 100 pounds. The complete list is given in current market quotations. Business on white lead in oil for the week has been fair.

Good Sale Continues for Mixed Paints

Toronto.

MIXED PAINTS.—Jobbers and manufacturers express satisfaction over the amount of business offering in mixed paints, sorting orders coming to hand representing a splendid volume of business. No change in quotations has been made and prices shown in current market quotations are held firmly.

Glass Very Firm; Putty Differentials Change

Toronto.

GLASS, PUTTY.—Advices from producing centers indicate that glass manufacturers are already ceasing operations at many points and that production will certainly not exceed 50 per cent. of the output of previous years, the figure agreed upon by the government and manufacturers, is quite evident. In addition to home consumption, the United States manufacturers are supplying a large export trade now and there are intimations that the present year's output may not take care of all demands. This provides for a decidedly firm element in the markets and any change in price which may be made will not be downward.

The change in the differentials on white lead in oil applies also to putty and an advance of 5 cents per 100 pounds in the Toronto price has been named. The demand on putty is only fair. The present range of quotations on the new basis is as follows: Standard bulk in casks, $4.60; 100 lb. drums, $5.35-$5.45; bladders in barrels, $5.50-$5.70 per 100 lbs. Pure putty takes an advance over standard of $2.00 per 100 lbs.

PLENTY OF NON-FERROUS METALS

The British Government has decided to release some of the enormous reserves of non-ferrous metals for shipment abroad, according to the British "Ironmonger." One of the regrets of that journal is that Canada is not included among the countries to which shipments can be made. It says: "At last the Ministry of Munitions has undertaken to issue certificates for the use of non-ferrous metals for the export trade to the Dominions and British Dependencies, and also for essential repairs and maintenance at home. We could have wished that the range of permissible uses had been wider. Having regard to the enormous reserves of metal available it should have been found possible to liberate a reasonable quantity of the metals for the civil trade at home and for export account it is necessary that permission should be given to supply foreign markets generally at the earliest moment, first in order that our manufacturers may get a firm foothold in those markets before the enemy arrives, and secondly because the sooner money is brought into Britain from foreign countries the better. We note with surprise that Canada is excluded from the list of Dominions to which metal goods may be shipped, the reason given being that the United States have promised to supply Canadian needs in order to save shipping metals and metal wares through the submarine danger zone.

Manager Wanted $50,000 Salary

A STRONG man—a tactful man—a man who will create sympathy and respect and support for the greatest factor in the upbuilding of Canada. A man who will curb the few selfish, the grafters, and the offensive combines which exact exorbitant profits, and bring the 95 per cent. decent Canadian manufacturers into disrepute, subjecting them to unfair and confiscatory legislation. A man who will work in unity with the press of the country, with the farmers, trade unions, and various journals, and finally and most important of all—a man who will organize Canadian industry for the greatest possible output of the best quality goods. Such a man can do more than any other to make Canada permanently prosperous. Such a man, says THE FINANCIAL POST of June 1st, should be secured as Manager of the Canadian Manufacturers' Association. You will find the article containing this and other powerfully constructive thoughts on page 1 of THE POST now on sale.

Know Canadian Affairs

News of Canadian Securities forms an important feature of THE FINANCIAL POST every week. In addition to the fifteen columns of the June 1st issue devoted to this department the following up-to-the-minute business articles appear:

Policy.
Milling Company Report Not Made on Business Basis.
Banks Prepare for Abnormal Domestic Needs.
Maintenance of Foreign Trade a Necessity.
Canadian Merchants Current Loans Millions Higher.
Effect of Victory Loan on Canadian Banks.

SPECIALISTS

Some doctors are just doctors. Some doctors are specialists. Did you ever go to a doctor who prescribed for you, and the beastly stuff cost you $3.00, and after shaking and taking you felt worse? Another visit and the doctor said: "We will try something else"—another $3.00 and results as before.

One visit to a specialist who can diagnose your case correctly and prescribe what is necessary and all is well.

There are doctors and specialists in every business. A Specialist in white metal alloys never needs to experiment with his customer. All experimenting has been done long ago and that is why we

THE CANADA METAL CO., LTD., ARE SPECIALISTS.

All experiments are conducted by our own chemists in our own laboratories, and whether you are interested in

BABBITT METALS—SOLDER—SHEET LEAD—LEAD PIPE

or any other white metal alloy, you cannot do better than get in touch with us. You will never be advised to "try something else." You will get exactly what you want the first time.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

"Look Over Your House

What does it need in the way of paint?

While paint is intended to make the surface more pleasing to the eye, by the selection of a color scheme that harmonizes with your ideas of tasteful decoration, still, its most vital function is to protect that surface against decay and deterioration

Ramsay's Paints combine to the greatest degree, looks, wear and protection. They give your house the best appearance over the longest term of years at the lowest cost.

There is a Ramsay dealer not far from where you live. Ask him or write us for booklet; we will gladly offer suggestions.

A. RAMSAY & SON COMPANY

Jamieson Sales Mean Larger Profits

ASK

the dealer who has been selling our line.

"HE IS A SUCCESS"

The veteran painter, tried and proved, the man who does paint well.

"HE KNOWS"

The chemist, who can analyze—he smiles and says

"ALL RIGHT"

Because

It goes farthest.

Covers more space at less cost.

Encourages the inexperienced to paint and brighten up.

Ask for details.

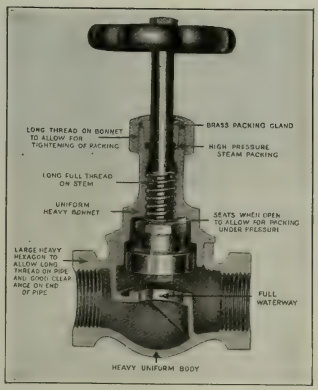
The NEW "EMCO" GLOBE VALVE

AND THE PLACE WHERE IT'S MADE

Just take a look at our **NEW EMCO** Globe Valve and note carefully a few of its good features. The long, full threads on spindle, the uniform thickness of metal.

It can be packed when open, is fitted with metal packing gland and is complete in every detail.

Every valve is packed with high grade packing before it leaves the factory.



This is only one of the many new lines we have made recently to fill some long-felt wants for high-grade valves.

We have one of the most modernly equipped brass manufacturing plants under the British flag.

We can make prompt shipments from stock. Let us quote you our prices on your next brass goods requirements.

When writing us or ordering from your jobber, ask for the EMCO GLOBE VALVE. It's a winner and we're proud of it.

It's so easy to apply

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Help your patrons to realize that Silkstone is in reality a specially prepared wall Paint — a flat finish peculiarly adapted to use on plaster. Then they'll understand why it is so easy to apply. So many people, when you speak of wall coatings, think of kalsomine and other distemper colors. Naturally they don't like the idea of mucking and splashing around with a big brush in a thin fluid that flies everywhere and spots everything.

We can send you a dandy booklet on Silkstone, and in handing it out we would suggest your drawing attention to the fact that Silkstone goes on just like paint.

We would like to know if there is no Stephens Paint Agent near you.

Display REED'S Plastic Asphalt Roof Cement—It Sells Itself

Dealers will find a ready sale in Reed's Plastic-Asphalt Roof Cement, the quickest and most permanent repair for Slate, Metal, Shingle and Composition Roofs.

Reed's Cement always does the work **right,** and 25 years of continuous use has proven **it best on the market.**

That's why it sells best. Reed's cement is simple to apply, will not harden with cold, or run with heat. Always remains **plastic.**

Prominently display a full row of "Reeds," then watch for silent sales. It will more than please you.

DOUGALL "KONKRETO"

"the varnish that lasts longest"

A composition (two which become one) for the sanitary treatment of concrete floors, walls and ceilings.

It gives them a smooth and moisture-proof surface. Prevents their WEARING DUSTY and GETTING MOULDY.

Makes them as easy to clean and keep clean as tiling.

Makes cement look and feel like hard rubber.

Makes concrete floors look at their best.

Write for our booklet, "KONKRETO," to-day.

Shall we also mail you our proposition?

The Dougall Varnish Co.
Limited
"the varnish that lasts longest"

Success and Your Associates

ALWAYS associate with men who are earning more money than you are. Such is the advice given by a man whose name is known the world over for his own success and the business which he created. It is good advice of a certainty, but we are not urging that it is the best advice. At the same time it is wise to associate with better or bigger men than you are yourself, because you are likely to be lifted up to their levels.

Most of us would probably like to be the intimates of J. P. Morgan, or of John D., or of Charlie Schwab, or Canny Andrew. If we had a speaking acquaintance with John Wanamaker, or Lord Beaverbrook, or Lord Shaughnessy, and with other distinguished and successful men, we would take comfort from the fact.

And most of us would feel rather small and uncomfortable if we were placed beside President Woodrow Wilson at a dinner table, or beside Sir Robert Borden, Sir Herbert Holt or Sir Wm. Mackenzie. And the reason would probably be that we know so little of the knowledge that really counts. If these successful business men engaged us in conversation we would probably find ourselves knowing very little about the things that matter.

This will illustrate the point:

Here's a true story. A Toronto manufacturer found himself on a train going to Albany in company with a number of distinguished Americans about to attend the inaugural ceremonies of a State Governor. A washout led to a delay, and the Canadian was thrown into close association with senators and congressmen and prominent lawyers. They bantered the little Canadian about Canada. He had the pluck of a bigger man. He had been a constant reader of THE FINANCIAL POST, and had absorbed many facts about Canada. He surprised his American travelling companions with his positive, well-informed and wide knowledge of Canada. When the company reached Albany, the Canadian was persuaded to attend the ceremonies and was introduced as the man who knew all about Canada. The Governor was interested in Canada, and said so, and the little Canadian found himself telling the story of Canada very ardently to a very attentive listener, much to the amusement of his friends who introduced him.

This man made a hit on that journey, and many friends. One of the company gave him a stock market tip worth a fortune.

The point of this story is: You, as a Canadian, can make yourself informed very fully and intelligently if you become a regular reader of THE FINANCIAL POST. You can make yourself a worthy companion and intimate of presidents and magnates. The world likes to listen to men who know something well, and who can talk interestingly and informingly on the subject of their study.

You can become worth listening to if you know your Canada well. And you can get the kind and amount of knowledge concerning Canada which will make you interesting to others if you will read THE FINANCIAL POST regularly each week.

IF you read THE FINANCIAL POST REGULARLY you will find yourself keeping company with the highest paid staff of editors engaged on any publication in Canada—trained men who know how to make others know what they know and learn.

You will find yourself living in a most interesting world—the great, throbbing world of business. You will have your thoughts tremendously stimulated and helpfully directed. You will find yourself becoming a fit table companion for big men — this because you will have knowledge of a quality that will keep you from shame.

What is it that keeps you and THE POST separated? It cannot be its subscription price of $3. Probably it is because you are not very well acquainted with this paper.

We are going to put it to you this way: If you have the desire to be worthy of association with big men, then prepare yourself for such association by reading THE POST, and to make acquaintance easy, we provide the coupon below. It offers you THE POST for four months for a dollar bill.

The MacLean Publishing Company, Limited,

Dept. F.M., 143-153 University Avenue, Toronto.

Send me / us THE FINANCIAL POST for four months for One Dollar. Money enclosed / to be remitted

(Signed)

A Profitable Line to Handle

Hardware dealers are finding Brantford Asphalt Slates a line that it pays to feature.

This modern roofing material is particularly suitable for present day conditions when labor is scarce and high, because time can be saved on the job—Brantford Asphalt Slates being quickly and easily laid on account of their pliability and their regularity of size. They do not split when nailing. Every one is perfect.

House in Kingston roofed with Brantford Asphalt Slates

Brantford Asphalt Slates are suitable for any building with a pitch roof. They are used on many costly homes to-day, yet they are moderate in price. There should be many roofing opportunities in your locality. Write for our proposition.

WANTED, AT ONCE — CAPABLE HARDware man to manage retail hardware business in thriving Ontario town. State experience, salary expected, and give references. Apply Box 182, Hardware and Metal.

Men who are capable of managing a retail hardware business are not easy to find. The position requires a high type of ability. Above all, it requires a man who recognizes opportunities and who knows how to make the most of them. That type of man in the hardware business is almost invariably a reader of HARDWARE AND METAL. There were fifteen replies to the advertisement shown here. It was a point in favor of all the applicants that they were in the habit of reading HARDWARE AND METAL.

USE THE WANT AD PAGE

If interested, tear out this page and keep with letters to be answered.

Fearless and Entertaining

This is the most momentous time in history, and you want your reading to keep you abreast of what is happening in the world. You want articles that are timely, vital, fearless. Here's what is offered in June MACLEAN'S:

Must the British Empire Cease to Exist? Must all nations, as separate nations, cease to exist? Read what is said on this subject by - - - - - - - - - - **H. G. Wells**

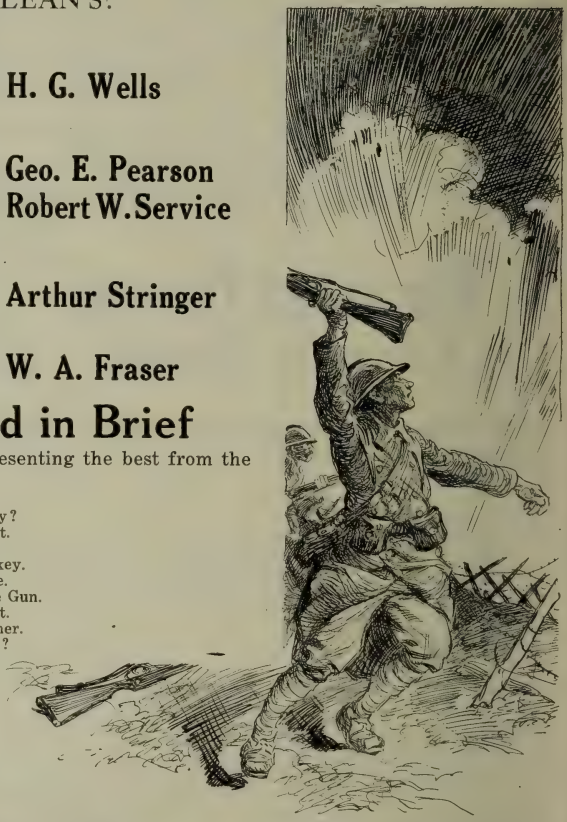
When a thousand guns play on a single trench, what happens in that trench? A powerful description by one who lived through it by - - - - - - - - - **Geo. E. Pearson**

A soul-stirring ballad of the trenches by **Robert W. Service**

Galvanizing the Government at Ottawa. An article on the work of the Ginger Group.

A gripping mystery story by - - - **Arthur Stringer**

The Three Sapphires—A new serial story combining Hindu mystery and war intrigue by a great Canadian novelist. **W. A. Fraser**



News of the World in Brief

The following articles are reprinted as representing the best from the best magazines the world over:

Is This Germany's Plan?
Is Japan Seeking a New Ally?
How Allied Victory Was Lost.
Is Foch Another Napoleon?
How Germany Annexed Turkey.
The Death of General Maude.
That Mysterious Long Range Gun.
How Bolo Pasha Was Caught.
The World is Growing Warmer.
Super-Kaiser or Little Willie?

A display will immediately improve your sale of *Sani-Flush*

The need for ***Sani-Flush*** is self-apparent. People are ready to buy it as soon as it is called to their attention by a local merchant.

Some women are just a little timid about asking for ***Sani-Flush*** on account of its being used for cleaning water-closets. You overcome this embarrassment by showing a can of ***Sani-Flush*** on a counter where a customer may simply point to it and say: "Give me a can of that!"

Sani-Flush is different from other articles you handle and should be given special treatment.

TORONTO, CANADA

Let Hardware & Metal—the paper most interested in your business—help you in your Want Ad. Problems.

Its circulation is among Business Men, interested in the same way as you are. Consequently, any replies you received would be earnest enquiries after business. You would thus eliminate the curious.

Use the Want Ad. Page of Hardware & Metal frequently to fill your needs. It will pay you.

Mr. Hardwareman

Have you ever considered the advantages of advertising your wants in HARDWARE AND METAL? One of the most important of these is the fact that there is no waste circulation. HARDWARE AND METAL goes only to the people who are directly interested in the trade. We have offices in Montreal, Toronto, and Winnipeg. If you like you can have a box number in care of either one of these offices, whichever is nearest to you. We will then notify our representative there and he will promptly forward any replies which may come in answer to your ad. Remember, Thursday noon is the latest for receiving want ads for the current issue.

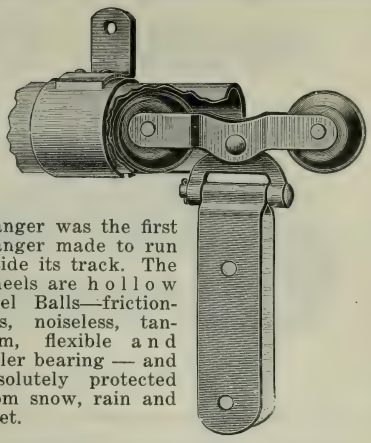
The Cannon Ball Barn Door



MEHASCO

ANOTHER MEHASCO MESSAGE 5

Hanger was the first Hanger made to run inside its track. The wheels are hollow steel Balls—frictionless, noiseless, tandem, flexible and roller bearing — and absolutely protected from snow, rain and sleet.

For a strong, serviceable Hanger to run outside we heartily recommend the 20th Century. Both these tracks can be conveniently carried under the counter in a hardware store as the Cannon Ball is put up in three-foot ends and the 20th Century in two-foot. This makes it very convenient for the consumer to take home in an automobile, buggy, or democrat.

Business Houses by the Hundred Buy "Confidential Circulars" for Dollars When Cents Would Buy Far More Facts

Waldon Fawcett, Washington Correspondent, writes as follows in *The Fourth Estate:*

> "Hundreds and thousands of business houses in all lines of trade are to-day paying fees of $25.00 and $50.00 and upwards to 'business correspondents,' 'information bureaus,' etc., located in Washington, which do not supply in their weekly printed or mimeographed 'confidential' letters a tithe of the information obtainable through TRADE PAPERS at a fraction of the price."

THE MACLEAN PUBLISHING COMPANY own and publish the most comprehensive group of Trade and Business Newspapers in Canada. The paper you are reading now is one of the group. The complete list with their subscription cost per year is as follows:

THE FINANCIAL POST (Weekly)	$ 3.00 Per Year
HARDWARE AND METAL (Weekly)	3.00 " "
CANADIAN GROCER (Weekly)	3.00 " "
DRY GOODS REVIEW (Monthly)	2.00 " "
MEN'S WEAR REVIEW (Monthly)	2.00 " "
BOOKSELLER & STATIONER (Monthly).	1.00 " "
PRINTER AND PUBLISHER (Monthly) ..	2.00 " "
SANITARY ENGINEER (Semi-Monthly)...	1.00 " "
CANADIAN MACHINERY (Weekly)	3.00 " "
POWER HOUSE (Monthly)	1.00 " "
CANADIAN FOUNDRYMAN (Monthly) ..	1.00 " "
MARINE ENGINEERING (Monthly)	1.00 " "
FARMERS' MAGAZINE (Semi-Monthly)...	1.00 " "
MACLEAN'S MAGAZINE (Monthly)	2.00 " "
	$26.00

Any single issue of any one of the above newspapers most certainly contains far more information for the business man concerned than could possibly be put into the most voluminous circular ever mimeographed or printed. To subscribe to the whole list would cost you only $26.00 a year. And yet, as Waldon Fawcett intimates, thousands of business houses are still paying $50.00 and upwards for weekly mimeographed circulars containing not a tithe of the business news given in any single issue of any one of THE MACLEAN BUSINESS NEWSPAPERS.

THE MACLEAN PUBLISHING COMPANY, LIMITED

153 UNIVERSITY AVENUE, TORONTO

The Publisher's Page

TORONTO JUNE 8, 1918

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶ Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases, customers place absolute confidence in the recommendation of their local dealer.

¶ The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesman on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

¶ Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

Mr. Dealer: Sell This Fence

Establish a trade that will stay with you and at the same time will show a substantial growth. Compare this strong, rustless, unyielding fence alongside flimsy netting, and every poultry raiser will flock to your store. Note the close spaces at bottom that turns the small chicks and keeps out intruders.

PEERLESS COILED SPRING FENCE

SEND FOR LITERATURE

Get our catalogue of fencing for all purposes. Every foot of it guaranteed. Write today for agency in open territory. Our fence in every instance backs up our advertising.

The MacLean Business and Class Publications in Canada

TO SELL or buy from Canada such lines as machinery, hardware, food products, dry goods, books and stationery, paper, printing machinery and supplies and general merchandise of almost every description, raw or manufactured, use or consult the MacLean Business and Class Publications, as per list below. For special information, write the publishers. Concerning the quality of the MacLean publications, let this copy of HARDWARE AND METAL which you hold in your hands speak for all. The MacLean list of 14 publications is as follows:—

THE CANADIAN GROCER (Est. 1886)
HARDWARE AND METAL (Est. 1889)
DRY GOODS REVIEW (Est. 1889)
MEN'S WEAR REVIEW (Est. 1898)
CANADIAN MACHINERY (Est. 1905)
THE POWER HOUSE (Est. 1907)
BOOKSELLER AND STATIONER (Est. 1884)
THE SANITARY ENGINEER (Est. 1907)
MARINE ENGINEERING OF CANADA (Est. 1910)
CANADIAN FOUNDRYMAN (Est. 1909)
PRINTER AND PUBLISHER (Est. 1892)
THE FINANCIAL POST (Est. 1907)
MACLEAN'S MAGAZINE (Est. 1896)
THE FARMER'S MAGAZINE (Est. 1910)

This fact may interest you: namely, the MacLean organization is the largest concern of its kind in the British Empire. The output of its mechanical department every working day is the equivalent of a 112-page publication of the size and type of this copy of HARDWARE AND METAL.

Our London Office, 88 Fleet Street, E.C.

Also at: NEW YORK, BOSTON, CHICAGO, MONTREAL, WINNIPEG

For over 20 years the MacLean Publishing Company has maintained a fully-staffed London office, and has rendered British and Continental manufacturers, shippers, and traders an invaluable service in many directions.

Our London managing director, Mr. E. J. Dodd, has just returned to London after an extended visit to Canada, during which time he investigated very closely the trade conditions and opportunities of both Eastern and Western Canada. Mr. Dodd will welcome correspondence from all who may wish fresh, full and well-informed knowledge concerning trade prospects, connections and introductions as these relate to Canada.

Specimen copies of the MacLean publications will be cheerfully forwarded to all asking for them. Address us at London or Toronto.

The MacLean Publishing Company, Limited

143-153 University Avenue **Toronto, Canada**

Electrical

"I have no place to attach them," says one
"It is inconvenient to take out a lamp," says another

IT has been stated that hundreds of thousands of the useful electrical appliances sold, such as irons, etc., are not used at all, while other hundreds of thousands are used only on rare occasions. Why?

There is No Convenient Place to Attach Them

This is a startling condition.

To the central station it means a loss of revenue.

To the manufacturer, jobber and dealer it means that there is a vast number of unused appliances standing as a barrier in the way of further sales.

What can we do?

How can we remove the obstacles to more revenue, greater sales, greater use of electrical household appliances? The easiest, simplest method of providing an extra outlet, both for emergency and everyday use is the

Benjamin
TWO-WAY PLUG

MADE IN CANADA

Supplies an extra outlet that is used, because it is put on at a point where more service is needed.

Attractive folders may be had on application. Send for copy.

Why Not Stock Them?

"1900" Cataract Electric

WE are Washing Machine specialists. For twenty years we have been manufacturing home laundry equipment exclusively. Our "1900" Cataract and "1900" Agitator Electric Machines are the best designed Washers on the market. They are mechanically perfect and give wonderful satisfaction.

A liberal profit is allowed on all "1900" Washers and Wringers. Our complete line includes washers that operate by Hand, Water Power, Engine Power and Electric Motor. We also have a full assortment of sizes and grades of superior, beautifully finished hand and power wringers. The profit made by carrying the "1900" line is limited only by the "prospects" within your reach.

"1900" Agitator Electric

Extensively Advertised— And the Dealer Gets the Benefit

Every dealer who proves his worth is handed all the inquiries from his territory, resulting from our twice-a-year advertising campaigns.

If, at the present time, you do not carry a line of washing machines, or are looking for "something better," you will profit by writing our "Wholesale Department."

Electrical

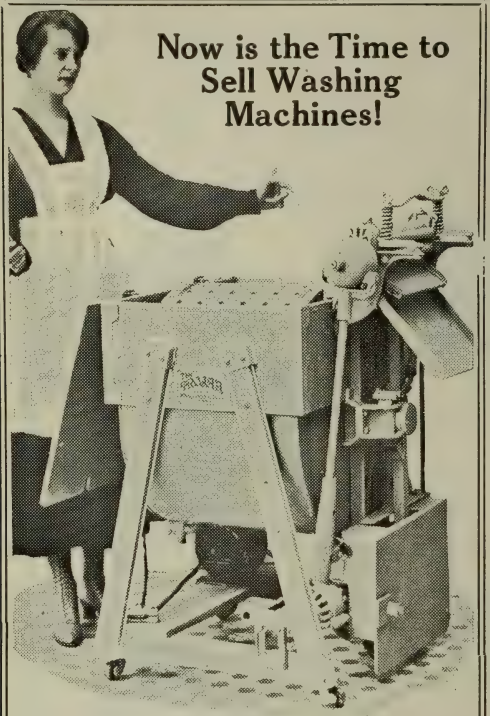
Now is the Time to Sell Washing Machines!



In these abnormal times when there is so great a demand for the conservation of human energy, there is a wonderful opportunity for the dealer who sells washing machines and other labor-saving household appliances which represent more than ever before an essential industry.

The dealer who will have the most success in building up a profitable Household Appliance Department is the dealer who sells a washing machine such as the Trojan Electric, which, because of the absolute satisfaction it gives, will build confidence for him and for his store.

The "Trojan" Electric Washer

The Trojan is built to last a life-time. It is noiseless in operation and works more quickly than any other washer. Equipped with casters it can be easily moved into any room—through any door.

The simplicity and efficency of the "Trojan" is so easily demonstrated that **agents find no difficulty in convincing customers that it is the Electric Washer they should buy.**

We want an agency in every town and city in Canada where one has not already been appointed. If you are interested, WRITE US TO-DAY and we will put the proposition before you or arrange to have one of our representatives call and see you.

WANTED — RELIABLE, ENERGETIC hardware clerk, 8 to 12 years' experience. Capable of taking charge. Apply, stating salary and giving full particulars, to Box 170, Hardware and Metal, Toronto.

The firm who inserted the above advertisement in HARDWARE AND METAL showed good judgment.

Naturally, replies would only come from clerks who were in the habit of reading HARDWARE AND METAL—and every hardware merchant realizes that a clerk who reads HARDWARE AND METAL is the kind of clerk he wants, because he will be thoroughly informed on market conditions, new selling plans and the best methods of window display and advertising. The above advertisement brought in 23 replies. It cost only 67 cents.

USE THE WANT AD. PAGE.

Electrical

Every Farmer's Wife Wants a Washer

No farm should be without a washer, and for the retail salesman it is a question of demonstrating to the farmers' wives how much time and labor can be saved by having a washer. Less time and less work over the wash tub means more time for profitable, money-making work in the dairy or with the poultry.

Show the farmers' wives the

Patroit Spiral Cut Gear Hand Washing Machine

It will exactly fill the bill where power is not available. The name "Dowswell" is a guarantee of the quality of material and workmanship.

Caverhill, Learmont Mail Orders

When the farmer is buying harvesting equipment or accessories there are reasons for his final choice.

He calls into consultation those who have "been there" before him. He asks the opinions of production men, gets all the expert knowledge at his command mobilized on the subject. No error is permissible—he makes thoroughly sure before he buys.

That the Caverhill, Learmont service in handling mail orders for

HARVESTING ACCESSORIES, ETC.

is both efficient and satisfactory is proven by the increase in this department of our business. We earnestly solicit your order for this season's business and will guarantee that the service rendered will please you to such an extent that you will remain our customer year after year.

MISCELLANEOUS

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

AN EXPERIENCED SALESMAN WOULD LIKE high grade lines for Montreal and Province of Quebec. Replies to Box 400, Hardware and Metal, 128 Bleury St., Montreal.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

2 cents

per word for the first insertion is the rate charged for an advertisement on this page. Each figure is counted as a word, and a charge of 5c extra is made when a box number is required.

When more than one insertion is ordered the cost is one cent per word for each subsequent insertion, providing the copy is not changed.

Write your message legibly and state the number of times you wish it to appear.

HARDWARE AND METAL "Wanted" ads get results.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

HARDWARE BUSINESS WANTED — IN good Ontario town or city. Replies treated strictly confidential. Box 167, Hardware and Metal, Toronto.

This little advertisement inserted in HARDWARE AND METAL not long ago immediately brought eleven replies to the advertiser. And the cost was only 47 cents, including 5 cents for Box Number.

Sell G.T.D. Leather Roll Automobile Screw Plates

to the Automobile Owner, Chauffeur and Repairman. Curtailment of automobile production means harder usage for older cars, consequently more repair work and more sales of automobile tools.

G. T. D. Leather Roll Screw Plates make an exceptionally strong appeal to the auto man. They are light in weight (No. 1475 shown here weighs but 3 lbs.) and compact, and cut S. A. E. Standard threads in all of the most comon sizes.

Are you getting your share of the profits?

Better get in touch with us early.

Ten Times the Illumination for the Same Money

WITH such a selling argument—and it's a proven fact—you'll find the Wallace Lamp a quick seller.

It's just the lamp that's needed in home and office. It gives more illumination (ten times more) than the ordinary ceiling light, and exactly where it's wanted, without waste. Cuts down the light bills.

Demonstrate it on office desk, arm of easy chair, sewing machine or dressing table, and your customers will want one. Folds to small size for travelling.

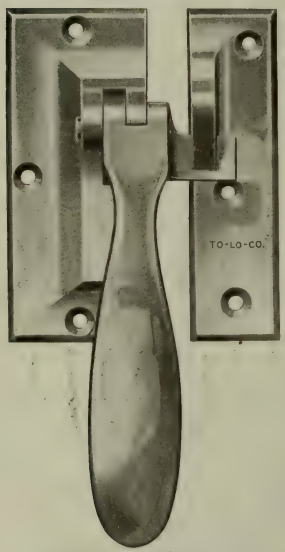
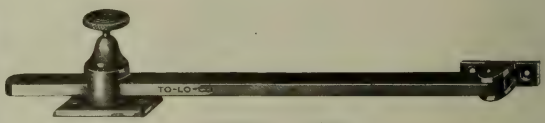
"TO-LO-CO"

BUILDERS,' CABINET AND REFRIGERATOR HARDWARE

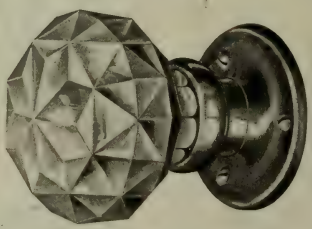
We solicit a nation-wide patronage for our extensive range of builders, cabinet and refrigerator hardware.
The four lines here illustrated are representative of the hundreds you will find assembled under the "To-Lo-Co" brand and listed in our new catalog.
The new "To-Lo-Co" Catalog "A" is now off the press and ready for delivery. If you have not received a copy, one will be mailed on request.



REFRIGERATOR CATCH NO. 1860.
This while very popular is only one of the seven distinctly different styles to select from in our new catalog. It is made of Polish Cast Brass or Nickel-plated.



CASEMENT ADJUSTER.
Of the five styles we carry the No. 431 shown above is the most popular. Comes in Brass metal in two sizes, 10 and 12 inch.



CUT GLASS DOOR KNOBS.
This is No. 645—a real winner, handsome in appearance, well finished; has wrought brass roses; made in 2¼ and 2½ inches, any finish required. Other styles in cut and pressed glass.

KNOB AND ESCUTCHEON.
"Colonial" design in wrought brass or steel. There are in all some two score different styles to select from in the "To-Lo-Co" range. The above is Knob No. 7630, Escutcheon No. 1934.

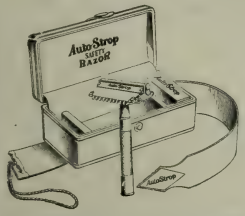
Safety Razors

for every man in khaki or mufti

The merchant who realizes the importance of the safety razor to-day to the man-power of Canada will keep it to the fore in his show case displays, nor will he forget his window displays.

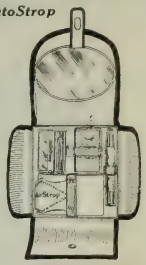
No one razor can to-day fill the requirements of the general public, so be sure to carry an assorted stock until you find the lines which are the best sellers in your community. Then buy accordingly. We carry the leading makes, a few of which are here illustrated.

AutoStrop



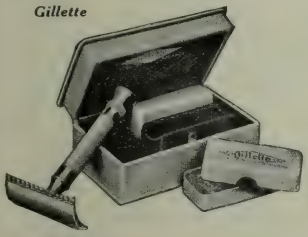
The AutoStrop—the popular automatic stropping safety razor which is backed by the makers' "money back" guarantee. The standard outfit is shown above.

AutoStrop



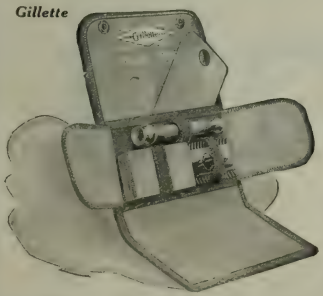
The AutoStrop—Military service outfit.

Gillette



The Gillette "Aristocrat"—A very handsome outfit modelled on extremely simple lines. French ivory, velvet lined case.

Gillette



The Gillette Khaki Soft Roll set—Includes pocket edition type safety razor, nickel plated box of 12 blades, indistructible trench mirror.

All Gillette razors guaranteed by makers.

Ever-Ready

The "Ever-Ready" as pictured above with 7 "Radio" blades, ten-year guaranteed frame, handle and fine case complete. Retails at $1.25.

Gem Khaki Set

Gem

The "Gem" Safety Razor has long since proven its value as a live selling line in the hardware trade. It comes in various styles including the military set shown above.

We also carry a range of the old style razors at prices to meet all requirements

SELF SHARPENING

MADE LIKE A WATCH

This feature does away with the annual expense of sharpening. This item alone will soon pay the original cost of the mower.

The bed knife has a raised edge about 1/8 inch, is several points harder in temper than cutter blades, thereby a process of sharpening takes place just as a butcher sharpens his knife with a steel.

A simple adjustment by means of a screw adjusts the cutter in the right position, and a sharp bevel edge is thus constantly being obtained.

Immediate shipments can be made on all styles of lawn mowers. Send us your orders. Write us. See our salesman.

The Hatch Garage Door Outfit

makes hinged doors

Sag Proof, Weather Tight and Open and Close Almost Automatically

Note the single hinged door which allows entrance to the garage without disturbing the other two.

Efficiency, ease of operation and no waste space are outstanding features.

The smooth-gliding, swivel rollers hold the doors in place—take the bind off the hinges and roll the doors around the corner, on the inside of the building to the side wall.

This practical, inexpensive equipment affords a wonderful opportunity to increase sales and profits.

LAYING THE DUST

90% of the ever-present atmospheric dust in your store can be captured and held.

STANDARD Floor Dressing

does this and more in your store. It keeps the goods on the shelves cleaner and fresher looking, and adds a note of tidiness and brightness to the whole store.

It definitely lays the dust because it is a sanitary, non-evaporating, wood preserving product. A gallon will take care of 500-700 square feet of surface, and one application will last for several months if the accumulating dust and dirt are swept regularly with a stiff brush or broom. Easily and quickly applied with an ordinary sprayer.

Sold in one and four gallon cans and in barrels and half barrels.

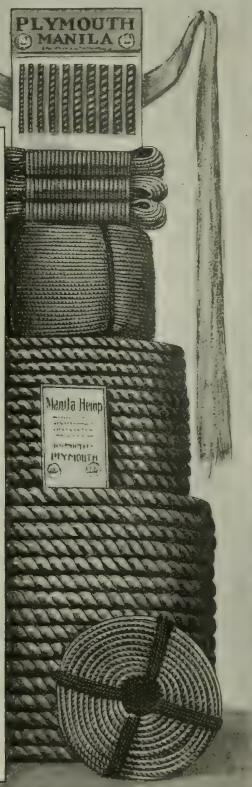
Greatly Increased Sales Follow Plymouth Window



GREATLY INCREASED SALES FOLLOW PLYMOUTH WINDOW

B. D. WILSON & COMPANY, Niotoze, Kansas, write that materially increased rope sales have followed the Plymouth Rope Window recently displayed. The interest created by the window was easily crystallized into sales by the talking points which the Plymouth dealer alone can bring to the support of the rope he sells. Talking points that are of vital interest to the buyer. Greater strength, greater durability, and the exact knowledge of what the rope will cost.

The material used by Mr. Wilson in his rope window was largely furnished by our Dealers' Service Department without charge. Window trim material is only one of the many sales helps available to the Plymouth Dealer.

If you are not a Plymouth Dealer we will gladly tell you the advantages of becoming one. A request for information places you under no obligation.

THE LARGEST IN THE WORLD.

80 Years of Churning Still Going Strong.
Yes, Ma'am, it's a Reliable!

There's a Reliable in our window at 141 King St. East, Toronto, that has been running daily since it was first put there. Churning twice a week, 15 minutes to each churning, it has run long enough to churn on farm 80 years, and is still in perfect condition.

The Reliable Churn is exactly an embodiment of the principles of the old dash churn—plus ease of operation —speed in making butter, and cleanliness.

No splash, no dirt, no trouble to keep clean; no plugs to pull out by accident; no latch to leave undone and let cream run away. No flies can get in. All this is impossible with the Reliable. It is designed and built especially to eliminate these troubles.

Absolutely sanitary and a certain satisfaction giver.

Every machine guaranteed for five years. Churn complete weighs only 45 lbs. Put the Reliable Churn in your store. You can honestly recommend it. It's sure to satisfy.

THE RELIABLE CHURN CO.
OF CANADA

T. W. Foster **TORONTO** **141 King St. E.**

More Than 175,000 Daisy Churns Sold

Here's the Season to Sell More

This is the "Season for best butter" right now, Mr. Dealer. Are you going to pass up profits on churns this year?

Since the barrel churn idea was first originated, 175,000 Daisys have been sold. They have cut in two the work of butter making and have done more than any other churn to better the quality of Canadian Butter.

Let the Daisy help you by rushing it a little right now. Show Mrs. Farmer how she can hitch it to the gasoline engine.

Demonstrate it tactfully—suggest it at every opportunity while the season is on. You'll be surprised at results.

Remember, too, the Daisy represents highest quality, most advanced design and best value. Our service is quick and efficient.

NEW SAFETY STOVE PIPE

The Stove Pipe with the patented lock

Mr. Hardware Dealer—Here is something entirely new and up-to-date in the way of stove pipes.

Though it sells at practically the same price as ordinary stove pipe, and can be used with it if desired, the New Safety Stove Pipe is vastly superior in every way as the following points so clearly demonstrate. Read them—then order your supply for next winter's business.

No. 1—Costs same as ordinary pipe.
No. 2—Made in 6 and 7-inch size.
No. 3—Made of 29 gauge iron.
No. 4—Telescope pipe does away with half lengths.
No. 5—No wiring needed. Can't be pulled apart.
No. 6—Pipe is nested, saving freight rates and storage room in store.
No. 7—Eliminates all danger of pipe falling down; easy to put up; absolutely leak-proof; cannot come apart; locks automatically; good appearance.
No. 8—New patent lock effects saving on each pipe, making a saving of one length in every 12 of ordinary pipe.
No. 9—Can be used any place where ordinary pipe is used, or can be used along with ordinary pipe.
No. 10—Patented in Canada and the United States, and "Made in Canada" by Fairgreave & Sons, Toronto.

Patenaude & Berini - Timmins, Ont.

Show Her the Way

FOR goodness' sake, cries the average housewife, show us how to save money out of the deluge of sky-high prices for meats, sugar, flour—everything. And seldom a thought has she of what a tidy sum can be saved every little while by checking up the honest mistakes of grocer, butcher, etc. Show her.

Just a bit of enterprise, pushing the Renfrew Scale to the front—displaying it—and showing her how it soon pays for itself will stir up a tidy lot of sales worth while. Right now is the "pyschological moment."

Clinch your sales by showing the Government Inspector's Certificate of correct weights accompanying [illegible] Renfrew. Scales supplied in black or all nickel-plated finish. The

Renfrew
HOUSEHOLD SCALE

Capacity ½ oz. to 30 lbs. Government inspector's certificate accompanies every scale.

If he isn't satisfied give him his money back

Every plumber and steamfitter knows the difficulty of making a good connection in a corner or any other contracted space. For that reason they'll be only too glad to meet up with the Original "Westcott" Adjustable "S" Pipe Wrench in your store. The "Westcott" does as good a job in a tight place as the ordinary pipe wrench does in the open.

More than that, you can give an absolute guarantee with it. If your customer can find anything wrong with the "Westcott" he buys from you give him his money back. Don't argue with him, don't quibble, just give him his money.

We authorize you to give this guarantee because we're confident that "Westcott" Wrenches will stand up under all conditions. Handles are of Refined Malleable Iron, jaws are of Forged Tool Steel scientifically heat treated and thoroughly inspected.

Ask your jobber for "Westcott." Tell us if he can't supply you.

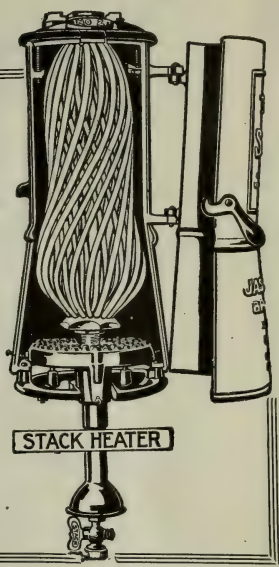
The Big Feature that Pulls Sales For Stack Gas Water Heaters—



is the near perpendicular copper tubes in which the water is heated. The advantage and superiority over other heaters is so immediately apparent to the customer.

After this, instead of tediously explaining, just open up the Heater and let your customer look for himself.

He can see at once that the water in those tubes is subject to intense heat from the time it enters the heater until it passes out of the coil.

He'll understand how small columns of water will heat much more quickly than a large coil, especially when heated from all sides. He'll be convinced that the Stack can heat water in one minute, and he'll buy because you can **prove** he's getting the best heater on the market.

Sold 1,000 Spark Plugs This Spring

Everton McNichol, Bloor and Dundas St., Toronto, Has Excellent Window to Display Accessories, and Uses it to Full Advantage—Believes in Virtue of Prices at Odd Cents—Seed Sales Alone Reach $500

Store of Everton McNichol, Toronto, Sh owing Window That Was Largely Responsible for Selling 1,000 Spark Plugs and A bout $500 Worth of Seeds.

EVERTON McNICHOL, hardwareman, Bloor and Dundas Streets, Toronto, is an enthusiast over the possibilities for the sale of automobile accessories. During the past months of the present spring he has sold over one thousand spark plugs in this single item alone. In price these plugs ranged from 75c to $2.50 each and it will be seen that the volume of trade in this one item was considerable. Spark plugs carry a good profit, as do the majority of the automobile accessory lines.

Mr. McNichol is located at the junction of the Bloor Street civic car line and the Dundas Street car line operated by the Toronto Street Railway Company. All people who travel downtown during the day on the Bloor Street civic car line leave the car at the corner on which he is located. When they alight they are confronted with one of his display windows which is located on the side of the store immediately in front of the Bloor Street line. They cannot very well miss that window in their travels either to or from the car.

Mr. McNichol has taken full advantage of this window as an advertising medium and the business which he has been able to develop as a result has amounted to considerable. The instance of the sale of spark plugs during the past spring is a concrete one. This window is practically the only kind of advertising that he uses. He is of course in a strategic position in the path of the passing throng. His window is framed nicely in an expanse of brick wall and people can hardly miss taking a look at it whenever they pass that way. In the sale of the spark plugs Mr. McNichol placed a pile of them in the window together with a card announcing the price. The price was made in odd cents, which principle has been found to work out for greater trade by some successful hardware merchants.

Appeal of Odd Cents

In the case of the spark plug, ones that were sold regularly at 75c were priced at 74c, while those selling regularly at $1 were marked at 99c. "There is a difference in the mind of the buyer between 99c and $1 which is infinitely greater than the real difference of 1c," stated Mr. McNichol to HARDWARE AND METAL. "The idea of the odd cent makes a strong appeal, as other successful hardwaremen have found out. In the mind of the buyer the actual difference is greatly magnified. He does not stop to analyze what the actual difference is, but it appeals to him possibly because it seems like aggressive business and an attempt to get the price down to a close margin of profit.

"Our auto accessory business has shown a great improvement over the amount secured last year. Last year was really our first year in handling auto accessories. This year the business is about double what it was last year. We are greatly pleased with the success of this line. The only handicap we have experienced is in the sale of tires where the man wanted them put on his car without going to the trouble himself. These cases are really in the minority as the great majority of car owners will put their own tires on their car. They will have them sent to their own garage and there will be able to tinker with them to their heart's content. Many car owners like such work about their car. It is a feature that gives them an added interest in their own car.

Big Sale of Seeds

During the past spring campaign for production Everton McNichol did his share in an endeavor to get the people to plant their gardens. As a result he sold double the amount of seeds that he has in any other year. While he did not keep a separate account for the seed sales alone Mr. McNichol estimates that his sales for seed must have been in the neighborhood of $400 to $500. These seeds were nearly all sold in 5c packages. The profit on them was good and there was practically no trouble in selling them. It was a sort of "serve self" proposition and in this way was clean and easily made money. There was no tying up of packages or expense in connection with string and paper. It was business that fitted in well with the present times when help is short and hard to get.

One of the novel features introduced by Mr. McNichol and which greatly assisted in the sale of the seeds was the use of his display window on the Bloor Street side to plant a small garden. Here the people could get an actual demonstration of the growing qualities of the seeds and they watched with interest the progress made from day to day. In the early spring they would examine the window to see the progress that was being made while they were waiting for their car. Some of them would even stop for a minute while making a run to catch a car and make good connections on the downtown trip. This window really served the same purpose as a bed under glass planted by the market gardener. The window is on the south side of the building and as such gets the warm spring sun. This naturally forced the plants along and gave them a good growth. The fact that good seed was also used helped some. But the main point was to get the interest of the people. They watched it with as great interest as they would their own garden. When the plants were well along toward maturity and ready to be transplanted they were taken from the window and a display of auto accessories followed.

Fishing Tackle Sells Well

The sale of fishing tackle, such as hooks, sinkers, rods, reels, lines, has been heavier this spring with Everton McNichol than in past years. Here again the window was used as a selling medium and quite a number of steel rods ranging in price as high as $5.50 were turned over. The lower-priced steel rods were priced at $1.75, but the most popular line was the more expensive one. During the two weeks' time that the display was on exhibit the stock of fishing tackle was pretty well cleaned out. Shelf stocks in some lines were disposed of and the display stock in the window had to be drawn upon in order to meet the needs. The small boy seemed to be doing considerable fishing this spring and the sale of lines, sinkers, and hooks was good on his account. It was undoubtedly the power of the window display to attract trade that resulted in this increased business.

Lot of Painting Going On

Mr. McNichol states that the volume of paint sales this spring has been equally as great as in some of the best building years before the war. The number of sales would of course be fewer but the amount in dollars and cents was up to the record of other years. Difference in the cost of paint now as compared with the pre-war prices of course accounts for increased volume. "People are doing a lot of painting this year as a matter of conservation," stated Mr. McNichol. "They have made up their mind that it does not pay to put it off. They are doing the painting themselves largely and in this way are eliminating the cost of getting a painter to do it. In this way they have saved on their painting bill and have not hesitated to pay the prices which it is necessary to get for paint at the present time. They have come to the conclusion that it is cheaper to paint than to let their buildings get in disrepair and deteriorate. We have had a steady sale of paint during the past spring and the trade has been very gratifying."

Auto Has Become Necessity on Farm

Regina Hardware Firm Asserts Belief in Big Future for Accessory Business—Aggressive Farmer Deems Car Essential —Western Hardware Dealers Taking Up More and More With Accessory Lines

IT it claimed by some for Saskatchewan that one out of every seven members of the population owns a motor car.

No matter where one goes in the cities and towns of the Province he sees a lot of people walking so it must be inferred that the farmers owning "cars" bring up the average to the extent above mentioned.

All of which reflects the wealth of the agricultural districts as well as the enormous amount of business being done in automobile accessories.

Among the hardware firms that have gone in for a share of this business recently is Armstrong, Smyth & Dowswell, Limited, Regina, Sask.

"About a year ago," explained J. W. Smyth, one of the members of the firm, "we felt that motor accessories belonged just as much to the hardware business as to that of the garage, and decided to put in a stock of various lines. These have been gradually added to since and we are well pleased with the development.

"We use the window frequently for accessories and find splendid sales from these displays," Mr. Smyth pointed out when asked as to methods of developing sales.

"For instance we are showing a line of flash lights there now and since that was put in I have had requests for the small bulbs used in them. Think I have sold half a dozen during the last day or two and don't remember having had a previous request for them. That shows in a small way, perhaps, the great value of the window.

"Some time ago we showed a certain line of automobile wrench sets in a window and we are still having requests for that particular set. Many sets have been sold as result of that one display."

The Armstrong, Smyth & Dowswell store devote an entire silent salesman to accessories. Others are shown on display fixtures. The department was only opened about a year ago and with little effort sales have developed rapidly, as stated above.

"We realize there is a big future in the line," Mr. Smyth added, "and contemplate enlarging our efforts and probably opening a separate department with a man in definite charge. Farmers are buying automobiles at a very rapid rate lately because they have had plenty of money, and after all a car is pretty nearly a necessity on the farm nowadays, at least for the aggressive farmer. Not only that but our regular city customers are buying them freely and we figure we might just as well sell them accessories when they come into the store as let somebody else do it. We do quite a trade in oils, grease, as well as detail parts, etc. There is no reason why we should not sell automobile oils as well as oils for farm machinery."

HARDWARE AND METAL'S representative finds that all through the West hardware dealers are going in more and more for accessories. When one sees the number of cars stationed all along the side as well as the centre streets, particularly on a Saturday night, their wisdom is well justified. In Regina on a recent Saturday evening the curbs were literally lined up with them no matter where one went—and that in addition to the continuous streams passing the main corners. The future is still bigger. There is a much greater acreage of wheat planted in the West this year—between 25 and 30 per cent. above last year—and with prices above the $2 mark again this year, the automobile industry is sure to expand.

Cement Prices Advance in United States

The price fixing committee of the War Industries Board of the United States has fixed the price of cement in that country for the four months, May 1 to September 1, the new price amounting to an advance of 15c to 30c per barrel. The justification for the advance is given as the great increase in the cost of labor and other manufacturing costs. The prices range from $1.60 to $2 per barrel, according to the section affected.

Fine Field for Canadian Exports in Brazil

J. D. McEwen, Returned Missionary, Asserts Opportunities for Trade Are Unlimited—Hardware, Farm Implements, Fish, Fruits, Household Furnishings, Manufactured Food Products, Machinery For Power Houses Are in Demand

View Showing City of Rio de Janeiro, the Capital of Brazil.

Rev. J. D. McEwen spent fourteen years in Brazil and is therefore in a position to speak with intimate knowledge of that country and its trade possibilities.

REV. J. D. McEWEN

Following story is an interview secured by HARDWARE AND METAL *from Mr. McEwen and shows the big opening for development of Canadian trade in that field.*

THERE is an unlimited field for the expansion of Canadian trade in Brazil at the present time," declared Rev. J. D. McEwen, returned missionary from Brazil, during the course of an interview. "Brazil is just beginning to awaken to the modern ways of doing things and the people are kindly disposed toward Canadians and Canadian industrial leaders. This has come about as a natural course of events. The part that Canada has taken in the present war has been a big factor in helping the Brazilians to feel kindly disposed toward Canadians. Furthermore, Canadian captains of industry were among the first to start the modern development along the lines of light, power and telephone systems. Alexander McKenzie, who is president of the Brazilian Traction, Light and Power Company, Limited, is a Canadian. This company has the control of the light, power and telephone systems in Rio de Janeiro, the capital of Brazil, and which is a city of 1,000,000 people. They also control the same industries in San Paulo, a city of 300,000 inhabitants. The leadership in industrial development afforded by these concerns has been a big factor in causing the Brazilians to be kindly disposed toward Canadian enterprise. The sewage systems of Rio and San Paulo were due to the enterprise of Canadian companies.

"These examples of enterprise have caused the Brazilians to awaken to the possibilities within their own country. Fourteen years ago when I first visited the country the city of Rio de Janeiro had a street car system that was to say the least very antiquated. Little cars

Street Scene in Pernambuco, One of the Cities of Brazil.

were drawn by three donkeys and the transportation was not at all rapid. Now the city has a magnificent traction system.

"Like Japan, Brazil has awakened. But unlike China they have invited everything modern. Indicative of the field that is ready to be harvested for exporting concerns it need only be mentioned that before the war Brazil bought from Germany goods to the value of $10,000,000 yearly.. This market is now gone so far as the enemy country is concerned. And it should not be forgotten that Brazil is one of our active Allies in this war. She has been doing valuable service in policing the southern waters with her navy.

"The people are building modern homes in place of the old mud houses and it is needless to say that enormous quantities of building materials, such as lumber, builders' hardware, nails, saws, hammers and carpenters' utensils, together with innumerable lines that go with modern housekeeping, such as bathroom fixtures, water supply systems, pipe, taps, household utensils, and the lines of hardware that will be required in transforming the country into the modern ways of living will be tremendous. There are 21 states in the Republic of Brazil, and the population comprises 25,000,000 of people. From this fact it will be seen that the possibilities in the way of requirements will be enormous.

Modern Foodstuffs in Demand

"Brazil is changing her diet with the transition to modern ways and therein is a field for the Canadian manufacturers of foodstuffs. Brazil is not a wheat growing country, as is the Argentine. With the adoption of wheat flour and wheat products there should be a field for Canadian wheat and other grain products. Mandioca is the bread of Brazil at the present time. This plant grows to about eight feet high, but the edible portion is the root. This tree is propagated by cutting small bits of the branches and planting them about five feet apart. After a year's growth it is ready for manufacture. The plant is pulled and a large root, something like the parsnip, and often a clump of roots, comes to view. The roots are put in a farina house, where the rind is scraped off with knives, or any old scraper thing. A woman squatted, holds this rinded root near a fast turning pulley which has little iron points. The pulley is propelled by a large wheel joined with rawhide belt. Two men, one on each side of the large wheel, turn it with a crank. The pulped material falls below the grater into the trough. When the trough is full a press is put over the trough and there is expressed a poisonous liquid. The pulp is then removed to a drying furnace, fire being under cover of iron or clay on which cover the pulp is placed and stirred continuously for several hours with a long wooden hoe.

"The pulp is now farina and ready for use. It is found on every Brazilian table, rich and poor alike. They eat it mixed with wheat and gravy. They eat it alone. It is a strong food and very nutritious, and when one learns to like it is very palatable. This farina is sold at local markets for about ten cents for twenty quarts.

Manufacture of Tapioca

"There is a sediment found at the bottom of the pressed-out poisonous liquid, already referred to, from which tapioca is made. Tapioca is well known in other lands. This sediment also makes excellent starch. The Brazilians dry the sediment also and from it drinks for infants and invalids are made.

"From this description of the bread-making process it will be seen that interior Brazil is still in a primitive state of development in this respect. They are taking to wheat flour and Canadian millers should find a good market for all their products in that country.

"There is also an excellent market for Canadian fish and fruits of various kinds, such as apples. Apples will not grow in that great country of tropical fruits. There is also a field for manufactured articles of clothing as industries devoted to their manufacture have as yet been meagrely developed.

Opening for Sewage Systems

"That there is an excellent chance for the development of trade in pipe and machinery that go hand in hand with sewage systems can be seen from the fact that there is not a single sewage disposal system in the interior of Brazil. The great central part of Brazil is the least known of any section in the world. It is less known than Africa. It is a dark country in that respect, but not dark in the sense that it is behind in modern requirements. Great quantities of musical instruments, gramophones and similar articles were sold to Brazil prior to the war by Germany. Japan is alive to the opportunity there and has not been losing sight of the chance to develop her trade. She is already selling many products there and will undoubtedly continue to do so. The United States manufacturers have also entered the country and are securing much trade. But the Canadian manufacturer has an equal chance with the manufacturers of other countries. The fact that some of the finest development in the country has been carried on by Canadians will go a long way toward making the people feel kindly toward Canadian manufacturers and goods when they go into that country.

Want Farm Implements

"Farm implements are wanted in Brazil, evidence of which is gleaned from the fact that all duty on farm implements has been removed by the Government. The people are anxious to get the modern implements to till the soil. They have become thoroughly imbued with the necessity of adopting the best methods of carrying on their farm industries if they are to succeed in the race for progress. Farming will be an important industry with them. One of the chief branches to which they are devoting their attention is the raising of live stock. The duty on pure bred cattle and horses has also been removed by the Government in order to encourage stock raising. The people are a meat-eating people, but their meat is largely of the sun-dried variety. The meat is cut from the carcase of the beef in long strips, sprinkled with salt, then is hung up on a pole to sun for several hours. After it is thoroughly cured it is sold in the markets. Millions of people buy this meat, which is

sold at 16c per pound. Fresh beef is sold as well, the price usually charged being ten cents per pound."

Mr. McEwen was stationed in the State of Bahia, the capital of which is the city of Bahia, the inhabitants numbering 300,000 people. German influence and intrigue has been at work to induce the Brazilian Government to keep out of the present European struggle. Three States of the country are largely peopled by Germans and their descendants, namely, the States of Parana, Santa Catarina and Rio Grande de Sul. These three States prepared for secession when there was talk of participation on the side of the Allies. These rebel States declared they would take up arms against the remainder of the country and prepared for the mobilization of an army of 500,000 men. But the Brazilian Government took prompt action and seizure of the German banks followed and soldiers placed to guard them. The interned German ships were taken over and added to the Brazilian navy or merchant marine.

Brazil is now actively engaged in the war and is patrolling all the South American waters and is shipping food and supplies to the Allied armies in the ships seized from the Germans. The principal products of Brazil which were shipped abroad comprise cereals of various kinds, coffee, cocoa, chicle and nuts. Her interior states are reported to be rich in minerals and forest wealth. There are many kinds of expensive woods suitable for furniture and other uses which would no doubt find a ready use in Canada.

Canada to Have Steamship Line

"There will be a line of steamships running direct to Brazil from Canada as soon as possible, I am informed on good authority. This will greatly facilitate trade between the two countries. Canadian manufacturers should avail themselves of the opportunity to get into that country now when the people are looking around for new sources of supply and when they are taking on modern ways and methods of living," stated Mr. McEwen. One of the essentials for Canadian business men is to become conversant with the country and its needs. To this end they would need to send representatives there who can talk the language, or who could learn the language readily. Portuguese is the language of the country, as the country was settled in the early days by Portuguese colonists. There can be no doubt but that a fine future is in store for the manufacturers and business men who take advantage of the opportunity at present afforded in Brazil," concluded Mr. McEwen.

Author of Book on Brazil

Rev. J. D. McEwen is the author of a book entitled "Brazil," which is written in very entertaining and interesting English and which gives an excellent picture of the country as he came to know it after a residence of fourteen years among the people. He has marched with them, stood in their file, and he knows the Brazilians from intimate contact with them in their home life and in their business life. He is enthusiastic about the possibilities for development in Brazil. The life of hardship and danger that he led among the people permits him to speak with authority on the needs of the country.

Put Yourself in Other Fellow's Place

So Says Frank Russill, Proprietor of the Russill Hardware, Toronto, Who Has Made a Big Success of Advertising—Gets Advertisements Down to Simple Language—Spends $100 Week on Newspaper Advertising

ONE of the big leaks in many hardware businesses is the amount of money which is spent on advertising and which does not bring results commensurate with the money spent. That advertising does pay when it is carried out in the right manner is demonstrated by the Russill Hardware, 126 King Street East, Toronto. This firm uses good sized space in two of the Toronto dailies on Friday of each week. Approximately $100 per week is spent in order to purchase this space. There must of necessity be considerable goods sold in order to bring back this initial outlay of $100 and give a margin of profit that will make the effort worth while. "We have been doing this advertising now for several years," said Frank Russill, proprietor of the Russill Hardware Company, to a HARDWARE AND METAL representative. "We would not do it if we did not find that it paid. It is a business proposition with us."

Many hardwaremen have taken refuge in the thought that the city hardwareman has a better chance to do advertising because he can make a daily appeal. "Where a paper comes out only once a week the same as our local paper it has always seemed to us that it was not frequent enough to make an impression," is often the line of argument which hardwaremen sometimes use in an attempt to justify their failure to take advantage of the means at their disposal.

But there are many hardwaremen throughout the country who have turned their attention to this matter of advertising and they give eloquent testimony

FRANK RUSSILL

Proprietor of the Russill Hardware Company, Toronto, Who Is a Firm Believer in the Power of Advertising to Get Trade.

that where it was carried out right it has brought results. There is really no justification for the argument that advertising in a country weekly is not frequent enough to bring results. The Russill Hardware Company advertises no more frequently than the hardwareman living in a town with only a weekly paper has the opportunity of doing. For the firm inserts their advertisement only on Friday of each week. That is usually the day on which the average weekly paper is published. Some are published on Thursday. But whether they are issued on Thursday or Friday there is the opportunity of placing goods before prospective customers in the same forceful and energetic way in which the Russill Hardware Company does. Frank Russill has built his business largely through the strength of his advertising in the Toronto dailies. His store is located some four or five blocks east of Yonge Street on King Street. That short distance would be sufficient to sidetrack the business if it were not for the fact that he has kept the trade coming to his store by means of his advertising. In large cities such as Toronto, the difference of three or four blocks in the matter of location often makes all the difference between success and failure in developing trade. When a store is away from the line of traffic some means must be adopted in order to turn that line of traffic to the merchant's store. Frank Russill has accomplished that through his weekly advertisements in two of the Toronto afternoon dailies on Friday of each week. Here is the story of advertising as Mr. Russill sees it, and as it was told by him to HARDWARE AND METAL.

Put Yourself in Other Fellow's Place

"One must put himself in the other fellow's place if he is to solve the problem of an effective appeal. The hardwareman must realize that he is talking to an average crowd of people who know

a great deal less about the hardware business than he does himself. His language should be couched in the simplest terms, according to my way of thinking. As an instance of this, in writing our advertisement during this week I was tempted to use the word 'illustrated' in referring to one of the electros. For fear lest there should even be some who might stumble over the word 'illustrated' the word was changed to 'as style shown herewith.'

"We have always made it a principle of advertising to use no words that would cause the reader to stumble. Another instance is that of using the term 'butt' in speaking of a hinge. We prefer to call them hinges rather than butts and describe them in such a way that there is no doubt in the mind of the reader as to what kind of hinge they are. There are countless numbers of people who would not know what is meant when they were called 'butts.' But the word hinge is within the comprehension of everyone. Our method of advertising is one that has evolved through a process of growth. We had to feel our way toward the style that we deemed the most effective.

Use Good Sales Talk

"In the wording of our advertisements we have endeavored to use such descriptive material that we thought would interest our customers. In other words we have endeavored to use good sales talk. Some advertisers will often simply quote the price of an article without giving details about that article. We do not believe that to be the most effective way of making an appeal. For instance, there is a kitchen knife. A salesman might toss the knife on the counter before a customer and say: 'There is a kitchen knife. Price 15c.' That appeal would not be as effective as: 'Here is a good kitchen knife, made of the best steel, will hold an edge and always give good satisfaction. It is pliable, it will bend but will not break. It will last a long time and give you good value for the amount spent on it. The price is 15c."

"Judge for yourself which would be the most effective appeal. That is the method that a good salesman would adopt in selling the article over the counter. We are of the opinion that it is the kind of appeal which gets a hearing in newspaper advertising. At any rate it is the principle that we endeavor to follow.

Illustrations Attract

"Illustrations in advertisements undoubtedly attract the attention. Wherever it is possible we always make it a point to use a small electro in placing an article before the people. Where it is not possible to use an electro we often put the headline in a catchy little box, which has somewhat the same effect as an electro. But the electro is by far the best wherever it can be used.

"We have followed the principle that it is good to concentrate our efforts on one day each week, and use a fairly large space on Friday. Some might find that it would pay to use smal'er space and use it oftener, say every day or perhaps

three times each week. We are of the opinion that a good-sized advertisement looms large and strikes out where a smaller one perhaps would not. We try not to lose any of the space for which we are paying money, and have endeavored to make every inch count for trade.

"We have adopted the principle of selling goods at odd cents and reducing the price a few cents. There is a strong inclination in human beings to want to get things for the best possible price—at a bargain in other words. If they can be made to think that they are getting good value for the money without intentionally misrepresenting or falsifying the goods it is good salesmanship to do so. It should not be forgotten that it is poor business policy to misrepresent an article. The harm that such a practice does far outweighs any temporary advantage that may accrue through the immediate sale.

"There is such a thing as painting the picture in the best light without misrepresenting it. The fact that people get an article for one or two or three cents below the usual price makes a strong appeal to them. There is something about the fact that makes them think that close prices are being given. For this reason the odd cents make an appeal to them.

"We are spending a lot of money each year in advertising, but we feel that it is getting results for us. In our location some four or five blocks east of Yonge Street we are compelled to keep before the people with good sales methods. We are not exactly in the line of traffic and we have to bring the people to us. This we have been able to do through our advertising. We have been following this principle in advertising for some years past. Not all the results from our advertising were apparent on the start. It took a considerable time before the cumulative effect of this method of advertising commenced to show results. Now people have come to look for our advertisement as a steady feature of the Friday paper. It took some time for it to gather momentum, but when it did start to come in it did so in a way that has left no doubt in our mind as to the effectiveness of this method of getting after business."

Good Sale of Fishing Tackle

Mr. Russill reports that their store has had a good sale of fishing tackle during the past spring. Following their usual method, this firm advertised their fishing tackle in the local dailies and in addition placed a display in one of their windows. That display was an attractive one. The Russill Hardware does not believe in carrying fishing tackle over from year to year. It sells best in the spring of the year "when man's fancy lightly turns to thoughts of creeks and trout and glistening lakes." Mr. Russill thinks that is the opportune time to dispose of fishing tackle. One of his salesmen is an enthusiast over fishing and that department is given over to his charge. He is consequently able to meet the fishermen on a common ground and understand what they are talking about. This has greatly facilitated the sale of these goods. Fishermen like to talk to a salesman who understands the game.

Illustration Showing Display of Fishing Tackle in Store of Russil Hardware Company, Toronto. This Firm had a Good Sale of Fishing Tackle During the past Spring.

Turpentine Market in a Flurry

All Quotations Withdrawn in Southern States as Result of Proposal to Withdraw Labor From Turpentine Industry as Being a Non-Essential—Prices Advance Locally

GREAT excitement was caused in the turpentine market during the past week as a result of the proposal of the United States Labor Commissioner for Georgia, Florida, Alabama, Mississippi and Louisiana to curtail the labor now used in that industry for more essential work. The matter was discussed at a meeting of the turpentine producers held in New Orleans on Monday of this week. Discussion there took place as to the feasibility of closing down the entire industry, as the Government had suggested that the naval stores industry is non-essential, and that workers engaged in it could be more profitably used in other lines of vital importance to the prosecution of the war. The secretary of the Turpentine & Rosin Producers' Association of the South sent the following telegram to the various interests when it became apparent that some action was to be taken by the Government:

"The United States Labor Commissioner for Georgia, Florida, Alabama, Mississippi and Louisiana has called a meeting of turpentine producers to be held Monday, June 10, at 3 o'clock, at the St. Charles Hotel, New Orleans, to explain that, as rosin and turpentine are considered non-essential products, it is necessary for the Government to use turpentine labor in other employments. As this action, if carried into effect, will result in at least a partial destruction of the industry, we hope you will urge all consumers, producers and dealers in naval stores to have representatives attend this meeting. This brings about an extremely critical situation that requires the most careful study and co-operation."

At the meeting of the producers propositions for curtailment all the way from complete suspension to 40 per cent. of present operating staff were brought forward. While the discussion was in progress all prices were withdrawn, and at the time of writing it is not apparent to what extent withdrawal of labor will be effected. It is evident that drastic measures will be taken. In the local market prices advance 5c per gallon in some quarters as a result of the situation. If it turns out that further supplies of turpentine and rosin are not available existing stocks will be at a premium.

EDITORIAL COMMENT

EDITORIAL BRIEFS

THE Ross rifle factory at Quebec is to be started again to manufacture pistols for the United States Government. This looks like the beginning of a new industry for Canada.

* * *

IT IS reported that another rich nickel and copper ore bed has been discovered in the Laurentian Hills, about three miles from Luskville, Que. It is to be hoped the find will prove as abundant as the first reports seem to indicate.

* * *

WHAT are believed to be the bones of Tecumseh, the great Shawnee Indian Chief, who died fighting with the British forces in 1813, were discovered near Thamesville, Ont. Three small metal military buttons together with the bullet which it is believed killed the man were found with the skeleton. But for the unchangeable quality of metals the last resting place of the good chief might for ever have been a mystery.

* * *

JEWELERS are reported to have obtained a ruling from the Customs Department as to what articles will carry the surtax of 10 per cent. levied at last session of Parliament. It is stated that it does not include watches, clocks, silverware, purses, cuff or collar buttons, mesh bags, vanity boxes or other articles not worn solely for the adornment of the person. Apparently about the only articles that are not excepted are rings, brooches, pins.

AMOUNT OF SPORTING GOODS IMPORTED

THE recent embargo placed on importation of certain lines of sporting goods, except under license, which will in all probability work out toward effective prohibition of these commodities, will not affect the trade as seriously as it would have done in the year 1914-15.

Figures of importations for the four years during which the war has been in progress show that in 1914-15 the amount reached $1,743,200, in 1915-16 it declined to $1,240,100, in 1916-17 it was slightly higher than the previous year when amount was $1,439,800. There was a big drop in importation for the year 1917-18 when the amount was $413,700.

In the three items of guns, cartridges and roller skates the total for fiscal year 1917-18 was over $400,000 in value. As will be noted the value of the imports have shown a steady decline since the beginning of hostilities. There has been a steady falling off in the sporting goods trade as the result of the departure of young men of military age.

Importations of skates have kept up well to the 1914 figures, in that year being $38,200 in value as compared with $35,400 in 1917-18. Restriction of the imports of skates will probably be felt relatively about the most of any of the lines. One of the important lines is roller skates, which are almost entirely imported from the United States.

With the prohibition of imports estimated at $30,000,000, it will be seen that with less than half a half million dollars in imports in all sporting lines into Canada the factor will not be a serious hindrance to trade.

FIRST PRICE REGULATING MEASURE

SO far as the Canadian manufacturing trade is concerned the first measure to regulate prices has been invoked, according to a despatch from Ottawa during the week. A new order in council has been passed supplementing the one restricting the importation of luxuries which stipulates that manufactures of gold and silver, electro-plated ware and gilt ware, and sterling or other silverware shall not be increased in price as from June 3 without the permission of the Minister of Trade and Commerce.

This order will affect plated holloware and flatware and sterling silverware of various kinds, a number of lines of which are carried by hardware merchants. This will undoubtedly cause some concern and extra labor to the hardware trade. Some of the Canadian manufacturers within the past two weeks advanced the price of their silver-plated holloware and in some instances the trade has not been advised of this fact.

Wherever these goods have to be purchased at the advanced prices and new prices made accordingly by the retail trade, it is apparently the intention of the Department of Trade and Commerce that dealers must submit their new prices before putting them into effect.

It is possible that it may not make any material

difference beyond the inconvenience and delay caused through the necessity of getting that sanction.

MAY BE SHORTAGE OF FLATWARE

MANUFACTURERS of silver flatware in Canada and importers of same may find difficulty in getting supplies of raw materials as a result of the embargo placed on shipment of same by the United States Government. The raw material placed under embargo is that of nickel-silver, which is largely used in the manufacture of flatware.

It is not yet apparent whether the United States Government intends that any leniency shall be exercised in allowing licenses to be granted. If the embargo holds tight it will mean that a shortage of this class of flatware will develop in Canada.

The recent order passed during the week preventing the increase in price by any dealer of manufactured articles of gold and silver and plated-ware will prevent any advantage being taken of the situation thus created.

Should it turn out that no further supplies of nickel-silver are allowed to come in consumers will have to be content to get along with their existing supplies of knives and forks and spoons or at least after present supplies in dealers' hands are exhausted.

PRODUCTION SHOULD BE KEPT UP

THOMAS A. EDISON is of the opinion that the way to meet the present situation is not by curtailing the manufacture of what are termed non-essential commodities but by increasing production. In a recent signed statement to a convention of phonograph dealers in New York he said:

"No legitimate industry is non-essential except as it interferes with the conduct of the war, and then only to the extent to which it interferes. No statistician can prepare figures that can be accepted safely as a guide to the curtailment that should occur in the manufacture of the so-called non-essentials.

"What we need to do is to speed up. It is not a question of what we must not do, but a question of what we must do. We must win the war. We must provide all the arms, ammunitions, ordnance, airplanes, and equipment that can be transferred to Europe, and we must build ships as rapidly as possible.

"We must make all the other goods that we can possibly make. We must keep on creating new wealth. We must keep our manufacturing organization in good running order. We must continue to go after foreign trade, and we must prepare ourselves for the intense competition for foreign markets that will come after the war."

Mr. Edison's idea seems to be that in this time of stress it is not fitting that industries should be torn up root and branch. He recognizes the need for production of war materials. But he does not think that the manufacturing organization should be crippled in certain lines.

The great inventor would make two blades of grass grow where formerly one grew. Production of certain commodities can be kept up even when the working staffs are reduced to provide for the necessary war work. Production of war materials on the other hand should be speeded up. This is sound business sense.

CONTROL OF STEEL ABSOLUTE

ANNOUNCEMENT was made during the week that an agreement had been reached between the War Industries Board and the American Iron and Steel Institute whereby the Government takes absolute control of distribution of all manufactured products and pig iron.

This is interpreted as meaning that there will be very little if any steel available for non-essential industries during the balance of the year. If there is any surplus over and above war requirements this steel will be distributed equitably. The Government has already placed contracts which approximate 18,000,000 tons, or more than one-half the capacity of the plants in the United States for the last six months of this year.

When the unfilled orders, prior to placing these new orders, are taken into acount it will become apparent that the amount available will no doubt be comparatively small. The prospect for the manufacture of what are termed non-essential commodities is, to say the least, not bright. This will not only cause a shortage of goods for present use in many lines, but will create a serious condition for these industries to pick up the broken threads when it is possible again to obtain supplies.

FURTHER INCREASES IN FREIGHT RATES?

DESPATCHES indicate that an increase in wages to employees of Canadian railway lines will be made in the same proportion as the advance secured on railways in the United States. The recent decree of the President of the United States provided for a blanket increase to railway employees amounting to $300,000,000.

Mr. McLeod, general manager of the Canadian Northern Railway, is authority for the statement that the wages of employees of Canadian railways would be increased. This advance, if it does come, will not come out of the earnings of the railways without provision being made therefor.

There are two ways which it may be provided for, namely, the Government can foot the bill or the railways may be permitted to increase their rates. As the Government already has great demand upon its funds the logical conclusion would seem to be that another increase in rates would in all probability be in order.

Analyzing the Luxury Embargo List

How the Estimated Saving of $70,000,000 is Made Up—Reason For the Ban Imposed and the Percentage of Canada's Total Trade

CANADIAN luxury imports—as the Federal Government defines luxuries or war-time essentials—during the war period are estimated to have reached a grand total approximating $70,000,000.

A compilation for HARDWARE AND METAL for the fiscal years 1914-15, 1915-16, 1916-17, and for the ten months of 1917-18 ending February 1 last shows the imports of non-essentials which are included in the Government's first list of prohibited importations to have aggregated $65,546,000, as follows:

1914-15	$15,514,500
1915-16	13,644,800
1916-17	18,985,300
1917-18	17,401,400
	$65,546,000

The Government's edict barring purchases of non-essentials abroad may be separated under nine distinct heads. A summary of the extent of Canadian buying in these nine classes during the period of the war is given in table No. 1.

It will be immediately clear that while no striking impression has been made upon the total of Canada's foreign buying, the Government, however, has at least made a start. Further progress in pruning down Canada's luxury imports may be expected now that a starting point has been reached. In the calendar year 1917, for instance, Canada's imports reached a total of $1,005,134,000, so that the ratio of now prohibited importations is less than 2 per cent. of the total of Canada's foreign buying.

The banning of this buying abroad is designed to correct an unfavorable trade position, not in the total of Canada's foreign trade, for Canada now has a favorable world balance of $600,000,000 but in the United States, where the Canadian dollar has been at a discount because of an adverse trade balance of $300,000,000. Analysis of the goods now under the ban shows that at least 75 per cent. are obtained in the United States, and to that extent the prohibitory measure will be accepted in the spirit in which the Government has enacted it.

A more detailed idea of the scope and extent of the order-in-council is given in table No. 2, which illustrates the extent of Canadian buying in these classes in each year of the war period:

TABLE NUMBER 1.

	1914-15	1915-16	1916-17	1917-18
Sports	$1,743,200	$1,240,100	$1,439,800	$ 413,700
Fruits	4,012,200	3,566,100	4,939,300	5,763,300
Vegetables	449,700	418,200	530,100	545,000

	$ 407,400	$ 149,600	$ 179,900	$ 169,600

A number of modifications have been made in the original order in regard to the varieties of fruit under embargo, so that some of the heaviest items in the above list are not now affected.

One Week More

Mr. Salesman: Can You Earn $10 Easier than by Telling--Simply Telling--How You Made a Success of Selling Some Particular Line?

The time is short and the opportunity is a good one. HARDWARE AND METAL'S *Contest for Salesmen and Saleslades will close on June 22nd. Only one week more.*

What is the selling power of the clerk? That is what we are seeking to find out. HARDWARE AND METAL *believes that it counts for very much—that real, aggressive methods and tactics are often shown.*

But we want you, Mr. Salesman, to tell how you put the sales across. For the best answer to this question, based on your own experience, HARDWARE AND METAL *offers a prize of* $10. *For the second best answer a prize of* $5 *is offered. For each reply that we are able to use in our news columns we will pay* $1.

The only conditions of the contest are these:

1. That the contestant shall refer to sale of some definite line of goods.
2. That these goods shall have been sold at regular and not cut prices.
3. That there shall be stated the amount or value, or both, of goods sold within a certain specified time.

In this contest literary merit does not count. What we are after is the idea that sold the goods. It may be window display, a sales talk, an idea of following up former sales—anything in fact that resulted in sales.

Send in your answer without delay. It will make you a better salesman to give expression to your ideas and methods.

EVENTS IN THE TRADE

Business Changes

Brant, Alta.—Blair & McNeil, hardware merchants, have dissolved.

Sherbrooke, Que.—Codere & Fils, Limited, wholesale and retail hardware, have discontinued.

Virden, Man.—Boiteau & Thompson have been registered as a firm to deal in auto accessories.

Welwyn, Sask.—Campbell & Van Male, hardware merchants, have been succeeded by Webster & Van Male.

Montreal, Que.—J. A. R. Chevrier, hardware, has been registered under the name of J. A. Raoul Chevrier.

Auburn, Ont.—G. E. Denstedt has sold out to J. R. Johnston. Stock and property is to be taken over Sept. 17.

Viceroy, Sask.—Gray Bros., hardware and billiards, have sold the hardware branch of their business to William Harper.

Estuary, Sask.—Wiebe Bros. & Walsh, Ltd., hardware and autos, has changed personnel of ownership through retirement of J. S. Walsh.

St. Thomas, Ont.—Jackson & Firth, hardware merchants, have dissolved partnership. The business will be continued by Mr. Jackson.

Winnipeg, Man.—The Parkyte Company, Limited, manufacturers of sanitary appliances, has been advertised for sale as a going concern.

Steinbach, Man.—Reimer, Barkman & Friesen have disposed of their flour mill to P. T. Barkman & Sons, who are dealers in lumber, hardware, implements, fuel and are millers.

Morris, Man.—The business of A. T. Mitchell at Morris, Man., is now being conducted under the firm name of Mitchell Bros., change having recently been made.

Obituary

Walkerton, Ont.—S. W. Vogan, hardware merchant, died recently.

S. W. Vogan, for over 36 years in the hardware business at Walkerton, Ont., died on June 2. For a number of years Mr. Vogan was interested in the Walkerton Flour Mills. During the year 1902 Mr. Vogan was mayor of Walkerton. There survive him his wife and one son, Sam W. Vogan, who is at present conducting the hardware business conducted for so long by his father.

Fire Losses

Holmfield, Man.—Cairn Bros., hardware merchants, have suffered fire loss.

Port Perry, Ont.—Fire damaged the store of G. S. Jeffrey & Son, wholesale hardware and saddlery hardware at Port Perry on June 11, by which damage to the extent of $10,000 was caused. Loss is covered by insurance. The building was saved.

Rosser, Man.—E. E. Price of Rosser, Man., suffered fire loss to his general store stock, including hardware, to the extent of $12,000. The fire occurred on June 7. Loss is partially covered by fire insurance.

J. A. ST. GERMAIN
Manager of Imperial Supply Company, a Newly Organized Company

Personal

George Peacock, hardware merchant, Mimico, Ont., was a Toronto visitor during the week.

Mr. Virtue, of Jordan & Virtue, Oshawa, Ont., was in Toronto on Wednesday of this week.

Mr. Neely, of the Victoria Mercantile Co., Victoria Harbor, Ont., spent a day in Toronto during the week.

James Isbister, representing Peck, Stow and Wilcox Co., Cleveland, Ohio, was in Toronto during the week in the interests of his firm.

E. T. Malone, who has been representing Armstrong, Whitworth Co., of Canada, Limited, in the Hamilton district, has been appointed district representative for Ontario and has been transferred to Toronto, his headquarters in the future.

Prescott W. Robinson, manufacturers' representative, Montreal, Que., was calling on the trade in Toronto during the week in the interests of the firms whom he represents.

Blount Burchaell, former motordrome racer, who had been living in Toronto since the days of the board track boom, has returned to his home city, Atlanta, Georgia, for the purpose of enlisting with the aviation branch of the United States army. Mr. Burchaell was employed by the Imperial Oil company during the past three years.

G. Alfred F. Bleau, senior partner of Allaire & Bleau, hardware merchants, St. Boniface, Man., was recently given prominence in one of the Winnipeg dailies in the space devoted to pioneers. Mr. Bleau is an ex-Mayor of St. Boniface. The item stated that as a business man he is very much esteemed and respected and paid compliment to his public services.

Stanley R. Frost has been appointed superintendent of the Durham Cement Company at Hanover, Ont. Guy Bowser, formerly of the Ontario Portland Cement Company of Blue Lake, near Brantford, has been appointed chemist for the Hanover Portland Cement Company. E. D. Gruetzner will act as managing director and superintendent of the latter company.

A rally of bicycle dealers, mechanics, and others associated with the bicycle business in various cities of Ontario will be held at Grimsby Beach on Saturday, June 22. under the auspices of the Canada Cycle & Motor Company, Limited. Toronto dealers will attend by boat while the dealers of Hamilton, St. Catharines, Welland and other centres will use other public conveyances to reach this summer resort. A special fare on the Toronto boats has been secured for the occasion.

Montreal News Notes

Under the auspices of the Montreal Automobile Association an outing is being arranged for the pupils of the School for Cripoled Children on the 4th of July. About 65 pupils and their wards will be thus entertained. The assistance of car owners is asked that this be made a real success and those willing to assist in this manner are being asked to communicate with Secretary T. C. Kirby, whose office is in the Windsor Hotel.

W. S. Leslie, president of A. C. Leslie & Co., Ltd., is in the States this week. Mr. Leslie will visit, among other points, Pittsburg, where he will conduct business for his firm.

Incorporations

The Petroleum and Gas Products, Limited, has been incorporated under the laws of the Dominion of Canada for the purpose of producing, manufacturing, purchasing, acquiring, refining, smelting, storing, distributing, selling, and to dispose of and deal in petroleum, natural gas, oil, salt, chemicals, metals, minerals and mineral substances of all kinds. The names of the incorporators are George Joseph Valin, barrister; Fred Woods and Fred Wilson Rogers, accountants; Mary V. Curley and Arthur J. Manley, stenographers, all of the town of Sudbury. The capital stock of the company is to be $1,000,000, divided in 10,000 shares of $100 each. The chief place of business of said company is to be at the city of Toronto.

The Dim-Rite Specialties, Limited, has been incorporated under the laws of the Province of Ontario to buy, sell and deal in auto accessories. The capital of the company is to be $60,000, divided into six hundred shares of $100 each. The head office of the company is to be located at Welland. The names of the subscribers to the memorandum of agreement are William Henry Honsberger, electrician; George Calver Brown, banker; Jay Clarke Diffin, contractor; Charles Richard Hagen, superintendent, and Lynn Bristol Spencer, barrister-at-law, all of the city of Welland.

The Dillon Crucible Alloys, Limited, has been incorporated under the laws of Canada, the names of the incorporators being Lynn Bristol Spencer and Lorenzo Clarke Raymond, barristers; Charles Henderson, retired farmer; Clarence M. Webber, bookkeeper; William W. Brookfield, road superintendent, all of the city of Welland. The purpose of the company is stated to be the manufacture of iron and steel of every description, including crucible steel, alloy steel, tool steel. The capitalization of the company is $100,000. The chief place of business of the company is to be at Welland, Ont.

C. A. Moore Becomes President of Company

Chas. A. Moore, formerly manager and secretary-treasurer of the Stratford Mfg. Co., Ltd., Stratford, Canada, has bought out the shareholders of the company and becomes president of the new company. The Stratford Mfg. Co has been in business for many years manufacturing step and extension ladders, gliding settees, lawn and verandah furniture, folding chairs and tables, kitchen cabinets, etc. In outlining to HARDWARE AND METAL the aims of the reorganized company, Mr. Moore stated that the policy of the company is as follows: "We are going to make fewer lines and only make lines for which there is a big demand. We will carry a heavy stock of all our lines made up so that we can get orders away the same day as they are received."

Bicycle Day Held in Toronto, June 5

The chief feature of the Bicycle Day in Toronto on June 5 was the huge bicycle parade from the City Hall to Scarboro Beach Park and a fancy dress and decorated wheel carnival in the park grounds during the evening. Approximately one thousand tickets were distributed among those in the parade and fully one-third of this turnout were in fancy dress or rode decorated bicycles. The stunt was entirely new for Toronto but the event was classed as a wonderful success by all dealers. Mayor Church accepted an invitation to attend the start of the parade and it was with difficulty that the procession got under way on account of the great congestion of people in the City Hall square. All along the route thousands of people actually cheered the wheelmen, particularly those in striking costume. This enthusiasm was one of the surprises of the event. At the park, the revellers ran the full gamut of pleasure. The judging took place at the vaudeville stage, where thousands of people gathered to applaud their favorites as they passed by in parade formation.

New Firm to Handle Hardware Specialties

The Imperial Supply Company has been formed recently and is now conducting business under the management of J. A. St. Germain at 104 Delorimier Avenue, Montreal.

The lines which will be carried comprise stoves and ranges and a full line of heaters also will be stocked. To complete the line desired the new firm contemplate handling such hardware specialties as are carried by manufacturers' agents. Washing machines, etc., will also be one of the commodities carried.

Mr. St. Germain, under whose management the business has been inaugurated and is now being conducted, has had a wide experience. For twelve years he was secretary-treasurer of the Canada Stove and Foundry Co., Ltd., and previous to this he was a travelling salesman for the H. R. Ives Company. His connection with the trade will give him a ready grasp in his new enterprise.

Photograph of Fany Dress Bicycle Parade Which was Recently Held in City of Toronto.

Roofing Company Has Been Incorporated

Bird & Son, who have had a Canadian plant at Hamilton, Ont., since 1905 for the manufacture of roofing materials, has been incorporated and the new officers include many of the employees who have served on its staff for many years. Philip R. Allen of the parent company at East Walpole, Mass., is president; George E. Messer, who has been Canadian sales manager for the past six years, becomes vice-president in charge of sales; George R. Wyman, manufacturing manager of the several Bird plants, becomes vice-president in charge of manufacturing; Henri E. Davenport, who has been with the company in Canada as accountant and purchasing agent, becomes treasurer. The board of directors in addition to the foregoing, comprises: Howard F. Everett, superintendent of the Hamilton plant; C. P. Cowan, superintendent of the Pont Rouge, Que., plant; F. W. Bird; George M. Graves and W. R. McNeil of the parent company.

Montreal to Have Costume Bicycle Parade

At a meeting of the Montreal Bicycle Dealers' Association at the Windsor Hotel it was decided to hold a costume parade on Saturday afternoon, June 22. Prizes will be offered by members of the association for costumes and for club representations. Ed. Barsalou, James McNieve and I. Hersbain were selected for a committee to look after arrangements. This is the first of a series of cycling events which are promised for the present season.

Changes in Sheet Metal Products Company Staff

William Duncan, who has travelled for the Sheet Metal Products Co., Toronto, for the past twelve years in the neighborhood of Hamilton, Galt, Guelph, etc., has resigned his position and has bought out a business in Richmond Hill, Ont.

Chas. Robertson, who has travelled for the company north of Guelph throughout the peninsula for a number of years, has taken Mr. Duncan's territory and John Heal, who has been in the office of the commpany for the past fifteen years, has taken over Mr. Robertson's territory.

Montreal Automobile Association Formed

The Montreal Automobile Association was formed a few days ago with headquarters in the Windsor Hotel. The officers elected are as follows: President, M. J. Stack; vice-president, J. C. Chesney; treasurer, W. Jennings, and secretary T. C. Kirby. The following also were elected directors: Leslie S. Mitchell, J. C. Asch, J. Strachan and J. Davidson. Peter Bercovitch, K.C., M.P.P., was selected as the association's legal adviser. Some of the advantages of the membership are those of free legal advice, reduced insurance rates, free touring information, etc. Complete touring information will be available to members. Affiliation has been already made with the Automobile Association of America and also with the Touring Club of America, the combined organizations having more than 100 branches. The annual fee for membership was fixed at $5.

Toronto Wins Grand Prize for Bicycle Week

Announcement was made by President R. G. McLeod of the Toronto Bicycle Dealers' Association on Bicycle Day, Wednesday, June 5, that Toronto had been awarded a grand prize by the United Cycle Trade Directorate of New York for the showing of the local dealers in advertising, publicity, stunts and other details during bicycle week. Mr. McLeod had received a telegram from Secretary Walter Rinck of the directorate which gave this decision of the judges elected by the directorate. The message also contained the information that Baltimore had been awarded a similar prize. It was the original plan to give only one prize, but honors were evenly divided between the two cities.

Standard Sizes for Catalogues Approved

At the session in Chicago recently of the National Catalogue Conference, including representatives of purchasing agents, typothetae, and various associations of paper and other industries, called by the standardization committee of the National Association of Purchasing Agents, the following resolutions were unanimously adopted:

Resolved, That catalogues be standardized to 6 by 9 or 7½ by 10⅝ or 8 by 11 inches; also resolved that we recommend for catalogues the manufacture of paper sheets ranging as follows, 25 by 38, 32 by 44, and 33 by 46 inches, with their double sizes; that we also indorse the weights of 40, 45, 50, 60, 70, and 80 pounds on the basis of 25 by 38, and that colors be limited to white and natural.

The standardization committee of the National Association of Purchasing Agents recommends that all catalogues meant for the use of purchasing agents be 7½ by 10⅝ inches.

BUTTER MIXERS ARE LEGAL

An Eastern Canada paper recently published an item to the effect that hardware merchants were breaking the law through selling butter mixers to the public. The eastern paper claimed that it was contrary to the Dairy Act and advised readers to avoid trouble in this matter. HARDWARE AND METAL has been in touch with the Dairy and Cold Storage Commissioner's Office of the Department of Agriculture at Ottawa and has been informed that there is no regulation which will prevent persons from mixing milk and butter together for his or her own use. It is therefore quite in order for hardware merchants to continue the sale of these utensils as in the past.

HARDWARE LETTER BOX

Fuse Plugs

Martin, Finlayson & Mather, Ltd., Vancouver, B.C.—Please advise names of manufacturers of fuse plugs.

The McFarland Hardware, Etzikom, Alta.—Can you inform us where we can secure repairs for the Pen Esther range?

Record Foundry & Supply Co., Moncton, N.B.; R. R. Kinread, Winnipeg, Man.

CATALOGUES and BOOKLETS

Catalogue of Forges

The Buffalo Forge Company, Buffalo, N.Y., has issued an attractive little catalogue showing their stationary forges, comprised in Section 108. The catalogue contains 32 pages and is well printed on a heavy quality of paper. The catalogue contains much valuable information pertaining to the various lines of stationary forges manufactured by this company, together with full description of the various styles. The catalogue is perforated to facilitate its use in a binder.

Explanation of Electrical Expression

The Canadian National Carbon Company, Limited, 265 Adelaide St. West, Toronto, issued a booklet entitled "Analogies Between Battery Current and Water Flow." This booklet explains the electrical expressions commonly applied to dry cells in terms of water pressure and flow. The booklet is prepared in good plain English, easily understood by laymen. The little booklet will prove valuable and interesting to those who desire a clear understanding of things electrical, and especially to retail salesmen who wish to impart their knowledge to others. Copies of the little booklet will be supplied free on request.

Presto Windshield Cleaner

LEAK-SEAL FOR RADIATORS

The Adams & Elting Company, 17 Adelaide street east, Toronto, is placing on the market a number of new commodities, one of which is the Ad-El-Ite Leak-Seal for radiators. It is claimed for this commodity that it will repair radiators and water jackets in a few minutes, and that it is easy to use and does not injure or clog the water system in any way. The manufacturers assert that it is a positive cure for leaky radiators. It is put out in three sizes, namely, 2 oz., 4 oz. and 7 oz. cans, net weight. It is claimed the 2 oz. can is enough for any radiator with a Ford capacity. Ad-El-Ite celluloid cleanser is designed to remove dirt, scratches and discolorations from automobile celluloid windows in drop curtains, and is manufactured by the same company, being a new product. It is claimed for it that it preserves the celluloid and keeps the windows clear and bright. Other lines which have just recently been introduced to the Canadian trade by this company include Ad-El-Ite motor carbon remover, for which it is claimed that it saves time and money and from 12½ to 25 per cent. in gas and oil, stops "knocks," makes hill-climbing easy, and that it is as easy as priming and is harmless to metals.

...se of
..., removing
...e scratches and
...quid cleanser and
...ne same qualities as the
..., it is claimed, and is designed for use on enamel and varnish finish. Ad-El-Ite non-freezing liquid is also being introduced to the Canadian trade by the above company. It is claimed for this product that it is safe, as it has high boiling and low freezing point, and that it is harmless to rubber hose or radiators and will not clog the water line, nor rust nor corrode metals.

NEW BULB TESTER

The Metal Specialties Company of Chicago is introducing a new article in the shape of their Presto bulb tester. This tester is designed for testing all sizes of automobile light bulbs with Ediswan base. It is asserted the lever switch has different contact points for one and one-half volts, three, six, nine and twelve-volt bulbs. It can be attached to any ordinary 110-volt lamp sockets and is equipped with seven feet of lamp cord. It is enclosed in a metal case, black enameled with nickel-plated trimmings. The advantage claimed for this device is that it enables the purchaser to see the exact voltage that is claimed for any particular light and whether or not the bulb is perfectly good.

Presto Bulb Tester

ACTOR PLUGS

...ius tractor plug is stated to ...ult of a long period of test-experimenting to develop a plug of standing up under the ad-conditions of oil, heat and vibration universal in tractor motors, stationary gas engines and high powered automobiles and trucks.

The centre core of this plug is made of sheet mica wound laterally around a steel bushing spindle, this winding being

Vesuvius Tractor Plug

further protected by heavy laminated mica washers. Owing to its peculiar design it is claimed this plug will stand up under the most severe work. It is made in a full line of auto sizes and also in ¾-inch and ¾-inch long special tractor sizes. In addition, there is a special ½-inch plug built on the same design for Ford cars, trucks, and tractors. The entire Mosler line is marketed exclusively in Canada by the Canada Sales Company, 183 Church St., Toronto.

AUTO ACCESSORY CABINETS

The Duluth Show Case Company, Duluth, Minesota, Manufacturers of Sectional Hardware Store Equipment and Sectional Garage Equipment, announces the addition to their line of three sizes of auto accessory or tool cabinets. It is claimed these cabinets are especially practical for the storage of carburetors, mageto and generator parts. It is stated the cabinets are extremely practical for the storage of small tools that are in frequent use. The drawers in the cabinets are subdivided into smaller sections by means of divisions, which are furnished with each cabinet.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

THE steel markets have tightened up considerably during the week. This is shown in an advance of 50c per 100 pounds in galvanized sheets, and there is a noticeable falling off in stocks rolling towards Canada. The movement of galvanized sheets has virtually stopped and buyers are eagerly picking up any supplies offering. That the lines manufactured from sheets are also due for an increase seems likely. Items which will probably be affected are corrugated sheets, metal ceilings, shingles, eavetrough and conductor pipe, in fact all manufactured sheet metal has revealed a firmer tendency. A decline of 25c per 100 pounds in lighter gauges of black sheets is reported in some quarters, but this is considered a local condition which will react at almost any time.

An advance of 5c per gallon on turpentine has been made and conditions prevailing at primary points are such that even higher levels may be reached. Production, it is estimated, will be less than 50 per cent. of normal, due to the labor being diverted to more specific war work, but heavy stocks on hand do not point to a shortage developing for this commodity. Some producers have withdrawn quotations altogether, and others are naming figures which must mean further revisions upward here if orders have to be placed on present basis.

Ingot tin continues on a high plane for spot offerings, but quotations on stocks to arrive show some recession. Some tin is arriving, though the time of arrival and quantity coming are not yet known. Pig lead revealed strength during the week in an advance in some quarters of ½c per pound. Primary points are also firm on this metal, and manufactured lead products have a very strong undertone, with the possibility of higher levels being reached.

Many important lines in the hardwareman's stock have been revised during the week, a substantial increase in scales being made, along with a revision by one manufacturer of his entire line of carpet and vacuum sweepers. A 10c to 15c advance in prices on ready roofings has also been named in some quarters, with conditions giving indications of some higher figures obtaining. Other lines affected by a revision upward are molasses gates, chair seats, wood blocks, lumbering tools, tire tape and stepladders. Business generally is considered good.

MONTREAL MARKETS

MONTREAL, June 13.—There is more firmness to many commodities than ever this week, while the price changes are not very numerous. The revisions expected will probably apply to the lines in a more or less non-essential class, although very little is looked for in the way of reductions for any commodity. It is a question of getting the goods these days, though a number of jobbers have reported that they still are able to get a reasonable supply. Carpet sweepers, sash weights, carpenters' chalk and crayons, stove and shoe polishes, wrenches, saws, planes and kindred lines, and oilers are higher, while the discounts on pipe fittings were revised. It is anticipated that there will be some advances in the very near future, and in general tendencies are to higher quotations. Quite a number of advances were made in auto accessories.

Stove and Shoe Polish, Carpet Sweepers Up

Montreal.

POLISHES, SCALES, SWEEPERS.—The manufacturers of shoe and stove polishes announce an advance for their goods. This applies to the paste and liquid lines, and will approximate at least 10 per cent. In common with the advances made on some lines of scales, other changes have been made, which, in some cases, approximate 20 to 25 per cent. These increases have been made essential through the higher cost of raw material and labor. Carpet sweepers advanced about $4 per dozen. Universal, japanned, are now $34, and nickel-plated $38 per dozen, while Grand Rapids are $36 for the japanned and $40 for nickel-plated.

Carpenters' Chalk Up; Oilers and Sash Weights

Montreal.

CARPENTERS' CHALK AND SASH WEIGHTS.—The price of carpenters' chalk has been a straight one with some jobbers, all colors being sold on the same basis as white. The former price of $1.25 has been abolished, and white is now $1.45 per gross; red, $1.80, and blue, $1.65. Copperized oilers are advanced to approximate about 10 per cent. increase over old prices. Sash weights are up, too, the sectional selling at $5.35 per 100 pounds and the solid at $4.

Some Pipe Fittings on Changed Basis

Montreal.

PIPE FITTINGS.—Certain revisions are made in the quotations on pipe fittings. This applies to cast bushings, which are quoted at 25 per cent. off list, and the same discount is in effect for malleable bushings as well. Flanges are subject to 17½ per cent. off list; black and galvanized plugs, 20 per cent.; while "pound" goods are subject to an added 12 per cent. on list.

Agricultural Wrenches Up; Saws, Levels, etc., Too

Montreal.

WRENCHES, SAWS, ETC. — Advances will be made this week in certain lines of Disston goods, applying to several lines, such as saws, levels, etc. Another revision by a change of discount is made in the quotations on agricultural wrenches. The former discount was 40 per cent., and this is now reduced to

37½ per cent. The same applies immediately.

Freight Equivalents Out for Dry Batteries

Montreal.

DRY BATTERIES.—In view of the recent rulings regarding freight rates a new schedule has been prepared as affecting the equivalent charges to be added for carriage costs to the regular quotations where delivery is to be provided for by the shipper. The list includes important points of distribution from Halifax to Victoria, and the trade will be advised of this, no doubt, through the regular jobbers with whom they conduct business.

Syringes, Grease Guns, Auto Specialties Up

Montreal.

SYRINGES, GREASE GUNS.—The price of Breaknot hydrometer syringes has advanced from 94c to 98c each in single lots, from 88c to 91c in dozens, and from 81c each to 85c in lots of 48. Rose single cylinder pumps are up from $2.53 each to $2.83, and in lots of 6 from $2.37 to $2.65; on this line 33 1/3 per cent. discount applies. Rose shop grease guns also are up from $2.52 each to $2.77, this applying to the single lots, and for quantities of 6 the relative prices are: old $2.39, and new $2.63. Considerable advances also are made in Weaver specialties, including valveless bucket pumps, towing poles, tire changers, auto hoists, etc. These will run from 10 to 15 per cent. over old costs.

Fan Belts, Spoke Brushes, Tire Racks Advance

Montreal.

FAN BELTS, SPOKE BRUSHES.—Fan belts for Maxwell cars are on the advance list this week. The 1916-17 style are quoted now at 78c each, against 57c formerly, this applying to the 48-lot quantities. Twelve cost 85c each, against a former price of 62c, and singles 90c, against 67c. Wire wheel spoke brushes are up from 87c to 94c in dozen lots and from 93c to $1 each in singles. On these two lines a 33 1/3 per cent. discount applies. Tire racks of the portable style are up to $13.05 each from $12.17. A special discount is given on these.

Breast Drills, Reseaters, Radiator Liquid Higher

Montreal.

BREAST DRILLS AND RADIATOR LIQUID.—Breast drills of Samson design are revised from $5.65 each to $6.20 in singles, and from $5.37 to $5.88 in lots of 6. A special discount is named on these. Ford valve re-seaters are also advanced considerably. In quantity lots of 48 the cost is 49c, the old price being 29c each. Twelve cost 53c each now, and were 31½c, and singles are 57c, as against 33½c. The 33 1/3 per cent. discount applies. "X" radiator liquid is higher, from $1.25 to $1.65 in pints, and in assortments from $18 to $21.60. Net prices on this are available on application.

Spot and Curtain Lights Moved Up

Montreal.

AUTO LIGHTS. — Advances were made this week in Millennium spot lights. In lots of 24 the old price was $4.85, and is now $6.47. Lots of six go to $7.04 from $5.27 each, and singles from $5.63 to $7.50. Rear curtain lights also are up. The 24-lot quantity are quoted at 60c each, an advance of 17c, and the six quantity from 47c to 66c. The trade price is 70c, and was 50c. On both the above a discount of 33 1/3 applies.

Auto Jacks, Tank Unions Move Higher

Montreal.

AUTO JACKS.—Auto twin jacks are up. The advance is considerable, and some of the comparative costs each are as follows, the old price appearing first: Auto twin regular, $16.25-$18.45; prices per pair, $27-$35.10; extra heavy, each $27-$30.60; extra heavy twin pair, $48.50-$57.60. Body extensions for these also go up to $12.15 from $11.50. Weaver auto ambulances are now $44.10 from $43, and Weaver 20-ton presses from $103.50 to $105. Special discounts apply. Gas tank unions are now 47c to the trade, or in dozen lots 44c. This is about 40 per cent. advance on list, with 33 1/3 per cent. applying as a discount.

Big Demand Now for Gasoline; Also Oil

Montreal.

GASOLINE AND COAL OIL.—The use of gasoline is larger, if anything, than ever. The supply is good, and all demand is being readily taken care of by the importers. Price has ruled steady, without any change whatever, at 34c per gallon for motor grade. The request still is good for coal oil, which is available at 19c for Royalite and at 22c per gallon for Electroline and Palacine. For lubricating oils of every kind, and particularly for automobile grades, there is a constant and healthy demand at full prices.

Material Big Factor in Wares and Stoves

Montreal.

STOVES, RANGES, WARES.—The markets are not very active for stoves at the moment—that is, for the coal-burning class. These are selling fairly well, in consideration of the high prices that have to be asked. Repeat business for oil and gasoline stoves would naturally respond actively to warmer weather conditions. Enameled ware has been in seasonable demand, as has also galvanized and tinware of certain kinds. The eliminating process will be gradual on the less needed lines, which it was decided to dispense with recently in view of the scarcity of sheets.

Tendencies Outside Point to Rope Firming

Montreal.

ROPE AND CORDAGE.—While all sizes of rope are not in the same relative demand there is still a great and, in some instances, a tremendous demand for rope of various sizes in the United States. This applies to the needs of the War Trade Board, for the trade is contenting itself largely with a hand-to-mouth buying, considering that prices are so high. It is pointed out, however, by those making a close study of the situation that there can be no lowering of rope prices, and that certain conditions and requirements that are now in embryo will make for a revision upward ere long. In the meantime prices here are firm, with pure Manila selling on a base of 39c, British Manila at 33c, and sisal 27½c per lb. It would seem that those wanting rope will not be able to buy in a more favorable market than obtains at present.

Some Good Orders for Iron and Steel

Montreal.

IRON AND STEEL.—No more than a regular routine business could be expected at this season of the year. This obtains in a general way, while one jobber states there is very good business. The market conditions are of a strong nature, and changes might come, and these would be of a firming nature and cause little surprise to many. Supplies are fairly ample, considering the general position of the iron and steel markets.

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Firmness Marks Wire Products and Nails

Montreal.

WIRE AND NAILS.—The market is characterized by the firmness previously reported and due to the strong position marking all wire and steel products here and in the States. Sales of nails are about what might be looked for, and there is average activity, seasonably speaking. A further advance would not be very surprising at any time, as wire rods are none too plentiful. Wire nails are on the basis of $5.35; cut nails, $5.60, and standard smooth wire, $6.25. Wire is not moving in a very active manner, but some is going forward.

Demand for Sheets Better Than Supply

Montreal.

SHEETS AND PLATES.—While it is claimed that of certain gauges of sheets

there is a very fair stock here, the general expression reveals the fact that the demand exceeds this. This will apply to some gauges more than to others. In speaking recently with a large user of galvanized sheets, HARDWARE AND METAL was informed that they had been able to secure good supplies of light gauge sheets, and that they had found it possible to use these in large measure where heavier weights were previously employed. The markets are such as to suggest a revision being made upward for replacement of stock is very frequently impossible. No changes are made for the week, and following quotations rule:

BLACK SHEETS—		100 lbs.
10 gauge	$9 50	$9 00
12 gauge	9 25	9 65
14 gauge	7 25	9 00
16 gauge	7 45	9 15
18-20 gauge	7 50	9 25
22-24 gauge	8 00	9 60
26 gauge	9 70	9 75

28 ga.	9 65
26 ga.	9 25
22 and 24 ga.	9 05
20 ga.	8 85
18 ga.	8 85
16 ga.	8 70

Strength of Lead Might Advance Products

Montreal.

LEAD PRODUCTS.—While the market for lead traps, bends and kindred manufactured lines has not advanced during the week, it is nevertheless characterized by strong tendencies. And while there is no immediate change in prospect, this wou'd develop if there was much further firming of pig lead. This is strong, and all business is reported as done on the basis of maintained prices. Solder is particularly strong yet, for while the outside prices of tin are lower the spot situation rules without any change.

Lead pipe, lb.	....	0 14
Lead waste pipe, lb.	....	0 15
Lead traps and bends	Net list	
Lead wool, lb.	....	0 12
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	....	0 11½

45-55	....	0 68¼
Zinc sheets, casks	....	....
Do., broken lots	....	....

Slight Improvement in Old Materials

Montreal.

OLD MATERIALS.—There is a somewhat improved condition with regard to the movement of old metals and other items in the old material list. This was noticeable through the past week, but as far as quotations go these are quite unchanged, and yet rule with firmness, particularly for iron and steel products.

Tea lead	$ 0 05	$0 06½
Heavy lead pipe	....	0 07
Yellow brass	0 12½	0 13½
Red brass	0 22½	....
Light brass	0 08	....

Old rubbers, boots and shoes	0 08	0 08¼
Overshoes, lumbermen's rubbers boots	0 07	....
Bicycle tires	0 04¼	....

Tin is Lower on Future Basis

Montreal.

INGOT METALS.—Anyone wanting ingot tin at present for immediate delivery has to pay the price, for there is very little on spot. For future the situation looks better. Copper is in demand, and spelter, lead and antimony have featured actively during the week.

COPPER.—One importer reports much activity. Considering the stocks available, if this demand continues there may be a temporary shortage for immediate needs. Price holds at 29c to 30c per pound for trade needs.

TIN.—If it is any comfort, and it ought to be, tin is easier for future delivery. One jobber will accept orders on the basis of a ten-day delivery at $1.10 for such quantity as he will then be able to supply. Some licenses have been secured, and the local situation should soon be better. In the meantime no reduction is made from $1.30 to $1.35 per pound on spot stocks.

SPELTER.—The position across the border is very firm. The prospect for business is very good here, and orders are accepted at around 10c per pound.

LEAD.—Firmness rules in the United States markets at present. Upward revisions have been made there, and more may be looked for. Here the demand is even greater than the supply, and this sells at 9½-10c pound.

ANTIMONY.—Owing to heavy buying there has been added interest the past week in this commodity. A very large quantity was picked up in the United States market, and this resulted in an advance there. At 16c and 17c business is being accepted, while the price across the line is higher at 13c to 13¼c pound.

ALUMINUM.—This is the quietest item on the list, with few sales made. These are effected at around 50c per pound.

TORONTO MARKETS

TORONTO, June 13.—Important price changes have been made in local markets during the week. Among the lines on which revised prices have been made are found carpet sweepers, wash boards, scales, chair seats, molasses gates, lumbering tools, wood blocks, tire tape and step ladders, all of which are now quoted at an advance. Ready roofings have also been advanced 10 to 15c per square while galvanized sheets are up 50c per 100 pounds.

Business continues satisfactory and some repeat business is coming to hand for screen doors and windows, lawn mowers, etc. Some interest in threshers' supplies is already manifest and movement of this class of goods will soon be in full swing.

Wash Boards Make Substantial Advance

Toronto.

WASH BOARDS.—A substantial advance in wash boards has been put into effect during the week ranging from 10 per cent. up. Those made from tin plate have been taken from the list altogether and only the zinc will be available outside of the glass, enamel and brass. It is also of note that a couple of lines have been discontinued, the Crown, Dandy and Wood, double-faced being eliminated. The present scale of quotations ranges as follows:

WASH BOARDS—	Doz.
Pony	$2 00
Improved Globe	4 90
Neptune	4 90
Standard Globe	4 90
Original Globe	5 40
Jubilee	5 50
Newmarket King	5 50
Diamond King (glass)	6 00
Western King (enamel)	7 00
Beaver (brass)	7 00

Chair Seats Up; Combination Vises Too

Toronto.

CHAIR SEATS, COMBINATION VISES.—Prices on perforated chair seats have been revised during the week and quotations now prevailing represent advances. The present scale of prices follows: Crown Dining square, ball top, round and rocker, 14-inch, $2.10; 15-inch, $2.40; 16-inch, $2.70.

An advance in Reid's combination vise No. 31 has also been made, new quotation being made at $18.00 each.

Revised List on Scales Means Advance

Toronto.

SCALES.—New prices have been made on scales, ranging from 15 per cent. to 25 per cent. higher than previous quotations. This is arranged for in a revision on the list, the discounts remaining the same on all with the exception of household scales. This line, on which the discount has been 25 per cent., is now selling at 20 per cent. from list. The discount from the Champion list remains at 10 per cent., the 240-pound Champion scale now taking a revised list of $12.50, making net price $11.25 as against a net of $9.00 formerly prevailing. Lists on other Champion scales will be found in current market quotations along with discounts.

Revision Upward Made in Step Ladders

Toronto.

STEP LADDERS.—A revision upwards has taken place in quotations prevailing on standard stepladders and the

present range of values as provided for in this latest advance is as follows: 4-foot, 75c each; 5-foot, 95c each; 6-foot, $1.15 each; 7-foot, $1.35 each; 8-foot, $1.50 each.

Carpet and Vacuum Sweepers Go Higher

Toronto.

CARPET, VACUUM SWEEPERS.—New prices have been named on carpet and vacuum sweepers and quotations now prevailing on the Bissell line are as follows: Universal, cyco bearing, japanned, $34.00; nickel-plated, $38.00; Grand Rapids, cyco b. b., japanned, $36.00; nickel-plated, $40.00; Standard, japanned, $33.00; American Queen, nickel, $43.00; Elite, nickel, $46.00; Grand, japanned, $52.00 per dozen. Vacuum Sweepers, Grand Rapids, nickel, $84.00; Household, japanned, $72.00; Superba, nickel, $99.00 per dozen. The complete list is shown in current market quotations.

Molasses Gates Reach Higher Level; Tapes

Toronto.

MOLASSES GATES, TAPES.—New prices have been named on Perfection molasses gates which represent an advance over former quotations. The present prices being made are for No. 50, $7.20; No. 51, $9.60; No. 52, $11.20; No. 53, $13.20; No. 54, $16.00 per dozen.

A ten per cent. increase in the price of Chesterman tapes is also noticeable in new prices issued, the No. 1822 x 33 feet selling at $1.50 and 66 foot selling at $2.15 each; No. 1840 x 66 feet is now quoted at $3.00 each.

Calks Undergo Revision Upward

Toronto.

CALKS.—Revised prices have been issued on Neverslip Calks during the week and the present lists are now for No. 4, 5/16, ⅜-in., $1.60; 7/16, ½-in., $2.80; 9/16-in., $3.00, all subject to a discount of 15 per cent.

Toe calks are also revised upwards in some quarters, blunt in 25-lb. boxes selling at $2.25 and sharp in 25-lb. boxes at $2.50.

Lumbering Tools Change, Valves are Up

Toronto.

LUMBERING TOOLS, VALVES.—A revision in the discount applying on lumbering tools has been made, the Pink line now being quoted at 15 per cent. discount. The recent heavy advance in handles along with increased production costs are given as probable reasons for present increase.

A change in Jenkins valves has also become effective, the new discount on globe, angle and check valves being 12½ per cent.

Sharp Advance In Tire Tape; Wood Blocks

Toronto.

TIRE TAPE, WOOD BLOCKS.—A sharp advance has been made in tire tape during the week, 20 cuts to the pound selling at 66½c; 16 cuts to the pound at 66½c; 8 cuts to the pound at 58¾c per pound and friction in ½-pound rolls at 55c.

Other items changing during the week include wood blocks, on which the discount is given as 10 per cent. Elgin wrenches at $10.25 per dozen and steel wool No. 1 at 50c per pound have also reached higher price levels.

Ready Roofings Go To Higher Levels

Toronto.

READY ROOFINGS.—An advance has been made in ready roofings by some makers during the week amounting to 10 to 15c per square and makers say that present conditions give indications of still further advances. The demand for roofing is said to be very fair and a satisfactory volume of business is being handled.

Revised Prices on Gas Ranges; Enamelware Firm

Toronto.

STOVES, ENAMELWARE.—The situation in respect to gas ranges shows some strength and manufacturers generally have instituted an advance which runs from 2½ to 15 per cent. The variety of stoves turned out has been curtailed considerably and production will be centred on what are considered the best sellers. Difficulty in getting supplies of raw materials is increasingly evident and stocks in some quarters are considered pretty light. Cast and steel stoves and ranges move out in fair numbers.

Enamelware shows no change during the week, but manufacturing difficulties seem to multiply—shortage of material and shortage of labor being factors which cannot be overlooked to-day. Sales for lines available continue good and retailers report little difficulty in moving goods to the consumers. Prices appear in current market quotations.

Heavy Demand Continues For Oils and Gasoline

Toronto.

OILS, GASOLINE.—There is apparently no let-up in the demand for oils and gasoline and if the railways would only move the goods, sales totals would mount rapidly. The transportation difficulties as outlined last week show no improvement and many centres are without gasoline. The demand for gasoline is very heavy and prices have held without change at 33c per gallon. The demand for coal oil is also good and quotations are firmly maintained, Royalite selling at 18c and Palacine at 21c per gallon.

Nails Moving Toward Higher Levels; Wire

Toronto.

NAILS, WIRE.—The movement on wire nails is towards higher levels and indications are increasingly evident that new prices will be named at almost any time. Prices for the week are unchanged at $5.20 base per 100 pounds with cut nails at $5.65 base. Smooth steel wire holds very firm, though prices are unchanged for the week. The demand on both nails and wire is considered fair.

Cordage Holds Firm; Some Movement Stocks

Toronto.

CORDAGE, TWINE.—Prices on cordage hold very firm and a slight improvement in orders coming to hand is reported. Quotations are unchanged, the base on pure manila remaining at 39c per pound; British manila holding at 33c per pound and sisal at 27½c per pound.

Booked orders for binder twine are pretty well cleaned up, the heavy movement during the past few weeks bringing this result. All twines are very firm, in fact the situation in both twine and cordage is one of great strength, and lower prices are most certainly not looked for.

Bar Iron Steady, Demand Seasonable

Toronto.

IRON AND STEEL.—There is no change in bar iron or steel reported for the week, prices holding steadily at figures shown below. The demand is seasonable, only a fair amount of business being transacted.

TORONTO—	Per 100 lbs.	
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65

Band steel, No. 10	....	5 75
Do., No. 12	....	6 00
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Higher Levels In Corrugated Sheets Probable

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—Indications point to a revision upward in corrugated sheets, shingles, ceilings, in fact all manufactured sheet metal products, within the near future. The advance in galvanized sheets recorded during the week is a factor and the exceeding scarcity developing in supplies must also be considered. How great this may be is not yet known, but a 15 per cent. jump at least is hinted at.

Eavetrough and conductor pipe will be affected also in any revised prices issued and future supplies must depend on sheets available and accordingly are uncertain. Quotations on corrugated sheets appear below while prices on trough and conductor pipe appear in current market quotations.

TORONTO—	Per 100 Sq. Feet Galvanized	Painted
No. 28 gauge	$ 8 25-$ 8 75	$6 75-$7 25
No. 26 gauge	9 00- 9 50	7 75- 8 25

No. 20 gauge	19 00-	16 50
No. 18 gauge	23 00-	20 00

Discount 7½%.

Galvanized Sheets Make 50c Advance

Toronto.

SHEETS, PLATES.—Prices on galvanized sheets have undergone revision upward, the advance amounting to 50c per 100 pounds. Supplies are not moving towards Canada with any degree of certainty and during the week this fact has become increasingly evident.

Some black sheets are reported in transit and a decline of 25c per 100 pounds has been made in some quarters. Stocks are in very fair shape though this condition may only be temporary, the amount released for future shipment to determine this factor. Business in sheets generally is fairly brisk.

		Per 100 lbs.	
BLACK SHEETS—			
10 gauge	....	10 00	$12 00
12 gauge	7 15	10 10	10 00

U.S. 26		8 90	9 15
22 and 24		8 75	9 00
16		8 45	8 70
14		8 35	8 60

Wrot. Iron Pipe Very Firm; Boiler Tubes

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—When manufacturers have exhausted present stocks of raw materials, the future presents anything but a bright outlook. Shipments of raw materials are not coming through and stocks on hand are generally considered light. This has provided an extremely firm element in this market and the possibility of higher prices seems nearer a probability. Prices in current market quotations show no change.

The position of boiler tubes shows no improvement over conditions outlined last week. Stocks are light and the question of further supplies increasingly difficult. Prices hold at figures shown herewith:

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Manufactured Lead Products Firming; Solder

Toronto.

LEAD AND ZINC PRODUCTS.—The market on manufactured lead products shows increased strength during the week, owing to the firming element in pig lead. No change has been made in quotations but further advances in the metal may bring about this result. Solder holds unchanged at high levels recently established. Quotations on the entire line follow:

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼
Lead sheets, 4 to 8 lbs. sq. ft.		0 12½
Cut sheets, ¾c lb. extra, and cut sheets to size.		
Solder, guaranteed, lb.	0 66	0 70
Solder, strictly, lb.	0 60	0 66½
Solder, commercial, lb.	0 55	0 62
Solder, wiping, lb.	0 54½	0 56
Solder, wire, lb.	0 65	0 70
Zinc sheets, per lb.	....	0 26

Improvement May Be Made in Old Materials

Toronto.

OLD MATERIALS.—The week shows no change in the position of old materials but a more generally optimistic tone seems to prevail in respect to the future —improvement being looked for against the present stagnant conditions. Prices below are unchanged.

Tea lead	$0 04½	....
Heavy lead pipe	0 07	0 07½
Yellow brass	0 12	0 13

Waste is Steady; Oakum Unchanged

Toronto.

WASTE, OAKUM.—The market on both waste and oakum remains steady with prices unchanged. Conditions prevailing during the past two or three weeks continue to rule, the demand being very good and orders being taken care of in satisfactory time. Prices appear in current market quotations:

Little Spot Tin Available; Some Arriving

Toronto.

INGOT METALS.—Practically no spot tin is available at the present time though some is arriving. The actual date of arrival is, however, uncertain, depending as it must on shipping. Lead is much firmer at primary points and has advanced locally in some quarters. Spelter is also very firm, though prices here are unchanged. Little interest centres in aluminum or antimony.

COPPER.—There is little of interest in local circles, though a very good demand for Government use continues to be felt. Commercial requirements are light. Prices locally hold at 29-30c per pound.

TIN.—Little spot tin is available and any quotations named ranged from $1.35 to $1.50 per pound. Some tin is arriving, though actual time of delivery cannot be determined; quotations on stocks to arrive range from $1.00 to $1.15, depending on delivery and quantity.

SPELTER.—Outside points report a very firm situation on this metal and this is reflected locally, though no change over price of 9c per pound has been made as yet.

LEAD.—In some quarters, price locally on lead has advanced to 10c per pound, widening the range ¼c over last week's spread to 9½-10c. Primary points record a very firm market. The demand locally shows some improvement, a greater call for commercial use being evident.

ALUMINUM.—Government requirements continue to absorb the bulk of this metal and there is little of interest to record in the situation locally. Price remains firm around 50c per pound.

ANTIMONY.—Although no change has been made in local quotations this market is very firm and price of 16c per pound is strongly held. The movement is not very brisk.

PIG IRON.—Conditions show no improvement in respect to pig iron and manufacturers on commercial work are finding it increasingly difficult to secure supplies. Government needs are many and absorbing the output with no difficulty. The future grows increasingly uncertain.

LONDON MARKETS

LONDON, June 13.—Prices continue firm with all changes in the upward direction. Many lines are hard to get. Supplies of pocket cutlery and razors are very limited and prices advance again on some makes. The run of exceptionally good business enjoyed here during the past month continues. Merchants are all busy. Lines that are demonstrated and advertised extensively such as paints, floor stains, oil stoves, etc., are in good demand.

Revised Prices Named on Pocket Cutlery

London.

POCKET CUTLERY.—Revised prices have been put into effect on pocket cutlery, the advance on Joseph Rodgers & Sons' make amounting to about 25 per cent. Difficulty in securing high grade steel along with high insurance and transportation charges are factors contributing to this increase. New prices on some of the best selling numbers are given herewith:

No. 17749, Ivory, $12.75 doz. No. 17749, Buff, $12.75 doz. No. 17751, Pearl, $26.40 doz.

No. 32341 x 3 in., $7.50 doz.; 3¼ in., $7.95; 3½ in., $8.80; 3¾ in., $10.15.

No. 32345 x 2¾ in., $9.70 doz.; 3 in., $10.55; 3¼ in., $11.90; 3½ in., $13.20; 3¾ in., $14.55.

No. 32352, $5.95 doz.

Safety Chain Goes Higher; Tinned Rivets

London.

SAFETY CHAINS, TINNED RIVETS. —Higher prices have been established on safety chains during the week, the new

quotations ranging as follows: Brass, No. 0 $2.00; No. 2/0 $1.65; No. 3/0 $1.50 dozen yards; nickel plated, No. 0 $2.20; No. 2/0 $1.80; No. 3/0 $1.60 dozen yards. A new extra has been adopted for tinning iron rivets and burrs amounting to 8c per pound, this representing an advance.

Substantial Advance Made in Scales

London.

SCALES.—A substantial increase is to be noted in new lists adopted on scales. The new prices range from 10 to 25 per cent. above former quotations. Net prices on Champion scales based on new lists and discount are: Even balance, capacity 4 lbs., $4.95; capacity 10 lbs., $6.75; Union platform, 240 lbs., $11.25; platform 600 lbs., $25.20; 1,200 lbs., $31.50; 2,000 lbs., $45.00; 2,000 lbs. with drop lever, $51.30 each. Further discounts are given in current market quotations.

Egg Crates go Higher; Floor Wax Up

London.

EGG CRATES, FLOOR WAX.—Humpty Dumpty egg crates are now being quoted at $4.50 per dozen, which represents an advance over previous figures. Floor wax has also joined the list of advancing commodities as will be noted in new price on Old English of 53c per pound, and on Johnson's of 57c per pound. Container costs are a factor in these new prices.

Prices 10% Higher on Carpet, Vacuum Sweepers

London.

CARPET, VACUUM SWEEPERS.—An advance amounting to about 10 per cent. has been made in carpet sweepers and vacuum sweepers immediately effective. The present scale of quotations on stock lines follows:

Bissell's Carpet Sweepers.—Universal, Japd., $34 doz.; N.P., $38. Standard, Japd., $33; N.P., $37. Grand Rapids, Japd., $36; N.P., $40. Champion, Japd., $31; N.P., $35. Princess, $41. Boudoir, $40. Parlor Queen, $46. American Queen, $43. Elite, $46.

Bissell's Vacuum Sweepers.—Household, $72 doz.; Grand Rapids, $84; Superba, $99.

Cultivators Moving Freely; Scythes, Snaths Firm

London.

CULTIVATORS, SCYTHES, SNATHS.—An excellent sale of hand cultivators continues to manifest itself both for country trade and city trade. Prices have held firm and unchanged, the Buco 5-prong selling at $12.38, and the Pull Easy adjustable at $18.00 dozen. More interest is apparent in scythes and snaths, and some movement is in evidence though this does not represent heavy proportions as yet. Quotations are maintained as follows: Scythes, cast steel, $12.50; Golden Clipper, $13.50; Little Giant, $14.50; Brush, $13.00; Snaths, patent, No. 3 $10.50; No. 2 $11.50; No. 1 $12.00; No. 2/0 $12.50.

Turpentine up 5c; Linseed Oil Firm

London.

TURPENTINE, LINSEED OIL.—An advance of 5c per gallon has been made in turpentine during the week, bringing quotations in single barrel lots up to 85c per gallon, with small quantities 10c per gallon higher. Primary markets are showing increasing strength and production is being curtailed considerably. The supply locally is limited, with a very good demand in evidence. A very good sale of linseed oil is reported and prices have held firm and unchanged during the week. The basis of quotations is: 1 to 2 bbls., raw, $1.90; boiled, $1.93 per gal.; 3 to 5 bbls., raw, $1.89; boiled, $1.92; per gal.; 6 to 9 bbls., raw, $1.87; boiled, $1.90. Less bbls. add 10c per gal.

Poultry Fence in Good Demand; Screen Doors

London.

POULTRY FENCE, SCREEN DOORS, WINDOWS.—Sales of poultry fence continue in good volume on a maintained price basis, Blue Ribbon selling for the 24-inch at $4.30; 36-inch $5.50; 48-inch $6.50; 60-inch $7.65; 72-inch $8.75 per roll. Hexagon poultry netting discount is unchanged at 15 per cent. discount from list. The movement of screen doors and windows is very satisfactory and a heavy demand for wire cloth is in evidence. It is intimated that many people are repairing their old screen doors and windows on account of high prices of the new goods, which has been a factor in sales of wire cloth. The black wire cloth in 100 ft. rolls remains firm at $3.50 per 100 sq. ft., while the bronze is quoted at 14c per sq. ft. Prices on screen doors and windows are maintained at following figures.

Screen Doors.—No. 1, $15.15 doz.; No. 2, $18.70; No. 3, $24.70; No. 21, $22.60; No. 8, $26.65; No. 9, $31.60.

Screen Windows.—No. 13, $3.30; No. 14, $3.55; No. 14½, $3.75; No. 15, $4.05; No. 16, $5.60; No. 2, $3.90; No. 3, $4.25; No. 4, $4.55; No. 5, $5; No. 6, $5.40; No. 7, $5.80.

Paris Green Moving in Liberal Quantities

London.

PARIS GREEN.—A liberal movement of Paris green is noticeable, orders in good volume being received and taken care of satisfactorily. The demand, it is thought, will be maintained for some little time. Quotations are unchanged, ½ lb. packages selling at 66½c per pound; 1 lb. packages at 64½c; 25 lb. drums, 62½c; 50 lb. and 100 lb. drums at 61½c.

WINNIPEG MARKETS

WINNIPEG, June 13.—Price changes for the past week indicate a steadier market. Advances in general, taken on a percentage basis, are small, although items affected are quite numerous. Lines affected this week include grain scoops, sad irons, sad iron handles, foot scrapers, waffle irons, thumb latches, barn door latches, harness hooks, hat and coat hooks, saw vises, grindstone fixtures, alarm tills, lamp and lantern burners, implement brackets and scales.
